

in its entirety and replacing it with the following:

12. Type II billboards shall be located only on lots that have frontage on public streets with four or more travel lanes or that are located within three hundred feet of a limited access highway. Paired one-way streets with a minimum of two travel lanes in each direction shall be considered a four-lane road in applying this provision. Type II billboards shall be oriented towards public streets with four or more travel lanes or limited access highways.

Section 2. This Ordinance shall take effect from and after its adoption, the welfare of The Metropolitan Government of Nashville and Davidson County requiring it.

Analysis

This ordinance amends Metro Code of Laws Section 17.32.150 to regulate the orientation of Type II billboards. "Type II" billboards are defined by this section as billboards with a display surface area of more than 75 feet and less than 675 square feet. The existing Subsection B.12 requires Type II billboards to be located only on lots that have frontage on public streets with four or more travel lanes or that are located within 300 feet of a limited access highway. This ordinance would clarify that Type II billboards must be oriented toward public streets with four or more travel lanes or limited access highways.
