Analysis

This resolution approves an amendment to a contract between Metro and InfoSapient, Inc. for the E-Business Suite R12 database administration support. R12 is an Oracle system that Metro uses for its financial operations and transactions. All Metro departments use the system for creating purchase orders, paying invoices, recording revenues, submitting payroll, tracking departmental budgets, as well as for some HR transactions.

InfoSapient, Inc. is a consulting services company that has worked with Metro’s R12 implementation since the beginning of the process. This contract is for database administration support for R12 application for items related to performance, tuning, patching, and validation, along with internal advisory services. The original sole source contract with InfoSapient did not require Council approval because it was below the \$250,000 threshold.

This amendment increases the value of the contract over the remaining four years, with an estimated amendment value of \$500,000 and a total contract value of \$700,000. Metro ITS has advised that InfoSapient is the only suitable contractor to perform these services due to their proprietary knowledge and a deep level of understanding of the application. ITS has provided a letter to the Council further explaining the reasoning for the sole source contract increase. This letter has been uploaded to Insite for viewing.
