## **Contract Amendment Justification**

### **Information**

Contract No.: 6477475  
Contractor Name: Splash Business Intelligence, Inc.  
Original Contract Value: \$ 1,000,000  
Previous Amendment Value: \$2,000,000  
Additional Amendment Amount Requested: \$ 1,500,000  
Proposed Revised Value: \$ 4,500,000

### **Justification**

This reporting consulting/development company has worked with our Oracle R12 ERP system since the initial implementation and their reporting solution is used by all end users to create and produce reports from R12 through the SplashBI and GL Connect reporting solutions. These are implemented within each of the modules of R12 and overall for custom reports developed.

This amendment is to update the total maximum contract value to accommodate the additional 3 years post go live of the Oracle Cloud project which is currently in process to migrate our ERP system and all the custom reports through SplashBI from Oracle EBS R12 to Oracle Cloud with a go live date of 1/1/2026 (5 days before the current contract expiration date of this contract). SplashBI will provide dashboards, data connections and reporting solution used within ERP support, maintenance and technical/development services for Oracle Cloud. Metro will continue the use of the enterprise reporting solution in R12 until Oracle Cloud is live.

Reporting and moving toward near real-time dashboards and more advanced reporting solutions will enable our users at all levels to provide new levels of transparency of financial, accounting and HR data. A new data warehouse with secured direct access by the MNPS IT team will allow them to extract and automate several integrations to their systems and reporting needs which today require quite a bit of manual effort. This amendment to extend the term to up to 3 years and increase the max value will allow us to get through the migration/implementation project from R12 to Oracle Cloud and after the go live and post go live support period then the team can evaluate the proper procurement and contracting direction for this reporting and dashboarding solution and then enact that procurement and contracting process in plenty of time to make an informed decision working with our Procurement partners prior to the expiration of the contract. This amendment of the term and maximum value accommodates that evaluation period of the options then get the new contract in place well in advance of the new contract expiration date.

As a reminder, SplashBI includes both standard and custom reports that are fully embedded into the Oracle product by module and all our reporting/extracting of data needs are being covered by their solutions. This contract and the increased max value is critical for the licensing, support, development and services for the thousands of reports (and growing) as well as the new dashboards and connection tools that are part of the Oracle Cloud project going live on 1/1/2026.
