Visual Inspection Cycle Quarters 3 through 12

Resolution of Metropolitan Nashville-Davidson County Council

DAVIDSON COUNTY
3 YEAR VISUAL INSPECTION CYCLE

START DATE OF INSPECTION CYCLE: 1/1/2022

Davidson County will not start visual Inspections until the third quarter of the first year inspection cycle due to appeals from the 2021 county wide reappraisal, the 2021 pro-rate roll, and the 1/1/2022 assessment roll.

ASSESSOR: Vivian M. Wilhoite

COUNTY INDEX MAP

Davidson County Property Map Index

NARRATIVE INFORMATION --- VISUAL INSPECTION

- A. **Field Inspectors:** Completion of visual inspections for Davidson County will require twenty-six (26) Residential, Commercial, and Rural appraisers and six (6) support staff members. During the reappraisal cycle, the Assessor's Office will conduct visual inspections using digital oblique images and field inspections. This will result in increased efficiency and accuracy. In addition, field data collectors will enter data directly into the Assessor's records using field data tablets.
- B. **Training Recommended:** The Assessor's Office continues to have staff attend appropriate training, including: IAAO courses and seminars, DPA courses, and training on specific software including Pictometry. In addition to this training, the Office will continue to provide applicable in-house training, including analysis database training, land valuation training, and statistics training.
- C. **Quarterly Progress Reports:** Each quarter, the Assessor will return a report to the DPA that shows progress that has been made on a quarterly basis. This report will show the number of parcels reviewed and keypunched along with the neighborhoods that have been completed.
- D. **Accuracy of All Attributes:** Land and Improvements must be reviewed on every parcel during the review phase for accuracy and completeness. This includes the physical attributes of the land, such as topography, and tree-lines that may have changed since the last inspection cycle.
- E. **Changes to Parcels:** Any new structures, additions, and remodeling should be keyed in the current file to maintain fairness and equity among all property owners. Changes held until reappraisal or future years, must only be nominal in nature. Review will be considered complete when changes have been keypunched into the Computerized-Assisted Mass Appraisal system.

- F. **Geographic Areas Assigned:** Davidson County is divided into nine (9) appraisal zones, which are subdivided into 867 residential, 16 rural, and 82 commercial neighborhoods. Visual inspections will be scheduled and assigned by zone and neighborhood type.

Residential properties, including rural and condominium properties, are assigned by zone and neighborhoods to four (4) Sections (groups of appraisers) as follows: Section 1 - Zone 2, Section 2 - Zones 3, 4, and 7, Section 3 - Zones 5, 6, and 9, and Section 4 - Zones 1 and 8. A detailed schedule for the visual inspection of residential properties is attached.

Commercial properties will be visually inspected by the office's Commercial Real Property Section. Commercial properties are assigned quarterly by zone, neighborhood, and parcel count. Multi-class and exempt properties will be reviewed by the commercial Section Leader and an assigned staff member. **Residential properties assigned a commercial classification will be assigned to the Residential (Urban) neighborhood in which they are located. (Example: non-owner-occupied single-family home Short-term Rental)** A detailed schedule for the visual inspection of commercial properties is attached.

- G. **Map Maintenance Schedule and Explanations:** Map maintenance in Davidson County is the responsibility of the Metropolitan Planning Commission. The maintenance of ownership records resulting from land transfers, including owner name(s), address, legal description, and map and parcel information is maintained daily by seven (7) members of the office's Deeds Division.
- H. **Use of Aerial Photography for Review:** The Assessor's Office will conduct visual inspections using digital oblique images and field inspections. This will result in increased efficiency and accuracy. In addition, field data collectors will enter data directly into the Assessor's records using field data tablets
- I. **Quality Assurance Efforts Planned:** Section Leaders will review the work of visual inspection work of their section members daily and will also review each neighborhood upon completion. In addition, 5% of all visual inspections will be field audited by the office's Quality Control Section to ensure the consistency and accuracy of the visual inspection

NARRATIVE INFORMATION – REVALUATION YEAR

- A. **Personnel Needs:** The Assessor's Office estimates that approximately 90% of its staff will participate in the work necessary during the revaluation year. During the fourth year of the cycle, staff will perform all necessary work, including: administrative, valuation analysis and the production of the assessment roll, quality control, appeals management, customer service, and information technology services to assign final 01/01 values and initiate the local appeals sessions.

- B. **Office Space and Equipment Needs:** The office's existing space located at 700 2nd Avenue South, Suite 210 is adequate to house its entire staff. There is no foreseeable need for State personnel; however, if the need arises, appropriate space will be provided.

- C. **Use of Aerial Photographs:** Aerial photography will be utilized to check location, access, land grades, improvements, tree-lines, acreage, etc. They will also be used to check consistency of improvement types, land tables, and consistency.

- D. **Assistance of Division of Property Assessments (DPA):** The DPA will evaluate procedures through quarterly monitoring and suggest any improvements that might be implemented.

- E. **Development of Sales File:** The office uses the same procedures for collecting and verifying sales data that are used by the DPA. Warranty deeds that are "same-as" are received daily. Office staff confirms the information contained on the deeds with information in the Assessor's records and enters a sale code and price paid and any appropriate changes. A "Q" is entered for residential transactions that are qualified or another code is entered for disqualified transfers. A sales verification form is mailed regarding all non-arms-length transactions. An "L" is entered into the record for all commercial, industrial, and farm sales until a determination is made based on communication with the grantee, grantor, and/or agent at which point a "Q" is entered for qualified sales or another code is entered for disqualified transfers. The office also uses the Multiple Listing Service (MLS) to assist in the verification of sales.

F. **Neighborhood Codes:** Neighborhood Codes have been established within the nine (9) appraisal zones by property type (Residential, Condominium, Residential Planned Unit Development (PUD), Rural, Commercial, Commercial. Condominium, and Industrial) and are maintained on a daily basis by the appraisal staff.

G. **Improvement Valuation:**

1. **Base House Development:** Base rates are developed using data from the Marshall & Swift building cost data. The base rates are adjusted to local cost and calibrated by market data to each neighborhood by appraisal staff.

2. **Out Building and Yard Items:** The office will use base rates developed by the DPA that it will adjust to the market in Davidson County using multipliers. In addition, the office develops and considers base rates for the valuation of special features and yard items using the Marshall & Swift building cost data.

3. **Collection & Use of Income & Expense Information:** Income and expense data is collected through interviews with property owners and during the appeals process. This information is entered into a database and maintained for each year. The information is used in conjunction with published sources to develop income and expense models for major commercial/industrial properties. The data is also stored at the parcel level on the office's CAMA system. In addition to the above, the office may contract with an outside firm to produce all attributes of an income approach for some major improvement types.

4. **Quality Assurance Efforts:** Audits are performed during the visual inspection cycle, the revaluation phase will be analyzed using sales ratio reports, before/after value compare reports, monthly audit reports and performance edits. This will be conducted in conjunction with other error and edit reports produced by the technical support division to ensure a quality product for the 2025 reappraisal.

H. **Land Valuation:**

1. **Rural Land & Use Value:** Rural land schedules will be developed from market data for each rural neighborhood. Use values will be obtained from the DPA.

2. **UOM Tables:** UOM tables will be used to value all residential land.

3. **Commercial & Industrial:** Commercial land will be valued on per square foot basis and larger commercial tracts will be valued per acre. Small industrial parcels will also be valued on a per square foot basis and larger industrial tracts will be value per acre.

4. Quality Control (QC): As each neighborhood is completed it will be monitored by the QC staff to ensure that all items on the neighborhood key sheet are accurate. Statistical analysis, including sales ratio studies, will be performed for each neighborhood and zone to insure statistical reliability. In addition, standard audit and edit reports will also be done.

- I. **Mineral and/or Leaseholds**: Leasehold appraisals will be conducted in accordance with DPA guidelines. No mineral interest values have been discovered within the county.
- J. **Valuation Analysis**: Detailed Analysis: The office runs various programs and reports using its CAMA system to determine the level of appraisal and equity between appraisals. These reports are incorporated in the office's appraisal software. In addition, staff programmers produce special needs reports to analyze the values on a neighborhood basis.
- K. **Mapping and Ownership**: Ownership data is updated by the office's Deeds Section for same-as transfers of ownership. Split-transfers are the responsibility of the Mapping Division of the Metropolitan Planning Commission. The Mapping Division updates the Land Information System and data is transferred daily via File Transfer Protocol (FTP) to the Assessor's CAMA system. After the data is transferred, it is audited by the Assessor's staff for accuracy.
- L. **New Construction**: Building permit data is received weekly from the Metro Codes Department and will be reviewed by neighborhood, within each appraisal zone. New construction and demolition that occurs from 2021 thru 2024 will be worked by field appraisers annually to ensure the annual assessment roll is complete
- M. **Final Value Meeting**: Upon completion of the valuation analysis by the appraisal staff, a sales file will be provided electronically to the DPA for review. If the DPA requests additional data, it will be provided per its request. A meeting will be scheduled with the DPA to ensure all applicable standards have been met. This meeting will be conducted prior to the mailing of appraisal notices.

N. **Hearings (Formal and Informal):** Upon completion of the valuation phase of the program, 01/01 notices will be mailed, and informal reviews will be conducted by Assessor's staff for a period of four to five weeks. Informal reviews will be filed on-line by the property owner via the internet or by telephone and in-person with the assistance of a member of the office's staff. Regardless of the method of filing, all informal reviews will be maintained in a database and routed to appraisers who calibrated the neighborhood models. The reviews will be worked daily until completed. Once the reviews are concluded, informal review result notices will be mailed, and recipients will be made aware of their appeal rights to the Metropolitan Board of Equalization (MBOE). The MBOE will appoint hearing officers to assist with appeals.

Is your county currently on the IMPACT system? Yes _____ No X

Do you plan to change to another system? Yes X No _____

If so, list the name and the date: AssessPro 5.0. Should be installed for the 1/1/2023 assessment roll. (We are currently on the original AssessPro system aka AssessPro Classic)

O. **Possibility of Completing the Reappraisal Sooner:** We reserve the right to complete the reappraisal sooner if market conditions should warrant, and the DPA approves such action.

MEMORANDUM OF UNDERSTANDING

between

Davidson County and The Division of Property Assessments

DATE: 4/13/21

TO: Vivian M. Wilhoite, Assessor of Property

John Cooper, County Mayor (or Executive)

RE: Davidson County 4 Year Reappraisal Program

**FROM: Tennessee Comptroller of the Treasury
Division of Property Assessments**

The purpose of this memorandum of understanding is to clarify the areas of responsibility for all parties involved in the reappraisal of Davidson County. It is intended to express the requirements needed to successfully complete reappraisal and to define the extent of involvement expected of the Comptroller's Division of Property Assessments. A reappraisal program is defined as the updating of all values in the county by analyzing current information and establishing new tables, models, schedules, rates and depreciation.

Tenn. Code Ann. § 67-5-1601 provides for assessors of property to have the option to reappraise either on a 6- year cycle with an update of values in the third year or to reappraise on a 4- or 5-year cycle with no updates. Tenn. Code Ann. § 67-5-1601 (d) requires the Division of Property Assessments to provide technical assistance to counties during the year of reappraisal. The resources available to the Division of Property Assessments enable them to provide technical assistance to counties during the reappraisal year; however, the amount of division involvement will be determined by the workload resulting from all counties that are scheduled for reappraisal during each year.

The amount of Division of Property Assessments involvement must be determined and clearly understood prior to the county producing a plan for reappraisal. The assessor of property will prepare a plan that accomplishes reappraisal in accordance

with standards and procedures prescribed by the Division of Property Assessments. The reappraisal plan must include all specific items identified in this memorandum of understanding.

I. County Responsibility

The assessor of property will be responsible for ensuring that all phases of the reappraisal program are conducted in accordance with Division of Property Assessment's policies and procedures relating to **property valuation, sales verification, appeal defense and statistical standards**. The county must **resolve data quality reports, provide accurate property characteristics, provide adequate data entry, demonstrate its ability to organize and manage a program, provide adequate staffing and provide financial support**.

A. Property Valuation: All types of property will be valued following standard procedures.

1. Residential - Residential properties will be valued by determining the proper base rate for each residential improvement type in the jurisdiction. The base rates will be developed using sale properties with recently constructed improvements whenever possible to reduce the difficulties of estimating depreciation and to increase the accuracy of the land values. The base rate analysis will consider the new depreciation that will automatically be calculated when the year of reappraisal changes. The assessor of property shall retain all base rate analyses for appeal purposes. Appropriate depreciation and/or effective age will be used to adjust groups of parcels where market evidence supports it. When additional depreciation or effective age changes are used to adjust values, market analysis must be retained to support the adjustments. Individual property characteristics will not be improperly altered to achieve acceptable analysis results. Outbuildings and Yard Items (OBYs) will be valued using standard abbreviations and updated cost tables. The cost tables will be developed from nationally recognized cost services and calibrated to the local market. The assessor of property will retain all necessary supporting documentation for review and appeal purposes. Residential land will be valued using accepted appraisal practices and available computer techniques. All residential market area (neighborhood) delineation codes will be reviewed to determine their accuracy, and the necessary action will be taken to correct any changes indicated by the market since the last reappraisal program.

2. Rural Land - Rural land will be valued using standard rural land valuation procedures. Rural sales will be located and verified to determine if they meet the requirements of a valid transaction. All rural sales will be reviewed by the assessor of property or a staff member

with either the buyer, seller, or agent to determine the conditions of the sale and if any adjustments are needed. A rural land sales verification form will be completed on all rural sales. These forms will be maintained in the assessor of property's office for review and use in appeals. Rural land will be valued using the rural land valuation tables. Appropriate sales analysis must be conducted to produce a rural land schedule and to determine all factors affecting value. Areas of the county that cannot be valued using the base rural land schedule will be valued using the rural land schedule adjusted to the appropriate level of value. Land grade maps will be used to determine the appropriate land grade for each parcel. The land grade maps, if not already available, will be constructed by using Natural Resources Conservation Service (NRCS) soil survey information. All maps will be updated to reflect the most current base features such as wooded areas and areas that have been cleared since the last reappraisal program. All rural market area (neighborhood) delineation codes will be reviewed to insure they conform to current market conditions.

3. Commercial/Industrial Property - All commercial and industrial property shall be valued using standard valuation procedures. The listing of commercial and industrial properties will be reviewed for accuracy. All commercial property will be reviewed to determine if valuation by the income approach is the most appropriate method. In these instances, it will be necessary to gather sufficient income and expense data from the market to calculate an indication of value by the income approach. Completed income and expense forms will be retained for review and appeal purposes. All income data must be analyzed by making comparisons with like properties such as comparing offices to offices, warehouses to warehouses, and restaurants to restaurants. All commercial sales will be verified to determine if any special circumstances such as personal property or unusual financing are included. Commercial and industrial base rates will be developed for each type of commercial and industrial improvement in the jurisdiction. This is typically accomplished using a combination of local information and a professional cost service. All industrial properties shall be revalued using the most appropriate method, typically the cost approach. All commercial and industrial land will be revalued using the most appropriate unit of comparison, and all pertinent information such as zoning will be indicated on the land valuation maps. All analyses and sales information used to determine the commercial and industrial land values will be retained by the assessor of property for review and appeal purposes. All commercial and industrial market area (neighborhood) delineation codes will be verified to determine if they need to be revised due to changes in the market.

4. Small Tracts - Land that does not qualify as a farm and is not part of an organized development is considered a small tract. It is typically valued as an individual unit and priced per unit or per acre. A total countywide small tract analysis must be accomplished in order to determine reasonable values. After the analysis has been accomplished and a pricing guide developed, the existing small tracts are to be reviewed to determine consistency. After making any needed adjustments to improve consistency, the small tracts will be revalued using accepted appraisal practices and any appropriate computer-assisted techniques. The assessor of property will maintain all analyses and sales information used in the valuation of small tracts for review and appeal purposes. All market area (neighborhood) delineation codes that influence the valuation of small tracts will be reviewed to determine accuracy, and any adjustments needed will be made.

5. Unique Properties - Usually, unique properties will exist in a county that will require special treatment. These can be lake properties, mobile homes, large industrial complexes, mineral interest, leasehold interest, etc. The reappraisal plan will address these properties and explain how they will be valued.

B. Sales Verification: A major element in the success of a reappraisal program is the completeness and accuracy of the sales file. The Division of Property Assessments maintains a publication entitled *Property Assessor's Procedures for Sales Data Collection and Verification* to guide assessors through this process. These procedures will be followed to ensure the necessary accuracy in sales analysis. Any attempt to influence the results of the analysis by inaccurate sales verification must be avoided. The quality of the final statistical analysis depends on the integrity of the sales file, and every effort should be made to ensure its accuracy. The assessor of property will maintain records on the verification of sales for review and appeal purposes.

C. Appeal Defense: Any reappraisal program must have the necessary data and information to defend the appraisals. The assessor of property and staff must have the ability to present the value-supporting data in a manner that provides the property owners and appeal boards with the information necessary to understand how and why the value conclusions were determined. The assessor of property and staff will resist making unnecessary changes just to satisfy the property owner when the appraisal is otherwise correct. All elements of the valuation process must consider the appeal process. An effort must be made to maintain sufficient data to defend the values, and this data includes the following: base rate analysis; sales analysis;

cost information; land valuation information; adjustments to sales; income and expense information; and any other information that will be useful in the appeal process.

D. Statistical Standards for Reappraisal: The Division of Property Assessments utilizes statistical standards developed by the International Association of Assessing Officers (IAAO) for evaluating the results of reappraisal programs. The reappraisal program should be completed with these standards as the goal. Failure to meet these standards indicate the reappraisal program may be flawed and unacceptable. The standards apply to property by its statutory classification such as residential, commercial/industrial, and farm. Within each classification, properties may be further stratified based on a detailed analysis of the information available. The data used to produce the analysis must be accurate and uninfluenced by personal bias. The discovery of inaccurate data that has an influence on the results of the statistical analysis will be considered in the overall evaluation of the program. If the results of the statistical analysis fail to meet acceptable standards, said results will be reported to the State Board of Equalization for appropriate action.

E. Data Quality Reports: Data quality reports include edits that enable the assessor to identify data problems. Since the success of a reappraisal program is determined by the accuracy of the data, each county must identify and resolve errors found on data quality reports. Typically, this information is produced from the assessor of property's computer file and analyzed locally. Counties utilizing the state computer-assisted mass appraisal (CAMA) system may contact Division of Property Assessments staff for assistance as needed to generate data quality reports. Counties operating independent CAMA systems are expected to accomplish this without Division assistance.

F. Data Entry: A reappraisal increases the amount of data entry because of changes and adjustments to the file, especially where extensive field reviews are required. Any plan for reappraisal must consider this additional data entry workload.

G. Organization and Management: The completion of a successful reappraisal program is dependent upon the ability of the assessor of property to organize work activities and to manage employees throughout the reappraisal cycle. Any reappraisal plan must consider topics including but not limited to: staffing (both in quantity and in assignment of duties), training, quality control, and office space.

H. Approval for 4-Year and 5-Year Cycles: The assessor of property in any county that plans a 4- or 5-year reappraisal program must have approval by resolution from the county legislative body. The plan for reappraisal prepared by the assessor of property must be submitted for review to the county executive and the county legislative body. The county legislative body must provide the funding to accomplish the reappraisal program as outlined in the plan for reappraisal.

II. Division of Property Assessments' Responsibility:

Tenn. Code Ann. § 67-5-1601 provides that all work (accomplished by the assessor of property) is subject to the supervision and approval of the director of the Division of Property Assessments. The Division of Property Assessments is required to supervise and direct all reappraisal and revaluation programs. The Division of Property Assessments' statutory responsibilities include providing technical assistance and ensuring the accuracy of the reappraisal program. All counties conducting reappraisal programs accept the condition of limited involvement from the Division of Property Assessments and agree to maintain records and provide sufficient data and reports to enable the Division of Property Assessments to evaluate the quality of the reappraisal program.

A. Technical Assistance: Technical assistance is provided to a county by staff members of the Division of Property Assessments. The amount of technical assistance to be provided by the Division of Property Assessments will be determined after considering available resources and existing workload of county reappraisal programs scheduled during each year.

Examples of technical assistance to the assessor's office may include:

- Residential Base Rate Development
- Residential Analysis
- OBY Cost Tables Development
- Rural Land Schedule Development
- Homesite Analysis
- Commercial & Industrial Base Rate Development
- Income & Expense Analysis
- Commercial Market Analysis
- Industrial Property Appraisal
- Small Tract Sales Analysis
- Small Tract Pricing Guide Development
- Sales Adjustments Determination
- Sales Verification Instruction
- Unique Properties Appeal Preparation
- Data Preparation for Appeals Defense
- Overall Statistical Results Review
- Data Quality Reports Production
- Assessable Mineral Interest Valuation
- Assessable Leasehold Interest Valuation
- On-The-Job Training for Assessor's Staff
- Market Area (Neighborhood) Delineation Codes Review

B. Modification of Responsibility

Due to level of expertise, number of staff members, and resources available to the assessor of property, there may be a need to modify areas of responsibility in the memorandum of understanding. The purpose of the modification of responsibility is to provide latitude between the assessor and the division regarding the identified areas of responsibility. The following are specific modifications to this agreement that will be mutually beneficial for both parties and allow for better utilization of resources during the revaluation program:

III. Accuracy of Program

The assessor of property will prepare a final value report at the end of the revaluation year that will give an overview of the reappraisal program and support the value indications. The accuracy of the reappraisal program shall be determined by a review of the supporting documentation for the following: base rate development; land valuation; application of market adjustments; market area (neighborhood) delineation codes analysis; rural land sales analysis; small tract analysis; identification and valuation of unique properties; completeness of the sales file; quality of records developed for appeal defense; results of the statistical analysis; resolution of the data quality reports; and correctness of property characteristic data.

IV. Computer Appraisal System

In the event the assessor of property chooses to change the current CAMA system, information regarding the new system and a detailed plan of implementation must be included with the reappraisal plan for approval by the State Board of Equalization.

V. Failure to Comply

It is the expressed intent of this memorandum of understanding to provide the county and the Division of Property Assessments with a clear understanding of the responsibility of each party

regarding the completion of the next reappraisal program. It is the intent of the Division of Property Assessments to take whatever action necessary to ensure the accurate and timely completion of the reappraisal program. Failure on the part of the county on any of the items agreed to herein shall result in the reporting of said failure to the State Board of Equalization for appropriate action.

It is with full understanding that we accept the conditions identified in this memorandum of understanding and accept responsibility to accomplish all items identified herein. We recognize that failure on the part of the county legislative body or the assessor of property to complete the agreed to requirements will result in the action identified herein.
