Note 4: In addition to the height restrictions in [Section]17.12.060, the height of two detached dwelling units on a single lot cannot exceed a ratio of 1.0 horizontal to 1.5 vertical for each structure. ~~Maximum height shall be measured from the natural grade. The natural grade shall be determined based on the average elevation of most exterior corners of the front facade, to the roof line. Natural grade is the base ground elevation prior to grading. The appropriate height shall be determined by the metro historic zoning commission for properties within a historic overlay. Notwithstanding the above provisions, two-family structures legally constructed prior to the effective date of this ordinance may remove the connector required under the previous definition of two-family, regardless of the height of the units.~~

Note 6: Maximum height to eave/parapet limited to 24 feet; maximum height to roof ridge line limited to 35 feet, excluding elevator or stair bulkheads and chimneys or flues. If fifty percent or more of the existing structures on the same block face and oriented to the same street are more than 35 feet in height, then the maximum height is limited to 3 stories in 45 feet. Any exposed foundation in an existing structure on the same block face and oriented to the same street shall count toward the height of that structure.

Note 7: For all districts, height shall be measured from the average grade plane post-development.
