Prior to issuance of use and occupancy permits, existing vertical obstructions shall be relocated outside of the required sidewalk. Vertical obstructions are only permitted within the required grass strip or frontage zone.

GENERAL NOTES

- 78-840 Note:** Any excavation, fill or disturbance of the existing ground elevation must be done in accordance with storm water management Ordinance No. 78/840 and approved by the Metropolitan Dept. of Water Services.
- Access Note:** Metro Water Services shall be provided sufficient & unencumbered access in order to maintain and repair utilities in this site.
- Fire Dept. Note:** Fire-flow shall meet the requirements of the International Fire Code - 2012 Edition; as amended.
- Preliminary SP Plan Note:** Minor modifications to this Preliminary SP Plan may be approved by the planning commission or its designee based upon final architectural, engineering or site design and actual site conditions. All modifications shall be consistent with the principles and further the objectives of the approved plan. Modifications shall not be permitted, except through an ordinance approved by metro council that increase the permitted density or floor area, add uses not otherwise permitted, eliminate specific conditions or requirements contained in the plan as adopted through this enacting ordinance, or add vehicular access points not currently present or approved.
- Stormwater Preliminary Plan Note:** Drawing is for illustration purposes to indicate the basic premise of the development, as it pertains to Stormwater approval / comments only. The final unit/lot count and details of the plan shall be governed by the appropriate stormwater regulations at the time of final application.
- Development Schedule:** It is anticipated that the residential phase of the project will be constructed in one phase, and will begin in Spring 2023 and completion by Summer 2024.
- Survey Note:** Boundary information taken from survey prepared by RSA dated 10/06/2020. Topographic information taken from survey prepared by SEAS dated 07/08/2021.
- Stream Buffer Note:** Stream buffers shall be provided per state/local requirements.
- Culvert/Driveway Note:** Size driveway culverts per the design criteria set forth by the Metro Stormwater Manual. (Minimum Driveway culvert in Metro ROW is 15" RCP).
- Off-Site Improvement Note:** For all development resulting in filling of floodplain storage (including but not limited to the multi-family development, greenway extensions, and modifications to Coley Davis Road), compensating storage capacity shall be provided in accordance with Section 5.5.7, Volume 1 of the Metro Stormwater Management Manual. Compensation shall be provided on Parcel 17.
- Stormwater Note:** All work in buffer areas, floodways, areas that do not compensate floodplain volumes, and proposed bridge alignment will require a variance through the Stormwater Management Committee.
- Stormwater Note:** All work in floodway, not compensating floodplain volumes, and proposed bridge will require a No-Rise study and/or CLOMR.
- Greenway Note:** The developer will be responsible for repairing any of the existing greenway that is damaged during construction of the bridge and/or the proposed residential development. The developer will be responsible for reconnecting the existing trail that may be cut off to accommodate the proposed bridge access. This proposed reconnection will be coordinated with Metro Parks.

PUBLIC STREET CONNECTIONS

Public street connection consistent with the attached concept plan shall be provided for the final site plan. The road and associated public sidewalks shall be bonded or constructed prior to the recordation of the final plat.

STREAM BUFFER NOTE

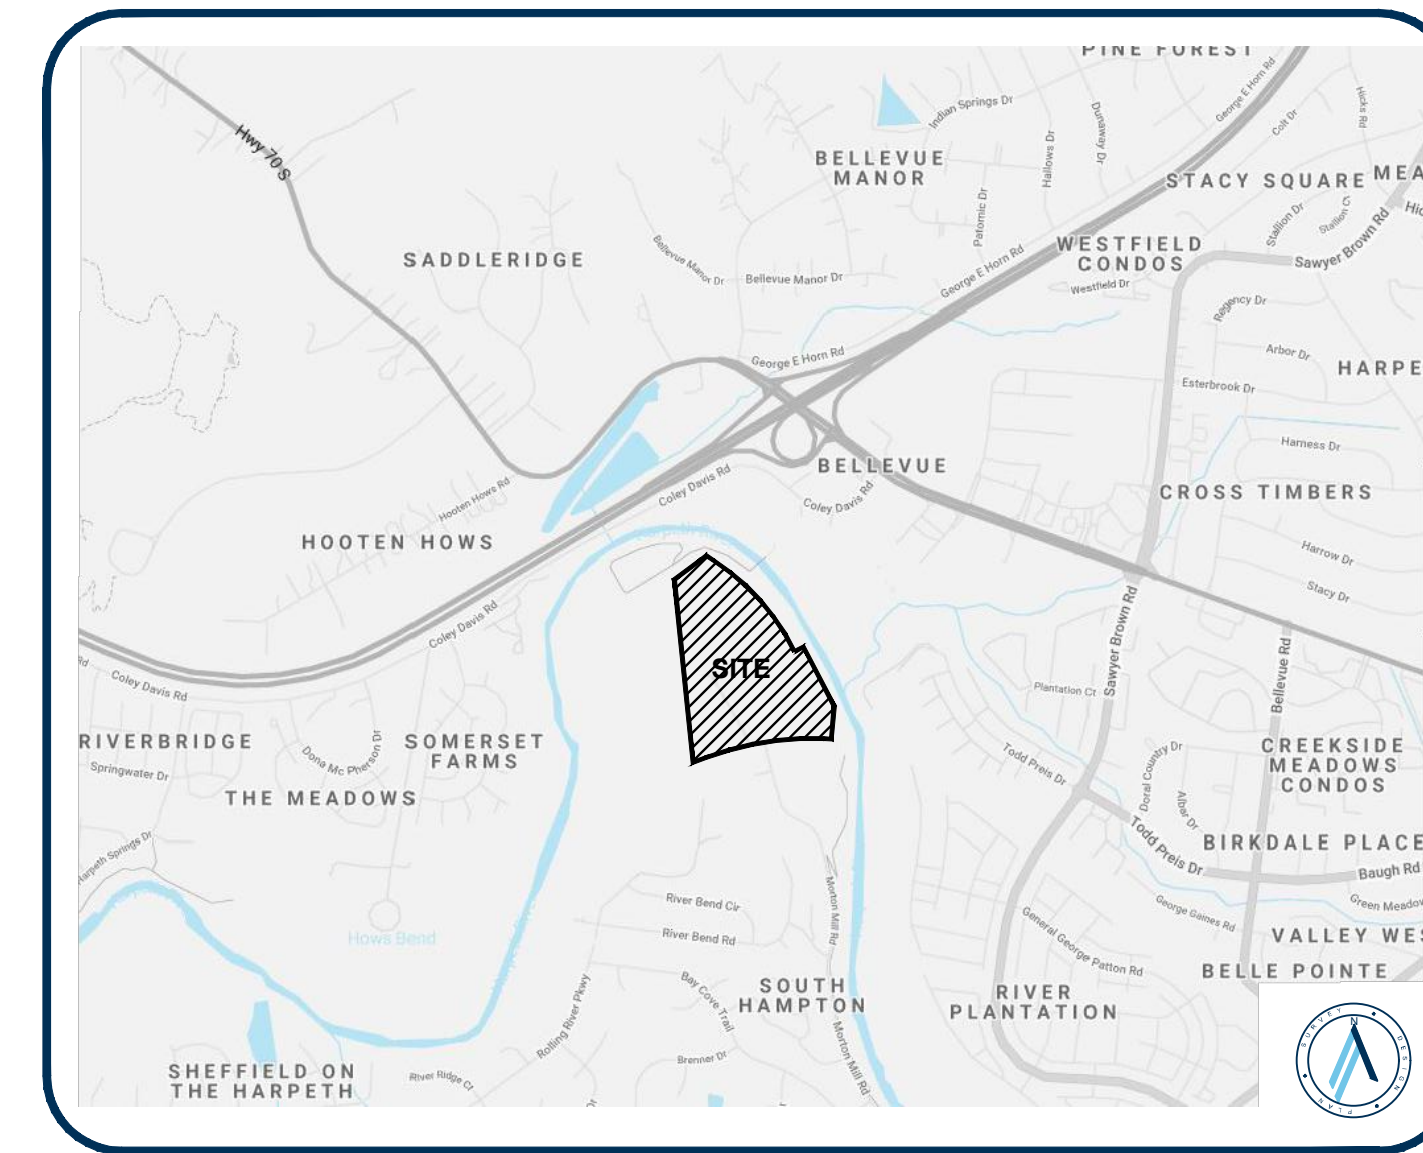

The buffer along waterways will be an area where the surface is left in a natural state and is not disturbed by construction activity. This is in accordance with the Storm Water Manual Volume 1 Regulations. Results of a Hydrological Determination confirming this feature is a wet weather conveyance would eliminate buffer requirements.

PUBLIC WORKS NOTES

- Final construction plans and road grades shall comply with the design regulations established by the Department of Public Works. Slopes along roadways shall not exceed 3:1.

U.S. FEMA FIRM NOTE

By scaled map location and graphic plotting only, this property lies within flood zones "ae", "x" (other flood areas), and "x" as designated on current Federal Emergency Management Agency map no. 47037c0329h, with an effective date of april 5, 2017, which makes up a part of the national flood insurance administration report; community no. 470040, panel no. 0329, suffix h, which is the current flood insurance rate map for the community in which said premises is situated. Said map defines zone "ae" under "special flood hazard areas subject to inundation by the 1% annual chance flood" as base flood elevations determined, said map defines zone "x" (other flood areas) under "other flood areas" as areas of 0.2% annual chance flood. Said map defines zone "x" under "other areas" as areas determined to be outside the 0.2% annual chance floodplain.
