3. Option 2 (Build Realignment of Dickerson Pike) is the preferred option. If the realignment is not approved by TDOT, adjustments may be necessary to the site plan, including but not limited to building placement and streetscape details.

4. If the development is proposed to be phased, include a full phasing plan with the 1st final site plan.
5. Pedestrian entries and street-level interaction shall be demonstrated with the final site plan architectural elevations, regardless of the final alignment determination.

The façade treatments shall integrate or complement the architectural characteristics of the habitable portion of the building and the surrounding built context. Openings for natural ventilation are permissible when integrated into the façade design.
11. On the corrected copy, update the location of the Site C residential liner building as needed to be consistent with the proposed rear setback.

Section 6. Be it further enacted, minor modifications to the preliminary SP plan may be approved by the Planning Commission or its designee based upon final architectural, engineering or site design and actual site conditions. All modifications shall be consistent with the principles and further the objectives of the approved plan. Modifications shall not be permitted, except through an ordinance approved by Metro Council that increase the permitted density or floor area, add uses not otherwise permitted, eliminate specific conditions or requirements contained in the plan as adopted through this enacting ordinance, or add vehicular access points not currently present or approved.

Section 7.
