Award Letter

U.S. Department of Homeland Security
Washington, D.C. 20472

Effective date: 09/13/2024

Drusilla Martin
NASHVILLE & DAVIDSON COUNTY, METROPOLITAN GOVERNMENT OF
P.O. BOX 196300
NASHVILLE, TN 37219
EMW-2024-PU-05214

Dear Drusilla Martin,

Congratulations on behalf of the Department of Homeland Security, your application submitted for the Fiscal Year 2024 Port Security Grant Program (PSGP), has been approved in the amount of \$300,000.00 in Federal funding. This award of federal assistance is executed as a Grant. As a condition of this award, you are required to contribute non-Federal funds equal to or greater than \$100,000.00 for a total approved budget of \$400,000.00. Please see the Fiscal Year 2024 Port Security Grant Program (PSGP) for information on how to meet this cost share requirement.

Before you request and receive any of the Federal funds awarded to you, you must establish acceptance of the award through the FEMA Grants Outcomes (FEMA GO) system. By accepting this award, you acknowledge that the terms of the following documents are incorporated into the terms of your award:

- Award Summary - included in this document
- Agreement Articles - included in this document
- Obligating Document - included in this document
- Fiscal Year 2024 Port Security Grant Program (PSGP) Notice of Funding Opportunity
- The Preparedness Grant Manual (PGM)

Please make sure you read, understand, and maintain a copy of these documents in your official file for this award.

Sincerely,

A handwritten signature in blue ink that reads "P.S. Williams".

PAMELA WILLIAMS
Assistant Administrator, Grant Programs

Award Summary

Program: Fiscal Year 2024 Port Security Grant Program

Recipient: NASHVILLE & DAVIDSON COUNTY, METROPOLITAN GOVERNMENT OF

UEI-EFT: LGZLHP6ZHM55

DUNS number: 078217668

Award number: EMW-2024-PU-05214

Summary description of award

The Port Security Grant Program provides funds to state, local, and private sector maritime partners to support increased port-wide risk management and protect critical surface transportation infrastructure from acts of terrorism, major disasters, and other emergencies.

Amount awarded table

The amount of the award is detailed in the attached Obligating Document for Award.

The following are the budgeted estimates for object classes for this award (including Federal share plus your cost share, if applicable):

Object Class	Total
Personnel	\$0.00
Fringe benefits	\$0.00
Travel	\$0.00
Equipment	\$400,000.00
Supplies	\$0.00
Contractual	\$0.00
Construction	\$0.00
Other	\$0.00
Indirect charges	\$0.00
Federal	\$300,000.00
Non-federal	\$100,000.00
Total	\$400,000.00
Program Income	\$0.00

Approved scope of work

After review of your application, FEMA has approved the below scope of work. Justifications are provided for any differences between the scope of work in the original application and the approved scope of work under this award. You must submit scope or budget revision requests for FEMA's prior approval, via an amendment request, as appropriate per 2 C.F.R. § 200.308 and the FY2024 PSGP NOFO.

Article 1 Assurances, Administrative Requirements, Cost Principles, Representations, and Certifications

I. Recipients must complete either the Office of Management and Budget (OMB) Standard Form 424B Assurances – Non- Construction Programs, or OMB Standard Form 424D Assurances – Construction Programs, as applicable. Certain assurances in these documents may not be applicable to your program and the DHS financial assistance office (DHS FAO) may require applicants to certify additional assurances. Applicants are required to fill out the assurances as instructed by the federal awarding agency.

Article 2 General Acknowledgements and Assurances

Recipients are required to follow the applicable provisions of the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards in effect as of the federal award date and located at 2 C.F.R. Part 200 and adopted by DHS at 2 C.F.R. § 3002.10. All recipients and subrecipients must acknowledge and agree to provide DHS access to records, accounts, documents, information, facilities, and staff pursuant to 2 C.F.R. § 200.337. I. Recipients must cooperate with any DHS compliance reviews or compliance investigations. II. Recipients must give DHS access to examine and copy records, accounts, and other documents and sources of information related to the federal financial assistance award and permit access to facilities and personnel. III. Recipients must submit timely, complete, and accurate reports to the appropriate DHS officials and maintain appropriate backup documentation to support the reports. IV. Recipients must comply with all other special reporting, data collection, and evaluation requirements required by law, federal regulation, Notice of Funding Opportunity, federal award specific terms and conditions, and/or federal awarding agency program guidance. V. Recipients must complete the DHS Civil Rights Evaluation Tool within thirty (30) days of receiving the Notice of Award for the first award under which this term applies. Recipients of multiple federal awards from DHS should only submit one completed tool for their organization, not per federal award. After the initial submission, recipients are required to complete the tool once every two (2) years if they have an active federal award, not every time a federal award is made. Recipients must submit the completed tool, including supporting materials, to CivilRightsEvaluation@hq.dhs.gov. This tool clarifies the civil rights obligations and related reporting requirements contained in these DHS Standard Terms and Conditions. Subrecipients are not required to complete and submit this tool to DHS. The evaluation tool can be found at <https://www.dhs.gov/publication/dhs-civil-rights-evaluation-tool>. DHS Civil Rights Evaluation Tool | Homeland Security. The DHS Office for Civil Rights and Civil Liberties will consider, in its discretion, granting an extension to the 30-day deadline if the recipient identifies steps and a timeline for completing the tool. Recipients must request extensions by emailing the request to CivilRightsEvaluation@hq.dhs.gov prior to expiration of the 30-day deadline.

Article 3	Acknowledgement of Federal Funding from DHS Recipients must acknowledge their use of federal award funding when issuing statements, press releases, requests for proposal, bid invitations, and other documents describing projects or programs funded in whole or in part with federal award funds.
Article 4	Activities Conducted Abroad Recipients must coordinate with appropriate government authorities when performing project activities outside the United States obtain all appropriate licenses, permits, or approvals.
Article 5	Age Discrimination Act of 1975 Recipients must comply with the requirements of the Age Discrimination Act of 1975, Pub. L. No. 94-135 (codified as amended at 42 U.S.C. § 6101 et seq.), which prohibits discrimination on the basis of age in any program or activity receiving federal financial assistance.
Article 6	Americans with Disabilities Act of 1990 Recipients must comply with the requirements of Titles I, II, and III of the Americans with Disabilities Act, Pub. L. No. 101-336 (1990) (codified as amended at 42 U.S.C. §§ 12101– 12213), which prohibits recipients from discriminating on the basis of disability in the operation of public entities, public and private transportation systems, places of public accommodation, and certain testing entities.
Article 7	Best Practices for Collection and Use of Personally Identifiable Information Recipients who collect personally identifiable information (PII) as part of carrying out the scope of work under a federal award are required to have a publicly available privacy policy that describes standards on the usage and maintenance of the PII they collect. DHS defines PII as any information that permits the identity of an individual to be directly or indirectly inferred, including any information that is linked or linkable to that individual. Recipients may also find the DHS Privacy Impact Assessments: Privacy Guidance and Privacy Template as useful resources respectively.
Article 8	Civil Rights Act of 1964 – Title VI Recipients must comply with the requirements of Title VI of the Civil Rights Act of 1964, Pub. L. No. 88-352 (codified as amended at 42 U.S.C. § 2000d et seq.), which provides that no person in the United States will, on the grounds of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance. DHS implementing regulations for the Act are found at 6 C.F.R. Part 21. Recipients of an award from the Federal Emergency Management Agency (FEMA) must also comply with FEMA’s implementing regulations at 44 C.F.R. Part 7.

Article 9

Civil Rights Act of 1968

Recipients must comply with Title VIII of the Civil Rights Act of 1968, Pub. L. No. 90-284 (codified as amended at 42 U.S.C. § 3601 et seq.) which prohibits recipients from discriminating in the sale, rental, financing, and advertising of dwellings, or in the provision of services in connection therewith, on the basis of race, color, national origin, religion, disability, familial status, and sex, as implemented by the U.S. Department of Housing and Urban Development at 24 C.F.R. Part 100. The prohibition on disability discrimination includes the requirement that new multifamily housing with four or more dwelling units— i.e., the public and common use areas and individual apartment units (all units in buildings with elevators and ground-floor units in buildings without elevators) —be designed and constructed with certain accessible features. (See 24 C.F.R. Part 100, Subpart D.)

Article 10

Copyright

Recipients must affix the applicable copyright notices of 17 U.S.C. §§ 401 or 402 to any work first produced under federal awards and also include an acknowledgement that the work was produced under a federal award (including the federal award number and federal awarding agency). As detailed in 2 C.F.R. § 200.315, a federal awarding agency reserves a royalty-free, nonexclusive, and irrevocable right to reproduce, publish, or otherwise use the work for federal purposes and to authorize others to do so.

Article 11

Debarment and Suspension

Recipients must comply with the non-procurement debarment and suspension regulations implementing Executive Orders (E.O.) 12549 and 12689 set forth at 2 C.F.R. Part 180 as implemented by DHS at 2 C.F.R. Part 3000. These regulations prohibit recipients from entering into covered transactions (such as subawards and contracts) with certain parties that are debarred, suspended, or otherwise excluded from or ineligible for participation in federal assistance programs or activities.

Article 12

Drug-Free Workplace Regulations

Recipients must comply with drug-free workplace requirements in Subpart B (or Subpart C, if the recipient is an individual) of 2 C.F.R. Part 3001, which adopts the Government-wide implementation (2 C.F.R. Part 182) of the Drug-Free Workplace Act of 1988 (41 U.S.C. §§ 8101-8106).

Article 13

Duplicative Costs

Recipients are prohibited from charging any cost to this federal award that will be included as a cost or used to meet cost sharing or matching requirements of any other federal award in either the current or a prior budget period. (See 2 C.F.R. § 200.403(f)). However, recipients may shift costs that are allowable under two or more federal awards where otherwise permitted by federal statutes, regulations, or the federal financial assistance award terms and conditions.

<p>Article 14</p>	<p>Education Amendments of 1972 (Equal Opportunity in Education Act) – Title IX Recipients must comply with the requirements of Title IX of the Education Amendments of 1972, Pub. L. No. 92-318 (codified as amended at 20 U.S.C. § 1681 et seq.), which provide that no person in the United States will, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any educational program or activity receiving federal financial assistance. DHS implementing regulations are codified at 6 C.F.R. Part 17. Recipients of an award from the Federal Emergency Management Agency (FEMA) must also comply with FEMA’s implementing regulations at 44 C.F.R. Part 19.</p>
<p>Article 15</p>	<p>E.O. 14074 – Advancing Effective, Accountable Policing and Criminal Justice Practices to Enhance Public Trust and Public Safety Recipient State, Tribal, local, or territorial law enforcement agencies must comply with the requirements of section 12(c) of E.O. 14074. Recipient State, Tribal, local, or territorial law enforcement agencies are also encouraged to adopt and enforce policies consistent with E.O. 14074 to support safe and effective policing.</p>
<p>Article 16</p>	<p>Energy Policy and Conservation Act Recipients must comply with the requirements of the Energy Policy and Conservation Act, Pub. L. No. 94-163 (1975) (codified as amended at 42 U.S.C. § 6201 et seq.), which contain policies relating to energy efficiency that are defined in the state energy conservation plan issued in compliance with this Act.</p>
<p>Article 17</p>	<p>False Claims Act and Program Fraud Civil Remedies Recipients must comply with the requirements of the False Claims Act, 31 U.S.C. §§ 3729- 3733, which prohibit the submission of false or fraudulent claims for payment to the Federal Government. (See 31 U.S.C. §§ 3801-3812, which details the administrative remedies for false claims and statements made.)</p>
<p>Article 18</p>	<p>Federal Debt Status All recipients are required to be non-delinquent in their repayment of any federal debt. Examples of relevant debt include delinquent payroll and other taxes, audit disallowances, and benefit overpayments. (See OMB Circular A-129.)</p>
<p>Article 19</p>	<p>Federal Leadership on Reducing Text Messaging while Driving Recipients are encouraged to adopt and enforce policies that ban text messaging while driving recipient-owned, recipient-rented, or privately owned vehicles when on official government business or when performing any work for or on behalf of the Federal Government. Recipients are also encouraged to conduct the initiatives of the type described in Section 3(a) of E.O. 13513.</p>

Article 20 Fly America Act of 1974

Recipients must comply with Preference for U.S. Flag Air Carriers (a list of certified air carriers can be found at: [Certificated Air Carriers List | US Department of Transportation, https://www.transportation.gov/policy/aviation-policy/certificated-air-carriers-list](https://www.transportation.gov/policy/aviation-policy/certificated-air-carriers-list)) for international air transportation of people and property to the extent that such service is available, in accordance with the International Air Transportation Fair Competitive Practices Act of 1974, 49 U.S.C. § 40118, and the interpretative guidelines issued by the Comptroller General of the United States in the March 31, 1981, amendment to Comptroller General Decision B-138942.

Article 21 Hotel and Motel Fire Safety Act of 1990

Recipients must ensure that all conference, meeting, convention, or training space funded entirely or in part by federal award funds complies with the fire prevention and control guidelines of Section 6 of the Hotel and Motel Fire Safety Act of 1990, 15 U.S.C. § 2225a.

Article 22 John S. McCain National Defense Authorization Act of Fiscal Year 2019

Recipients, subrecipients, and their contractors and subcontractors are subject to the prohibitions described in section 889 of the John S. McCain National Defense Authorization Act for Fiscal Year 2019, Pub. L. No. 115-232 (2018) and 2 C.F.R. §§ 200.216, 200.327, 200.471, and Appendix II to 2 C.F.R. Part 200. The statute – as it applies to DHS recipients, subrecipients, and their contractors and subcontractors – prohibits obligating or expending federal award funds on certain telecommunications and video surveillance products and contracting with certain entities for national security reasons.

Article 23 Limited English Proficiency (Civil Rights Act of 1964, Title VI)

Recipients must comply with Title VI of the Civil Rights Act of 1964 (42 U.S.C. § 2000d et seq.) prohibition against discrimination on the basis of national origin, which requires that recipients of federal financial assistance take reasonable steps to provide meaningful access to persons with limited English proficiency (LEP) to their programs and services. For additional assistance and information regarding language access obligations, please refer to the DHS Recipient Guidance: <https://www.dhs.gov/guidance-published-help-department-supported-organizations-provide-meaningful-access-people-limited> and additional resources on <http://www.lep.gov>.

Article 24 Lobbying Prohibitions

Recipients must comply with 31 U.S.C. § 1352 and 6 C.F.R. Part 9, which provide that none of the funds provided under a federal award may be expended by the recipient to pay any person to influence, or attempt to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with any federal action related to a federal award or contract, including any extension, continuation, renewal, amendment, or modification. Per 6 C.F.R. Part 9, recipients must file a lobbying certification form as described in Appendix A to 6 C.F.R. Part 9 or available on Grants.gov as the Grants.gov Lobbying Form and file a lobbying disclosure form as described in Appendix B to 6 C.F.R. Part 9 or available on Grants.gov as the Disclosure of Lobbying Activities (SF-LLL).

Article 25 National Environmental Policy Act

Recipients must comply with the requirements of the National Environmental Policy Act of 1969, Pub. L. No. 91-190 (1970) (codified as amended at 42 U.S.C. § 4321 et seq.) (NEPA) and the Council on Environmental Quality (CEQ) Regulations for Implementing the Procedural Provisions of NEPA, which require recipients to use all practicable means within their authority, and consistent with other essential considerations of national policy, to create and maintain conditions under which people and nature can exist in productive harmony and fulfill the social, economic, and other needs of present and future generations of Americans.

Article 26 Nondiscrimination in Matters Pertaining to Faith-Based Organizations

It is DHS policy to ensure the equal treatment of faith-based organizations in social service programs administered or supported by DHS or its component agencies, enabling those organizations to participate in providing important social services to beneficiaries. Recipients must comply with the equal treatment policies and requirements contained in 6 C.F.R. Part 19 and other applicable statutes, regulations, and guidance governing the participations of faith-based organizations in individual DHS programs.

Article 27 Non-Supplanting Requirement

Recipients of federal awards under programs that prohibit supplanting by law must ensure that federal funds supplement but do not supplant non-federal funds that, in the absence of such federal funds, would otherwise have been made available for the same purpose.

Article 28 Notice of Funding Opportunity Requirements

All the instructions, guidance, limitations, scope of work, and other conditions set forth in the Notice of Funding Opportunity (NOFO) for this federal award are incorporated by reference. All recipients must comply with any such requirements set forth in the NOFO. If a condition of the NOFO is inconsistent with these terms and conditions and any such terms of the Award, the condition in the NOFO shall be invalid to the extent of the inconsistency. The remainder of that condition and all other conditions set forth in the NOFO shall remain in effect.

Article 29 Patents and Intellectual Property Rights

Recipients are subject to the Bayh-Dole Act, 35 U.S.C. § 200 et seq. and applicable regulations governing inventions and patents, including the regulations issued by the Department of Commerce at 37 C.F.R. Part 401 (Rights to Inventions Made by Nonprofit Organizations and Small Business Firms under Government Awards, Contracts, and Cooperative Agreements) and the standard patent rights clause set forth at 37 C.F.R. § 401.14.

Article 30 Procurement of Recovered Materials

States, political subdivisions of states, and their contractors must comply with Section 6002 of the Solid Waste Disposal Act, Pub. L. No. 89-272 (1965) (codified as amended by the Resource Conservation and Recovery Act at 42 U.S.C. § 6962) and 2 C.F.R. § 200.323. The requirements of Section 6002 include procuring only items designated in guidelines of the Environmental Protection Agency (EPA) at 40 C.F.R. Part 247 that contain the highest percentage of recovered materials practicable, consistent with maintaining a satisfactory level of competition.

Article 31 Rehabilitation Act of 1973

Recipients must comply with the requirements of Section 504 of the Rehabilitation Act of 1973, Pub. L. No. 93-112 (codified as amended at 29 U.S.C. § 794), which provides that no otherwise qualified handicapped individuals in the United States will, solely by reason of the handicap, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving federal financial assistance.

Article 32 Reporting of Matters Related to Recipient Integrity and Performance

If the total value of any currently active grants, cooperative agreements, and procurement contracts from all federal awarding agencies exceeds \$10,000,000 for any period of time during the period of performance of the federal award, then the recipient must comply with the requirements set forth in the government-wide Award Term and Condition for Recipient Integrity and Performance Matters located at 2 C.F.R. Part 200, Appendix XII, the full text of which is incorporated by reference.

Article 33 Reporting Subawards and Executive Compensation

For federal awards that equal or exceed \$30,000, recipients are required to comply with the requirements set forth in the government-wide award term on Reporting Subawards and Executive Compensation set forth at 2 C.F.R. Part 170, Appendix A, the full text of which is incorporated by reference.

Article 34 Required Use of American Iron, Steel, Manufactured Products, and Construction Materials

Recipients of an award of Federal financial assistance from a program for infrastructure are hereby notified that none of the funds provided under this award may be used for a project for infrastructure unless: (1) all iron and steel used in the project are produced in the United States—this means all manufacturing processes, from the initial melting stage through the application of coatings, occurred in the United States; (2) all manufactured products used in the project are produced in the United States—this means the manufactured product was manufactured in the United States; and the cost of the components of the manufactured product that are mined, produced, or manufactured in the United States is greater than 55 percent of the total cost of all components of the manufactured product, unless another standard for determining the minimum amount of domestic content of the manufactured product has been established under applicable law or regulation; and (3) all construction materials are manufactured in the United States—this means that all manufacturing processes for the construction material occurred in the United States. The Buy America preference only applies to articles, materials, and supplies that are consumed in, incorporated into, or affixed to an infrastructure project. As such, it does not apply to tools, equipment, and supplies, such as temporary scaffolding, brought to the construction site and removed at or before the completion of the infrastructure project. Nor does a Buy America preference apply to equipment and furnishings, such as movable chairs, desks, and portable computer equipment, that are used at or within the finished infrastructure project but are not an integral part of the structure or permanently affixed to the infrastructure project. Waivers When necessary, recipients may apply for, and the agency may grant, a waiver from these requirements. The agency should notify the recipient for information on the process for requesting a waiver from these requirements. (a) When the Federal agency has determined that one of the following exceptions applies, the awarding official may waive the application of the domestic content procurement preference in any case in which the agency determines that: (1) applying the domestic content procurement preference would be inconsistent with the public interest; (2) the types of iron, steel, manufactured products, or construction materials are not produced in the United States in sufficient and reasonably available quantities or of a satisfactory quality; or (3) the inclusion of iron, steel, manufactured products, or construction materials produced in the United States will increase the cost of the overall project by more than 25 percent. A request to waive the application of the domestic content procurement preference must be in writing. The agency will provide instructions on the format, contents, and supporting materials required for any waiver request. Waiver requests are subject to public comment periods of no less than 15 days and must be reviewed by the Made in America Office. There may be instances where an award qualifies, in whole or in part, for an existing waiver described at “Buy America” Preference in FEMA Financial Assistance Programs for Infrastructure | FEMA.gov. Definitions The definitions applicable to this term are set forth at 2 C.F.R. § 184.3, the full text of which is incorporated by reference.

<p>Article 35</p>	<p>SAFECOM Recipients receiving federal financial assistance awards made under programs that provide emergency communication equipment and its related activities must comply with the SAFECOM Guidance for Emergency Communication Grants, including provisions on technical standards that ensure and enhance interoperable communications. The SAFECOM Guidance is updated annually and can be found at Funding and Sustainment CISA.</p>
<p>Article 36</p>	<p>Terrorist Financing Recipients must comply with E.O. 13224 and applicable statutory prohibitions on transactions with, and the provisions of resources and support to, individuals and organizations associated with terrorism. Recipients are legally responsible for ensuring compliance with the E.O. and laws.</p>
<p>Article 37</p>	<p>Trafficking Victims Protection Act of 2000 (TVPA) Recipients must comply with the requirements of the government-wide financial assistance award term which implements Trafficking Victims Protection Act of 2000, Pub. L. No. 106-386, § 106 (codified as amended at 22 U.S.C. § 7104). The award term is located at 2 C.F.R. § 175.15, the full text of which is incorporated by reference.</p>
<p>Article 38</p>	<p>Universal Identifier and System of Award Management Recipients are required to comply with the requirements set forth in the government-wide financial assistance award term regarding the System for Award Management and Universal Identifier Requirements located at 2 C.F.R. Part 25, Appendix A, the full text of which is incorporated reference.</p>
<p>Article 39</p>	<p>USA PATRIOT Act of 2001 Recipients must comply with requirements of Section 817 of the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (USA PATRIOT Act), which amends 18 U.S.C. §§ 175–175c.</p>
<p>Article 40</p>	<p>Use of DHS Seal, Logo and Flags Recipients must obtain written permission from DHS prior to using the DHS seals, logos, crests, or reproductions of flags, or likenesses of DHS agency officials. This includes use of DHS component (e.g., FEMA, CISA, etc.) seals, logos, crests, or reproductions of flags, or likenesses of component officials.</p>
<p>Article 41</p>	<p>Whistleblower Protection Act Recipients must comply with the statutory requirements for whistleblower protections at 10 U.S.C § 470141 U.S.C. § 4712.</p>

Article 42

Environmental Planning and Historic Preservation (EHP) Review

DHS/FEMA funded activities that may require an Environmental Planning and Historic Preservation (EHP) review are subject to the FEMA EHP review process. This review does not address all federal, state, and local requirements. Acceptance of federal funding requires the recipient to comply with all federal, state and local laws. DHS/FEMA is required to consider the potential impacts to natural and cultural resources of all projects funded by DHS/FEMA grant funds, through its EHP review process, as mandated by: the National Environmental Policy Act; National Historic Preservation Act of 1966, as amended; National Flood Insurance Program regulations; and any other applicable laws and executive orders. General guidance for FEMA's EHP process is available on the DHS/FEMA Website at:

<https://www.fema.gov/grants/guidance-tools/environmental-historic>. Specific applicant guidance on how to submit information for EHP review depends on the individual grant program and applicants should contact their grant Program Officer to be put into contact with EHP staff responsible for assisting their specific grant program. The EHP review process must be completed before funds are released to carry out the proposed project; otherwise, DHS/FEMA may not be able to fund the project due to noncompliance with EHP laws, executive orders, regulations, and policies. If ground disturbing activities occur during construction, applicant will monitor ground disturbance, and if any potential archaeological resources are discovered the applicant will immediately cease work in that area and notify the pass-through entity, if applicable, and DHS/FEMA.

Article 43

Applicability of DHS Standard Terms and Conditions to Tribes

The DHS Standard Terms and Conditions are a restatement of general requirements imposed upon recipients and flow down to sub-recipients as a matter of law, regulation, or executive order. If the requirement does not apply to Indian tribes or there is a federal law or regulation exempting its application to Indian tribes, then the acceptance by Tribes of, or acquiescence to, DHS Standard Terms and Conditions does not change or alter its inapplicability to an Indian tribe. The execution of grant documents is not intended to change, alter, amend, or impose additional liability or responsibility upon the Tribe where it does not already exist.

Article 44

Acceptance of Post Award Changes

In the event FEMA determines that an error in the award package has been made, or if an administrative change must be made to the award package, recipients will be notified of the change in writing. Once the notification has been made, any subsequent requests for funds will indicate recipient acceptance of the changes to the award. Please call FEMA Grant Management Operations at (866) 927-5646 or via e-mail to: ASK-GMD@fema.dhs.gov if you have any questions.

Article 45 Disposition of Equipment Acquired Under the Federal Award
For purposes of original or replacement equipment acquired under this award by a non-state recipient or non-state sub-recipients, when that equipment is no longer needed for the original project or program or for other activities currently or previously supported by a federal awarding agency, you must request instructions from FEMA to make proper disposition of the equipment pursuant to 2 C.F.R. section 200.313. State recipients and state sub-recipients must follow the disposition requirements in accordance with state laws and procedures.

Article 46 Prior Approval for Modification of Approved Budget
Before making any change to the FEMA approved budget for this award, you must request prior written approval from FEMA where required by 2 C.F.R. section 200.308. For purposes of non-construction projects, FEMA is utilizing its discretion to impose an additional restriction under 2 C.F.R. section 200.308(f) regarding the transfer of funds among direct cost categories, programs, functions, or activities. Therefore, for awards with an approved budget where the federal share is greater than the simplified acquisition threshold (currently \$250,000), you may not transfer funds among direct cost categories, programs, functions, or activities without prior written approval from FEMA where the cumulative amount of such transfers exceeds or is expected to exceed ten percent (10%) of the total budget FEMA last approved. For purposes of awards that support both construction and non-construction work, FEMA is utilizing its discretion under 2 C.F.R. section 200.308(h)(5) to require the recipient to obtain prior written approval from FEMA before making any fund or budget transfers between the two types of work. You must report any deviations from your FEMA approved budget in the first Federal Financial Report (SF-425) you submit following any budget deviation, regardless of whether the budget deviation requires prior written approval.

Article 47 Indirect Cost Rate
2 C.F.R. section 200.211(b)(15) requires the terms of the award to include the indirect cost rate for the federal award. If applicable, the indirect cost rate for this award is stated in the budget documents or other materials approved by FEMA and included in the award file.

Article 48 Summary Description of Award
The terms of the approved Investment Justification(s) and Budget Detail Worksheet(s) submitted by the recipient are incorporated into the terms of this Federal award, subject to the additional description and limitations stated in this Agreement Article and the limitations stated in subsequent reviews by FEMA of the award budget. Post-award documents uploaded into FEMA GO for this award are also incorporated into the terms and conditions of this award, subject to any limitations stated in subsequent approvals by FEMA of changes to the award. Investments not listed in this Agreement Article are not approved for funding under this award. Investment 1: Police Multi-Hazard Rapid Maritime Response - Boat is fully funded for \$300,000.00

Article 49 PSGP Performance Goal

In addition to the Performance Progress Report (PPR) submission requirements outlined in the Preparedness Grants Manual, recipients must demonstrate how the grant-funded project addressed the capability gaps identified in their vulnerability assessment or other relevant documentation or sustains existing capabilities per the FEMA-approved Investment Justification. The capability gap reduction or capability sustainment must be addressed in the PPR, Section 10. Performance Narrative.

The U. S. Department of Homeland Security (DHS) Notice of Funding Opportunity (NOFO) Fiscal Year 2024 Port Security Grant Program

Release Date: Apr 16, 2024

[Download the NOFO.](#)

All entities wishing to do business with the federal government must have a unique entity identifier (UEI). The UEI number is issued by the system. Requesting a UEI using System for Award Management (SAM.gov) can be found at: <https://sam.gov/content/entity-registration>.

Updates in Grant Application Forms:

The Data Universal Numbering System (DUNS) Number was replaced by a new, non-proprietary identifier requested in, and assigned by SAM.gov. This new identifier is the Unique Entity Identifier.

Additional Information can be found on Grants.gov:
<https://www.grants.gov/forms/forms-development/planned-uei-updates>.

Preparedness: Infrastructure Security

10. Program Overview, Objectives and Priorities

a. Overview

The Fiscal Year (FY) 2024 Port Security Grant Program (PSGP) is one of four grant programs that constitute DHS/FEMA's focus on transportation infrastructure security activities. These grant programs are part of a comprehensive set of

measures authorized by Congress and implemented by the Administration to help strengthen the nation's critical infrastructure against risks associated with potential terrorist attacks. The PSGP provides funds to state, local, territorial, and private sector maritime partners to support increased port-wide risk management and protect critical marine transportation system infrastructure from acts of terrorism, major disasters, and other emergencies. Cumulative funding of PSGP since inception (2001) to present includes approximately **\$3,288,610,706** for approximately **4,800** grant awards dedicated specifically for enhancing maritime security capabilities throughout U.S. ports.

For FY 2024, DHS is focused on the criticality of information sharing and collaboration to building a national culture of preparedness and protecting against terrorism and other threats to our national security. DHS and its homeland security mission were born from the "failures among federal agencies and between the federal agencies and state and local authorities to share critical information related to the threat of terrorism" prior to the September 11, 2001, attacks.^[1] The threat profile has changed in the past two decades. We now face continuous cyber threats by sophisticated actors, threats to soft targets and crowded places, and threats from domestic violent extremists, who represent one of the most persistent threats to the nation today^[2]. Therefore, for FY 2024, DHS has identified two priority areas related to some of the most serious threats that recipients should address with their PSGP funds for enhancing maritime security. These two priority areas are enhancing cybersecurity and enhancing the protection of soft targets/crowded places. DHS also will continue to forge partnerships to strengthen information sharing and collaboration in each of these priority areas.

For FY 2023, 403 applications were received and 299 approved for funding. For a full list of recipients, please refer to [Information Bulletin \(IB\) 490a](#).

b. Goals, Objectives, and Priorities

Goals: The goal of PSGP is strengthened port-wide risk management and protection of critical surface transportation infrastructure from acts of terrorism, major disasters, and other emergencies.

Objectives: PSGP provides resources that support port authorities, facility operators, and state, local, and territorial agencies to meet the following objectives:

1. Build and sustain core capabilities of maritime infrastructure systems in annual national priority areas, including for FY 2024 the priorities of enhancing cybersecurity and enhancing the protection of soft targets/crowded places.
2. Address and close gaps identified in Area Maritime Transportation Security Plans and Facility Security Plans.
3. Implement a comprehensive and coordinated (all-inclusive) approach to address enduring security needs of communities that includes planning, training and awareness campaigns, equipment and capital projects, and exercises.

Priorities: Given the evolving threat landscape, it is incumbent upon DHS/FEMA to continuously evaluate the national risk profile and set priorities that help ensure appropriate allocation of scarce security dollars. In assessing the national risk profile for FY 2024, two areas warrant the most concern:

1. Enhancing cybersecurity; and
2. Enhancing the protection of soft targets/crowded places.

For more information about these priorities, see [Section D.10.b](#).

Likewise, there are several enduring security needs that crosscut the homeland security enterprise. The following are second-tier priorities that help recipients implement a comprehensive approach to securing critical maritime transportation infrastructure:

3. Effective planning;
4. Training and awareness campaigns;
5. Equipment and capital projects; and
6. Exercises.

The table below provides a breakdown of these priority areas for the FY 2024 PSGP, showing both the core capabilities impacted, as well as examples of eligible maritime security project types for each area. More information on allowable investments can be found in the Funding Restrictions and Allowable Costs section below. As discussed in Section E, projects that sufficiently address one or more of the two National Priorities (enhancing cybersecurity or enhancing the protection of soft targets/crowded places) will have their final review scores increased by a multiplier of 20%.

FY 2024 PSGP Funding Priorities

All priorities in this table concern the Safety and Security and Transportation Lifelines.

National Priorities

Priority Areas	Core Capabilities	Example Project Types
----------------	-------------------	-----------------------

<p>Enhancing Cybersecurity</p>	<p>Cybersecurity</p> <p>Intelligence and information sharing</p> <p>Planning</p> <p>Public information and warning</p> <p>Operational coordination</p> <p>Screening, search, and detection</p> <p>Access control and identity verification</p> <p>Supply chain integrity and security</p> <p>Risk management for protection programs and activities</p> <p>Long-term vulnerability reduction</p> <p>Situational assessment</p> <p>Infrastructure systems</p> <p>Operational communications</p>	<p>Cybersecurity risk assessments</p> <p>Projects that address vulnerabilities identified in cybersecurity risk assessments</p> <p>Improving cybersecurity of critical infrastructure to meet minimum levels identified by Cybersecurity and Infrastructure Security Agency, and the National Institute of Standards and Technology Cybersecurity Framework (Version 1.1) or equivalent</p> <p>Adoption of cybersecurity performance goals (CISA's Cross-Sector Cybersecurity Performance Goals)</p> <p>Cybersecurity training and planning</p>

c. Alignment to Program Purpose and the DHS and FEMA Strategic Plan

Among the five basic homeland security missions noted in the [DHS Strategic Plan for Fiscal Years 2020-2024](#), the PSGP supports the goal to Strengthen Preparedness and Resilience.

The [2022-2026 FEMA Strategic Plan](#) outlines three bold, ambitious goals in order to position FEMA to address the increasing range and complexity of disasters, support the diversity of communities we serve, and complement the nation’s growing expectations of the emergency management community. The PSGP supports Goal 3 to Promote and Sustain a Ready FEMA and Prepared Nation. We invite our stakeholders and partners to also adopt these priorities and join us in building a more prepared and resilient nation.

11. Performance Measures

Performance metrics for this program are as follows:

- Percentage of funding allocated by the recipient to core capabilities to build or sustain the national priorities identified in the section above.

B. Federal Award Information

1. Available Funding for the NOFO: \$90,000,000

2. Period of Performance: 36 months

Extensions to the period of performance are allowed. For additional information on period of performance extensions, please refer to the [Preparedness Grants Manual](#) (FM-207-23-001).

3. Projected Period of Performance Start Date(s): September 1, 2024

4. Projected Period of Performance End Date(s): August 31, 2027

5. Projected Budget Period(s) : There will be only a single budget period with the same start and end dates as the period of performance. See 2 C.F.R. § 200.1 for definitions of “budget period” and “period of performance.”

6. Funding Instrument Type: Grant

C. Eligibility Information

1. Eligible Applicants

All entities subject to an AMSP, as defined by 46 U.S.C. § 70103(b), may apply for PSGP funding. Eligible applicants include but are not limited to port authorities, facility operators, and state, local, and territorial government agencies. A facility operator owns, leases, or operates any structure or facility of any kind located in, on, under, or adjacent to any waters subject to the jurisdiction of the United States. Examples of facility operators include, but are not limited to terminal operators, ferry systems, bar/harbor pilots, and merchant's exchanges. See the "Applications Submitted by Eligible Entities" section below for further detail.

2. Applicant Eligibility Criteria

Pursuant to the Maritime Transportation Security Act of 2002 (MTSA), Pub. L. No. 107-295, as amended, DHS established a risk-based grant program to support maritime security risk management. Funding is directed towards the implementation of AMSPs, Facility Security Plans (FSP), and Vessel Security Plans (VSP) among port authorities, facility operators, and state and local government agencies that are required to provide port security services. In administering the grant program, national, economic, energy, and strategic defense concerns based upon the most current risk assessments available will be considered.

Port Area Definition

A Port Area is a location on a coast, shore, or inland waterway containing one or more harbors where vessels can dock and transfer people or cargo to or from land. For the purposes of the PSGP, eligible ports included those identified by the U.S. Army Corps of Engineers (USACE) Principal Port List (PPL), as well as unlisted ports which have the presence of MTSA-regulated facilities.

Applications Submitted by Eligible Entities

Subject to the information and exceptions in this section, ***an eligible entity may submit only one application within each Port Area. An application may contain up to five Investment Justifications (IJs).*** See Section D, below, for further instructions regarding IJs.

- A single eligible entity may have multiple facilities, departments, subcomponents, or agencies operating within a Port Area. ***FEMA will***

generally view multiple agencies within a local government (e.g., police department, fire department, emergency management office) operating within one Port Area as a single eligible entity. An applicant's Employer Identification Number (EIN) will help inform FEMA's determination of which applicants may constitute a single eligible entity.

- An eligible entity operating multiple facilities, departments, subcomponents, or agencies within a single Port Area may choose to submit separate applications for facilities, departments, subcomponents, or agencies within it, but any such separate applications will be considered part of the same eligible entity for purposes of the cost-share requirements, as discussed later in this NOFO.
- If a single eligible entity chooses to have its components submit separate applications, each individual facility, department, subcomponent, or agency of that single eligible entity should submit no more than one application. For example, a police department should submit no more than one collective application. If an individual facility, department, subcomponent, or agency of an eligible entity submits more than one application for a single Port Area, FEMA reserves the discretion to consolidate the projects or determine which application(s) to approve or deny.
- Funding allocation decisions are based partially on Port Area risk. Therefore, ***no single application should include IJs for projects intended to be implemented in multiple Port Areas.*** For example, a state agency or facility operator that operates in multiple Port Areas must submit separate applications to fund projects in each Port Area.
 - Exception: "Hub and spoke" cybersecurity projects may affect a parent organization's multiple eligible entities in multiple Port Areas. Such projects may be submitted within a primary Port Area for the project implementation. Proportionally, costs associated with *entities or subcomponents that are not covered under an AMSP and are not instrumental to enhancing maritime security* must not be included in the detailed budget worksheet or IJ and thereby prorating the cost of the project only to those facilities that are covered by the AMSP.

An application submitted by an otherwise eligible non-federal entity (i.e., the applicant) may be deemed ineligible when the person that submitted the application is not: 1) a ***current employee, personnel, official, staff, or leadership*** of the non-federal entity; and 2) ***duly authorized to apply*** for an

award on behalf of the non-federal entity at the time of application.

Further, the Authorized Organization Representative (AOR) and Signatory Authority (SA) must be a duly authorized current employee, personnel, official, staff, or leadership of the recipient and ***provide an email address unique to the recipient at the time of application and upon any change in assignment during the period of performance. Consultants or contractors of the recipient are not permitted to be the AOR or SA of the recipient. It is the sole responsibility of the recipient to keep their points of contact for the organization up-to-date and accurate in all federal systems.***

Compliance with Maritime Security Regulations

As a condition of eligibility, all PSGP applicants must be fully compliant with relevant Maritime Security Regulations (33 C.F.R. Parts 101-106). Any applicant who, as of the grant application deadline, has an open or outstanding Notice of Violation (NOV) will not be considered for PSGP funding if:

1. The applicant has failed to pay the NOV within 45 days of receipt of the NOV and the applicant has failed to decline the NOV within 45 days of receipt of the NOV, resulting in the U.S. Coast Guard (USCG) entering a finding of default in accordance with 33 C.F.R. § 1.07- 11(f)(2); or
2. The applicant appealed the NOV pursuant to 33 C.F.R § 1.07-70 and received a final appeal decision from the Commandant, USCG, as described in 33 C.F.R. § 1.07-75, and failed to come into compliance with the terms of the final appeal decision within the timelines noted herein.

The local USCG Captain of the Port (COTP) will verify security compliance eligibility during the field review process. Eligibility does not guarantee grant funding..

Ferry Systems

Ferry systems are eligible to apply for FY 2024 PSGP funds. However, any ferry system electing to participate (e.g., submit an application) under the FY 2024 PSGP will not be eligible to participate (e.g., submit an application) under the FY 2024 Transit Security Grant Program (TSGP) and will not be considered for funding under the FY 2024 TSGP. Likewise, any ferry system that participates in

FEMA

the FY 2024 TSGP will not be eligible for funding under the FY 2024 PSGP.

Subawards

Subawards are prohibited under PSGP. Applicants are also prohibited from applying on behalf of other, separate entities. Notwithstanding this prohibition, however, community-based projects, to include planning, training, exercises, and port-wide cyber vulnerability assessments and cyber interoperability projects that may include multiple beneficiaries (e.g., a port authority hosts a large training session or exercise) in which the applicant applies for and administers the grant award are allowable. Only the eligible applicant is permitted to take ownership of PSGP-funded equipment and other non-consumables until disposition actions are required.

3. Subawards and Beneficiaries

a. *Subaward allowability*

Subawards are prohibited under the PSGP. Applicants are also prohibited from applying on behalf of other, separate entities. Notwithstanding this prohibition, however, community-based projects, to include planning, training, exercises, and port-wide cyber vulnerability assessments and cyber interoperability projects that may include multiple beneficiaries (e.g., a port authority hosts a large training session or exercise) in which the applicant applies for and administers the grant award are allowable. Only the eligible applicant is permitted to take ownership of PSGP-funded equipment and other non-consumables until disposition actions are required.

b. *Beneficiaries or Participants*

This NOFO and any subsequent federal awards create no rights or causes of action for any participant or beneficiary.

4. Other Eligibility Restrictions

a. National Incident Management System (NIMS) Implementation

Prior to allocation of any federal preparedness awards, recipients must ensure and maintain adoption and implementation of NIMS. The list of objectives used for progress and achievement reporting is on FEMA's website at

<https://www.fema.gov/emergency-managers/nims/implementation-training>.

Please see the [Preparedness Grants Manual](#) for more information on NIMS.

5. Cost Share or Match

The FY 2024 PSGP has a cost-share requirement. The non-federal entity contribution can be cash (hard match) or third-party in-kind (soft match), with the exception of construction activities, which must be a cash (hard) match. In-kind contributions are defined as third-party contributions per 2 C.F.R. § 200.306.

All applicants will be required to commit to the cost-share requirement of each project at the time of application. ***The required cost share is based on and calculated against the total of all PSGP funds awarded to an eligible entity as described in the "Applications Submitted by Eligible Entities" section above during this fiscal year within a single Port Area.*** For example, if an entity operates multiple facilities under the same UEI within the same Port Area and each facility requests projects exempt of cost share due to being \$25,000 or less, FEMA will view these projects collectively for purposes of determining the appropriate cost share and a cost share will be required if the total exceeds \$25,000. As a result, multiple components within a single eligible entity (i.e., port authority, facility operator, local government, or state government) are strongly encouraged to coordinate their applications if they apply separately (even if addressing multiple, disparate projects within the Port Area) for these cost share purposes.

Public-Sector Cost Share

All public sector and non-governmental, nonprofit PSGP award recipients—meaning recipients other than private, for-profit entities—must provide a non-federal entity contribution supporting 25% of the total of all project costs as submitted in the application and approved in the award. The non-federal contribution should be specifically identified for each proposed project. The non-federal contribution, whether cash or third-party in-kind match, has the same eligibility requirements as the federal share (e.g., operational costs for routine patrols are ineligible, and operational costs for overtime to conduct an approved exercise may be eligible as part of the IJ) and must be justified as part of the project within the investment justification. For example, if the federal award for a public sector recipient requires a 25% cost share and the total project cost is \$100,000, then:

- Federal share is 75% of \$100,000 = \$75,000
- Recipient cost share is 25% of \$100,000 = \$25,000

Because the statute at 46 U.S.C. § 70107(c)(1) states that the federal share shall not exceed 75% of the total cost, any application of the percentages that would result in a decimal will be rounded down in favor of the federal share not exceeding 75%, even if normal rounding standards would indicate rounding up in certain instances.

In accordance with Public Law 96-205, title VI, section 601, Mar. 12, 1980 as amended, 48 U.S.C. § 1469a(d), and OMB Controller Alert CA-23-04, Waiving Matching Fund Requirements for Insular Areas (Feb. 6, 2023) agencies are required to waive any requirement for local matching funds for grants to an Insular Area under \$200,000, when the match is otherwise required by law. Insular Areas include the U.S. territories of American Samoa, Guam, the U.S. Virgin Islands, and the Commonwealth of the Northern Mariana Islands. For the four Insular Areas, agencies may waive the requirement for matching where the local match amount otherwise required by law is \$200,000 or greater. For amounts \$200,000 or greater it is at the applicable program's discretion to waive cost shares either in part or in total.

Private-Sector Cost Share

Private, for-profit PSGP award recipients must provide a non-federal entity contribution supporting 50% of the total of all project costs as submitted in

the application and approved in the award. The non-federal entity contribution should be specifically identified for each proposed project. The non-federal contribution, whether cash (hard) or third-party in-kind (soft), has the same eligibility requirements as the federal share (e.g., operational costs for routine patrols are ineligible, and operational costs for overtime to conduct an approved exercise may be eligible as part of the IJ) and must be justified as part of the project within the IJ. For example, if the federal award for a private sector recipient requires a 50% cost share and the total project cost is \$100,000, then:

- Federal share is 50% of \$100,000 = \$50,000
- Recipient cost share is 50% of \$100,000 = \$50,000

Ultimately, the recipient is responsible for ensuring that it contributes the proper cost share to its actual project costs. ***If actual total project costs exceed the projected total project costs stated in the Federal Award, the recipient will not receive any additional federal funding and will be responsible for contributing additional funds above the required cost match.*** If actual total project costs are less than the projected total project costs stated in the federal award, the recipient will be responsible for contributing a cost match calculated as a percentage of those actual project costs.

Cash and third-party in-kind matches must consist of eligible costs (i.e., same allowability as the federal share) and must be identified as part of the submitted detailed budget worksheet. A cash-match includes cash spent for project-related costs, while a third-party in-kind match includes the valuation of in-kind services. The cost match requirement for the PSGP award may not be met by funds from another federal grant or assistance program, or by funds used to meet matching requirements for another federal grant program, unless otherwise permitted by federal statute. Likewise, third-party in-kind matches used to meet the matching requirement for the PSGP award may not be used to meet matching requirements for any other federal grant program. Additionally, normal routine operational costs cannot be used as a cost match unless a completely new capability is being awarded and must be justified as “reasonable and necessary” to complete the project. Please see 2 C.F.R. § 200.306, as applicable, for further guidance regarding cost matching.

Exceptions to the Cost Match Requirements

The following exceptions to the cost match requirement may apply:

- **Port-Wide Benefit:** The cost match requirements for projects that have a port-wide benefit need only to be funded at the public-sector matching fund level of 25% (with a federal share not to exceed 75% per 46 U.S.C. § 70107(c)(1)). These projects must be certified by the COTP as having a port-wide benefit. Examples of projects with a port-wide benefit include, but are not limited to:
 - Port-wide planning, training, and exercises;
 - Security camera systems with shared access;
 - Response vessels; and
 - Other maritime domain awareness systems.
- **\$25,000 or Less:** There is no matching requirement for grant awards where the total project cost for all projects under the award is \$25,000 or less in accordance with 46 U.S.C. § 70107(c)(2)(A). If multiple small projects for the same Port Area by the same entity (i.e., same UEI) are submitted totaling more than \$25,000 under this exemption, a cost match is required to be demonstrated at the time of application.
- **Public Safety Personnel Security Zone Training:** There is no matching requirement for grants to train public safety personnel in the enforcement of security zones as defined by 46 U.S.C. § 70132 or in assisting in the enforcement of such security zones. Per 46 U.S.C. § 70132(d), the term “public safety personnel” includes any federal, state (or political subdivision thereof), territorial, or tribal law enforcement officer, firefighter, or emergency response provider.
- **Waiver Requests:** Requests for cost match waivers as outlined in 46 U.S.C. § 70107(c) may be considered for successful applicants only after awards have been made. Applicants must have demonstrated the ability to comply with the cost match requirement at the time of application and since being awarded the grant, have experienced significant financial constraints as outlined in [DHS/FEMA Information Bulletin \(IB\) 376](#), (i.e., specific economic issues preclude provision of the cost share identified in the original grant application). Cost share waiver requests that do not demonstrate new, post-award difficulties and cost share waivers submitted at the time of application will not be considered. Cost share waiver requests must comply with the process identified in [IB 376](#).

D. Application and Submission Information

1. Key Dates and Times

a. **Application Start Date:** **04/16/2024**

b. **Application Submission Deadline:** **06/24/2024 at 5 p.m. ET**

All applications **must** be received by the established deadline.

FEMA's Grants Outcomes System (FEMA GO) automatically records proof of timely submission and the system generates an electronic date/time stamp when FEMA GO successfully receives the application. The individual with the AOR role that submitted the application will also receive the official date/time stamp and a FEMA GO tracking number in an email serving as proof of their timely submission. For additional information on how an applicant will be notified of application receipt, see the subsection titled "Timely Receipt Requirements and Proof of Timely Submission" in Section D of this NOFO.

FEMA will not review applications that are received after the deadline or consider these late applications for funding. FEMA may, however, extend the application deadline on request for any applicant who can demonstrate that good cause exists to justify extending the deadline. Good cause for an extension may include technical problems outside of the applicant's control that prevent submission of the application by the deadline, other exigent or emergency circumstances, or statutory requirements for FEMA to make an award.

Applicants experiencing technical problems outside of their control must notify FEMA as soon as possible and before the application deadline. Failure

to timely notify FEMA of the issue that prevented the timely filing of the application may preclude consideration of the award. “Timely notification” of FEMA means the following: prior to the application deadline and within 48 hours after the applicant became aware of the issue.

A list of FEMA contacts can be found in Section G of this NOFO, “DHS Awarding Agency Contact Information.” For technical assistance with the FEMA GO system, please contact the FEMA GO Helpdesk at femago@fema.dhs.gov or (877) 585-3242, Monday through Friday, 9:00 AM – 6:00 PM Eastern Time (ET). For programmatic or grants management questions, please contact your Preparedness Officer or Grants Management Specialist. If applicants do not know who to contact or if there are programmatic questions or concerns, please contact fema-grants-news@fema.dhs.gov, Monday through Friday, 9:00 AM – 5:00 PM ET.

c. Anticipated Funding Selection Date: **No later than August 23, 2024**

d. Anticipated Award Date: **No later than September 30, 2024**

e. Other Key Dates:

Event	Suggested Deadline for Completion
Obtaining Unique Entity Identifier (UEI) number	Four weeks before actual submission deadline

Event	Suggested Deadline for Completion
Obtaining a valid Employer Identification Number (EIN)	Four weeks before actual submission deadline
Creating an account with login.gov	Four weeks before actual submission deadline
Registering in SAM or updating SAM registration	Four weeks before actual submission deadline
Registering Organization in FEMA GO	Prior to beginning application
Submitting complete application in FEMA GO	One week before actual submission deadline

2. Agreeing to Terms and Conditions of the Award

By submitting an application, applicants agree to comply with the requirements of this NOFO and the terms and conditions of the award, should they receive an award.

3. Address to Request Application Package

Applications are processed through the FEMA GO system. To access the system, go to <https://go.fema.gov/>.

4. Requirements: Obtain a Unique Entity Identifier (UEI) and Register in the System for Award Management (SAM.gov)

Each applicant, unless they have a valid exception under 2 CFR §25.110, must:

1. Be registered in Sam.Gov before application submission.
2. Provide a valid UEI in its application.
3. Continue to always maintain an active SAM registration with current information during the federal award process. Note: Per 2 C.F.R. § 25.300, subrecipients are NOT required to go through the full SAM registration process. First-tier subrecipients (meaning entities receiving funds directly from the recipient) are only required to obtain a UEI through SAM, but they

are not required to complete the full SAM registration in order to obtain a UEI. Recipients may not make subawards unless the subrecipient has obtained and provided the UEI.

Lower-tier subrecipients (meaning entities receiving funds passed through by a higher-tier subrecipient) are not required to have a UEI and are not required to register in SAM. Applicants are also not permitted to require subrecipients to complete a full registration in SAM beyond obtaining the UEI.

5. Steps Required to Obtain a Unique Entity Identifier, Register in the System for Award Management (SAM), and Submit an Application

Applying for an award under this program is a multi-step process and requires time to complete. Applicants are encouraged to register early as the registration process can take four weeks or more to complete. Therefore, registration should be done in sufficient time to ensure it does not impact your ability to meet required submission deadlines. Please review the table above for estimated deadlines to complete each of the steps listed. Failure of an applicant to comply with any of the required steps before the deadline for submitting an application may disqualify that application from funding.

To apply for an award under this program, all applicants must:

- Apply for, update, or verify their UEI number and Employer Identification Number (EIN) from the Internal Revenue Service;
- In the application, provide an UEI number;
- Have an account with login.gov;
- Register for, update, or verify their SAM account and ensure the account is active before submitting the application;
- Register in FEMA GO, add the organization to the system, and establish the AOR. The organization's electronic business point of contact (EBiz POC) from the SAM registration may need to be involved in this step. For step-by-step instructions, see <https://www.fema.gov/grants/guidance-tools/fema-go/startup>;
- Submit the complete application in FEMA GO; and
- Continue to maintain an active SAM registration with current information at all times during which it has an active federal award or an application or plan under consideration by a federal awarding agency. As part of this, applicants

must also provide information on an applicant's immediate and highest-level owner and subsidiaries, as well as on all predecessors that have been awarded federal contracts or federal financial assistance within the last three years, if applicable.

Applicants are advised that FEMA may not make a federal award until the applicant has complied with all applicable SAM requirements. Therefore, an applicant's SAM registration must be active not only at the time of application, but also during the application review period and when FEMA is ready to make a federal award. Further, as noted above, an applicant's or recipient's SAM registration must remain active for the duration of an active federal award. If an applicant's SAM registration is expired at the time of application, expires during application review, or expires any other time before award, FEMA may determine that the applicant is not qualified to receive a federal award and use that determination as a basis for making a federal award to another applicant.

Per 2 C.F.R. § 25.110(c)(2)(iii), if an applicant is experiencing exigent circumstances that prevents it from obtaining an UEI number and completing SAM registration prior to receiving a federal award, the applicant must notify FEMA as soon as possible by contacting fema-grants-news@fema.dhs.gov and providing the details of the circumstances that prevent completion of these requirements. If FEMA determines that there are exigent circumstances and FEMA has decided to make an award, the applicant will be required to obtain an UEI number, if applicable, and complete SAM registration within 30 days of the federal award date.

6. Electronic Delivery

DHS is participating in the Grants.gov initiative to provide the grant community with a single site to find and apply for grant funding opportunities. DHS encourages or requires applicants to submit their applications online through Grants.gov, depending on the funding opportunity.

For this funding opportunity, FEMA requires applicants to submit applications through FEMA GO.

7. How to Register to Apply

a. General Instructions:

Registering and applying for an award under this program is a multi-step process and requires time to complete. Read the instructions below about registering to apply for FEMA funds. Applicants should read the registration instructions carefully and prepare the information requested before beginning the registration process. Reviewing and assembling the required information before beginning the registration process will alleviate last-minute searches for required information.

The registration process can take up to four weeks to complete. To ensure an application meets the deadline, applicants are advised to start the required steps well in advance of their submission.

Organizations must have an UEI number, an EIN, and an active SAM registration to apply for a federal award under this funding opportunity.

b. Obtain an UEI Number:

All entities applying for funding, including renewal funding, must have a UEI number. Applicants must enter the UEI number in the applicable data entry field on the SF-424 form.

For more detailed instructions for obtaining a UEI number, refer to: [SAM.gov](https://sam.gov)

c. Obtain Employer Identification Number

All entities applying for funding must provide an Employer Identification Number (EIN). The EIN can be obtained from the IRS by visiting: <https://www.irs.gov/businesses/small-businesses-self-employed/apply-for-an-employer-identification-number-ein-online>.

d. Create a login.gov account:

Applicants must have a login.gov account in order to register with SAM or update their SAM registration. Applicants can create a login.gov account here:

https://secure.login.gov/sign_up/enter_email?request_id=34f19fa8-14a2-438c-8323-a62b99571fd3.

Applicants only have to create a login.gov account once. For applicants that are existing SAM users, use the same email address for the login.gov account as with SAM.gov so that the two accounts can be linked.

For more information on the login.gov requirements for SAM registration, refer to:

<https://www.sam.gov/SAM/pages/public/loginFAQ.jsf>.

e. Register with SAM:

All applicants applying online through FEMA GO must register with SAM. Failure to register with SAM will prevent an applicant from completing the application in FEMA GO. SAM registration must be renewed annually. Organizations will be issued a UEI number with the completed SAM registration.

For more detailed instructions for registering with SAM, refer to:

<https://apply07.grants.gov/help/html/help/Register/RegisterWithSAM.htm>.

Note: Per 2 C.F.R. § 25.200, applicants must also provide the applicant's immediate and highest-level owner, subsidiaries, and predecessors that have been awarded federal contracts or federal financial assistance within the last three years, if applicable.

i. Additional SAM Reminders

Existing SAM.gov account holders should check their account to make sure it is "ACTIVE." SAM registration should be completed at the very beginning of the application period and should be renewed annually to avoid being "INACTIVE."

Please allow plenty of time before the grant application submission deadline to obtain an UEI number and then to register in SAM. It may be four weeks or more after an applicant submits the SAM registration before the registration is active in SAM, and then it may be an additional 24 hours before FEMA's system recognizes the information.

FEMA

It is imperative that the information applicants provide is correct and current. Please ensure that your organization's name, address, and EIN are up to date in SAM and that the UEI number used in SAM is the same one used to apply for all other FEMA awards. Payment under any FEMA award is contingent on the recipient's having a current SAM registration.

ii. Help with SAM

The SAM quick start guide for new recipient registration and SAM video tutorial for new applicants are tools created by the General Services Administration (GSA) to assist those registering with SAM. If applicants have questions or concerns about a SAM registration, please contact the Federal Support Desk at <https://www.fsd.gov/fsd-gov/home.do> or call toll free (866) 606-8220.

f. Register in FEMA GO, Add the Organization to the System, and Establish the AOR:

Applicants must register in FEMA GO and add their organization to the system. The organization's electronic business point of contact (EBiz POC) from the SAM registration may need to be involved in this step. For step-by-step instructions, see <https://www.fema.gov/grants/guidance-tools/fema-go/startup>.

Note: FEMA GO will support only the most recent major release of the following browsers:

- Google Chrome
- Internet Explorer
- Mozilla Firefox
- Apple Safari
- Microsoft Edge

Users who attempt to use tablet type devices or other browsers may encounter issues with using FEMA GO.

8. Submitting the Application

Applicants will be prompted to submit the standard application information and any program-specific information required as described in Section D. of this NOFO, in the subsection “Content and Form of Application Submission.” The Standard Forms (SF) may be accessed in the Forms tab under the <https://grants.gov/forms/forms-repository/sf-424-family>. Applicants should review these forms before applying to ensure they have all the information required.

After submitting the final application, FEMA GO will provide either an error message or a successfully received transmission in the form of an email sent to the AOR that submitted the application. Applicants using slow internet connections, such as dial-up connections, should be aware that transmission can take some time before FEMA GO receives your application.

For additional application submission requirements, including program-specific requirements, please refer to the subsection titled “Content and Form of Application Submission” under Section D of this NOFO.

9. Timely Receipt Requirements and Proof of Timely Submission

All applications must be completed in FEMA GO by the application deadline. FEMA GO automatically records proof of timely submission and the system generates an electronic date/time stamp when FEMA GO successfully receives the application. The individual with the AOR role that submitted the application will also receive the official date/time stamp and a FEMA GO tracking number in an email serving as proof of their timely submission on the date and time that FEMA GO received the application.

Applicants who experience system-related issues will be addressed until 3:00 PM ET on the date applications are due. No new system-related issues will be addressed after this deadline. Applications not received by the application submission deadline will not be accepted.

10. Content and Form of Application Submission

a. Standard Required Application Forms and Information

Generally, applicants have to submit either the non-construction forms (i.e., SF-424A and SF-424B) or construction forms (i.e., SF-424C and SF-424D), meaning that applicants that only have construction work and do not have any non-construction work need only submit the construction forms (i.e., SF-424C and SF-424D) and not the non-construction forms (i.e., SF-424A and SF-424B), and vice versa. However, applicants who have both construction and non-construction work under this program need to submit both the construction and non-construction forms.

The following forms or information are required to be submitted via FEMA GO. The Standard Forms (SF) are also available at <https://grants.gov/forms/forms-repository/sf-424-family>

- **SF-424, Application for Federal Assistance**
- **Grants.gov Lobbying Form, Certification Regarding Lobbying**
- **SF-424A, Budget Information (Non-Construction)**
 - **For construction under an award, submit SF-424C, Budget Information (Construction),** in addition to or instead of SF-424A
- **SF-424B, Standard Assurances (Non-Construction)**
 - **For construction under an award, submit SF-424D, Standard Assurances (Construction),** in addition to or instead of SF-424B
- **SF-LLL, Disclosure of Lobbying Activities**

b. Program-Specific Required Forms and Information

The following program-specific forms or information are required to be submitted in [FEMA GO](#):

- Associated Investment Justification (IJs) template with detailed budget(s); and
- Associated Memoranda of Understanding (MOU)/Memoranda of Agreement (MOA).

i. Priority Investments

Cybersecurity

Cybersecurity investments must support the security and functioning of critical infrastructure and core capabilities as they relate to achieving target capabilities related to preventing, preparing for, protecting against, or responding to acts of terrorism at maritime infrastructure facilities. Additional resources and information regarding cybersecurity and cybersecurity performance goals are available through the [Cybersecurity and Infrastructure Security Agency, Cross-Sector Cybersecurity Performance Goals](#), and the [National Institute of Standards and Technology](#).

Soft Targets and Crowded Places

Soft targets and crowded places are increasingly appealing to terrorists and other violent extremist actors because of their relative accessibility and the large number of potential targets. This challenge is complicated by the prevalent use of simple tactics and less sophisticated attacks. Segments of our society are inherently open to the general public, and by nature of their purpose do not incorporate strict security measures. Given the increased emphasis by terrorists and other violent extremist actors to leverage less sophisticated methods to inflict harm in public areas, it is vital that the public and private sectors collaborate to enhance security of locations such as transportation centers, cruise terminals, ferry systems/terminals, and similar facilities. Additional resources and information regarding securing soft targets and crowded places are available through the [Cybersecurity and Infrastructure Security Agency](#).

ii. Investment Justification (IJ)

As part of the FY 2024 PSGP application process, applicants must use the current Office of Management and Budget (OMB) approved IJ template on Grants.gov to address each initiative being proposed for funding, including a project's management and administration (M&A) costs. Applications submitted that do not use the OMB approved IJ template as provided will not be considered for funding. Applications with modified data fields, incomplete data fields, or are segmented into multiple attachments will not be considered for funding. A separate tab within the IJ template should be used for each proposed project. The detailed budget worksheet noted below is included in the IJ template. ***Please refer to the "Applications Submitted by Eligible Entities" language in Section C above***

regarding the limitations on the number of applications per eligible entity or facilities, departments, subcomponents, or agencies within a single eligible entity. No single application or IJ may include projects intended to be implemented in different Port Areas, subject to the provisions of this section, below. Applicants may submit up to five IJs within a single application. Due to limited available funds, applicants are encouraged to include a statement within the IJ project description identifying a minimum funding level for a project to be feasible in the event that a project can only be partially funded based on available funds.

IJs must demonstrate how proposed projects address gaps and deficiencies in one or more of the core capabilities outlined in the National Preparedness Goal (the Goal). In the IJ, the applicant must demonstrate the ability to provide enhancements consistent with the purpose of the program and guidance provided by DHS/FEMA. PSGP projects must be both 1) feasible and effective at reducing the risks for which the project was designed; and 2) able to be fully completed within the 36-month period of performance. For information on the feasibility and effectiveness determination, please see the Review and Selection Process as outlined in this NOFO.

For the purposes of a PSGP application, a Port Area is selected for funding based on the project location. Eligible entities that have facilities in multiple Port Areas should apply for projects based on the Port Area where the project/asset will be implemented, housed, or maintained, not the entity's headquarters location. For entities submitting applications for a single project that spans multiple Port Areas, such as one patrol vessel that may be deployed outside of the primary Port Area, the project location is considered to be the Port Area that will see the most benefit from the project. Large projects that implement multiple components in multiple Port Areas, such as state agency purchases of multiple patrol vessels for multiple Port Areas, must be submitted as separate applications (e.g., State Police vessel project in Port Area #1 is one application; State Police vessel project in Port Area #2 is a separate application). All eligible and complete applications will be provided to the applicable COTP for further review.

Applicants seeking to participate in large-scale regional projects requiring the purchase of services or equipment should directly reference this need in their applications. Applicants should specify their portion of the requested project

funding and role in the project. Applicants should also note if their portion of a project can be completed independently of the large-scale regional project. **Applicants are prohibited from applying for equipment or other non-consumables intended to be solely used by another agency.**

Applicants will find the IJ template on Grants.gov in the “Related Documents” tab of the PSGP posting. This IJ template must be used for each project submitted. Applicants must provide information in the following categories for each proposed investment:

1. Background;
2. Strategic and Program Priorities;
3. Impact; and
4. Funding/Implementation Plan.

Applicants must use the following file naming convention when submitting an IJ as part of the FY 2024 PSGP:

Name of Applicant_IJ Numbers (Example: XYZ Oil_IJ 1-3)

iii. Detailed Budget

Detailed budget worksheets are incorporated within the PSGP IJ template. Applicants must use the IJ template provided. All applicants must complete the detailed budget worksheets for each corresponding project requested at the time of application. The detailed budget must be complete, reasonable, and cost-effective in relation to the proposed project and should provide the basis of computation of all project-related costs (including M&A costs) and any appropriate narrative. Review panels must be able to thoroughly evaluate the projects being submitted based on the information provided. Consequently, applicants must provide an appropriate level of detail within the budget detail worksheets to clarify what will be purchased and spent. **Applications that do not include a detailed budget narrative will not be considered for funding.** Detailed budgets often assist reviewers in determining what type of equipment or service is being purchased, which may assist in determining the effectiveness of a project. Additionally, a detailed budget must demonstrate the required cost share, either cash (hard) or third-party in-kind (soft), of the recipient based on the projected project cost. **Applications failing to demonstrate the required cost share**

within the detailed budget will not be considered for funding.

Cash and third-party in-kind matches must consist of eligible costs (i.e., same allowability as the federal share), reasonable and necessary to complete the project, and must be identified as part of the submitted budget detail worksheet. A cash (hard) match includes cash spent for project-related costs while a third-party in-kind (soft) match includes the valuation of in-kind services. The cost match requirement for a PSGP award may not be met by funds from another federal grant or assistance program or funds used to meet matching requirements for another federal grant program. Likewise, third-party in-kind matches used to meet the matching requirement for the PSGP award may not be used to meet matching requirements for any other federal grant program. Please see Section C of this NOFO, and reference 2 C.F.R. § 200.306 as applicable, for further guidance regarding cost matching.

iv. MOU/MOA Requirement for Security Services Providers

State and local agencies that are identified in the AMSP of their respective COTP/Federal Maritime Security Coordinator as providing security services to one or more MTSA regulated facilities within a Port Area may apply for PSGP funding. However, ***state, local, and territorial agencies that are not specifically identified in their respective AMSP but are otherwise required to provide port security services must have a signed MOU/MOA between the security service agency and the MTSA regulated facilities receiving these services within the applicant Port Area prior to receipt of PSGP funding*** and must include an acknowledgement of the security services, roles, and responsibilities of all entities involved. This includes agencies or entities that are new to the port area or are newly participating in Area Maritime Security Committee activities but are not yet included in the AMSP. These entities must have an MOU/MOA with the respective MTSA regulated facility pending AMSP updates. This information must be maintained by the grant recipient and provided to DHS/FEMA upon request; or verification through the field review process that the agency is identified within the MOU/MOA as an entity that provides maritime security services or is otherwise required to provide port security services. The MOU/MOA must address the following points:

1. The nature of the security service that the applicant agrees to supply to the MTSA regulated facility (e.g., waterside surveillance, increased screening);

2. The roles and responsibilities of the MTSA regulated facility and the applicant during different Maritime Security levels;
3. An acknowledgement by the MTSA regulated facility that the applicant is part of the facility's security plan; and,
4. An acknowledgment that the applicant will provide semi-annual progress reports on project status to the local applicable Area Maritime Security Committee and/or COTP.

The signed MOU/MOA for state or local agencies providing security services to regulated entities should be submitted with the grant application as a file attachment within [FEMA GO](#). A sample MOU/MOA can be found below. Applicants must use the following file naming convention for FY 2024 MOUs and MOAs:

Name of Applicant_MOU (Example: Harris County_MOU)

See the appendix in Section H.5 of this NOFO for a sample MOU/MOA. The sample MOU/MOA demonstrates all of the elements required in the PSGP NOFO for acceptance for review as part of a grant application from a state or local agency providing security services to MTSA-regulated entities.

v. Sensitive Security Information (SSI) Requirements

A portion of the information that is routinely submitted in the course of applying for funding or reporting under certain programs or that is provided in the course of an entity's grant management activities under those programs that are under federal control is subjected to protection under SSI requirements and must be properly identified and marked. SSI is a control designation used by DHS/FEMA to protect transportation security related information. It is applied to information about security programs, vulnerability and threat assessments, screening processes, technical specifications of certain screening equipment and objects used to test screening equipment, and equipment used for communicating security information relating to air, land, or maritime transportation. Further information can be found in 49 C.F.R. §§ 1520.1-15.20.19.

For the purposes of the PSGP, and due to the high frequency of SSI found in IJs, all IJs shall be considered SSI and treated as such until they have been subject to review for SSI by DHS/FEMA. This means that applicants shall label these

documents as SSI in accordance with 49 C.F.R. § 1520.13.

11. Intergovernmental Review

An intergovernmental review may be required. Applicants must contact their state's Single Point of Contact (SPOC) to comply with the state's process under Executive Order 12372 (See <https://www.archives.gov/federal-register/codification/executive-order/12372.html>; [Intergovernmental Review \(SPOC List\) \(whitehouse.gov\)](https://www.whitehouse.gov/intergovernmental-review-spoc-list))

12. Funding Restrictions and Allowable Costs

Administrative Requirements, Cost Principles, and Audit Requirements at 2 C.F.R. Part 200, unless otherwise indicated in the NOFO, the terms and conditions of the award, or the Preparedness Grants Manual. This includes, among other requirements, that costs must be incurred, and products and services must be delivered, within the period of performance of the award. See 2 C.F.R. § 200.403(h) (referring to budget periods, which for FEMA awards under this program is the same as the period of performance).

Federal funds made available through this award may be used for the purpose set forth in this NOFO, the [Preparedness Grants Manual](#), and the terms and conditions of the award and must be consistent with the statutory authority for the award. Award funds may not be used for matching funds for any other federal awards, lobbying, or intervention in federal regulatory or adjudicatory proceedings. In addition, federal funds may not be used to sue the Federal Government or any other government entity. See the [Preparedness Grants Manual](#) for more information on funding restrictions and allowable costs.

a. Prohibitions on Expending FEMA Award Funds for Covered Telecommunications Equipment or Services

See the [Preparedness Grants Manual](#) for information on prohibitions on expending FEMA award funds for covered telecommunications equipment or services.

b. Pre-Award Costs

Pre-award costs are not allowable and will not be approved, with the exception of costs resulting from pre-award grant writing services provided by an independent contractor that shall not exceed \$1,500 per applicant per year.

c. Management and Administration (M&A) Costs

M&A costs are allowed by the FY 2024 Annual Appropriation (Department of Homeland Security Appropriations Act, 2024, Pub. L. No. 118-47, Title III, "Protection, Preparedness, Response, and Recovery," Section 302). Recipients may use up to 5% of the amount of the award's federal share for their M&A costs. M&A activities are those defined as directly relating to the management and administration of PSGP funds, such as financial management and monitoring. M&A expenses must be based on actual expenses or known contractual costs. Requests that are simple percentages of the award, without supporting justification, will not be allowed or considered for reimbursement. PSGP funds may be used for the following M&A costs:

- Hiring full-time or part-time staff, including contractors and consultants, to execute the following:
 - Management of the awarded fiscal years' PSGP award;
 - Design and implementation of the awarded fiscal years' PSGP submission meeting compliance with reporting/data collection requirements, including data calls;
 - Information collection and processing necessary to respond to FEMA data calls;
 - Domestic travel expenses related to PSGP grant administration (International travel is not an allowable cost under this program unless approved in advance by DHS/FEMA.); and
 - Acquisition of authorized office equipment, including personal computers or laptops for PSGP M&A purposes.

M&A costs are not operational costs but are necessary costs incurred in direct support of the federal award or as a consequence of it, such as travel, meeting-related expenses, and salaries of full/part-time staff in direct support of the program. As such, M&A costs can be itemized in financial reports. Other M&A cost examples include preparing and submitting required programmatic and financial reports, establishing and/or maintaining equipment inventory, documenting

operational and equipment expenditures for financial accounting purposes; responding to official information requests from state and federal oversight authorities, including completing the Civil Rights Evaluation Tool as required by DHS; and grant performance measurement or evaluation activities.

If an applicant uses an outside consultant or contractor to provide pre-award grant writing services or post-award grant management services, the considerations and requirements in the “Authorized Use of Contractual Grant Writers And/Or Grant Managers” section below apply.

d. Indirect Facilities & Administrative (F&A) Costs

Indirect (F&A) costs (IDC) mean those costs incurred for a common or joint purpose benefitting more than one cost objective and not readily assignable to the cost objectives specifically benefitted, without effort disproportionate to the results achieved. IDC are allowable by the recipient and subrecipients as described in 2 C.F.R. Part 200, including 2 C.F.R. § 200.414. Applicants with a current negotiated IDC rate agreement who desire to charge indirect costs to a federal award must provide a copy of their IDC rate agreement with their applications. Not all applicants are required to have a current negotiated IDC rate agreement. Applicants that are not required to have a negotiated IDC rate agreement but are required to develop an IDC rate proposal must provide a copy of their proposal with their applications. Applicants who do not have a current negotiated IDC rate agreement (including a provisional rate) and wish to charge the de minimis rate must reach out to FEMA for further instructions. Applicants who wish to use a cost allocation plan in lieu of an IDC rate proposal must reach out to the FEMA Point of Contact for further instructions. As it relates to the IDC for subrecipients, a recipient must follow the requirements of 2 C.F.R. §§ 200.332 and 200.414 in approving the IDC rate for subawards. For information on procedures for establishing indirect cost rates, see the [Preparedness Grants Manual](#).

e. Evaluation Costs

Evaluation costs are allowable. See Section H.2 “Program Evaluation” for more details.

f. Other Direct Costs

Costs generally need to fit within one of the categories listed below to be allowable under this program. Applicants who have questions about whether a potential cost is allowable or not under this program should contact their Preparedness Officer.

Specific investments made in support of the funding priorities generally fall into one of the following allowable expense categories:

- Planning;
- Operational Activities;
- Equipment and Capital Projects;
- Training and Awareness Campaigns; and
- Exercises.

The following provides guidance on allowable costs within each of these areas:

i. Planning

Planning activities address the Soft Targets/Crowded Places; Cybersecurity; and Planning Priorities.

PSGP funds may be used for the following types of planning activities:

1. Development or updating of port wide risk mitigation plan (PRMP), including the conduct of port security vulnerability assessments as necessary to support plan update/development;
2. Development and enhancement of security plans and protocols within the Area Maritime Security Plan (AMSP), PRMP, and the Business Continuity and Resumption of Trade Plans (BCRTP) in support of maritime security and risk mitigation planning;
3. Materials required to conduct planning activities noted in this section;
4. Travel and per diem related to the professional planning activities noted in this section;
5. Coordination and information sharing with fusion centers;
6. Planning activities related to alert and warning capabilities;
7. Conducting risk and resilience assessments on increasingly connected cyber and physical systems, on which security depends, using the [Infrastructure Resilience Planning Framework](#) and related CISA resources;

8. Other port wide maritime security project planning activities, which emphasize the ability to adapt to changing conditions and be prepared to withstand, and recover from, disruptions due to emergencies with prior approval from FEMA; and
9. Backfill, overtime, hiring of part-time temporary personnel, and contractors or consultants to assist with planning activities. Copies of PSGP-funded plans must be made available to FEMA and the U. S. Coast Guard (USCG) upon request.

ii. Operational Activities

Operational Activities address the Soft Targets/Crowded Places Priority.

Explosive Detection Canine Teams (EDCTs)

Use of canines (K-9) for explosive detection is one of the most effective solutions for the detection of vehicle-borne IEDs. When combined with the existing capability of a port or ferry security/police force, the added value provided through the addition of a canine team is significant. EDCTs are a proven, reliable resource to detect explosives and are a key component in a balanced counter-sabotage program.

Eligibility for funding of EDCTs is restricted to:

1. U.S. Ferry Systems regulated under 33 C.F.R. Parts 101, 103, 104, and the passenger terminals these specific ferries service under 33 C.F.R. Part 105;
2. Maritime Transportation Security Act (MTSA) regulated facilities; and
3. Port authorities, port police, and local law enforcement agencies that provide direct layered security for these U. S. Ferry Systems and MTSA-regulated facilities, and are defined in an AMSP, Facility Security Plan (FSP), or Vessel Security Plan (VSP).

Applicants may apply for up to \$450,000 (\$150,000/year for three years) per award to support this endeavor. At the end of the grant period (36 months), recipients will still be responsible for continuing the heightened level of capability provided by the EDCT. ***A sustainment plan must be submitted with the applicant's IJ to address the 12-month period beyond the period of performance of the award.***

Eligible EDCT Costs

Funds for these EDCTs may **not** be used to fund drug detection and apprehension technique training. Only explosives detection training for EDCTs will be funded. The PSGP EDCT funds may only be used for **new or expanded** capabilities/programs and cannot be used to pay for existing K-9 teams, personnel, or K-9 training costs already supported by the port area. Repair and replacement of existing EDCT equipment is allowed. Eligible costs include:

1. Contracted K-9 and handler providing services in accordance with PSGP guidance;
2. Salary and fringe benefits of new full- or part-time K-9 handler positions;
3. Training and certifications (travel costs associated with training for new or expanded full or part time agency handlers, and canines are allowable);
4. K-9 and handler equipment costs;
5. Purchase and train a new K-9 and handler for CBRNE detection; and
6. K-9 maintenance costs including but not limited to veterinary, housing, and feeding costs.

Ineligible EDCT costs include, but are not limited to:

1. Hiring costs, including costs associated with initial police academy training of new officers;
2. Meals and incidentals associated with travel for initial certification;
3. Vehicles modified to be used solely to transport canines; and
4. Repair or replacement of unallowable equipment.

For additional information on EDCTs, see the [Preparedness Grants Manual](#).

iii. Equipment and Capital Projects

Equipment and Capital Projects address the Soft Targets/Crowded Places; Cybersecurity; and Equipment/Capital Projects Priorities.

Equipment costs are allowed under this program. Please see the [Preparedness Grants Manual](#) for more information. Additionally, recipients that are using PSGP funds to support emergency communications equipment activities must comply with the [SAFECOM Guidance on Emergency Communications Grants](#), including provisions on technical standards that ensure and enhance interoperable

communications. For more information about SAFECOM, see the [Preparedness Grants Manual](#).

Equipment Acquisition

PSGP funds must comply with [FEMA Policy 207-22-0002, Prohibited or Controlled Equipment Under FEMA Awards](#). PSGP funds may be used for the following categories of equipment. A comprehensive listing of allowable equipment categories and types is found in the [Authorized Equipment List \(AEL\)](#). Requests for vehicles of any type are subject to secondary review and approval by the National Review Panel. These costs include:

1. Personal Protective Equipment (PPE) for maritime security providers, such as ballistic protective body armor (not including uniforms);
2. CBRNE response and remediation equipment for maritime security providers;
3. CBRNE decontamination equipment for direct maritime security providers and MTSA-regulated industry;
4. CBRNE detection-equipped patrol vehicles (**not including armored personnel carriers or tow trucks**), provided they will be used **exclusively for port/facility CBRNE detection** security operations. A CBRNE detection equipped patrol vehicle must include specifically identified, permanently mounted detection equipment;
5. Trailers (not vehicles) designed to carry maritime security equipment essential to maritime security, mitigation, and response (such as boat trailers, dive trailers, or mobile command trailers);
6. Mobile Command Centers **only when validated by the COTP as essential to address a specifically required capability outlined in the approved AMSP**. This does not include prime movers (tow-trucks), personnel carriers, or equipment transport vehicles;
7. CBRNE detection-equipped and patrol watercraft vessel/small boat used to directly support maritime security for a facility or within a Port Area on a routine basis (CBRNE detection equipment requested with the watercraft/small boat in the IJ must be listed and also detailed in the budget). However, a vessel is not required to be CBRNE equipped;
8. Marine firefighting vessels, provided they are outfitted with CBRNE detection equipment and are designed and equipped to meet NFPA 1925: Standard on Marine Fire-Fighting Vessels;

FEMA

9. Firefighting foam and Purple-K Powder (PKP) may be purchased by public fire departments that have jurisdictions in a port area and would respond to an incident at an MTSA regulated facility; MTSA facilities may also receive funding for this purpose. Funding will be limited to a one-time purchase based on a worst-case incident at the facility or facilities;
10. Information-sharing technology; components or equipment designed to share maritime security risk information and maritime all-hazards risk information with other agencies (equipment must be compatible with generally used equipment);
11. Maritime security risk mitigation interoperable communications equipment, including alert and warning capabilities;
12. Terrorism incident prevention and response equipment for maritime security risk mitigation;
13. Physical security enhancements, to include TWIC projects (e.g., card readers, fences, blast resistant glass, turnstiles, hardened doors, and vehicle gates) at maritime facilities;
14. Portable fencing, closed-circuit televisions (CCTVs), passenger vans, minibuses, etc. to support secure passage of vessel crewmembers through a MTSA regulated facility;
15. Equipment that enhances continuity capabilities, such as interoperable communications, intrusion prevention/detection, physical security enhancements, software and other equipment needed to support essential functions during a disruption to normal operations;
16. Generators with appropriate capability (size) to provide back-up power to security systems and equipment that support Maritime Domain Awareness (not including routine operational capabilities):
 - Access control equipment and systems;
 - Detection and security surveillance equipment; and
 - Enhancement of Command-and-Control facilities
17. Equipment for new personnel, such as personal protective equipment, is an allowable expense. Weapons and equipment associated with weapons maintenance/security (e.g., firearms, ammunition, and gun lockers) are not allowable.

Recipients may purchase maritime security equipment not listed on the AEL, but **only** if they first seek and obtain **prior approval** from FEMA.

Requirements for Small Unmanned Aircraft Systems

For information on sUAS allowability, please see the [Preparedness Grants Manual](#)

Improvised Explosive Device (IED) and CBRNE Prevention, Protection, Response, Recovery Capabilities

Port areas should continue to enhance their capabilities to prevent, detect, respond to, and recover from terrorist attacks employing IEDs, CBRNE devices, and other non-conventional weapons. Please refer to DHS [Small Vessel Security Strategy \(Apr. 2008\)](#).

Sonar Devices

The four types of allowable sonar devices are: imaging sonar, scanning sonar, side scan sonar, and three-dimensional sonar. These types of sonar devices are intended to support the detection of underwater improvised explosive devices and enhance maritime domain awareness. The eligible types of sonar, and short descriptions of their capabilities, are provided below:

1. **Imaging Sonar:** A high-frequency sonar that produces “video-like” imagery using a narrow field of view. The sonar system can be pole-mounted over the side of a craft or hand-carried by a diver.
2. **Scanning Sonar:** Consists of smaller sonar systems that can be mounted on tripods and lowered to the bottom of the waterway. Scanning sonar produces a panoramic view of the surrounding area and can cover up to 360 degrees.
3. **Side Scan Sonar:** Placed inside a shell and towed behind a vessel. Side scan sonar produces strip-like images from both sides of the device.
4. **Three-Dimensional Sonar:** Produces 3-dimensional imagery of objects using an array receiver.

Physical Security

Physical security is security measures that are designed to deny unauthorized access to facilities, equipment, and resources and to protect personnel and property from damage or harm (such as espionage, theft, or terrorist attacks). Physical security involves the use of multiple layers of interdependent systems and techniques. Physical security has been a focus of PSGP since the program’s

inception in 2002. Primarily, physical security is intended to harden MTSA-regulated facilities against attacks. Law enforcement may contribute to physical security through patrols; however, patrol vessels generally enhance multiple core capabilities with a focus on CBRNE detection, deterrence, and response. Funding through PSGP for physical security projects should be only directed toward those projects that address identified MTSA required activities and identified in the entity FSP and/or the port area AMSP. Some examples of funded projects include TWIC-related equipment, fencing, lighting, gates, and CCTV. Physical security projects typically require EHP review prior to obligating PSGP funds.

Capital (Construction) Projects Guidance

See the [Preparedness Grants Manual](#) for more information about PSGP Capital (Construction) Projects Guidance.

Controlled Equipment

For decades, the federal government has provided equipment to state, local, territorial, and tribal law enforcement agencies (LEAs) through federal grants. Some federal grant programs have assisted LEAs as they carry out their critical missions to keep the American people safe. The equipment acquired by LEAs through these programs includes administrative equipment, such as office furniture and computers. Some federal grant programs also may include military and military-styled equipment, firearms, and tactical vehicles provided by the federal government, including property covered under 22 C.F.R. Part 121 and 15 C.F.R. Part 774 (collectively, “controlled equipment”).

However, not all equipment that is considered controlled equipment is allowable under the PSGP. As discussed further below, there are certain “prohibited equipment” that are not allowable under the PSGP. And for the procurement of certain controlled equipment that is allowable under the PSGP, there are additional submission requirements and reviews that must be met before DHS/FEMA will permit funding to be used for this purpose, including but not limited to the provision of policies and procedures in place to safeguard individuals’ privacy, civil rights, and civil liberties.

DHS/FEMA will continue to collaborate with federal agency partners to ensure that there is a consistent and reasonable approach to the restrictions placed on

controlled equipment expenditures while continuing to support these investments when there is a justifiable need. Further, DHS/FEMA will continue to maintain an awareness of the evolving policy developments related to controlled equipment expenditures and keep grant recipients up to date on future developments.

Grant funds under this program may not be used for the purchase of equipment not approved by DHS/FEMA. The purchase of weapons and weapons accessories, including ammunition, is not allowed with PSGP funds. Grant funds under this program must also comply with [FEMA Policy 207-22-0002, Prohibited or Controlled Equipment Under FEMA Awards](#) and may not be used for the purchase of the following equipment: 1) firearms; 2) ammunition; 3) grenade launchers; 4) bayonets; or 5) weaponized aircraft, vessels, or vehicles of any kind with weapons installed.

Cybersecurity Projects

PSGP funds may be used for projects that enhance the cybersecurity of:

1. Access controls;
2. Sensors;
3. Security cameras;
4. Badge/ID readers;
5. Industrial Control System (ICS)/Supervisory Control and Data Acquisition (SCADA) systems;
6. Process monitors and controls (such as firewalls, network segmentation, predictive security cloud, etc.); and
7. Passenger/vehicle/cargo security screening equipment (cybersecurity assessments are allowable).

When requesting funds for cybersecurity, applicants are encouraged to propose projects that would aid in implementation of all or part of the [Framework for Improving Critical Infrastructure Cybersecurity, Version 1.1](#) (the “Framework”) developed by the National Institute of Standards and Technology (NIST), or other similar sources. The Framework gathers existing international standards and practices to help organizations understand, communicate, and manage their cyber risks. For organizations that do not know where to start with developing a cybersecurity program, the Framework provides initial guidance. For organizations with more advanced practices, the Framework offers a way to improve their

programs, such as better communication with their leadership and suppliers about management of cyber risks.

DHS's Enhanced Cybersecurity Services (ECS) program is an example of a resource that assists in protecting U.S.-based public and private entities and combines key elements of capabilities under the "Detect" and "Protect" functions to deliver an impactful solution relative to the outcomes of the Cybersecurity Framework.

Specifically, ECS offers intrusion prevention and analysis services that help U.S.-based companies and SLTT governments defend their computer systems against unauthorized access, exploitation, and data exfiltration. ECS works by sourcing timely, actionable cyber threat indicators from sensitive and classified Government Furnished Information (GFI). DHS then shares those indicators with accredited Commercial Service Providers (CSPs). Those CSPs in turn use the indicators to block certain types of malicious traffic from entering a company's networks. Groups interested in subscribing to ECS must contract directly with a CSP in order to receive services. Please visit <http://www.cisa.gov/enhanced-cybersecurity-services-ecs> for a current list of ECS CSP points of contact.

"Hub and spoke" cybersecurity projects are allowable under PSGP for cybersecurity projects that span multiple port area facilities. Hub and spoke cybersecurity projects may affect a parent organization's multiple eligible entities, and maritime security partners, in multiple port areas to provide a port-wide benefit. Such projects may be submitted within a primary Port Area for the project implementation. For example, an applicant in the Port of Houston may submit a hub and spoke project within the Houston/Galveston port area which includes system hardening throughout the organization's facilities in Houston, Port Lavaca, and Corpus Christi. Proportionally, costs associated with entities or subcomponents that are not covered under an AMSP and are not instrumental to enhancing maritime security must not be included in the detailed budget worksheet or investment justification and thereby prorating the cost of the project only to those facilities that are covered by the AMSP. Following the example noted above, the applicant may not include costs associated with cybersecurity of their non-maritime facilities, such as a non-MTSA regulated facility located in San Antonio. Hub and spoke projects are limited only to the enhancement of maritime security as outlined in this section and may not include non-maritime systems or facilities. Please clearly identify hub and spoke projects as such within your IJ and

consult your COTP to verify project applicability to enhancing maritime security.

Cybersecurity projects should address risks to the marine transportation system and/or Transportation Security Incidents (TSIs) outlined in the applicable AMSP, or priorities prescribed under applicable FSP or VSP, as mandated under the MTSA or the PRMPs. At the port level, examples of cybersecurity projects include but are not limited to projects that enhance the cybersecurity of access control, sensors, security cameras, badge/ID readers, ICS/SCADA systems, process monitors and controls (such as those that monitor flow rates, valve positions, tank levels, etc.), security/safety of the ship-to-port-to-facility-to-intermodal interface, and systems that control vital cargo machinery at the ship/shore interface (such as cranes, manifolds, loading arms, etc.), and passenger/vehicle/cargo security screening equipment.

Vulnerability assessments are generally not funded under PSGP. However, considering the evolving malicious cyber activity, the relative novelty of cybersecurity as a priority within the program, and the need to adopt best practices included in the voluntary Cybersecurity Framework, vulnerability assessments may be funded as contracted costs. Port-wide assessments are eligible and must demonstrate that the assessment includes port area partners and are necessary to be completed as a single project to ensure a comprehensive evaluation of port area cyber security vulnerabilities. Personnel costs (other than M&A) are not an allowable expense for conducting these assessments.

CISA offers free resources to assist with initial assessments, please see <https://www.cisa.gov/cyber-resource-hub> for additional information. Applicants are encouraged to utilize free resources prior to requesting funds under this program.

Copies of completed cybersecurity assessments funded under PSGP that impact the maritime transportation system, lead to a “transportation security incident” (as that term is defined under 46 U.S.C. § 70101(6)), or are otherwise related to systems, personnel, and procedures addressed by the facility and vessel plan shall be made available to FEMA and/or the local COTP upon request. The results of these cybersecurity assessments may be designated as Sensitive Security Information (SSI) and may be used to inform national maritime cybersecurity assessments.

Where a vulnerability assessment has been completed either through contracts or qualified personnel to identify existing gaps and required mitigation efforts, mitigating projects may be funded that include purchase of equipment, software, and infrastructure designed to harden cybersecurity. Specific questions on conducting vulnerability assessments should be referred to the respective FEMA Preparedness Officer.

iv. Training and Awareness Campaigns

Training and Awareness Campaigns address the Soft Targets/Crowded Places; Cybersecurity; and Training and Awareness Campaign Priorities.

Training

Port areas should assess their training and qualification requirements and coordinate training needs and qualification requirements of incident response personnel. Funding for personnel training is limited to those courses that are **essential to enhance maritime security**. A listing of courses that are currently approved for PSGP funding is included in the table below.

Some training activities require EHP Review, including exercises, drills or trainings that require any type of land, water, or vegetation disturbance or building of temporary structures or that are not located at facilities designed to conduct training and exercises. Additional information on training requirements and EHP review can be found online at [Environmental & Historic Preservation Grant Preparation Resources | FEMA.gov](#).

Funding for training courses not listed in the table below may be permitted on a case-by-case basis depending on the specific maritime security risk mitigation training needs of the eligible PSGP applicant. In such cases, an applicant will be required to explain in the IJ why none of the approved courses referenced in the table below satisfy the identified training need and must submit detailed course information for review and consideration by the local COTP field review team and the Nation Review Panel.

Further, in accordance with 46 U.S.C. § 70107(c)(2)(C), no cost share is required to train public safety personnel in the enforcement of security zones under section 46 U.S.C. § 70132 or assisting the enforcement of such security zones. Per 46

U.S.C. § 70132(d), the term “public safety personnel” includes any federal, state (or political subdivision thereof), territorial, or tribal law enforcement officer, firefighter, or emergency response provider.

Trainings denoted with an asterisk (*) in the table below is exempt from cost share only to train public safety personnel who enforce security zones. Additional training of public safety personnel may be exempt if specifically identified by the COTP as exempt and necessary for enforcement or the assistance of enforcement of security zones as specified by 46 U.S.C. § 70132. **Requests that fail to include a cost share for training that is not exempt from cost share requirements as outlined in 46 U.S.C. § 70132 will not be considered for funding.** Training for public safety personnel who do not provide enforcement of security zones are not exempt from cost share. Training rosters and certificates must be provided to FEMA upon request. Please consult your COTP prior to requesting cost share exempt training for enforcement of security zones. Refer to Section C of this NOFO for more specific cost share information.

Seminars and workshops are not considered “Training,” however applicants wishing to host seminars or workshops with PSGP funding may be eligible for funding following the criteria set forth in the “Exercise” section of this guidance.

Approved PSGP Training Courses

National Training and Education Division

Course Number	Course Name
AWR-144	Port and Vessel Security for Public Safety and Maritime Personnel
AWR-213	Critical Infrastructure Security and Resilience Awareness
AWR-366-W	Developing a Cyber Security Annex for Incident Response
MGT-335	Event Security Planning for Public Professionals
MGT-335-W	Event Security Planning for Public Professionals, Web Based

Course Number	Course Name
MGT-400	Master of Arts Degree in Homeland Security
MGT-425	Homeland Security Executive Leaders Program (ELP)
MGT-452	Physical and Cybersecurity for Critical Infrastructure
MGT-456	Integration of Cybersecurity Personnel into the Emergency Management Operations Center for Cyber Incidents
PER-330	The Surface Transportation Emergency Preparedness and Security for Mass Transit and Passenger Rail (STEPS-PT)
PER-331	Surface Transportation Emergency Preparedness and Security for Senior Officials or Administrators (STEPS Sr)

Federal-Sponsored

Course Number	Course Name
DHS-006-PREV	Seaport Security Anti-Terrorism Training Program (SSATP)
DHS-011-PREV	Maritime PRND Operations Course
DHS-016-PREV	Protective Measures Training for Security Officers, Mid-Level Safety/Security Supervisors, and Property Managers
*DHS-011-PROT	NASBLA BOAT Tactical Operators Course
*DHS-009-PROT	Boat Operator's Anti-Terrorism Training
DHS-126-RESP	NASBLA BOAT Crew Member Course

Course Number	Course Name
*DHS-128-RESP	NASBLA - Pursuit and Stop Course

State-Sponsored

Course Number	Course Name
CA-006-PREV	Maritime Company, Vessel, and Facility Security Officer
CA-007-PREV	Basic Maritime Security Awareness
CA-008-PREV	Basic First Responder Operational Maritime Security (FROMS)
CA-015-RESP	Maritime Facility Security Officer
CA-020-RESP	WMD & Terrorism Awareness for Security Professionals

*CVBTP	Commercial Vessel Boarding Training Program
*SSATP	Seaport Security Anti-Terrorism Training Program

Awareness Campaigns

Program funds may be used for the development and implementation of awareness campaigns to raise public awareness of indicators of terrorism and terrorism-related crime and for associated efforts to increase the sharing of information with public and private sector partners, including nonprofit organizations. DHS currently sponsors or supports a number of awareness campaigns. Please review materials, strategies, and resources at <https://www.dhs.gov/dhs-campaigns> before embarking on the development of an awareness campaign for local constituencies and stakeholders.

Note: DHS requires that all public and private sector partners wanting to implement and/or expand the DHS “If You See Something, Say Something®” campaign (“campaign”) using grant funds work directly with the DHS Office of Partnership and Engagement (OPE). This will help ensure that the awareness materials (e.g., videos, posters, trifold, etc.) remain consistent with DHS’s messaging and strategy for the campaign and compliant with the initiative’s trademark, which is licensed to DHS by the New York Metropolitan Transportation Authority. Coordination with OPE, through the campaign’s office (seesay@hq.dhs.gov), must be facilitated by the applicable FEMA HQ Preparedness Officer.

Exercises

Exercise activities address the Soft Targets/Crowded Places; Cybersecurity; and Exercises Priorities.

Exercises funded under the PSGP typically include Seminars, Workshops, Tabletop, Functional, Drills, and Full-Scale exercises. PSGP-funded exercises must have a maritime security focus and include applicable documentation, after action reports, and improvement plans. See below for additional information.

Maritime entity training needs and qualification requirements of incident response personnel should be regularly tested through emergency exercises and drills. Exercises must test operational protocols that would be implemented in the event of a terrorist attack in the maritime environment in accordance with the Area Maritime Security Training Exercise Program (AMSTEP) or the TSA Intermodal Security Training Exercise Program (I-STEP) guidelines. AMSTEP or I-STEP

exercises will follow the latest change in requirements contained in the Navigation and Inspection Circular (NVIC) 09-02. Exercises must be designed, developed and conducted consistent with the [Homeland Security Exercise and Evaluation Program \(HSEEP\)](#). Funding used for exercises will only be permitted for those exercises that are in direct support of a MTSA-regulated facility or a port area's MTSA-required exercises (see 33 C.F.R. § 105.220 for a facility and 33 C.F.R. § 103.515 for the AMSP). These exercises must be coordinated with the COTP and AMSC and be consistent with HSEEP.

Some exercise activities require EHP Review, including exercises, drills or trainings that require any type of land, water, or vegetation disturbance or building of temporary structures or that are not located at facilities designed to conduct training and exercises. Additional information on training requirements and EHP review can be found online at [Environmental & Historic Preservation Grant Preparation Resources | FEMA.gov](#).

Recipients are required to submit an After-Action Report/Improvement Plan (AAR/IP) for each PSGP-funded exercise to hseep@fema.dhs.gov, and the appropriate local COTP no later than 90 days after completion of the exercise conducted within the PSGP period of performance (POP). Recipients are reminded of the importance of implementing corrective actions iteratively throughout the progressive exercise cycle. Recipients are required to use the HSEEP AAR/IP template located at <https://preptoolkit.fema.gov/web/hseep-resources/improvement-planning>.

Recipients of PSGP funding for exercises should verify in progress reports the completion of the exercise(s), after-action report(s), improvement plan(s), and notifications made to hseep@fema.dhs.gov and the COTP.

PSGP funds may be used for the following exercise activities:

1. Funds Used to Design, Develop, Conduct, and Evaluate an Exercise.

This includes costs related to planning, meeting space, and other meeting costs, facilitation costs, materials and supplies, travel, and documentation. Exercises afford organizations the opportunity to validate plans and procedures, evaluate capabilities, and assess progress toward meeting capability targets in a controlled, low risk setting. Any shortcoming or gap identified, including those for children and individuals with disabilities or other

- access and functional needs, should be identified in an effective corrective action program that includes development of improvement plans that are dynamic documents, with corrective actions continually monitored and implemented as part of improving preparedness through the exercise cycle.
2. **Hiring of Full- or Part-Time Staff or Contractors/Consultants.** Full- or part-time staff may be hired to support exercise-related activities. Hiring of contractors/consultants must follow the applicable federal procurement requirements at 2 C.F.R. §§ 200.317-200.327. Such costs must be included within the funding allowed for program management personnel expenses, which must not exceed 10% of the total allocation. Dual compensation is never allowable, meaning, in other words, that an employee of a unit of government may not receive compensation from his or her unit or agency of government and from an award for a single period of time (e.g., 1:00 p.m. to 5:00 p.m.), even though such work may benefit both entities. Personnel hiring, overtime, and backfill expenses are permitted under this grant only to the extent that such expenses are for the allowable activities within the scope of the grant.
 3. **Overtime and Backfill Costs.** The entire amount of overtime costs, including payments related to backfilling personnel that are the direct result of time spent on the design, development and conduct of exercises are allowable expenses. These costs are allowed only to the extent the payment for such services is in accordance with the policies of the state or unit(s) of local government and has the approval of the state or the awarding agency, whichever is more restrictive. Dual compensation is never allowable.
 4. **Travel.** Domestic travel costs are allowable as expenses by employees who are on travel status for official business related to the planning and conduct of exercise project(s). International travel costs are not permitted.
 5. **Supplies.** Supplies are items that are expended or consumed during the course of the planning and conduct of the exercise project(s) (e.g., gloves, non-sterile masks, and disposable protective equipment).
 6. **Other Items.** These costs include the rental of space/locations for exercise planning and executing, rental of equipment, etc. Recipients are encouraged to use free public space, locations, or facilities, whenever available, prior to the rental of space, locations, or facilities. These also include costs that may be associated with inclusive practices and the provision of reasonable accommodations and modifications to provide full access for children and adults with disabilities.

**FEMA**

The National Exercise Program (NEP) serves as the principal exercise mechanism for examining national preparedness and measuring readiness. Recipients are strongly encouraged to nominate exercises into the NEP. For additional information on the NEP, please refer to <http://www.fema.gov/national-exercise-program>.

vi. Maintenance and Sustainment Costs

Maintenance and sustainment related costs are allowed under this program only as described in this NOFO and the [Preparedness Grants Manual](#).

vii. Construction and Renovation

Construction and renovation costs are allowed under this program. For construction costs to be allowed, they must be specifically approved by DHS/FEMA in writing prior to the use of any program funds for construction or renovation. Additionally, recipients are required to submit a SF-424C Budget and budget detail citing the project costs. All proposed construction and renovation activities must undergo an Environmental Planning and Historic Preservation (EHP) review, including approval of the review from FEMA, prior to undertaking any action related to the project. Failure of a grant recipient to meet these requirements may jeopardize Federal funding.

See the [Preparedness Grants Manual](#) for additional information.

viii. Organization Costs

Allowable organization-related costs are limited to those activities associated with new and ongoing maritime security operations essential to the national priorities. All such activities must be focused exclusively on maritime security and coordinated with the local Captain of the Port (COTP). PSGP funding used for organizational costs will only fund immediate needs for personnel that will be directly engaged in maritime security activities. Allowable organization personnel costs include:

- 1. Backfill, Overtime, Hiring of Full or Part-Time Personnel or Contractors/Consultants.** Full or part-time staff or contractors/consultants may be hired to support maritime-security-related activities and/or training conducted under this grant only to the extent that such expenses are for the

allowable activities within the scope of the grant. Hiring of contractors/consultants must follow the applicable federal procurement requirements at 2 C.F.R. §§ 200.317-200.327. Salary and fringe benefit payments must be in accordance with the policies of the state or unit(s) of local government and have the approval of the state or awarding agency. Dual compensation is not allowable. That is, an employee of a unit of government may not receive compensation from their unit or agency of government AND from an award for a single period of time (e.g., 1:00 p.m. to 5:00 p.m.), even though such work may benefit both activities. Limitations may apply for grant related activities. See specific guidance provided within this Manual for additional details on allowable organization costs (i.e., Training – Personnel costs are limited to backfill and overtime).

2. Hiring new, full-time personnel to:

- Operate maritime security patrol vessels (first response agencies only);
- Staff a new or expanded interagency maritime security operation center;
- Support maritime security/counterterrorism efforts in the local Joint Terrorism Task Force (JTTF) and/or fusion center; and
- Support credentialing access to a MTSA facility.

1. Backfill and Overtime costs for existing personnel to:

- Operate patrol vessels in support of pre-planned, mission critical activities, as identified by the local COTP (not including routine patrol); and
- Attend approved maritime security training courses.

1. Personnel or contracted costs to:

- Install, repair, and replace port security equipment acquired with FEMA preparedness grant funds. Note this does not include routine maintenance, such as oil changes and daily/weekly systems tests; and
- Management and administration (M&A) of projects funded under this program.

1. Contracted costs to:

- Provide approved training courses; and
- Provide warranty, maintenance, and service agreements for equipment purchased under this grant.

Organization costs will only be funded to address port (or facility) security needs as outlined in this NOFO. PSGP funding for new permanent or part-time personnel will not exceed the 36-month period of performance. Applicants must provide reasonable assurance that personnel costs can be sustained beyond the 36-month award period. ***A sustainment plan must be submitted with the applicant's IJ to address the 12-month period beyond the period of performance of the award.***

ix. Authorized Use of Contractual Grant Writers and/or Grant Managers

A grant applicant may procure the services of a contractor to provide support and assistance for pre-award grant development services (grant writing) or post-award grant management and administrative services (grant management). As with all federal grant-funded procurements, grant writer or grant management services must be procured in accordance with the federal procurement standards at 2 C.F.R. §§ 200.317 – 200.327. See the [Preparedness Grants Manual](#) regarding Procurement Integrity, particularly the sections applicable to non-state entities that discuss organizational conflicts of interest under 2 C.F.R. § 200.319(b) and traditional conflicts of interest under 2 C.F.R. § 200.318(c)(1). States must follow the same policies and procedures it uses for procurements of its non-federal funds, pursuant to 2 C.F.R. § 200.317, which also applies 2 C.F.R. §§ 200.321, 200.322, 200.323, and 200.327.

As applicable to non-state entities, DHS/FEMA considers a contracted grant writer to be an agent of the recipient for any subsequent contracts the recipient procures under the same federal award in which the grant-writer provided grant writing services. Federal funds and funds applied to a federal award's cost share generally cannot be used to pay a contractor to carry out the work if that contractor also worked on the development of such specifications unless the original contract was properly procured and included both grant writing and grant management services in the solicitation's scope of work.

As applicable to all non-federal entities, regardless of whether an applicant or recipient uses grant writing and/or grant management services, the recipient is solely responsible for the fiscal and programmatic integrity of the grant and its authorized activities and expenditures. The recipient must ensure adequate internal controls, including separation of duties, to safeguard grant assets, processes, and documentation, in keeping with the terms and conditions of its

award, including this NOFO, and 2 C.F.R. Part 200.

Grant Writers

Grant writing contractors may assist the applicant in preparing, writing, and finalizing grant application materials and assisting the applicant with handling online application and submission requirements in FEMA GO. Grant writers may assist in a variety of ways. Ultimately, however, the applicant that receives an award is solely responsible for all grant award and administrative responsibilities.

By submitting the application, applicants certify that all of the information contained therein is true and an accurate reflection of the organization and that regardless of the applicant's intent, the submission of information that is false or misleading may result in actions by DHS/FEMA. These actions include but are not limited to the submitted application not being considered for an award, temporary withholding of funding under the existing award pending investigation, or referral to the DHS Office of the Inspector General.

To assist applicants with the cost of grant writing services, DHS/FEMA is permitting a one-time pre-award cost of no more than \$1,500 per applicant per year for contractual grant writing services as part of the recipient's M&A costs. This is only intended to cover costs associated with a grant writer and may not be used to reimburse the applicant for their own time and effort in the development of a grant application. Additionally, the applicant may be required to pay this fee with its own funds during the application preparation and submission period. If the applicant subsequently receives an award, the applicant may then request to be reimbursed once grant funds become available for that cost, not to exceed \$1,500. If the applicant does not receive an award, this cost will not be reimbursed by the federal government. The applicant must understand this risk and be able to cover this cost if an award is not made.

If an applicant intends to request reimbursement for this one-time pre-award cost, it must include this request in its application materials, including in the budget detail worksheet for each IJ. Failure to clearly identify this as a separate cost in the application may result in its disallowance. This is the only pre-award cost eligible for reimbursement. Recipients must maintain grant writer fee documentation including, but not limited to, a copy of the solicitation, such as a quote request, rate request, invitation to bid, or request for proposals, if applicable;

a copy of the grant writer's contract agreement; a copy of the invoice or purchase order; and a copy of the canceled check or proof of payment. These records must be made available to DHS/FEMA upon request.

Consultants or contractors are not permitted to be the AOR or SA of the recipient. Further, an application must be officially submitted by 1) a ***current employee, personnel, official, staff, or leadership*** of the non-federal entity; and 2) ***duly authorized to apply*** for an award on behalf of the non-federal entity at the time of application.

Grant Managers

Grant management contractors provide support in the day-to-day management of an active grant and their services may be incurred as M&A costs of the award. Additionally, recipients may retain grant management contractors at their own expense.

Consultants or contractors are not permitted to be the AOR or SA of the recipient. The AOR is responsible for submitting programmatic and financial performance reports, accepting award packages, signing assurances and certifications, and submitting award amendments.

Restrictions Regarding Grant Writers and Grant Managers

Pursuant to 2 C.F.R. Part 180, recipients may not use federal grant funds to reimburse any entity, including a grant writer or preparer, if that entity is presently suspended or debarred by the Federal Government from receiving funding under federally funded grants or contracts. Recipients must verify that a contractor is not suspended or debarred from participating in specified federal procurement or non-procurement transactions pursuant to 2 C.F.R. § 180.300. FEMA recommends recipients use SAM.gov to conduct this verification. Further, regardless of whether any grant writer fees were requested, as applicable to non-state entities, unless a single contract covering both pre- and post-award services was awarded to the grant writer and procured in compliance with 2 C.F.R. §§ 200.317 – 200.327, federal funds cannot be used to pay the grant writer to provide post-award services.

g. Reprogramming Award Funds

Reprogramming award funds is permitted under this program only as described in this NOFO. Please also see Section C of this NOFO regarding cost-share requirements, including the implications if the project costs end up being less than what was applied for.

h. Limitations on Funding

As part of the PSGP application process, applicants must complete the approved Investment Justification (IJ) template on Grants.gov and included detailed budget sheets (incorporated into the IJ) provided addressing each initiative being proposed for funding. A single IJ should be submitted with each application. A corresponding detailed budget tab is included within the IJ and must be completed for each project, including the budget summary at the bottom of the form. Each project should represent the complete scope of work and materials required to achieve a single overall capability. For example, a project could be to procure a boat specifically designed and equipped as chemical, biological, radiological, nuclear and explosives (CBRNE) detection, prevention, response, and/or recovery platform. The IJ for this example project should include the CBRNE equipment in the same IJ as the vessel. The corresponding detailed budget should include a description of the equipment (i.e., 24' Response Vessel) and computation (i.e., 1 x \$375,000, total \$375,000; Vessel mounted Rad/Nuke detection device, 1 x \$25,000, total \$25,000). Additionally, the total computation for the Total Project Cost, Federal Share, and non-Federal Share must be included in the detailed budget (i.e., Total \$400,000; Federal Share \$300,000; non-Federal Share \$100,000). This demonstrates that the applicant and FEMA understand the level of Federal funding requested, as well as a commitment to the Cost Share required by the applicant to complete the project. (see "Cost-Share or Match" in Section C above).

In accordance with 46 U.S.C. § 70107(b)(2), PSGP funding for projects for the cost of acquisition, operation, and maintenance of security equipment or facilities to be used for security monitoring and recording, security gates and fencing, marine barriers for designated security zones, security-related lighting systems, remote surveillance, concealed video systems, security vessels, and other security-related infrastructure or equipment that contributes to the overall security of passengers, cargo, or crewmembers **cannot exceed \$1 million federal share per project**. The \$1 million per project limitation applies only to those projects

funded under 46 U.S.C. § 70107(b)(2) and does not apply to projects funded under other provisions of Section 70107.

i. Unallowable Costs

Projects that do not provide a compelling maritime security benefit or have a direct nexus toward maritime security risk mitigation are not permitted. For example, projects that are primarily for economic or safety benefit (as opposed to having a direct maritime security risk mitigation benefit) are ineligible for PSGP funding. In addition, projects that provide a broad homeland security benefit (e.g., a communication system or fusion center for an entire city, county, state, etc.) as opposed to providing primary benefit to the port are ineligible for PSGP funding since these projects should be eligible for funding through other preparedness grant programs. The following projects and costs are considered ineligible for award consideration:

- ***Grant funds must comply with [FEMA Policy 207-22-0002, Prohibited or Controlled Equipment Under FEMA Awards](#), and may not be used for the purchase of the following equipment: firearms, ammunition, grenade launchers, bayonets, or weaponized aircraft, vessels, or vehicles of any kind with weapons installed;***
- Projects in which federal agencies are the primary beneficiary or that enhance federal property, including sub-components of a federal agency;
- Projects that study technology development for security of national or international cargo supply chains (e.g., e-seals, smart containers, container tracking or container intrusion detection devices);
- Proof-of-concept projects;
- Development of training;
- Projects that duplicate capabilities being provided by the Federal Government (e.g., vessel traffic systems);
- Business operating expenses (certain security-related operational and maintenance costs are allowable—see “Maintenance and Sustainment” and “Operational Costs” for further guidance);
- Transportation Worker Identification Credential (TWIC) card fees;
- Reimbursement of pre-award security expenses;
- Outfitting facilities, vessels, or other structures with equipment or items providing convenience rather than a direct security benefit. Examples of such

equipment or items include but are not limited to office furniture, CD players, DVD players, AM/FM radios, TVs, stereos, entertainment satellite systems, entertainment cable systems and other such entertainment media, unless sufficient justification is provided. This includes weapons and associated equipment (i.e., holsters, optical sights, and scopes), including but not limited to, non-lethal or less-than-lethal weaponry including firearms, ammunition, and weapons affixed to facilities, vessels, or other structures;

- Standard issue uniforms (other than maritime security personal protective equipment [PPE]);
- Expenditures for items such as general-use software, general-use computers, and related equipment (other than for allowable M&A activities, or otherwise associated) preparedness or response functions), general-use vehicles and licensing fees;
- Land acquisitions and right of way purchases;
- Funding for standard operations vehicles utilized for routine duties, such as patrol cars and fire trucks;
- Fuel costs (except as permitted for training and exercises);
- Exercise(s) that do not support maritime security preparedness efforts;
- Patrol vehicles and firefighting apparatus, other than those CBRNE detection equipped vehicles for port area and/or facility patrol or response purposes;
- Specialty vehicles such as trucks for towing boat trailers/equipment and armored personnel carriers;
- Providing protection training to public police agencies or private security services to support protecting VIPs or dignitaries;
- Aircraft pilot training, including aircraft operations such as aircraft ditch training;
- Post incident investigation training;
- Basic or advanced dive training (except marine unit CBRNE detection/response dive training);
- Training for personnel not primarily assigned to maritime security activities or MTSA required security personnel (e.g., vessel patrol officers, facility security officers); and
- Reimbursement for the maintenance and wear and tear costs of general use vehicles (e.g., construction vehicles) and emergency response apparatus (e.g., fire trucks, ambulances, repair, or cleaning of PPE, etc.).

j. Indirect Costs

Indirect costs are allowable under this program. Please refer to the [Preparedness Grants Manual](#) for more information.

E. Application Review Information

1. Application Evaluation Criteria

a. Programmatic Criteria

The PSGP uses a risk-based methodology for making funding decisions whereby each Port Area's relative threat, vulnerability, and consequences from acts of terrorism are considered. This approach helps ensure that program funding is directed toward those Port Areas that present the highest risks in support of the Goal a secure and resilient Nation. Please refer to the [Preparedness Grants Manual](#) for further information on the Goal. PSGP will only fund those eligible projects that close or mitigate maritime security risk vulnerabilities gaps as identified in the applicable AMSP, FSP, VSP, and/or Port-wide Risk Management Plan (PRMP). Projects that enhance business continuity and resumption of trade within a Port Area will also be considered for funding.

Projects submitted by a public sector applicant or projects otherwise certified by the USCG COTP as having a port-wide benefit (please see the cost match section of this NOFO for further information regarding what constitutes a port-wide benefit) will have their final scores increased by a multiplier of 10%.

FY 2024 PSGP applications will be evaluated through a three-part review and selection process that encompasses: 1) an Initial Screening; 2) a Field Review; and 3) a National Review. There are four core PSGP scoring criteria applied in each step of this process:

i. Projects that support development and sustainment of the core capabilities in the Goal.

- Projects are ranked and weighted based on alignment with core capabilities across the five mission areas of the Goal: Prevention, Protection, Mitigation, Response, and Recovery. A composite score is given to each project to determine a Port Area prioritized ranking of all reviewed projects. The following scale shall be used:

0=None; 1=Minimal; 3=Moderate; 9=Significant/Gap Filled

ii. Projects that address priorities outlined in the applicable AMSP, FSP, and/or VSP, as mandated under the MTSA and/or in an applicable PRMP.

- AMSP priorities are the top three Transportation Security Incidents (TSIs) (as defined in 46 U.S.C. § 70101(6)) ranked and correspondingly weighted. Each IJ will be given a score (using the same scale as the National Priorities module) based on how well it addresses one or more TSIs within the context of the five mission areas of the Goal. The following scale shall be used:

0=None; 1=Minimal; 3=Moderate; 9=Significant/Gap Filled

- COTPs may require proposed projects to be socialized with the COTP/Area Maritime Security Committee (AMSC) prior to applying. Applicants are encouraged to coordinate with the COTP/AMSC routinely to ensure their projects align with Port Area priorities.

iii. Projects that are eligible and feasible, based on the period of performance. In addition, a recipient's past performance demonstrating competent stewardship of Federal funds may influence funding decisions.

- IJs should justify the scope, breadth, and cost of a project, as well as a timeline for completing the project as required within this NOFO. Projects failing to demonstrate these minimum funding considerations may be denied funding. The following scale shall be used:

0=No Funding Recommended; 1=Funding Recommended

b. Financial Integrity Criteria

Prior to making a federal award, FEMA is required by 31 U.S.C. § 3354, as enacted by the Payment Integrity Information Act of 2019, Pub. L. No. 116-117 (2020); 41 U.S.C. § 2313; and 2 C.F.R. § 200.206 to review information available through any Office of Management and Budget (OMB)-designated repositories of governmentwide eligibility qualification or financial integrity information, including whether SAM.gov identifies the applicant as being excluded from receiving federal awards or is flagged for any integrity record submission. FEMA may also pose additional questions to the applicant to aid in conducting the pre-award risk review. Therefore, application evaluation criteria may include the following risk-based considerations of the applicant:

- i. Financial stability.
- ii. Quality of management systems and ability to meet management standards.
- iii. History of performance in managing federal award.
- iv. Reports and findings from audits.
- v. Ability to effectively implement statutory, regulatory, or other requirements.

c. Supplemental Financial Integrity Criteria and Review

Prior to making a federal award where the anticipated total federal share will be greater than the simplified acquisition threshold, currently \$250,000:

- i. FEMA is required by 41 U.S.C. § 2313 and 2 C.F.R. § 200.206(a)(2) to review and consider any information about the applicant, including information on the applicant's immediate and highest-level owner, subsidiaries, and predecessors, if applicable, that is in the designated integrity and performance system accessible through the System for Award Management (SAM), which is currently the [Federal Awardee Performance and Integrity Information System](#) (FAPIIS).
- ii. An applicant, at its option, may review information in FAPIIS and comment on any information about itself that a federal awarding agency previously entered.

iii. FEMA will consider any comments by the applicant, in addition to the other information in FAPIIS, in making a judgment about the applicant's integrity, business ethics, and record of performance under federal awards when completing the review of risk posed by applicants as described in 2 C.F.R. § 200.206.

2. Review and Selection Process

Following the USCG COTP-led Field Review, DHS/FEMA will lead a National Review. The National Review encompasses 1) a review by a panel of subject-matter experts (SME) from DHS/FEMA and other federal partners that validates the USCG COTP-led Field Review results; and 2) a detailed administrative/financial review of applications recommended for funding. ***As part of the National Review, the SME panel will increase the score of any proposed project that sufficiently addresses one or more of the two National Priorities (enhancing cybersecurity or enhancing the protection of soft targets/crowded places) by 20%.*** Projects that are not dedicated to specifically enhancing a National Priority will not receive a score increase (e.g., a port area patrol vessel that is not solely dedicated to patrolling the soft target/crowded place or a camera replacement project that includes a cybersecurity software installation will not receive a 20% score increase). To be considered for a 20% score increase, projects must be submitted as distinct and standalone, and dedicated to supporting the national priority.

As part of the National Review, the SME panel may also recommend partial funding for individual projects and eliminate others that are determined to be duplicative or require a sustained federal commitment to fully realize the intended risk mitigation. In addition, the SME panel will validate proposed project costs. ***Decisions to reduce requested funding amounts or eliminate requested items deemed inappropriate under the scope of the FY 2024 PSGP will take into consideration the ability of the revised project to address the National Priorities and whether it will achieve the intended risk mitigation goal.*** Historically, the PSGP has placed a high priority on providing full project funding rather than partial funding.

Elements of the application considered during the National Review include the following as specified within this NOFO:

- Eligibility of an applicant;
- Allowable costs;
- Required cost share; and
- Alignment with program priorities.

Independent of the Field and National Reviews, a risk score will also be calculated for each Port Area in which an eligible entity applies for PSGP funding. A Port Area risk score will be calculated based on the relative threat, vulnerability, and consequences from acts of terrorism. The risk methodology used to calculate this score is focused on three elements:

- *Threat* – likelihood of an attack being attempted by an adversary;
- *Vulnerability* – likelihood that an attack is successful, given that it is attempted; and
- *Consequence* – effect of an event, incident, or occurrence.

The risk methodology determines the relative risk of terrorism faced by a given Port Area, considering the potential risk of terrorism to people, critical infrastructure, economic security, and national security missions. The analysis includes threats from domestic violent extremists, international terrorist groups, and individuals inspired by terrorists abroad. A risk and effectiveness prioritization will then be applied to the SME panel's recommended list of projects for each Port Area. This analysis considers the following factors to produce a comprehensive national priority ranking of port security proposals:

- Relationship of the project to one or more of the National Priorities;
- Relationship of the project to the local port security priorities;
- Risk level of the Port Area in which the project would be located;
- Those Port Areas that have a measurable risk of at least 1% of the overall maritime security risk based on the comprehensive DHS/FEMA risk methodology would be prioritized above those with less than 1% of the overall risk;
- To ensure that the most effective projects are funded, the risk and effectiveness prioritization could be limited by Port Area, based on the Port Area's relative risk score; and
- Effectiveness and feasibility of the project to be completed in support of the priorities highlighted above during the period of performance.

Projects recommended for funding will also receive a detailed administrative/financial review to ensure compliance with all program requirements. As a part of this, applications will be reviewed to ensure there are no ineligible costs, there is an appropriate nexus to maritime security, etc.

FEMA may place a risk-based funding cap on Port Areas to ensure a broad distribution of program funds among multiple Port Areas. This will ensure that minimally effective projects in the highest risk Port Areas are not funded ahead of highly effective projects in lower risk Port Areas; however, this does not guarantee that Port Areas with minimal risk scores will receive funding. All funding recommendations will be provided to the inter-agency partners for concurrence. All final funding determinations will then be made by the Secretary of Homeland Security, who retains the discretion to consider other factors and information in addition to DHS/FEMA's funding recommendations.

F. Federal Award Administration Information

1. Notice of Award

Before accepting the award, the AOR and recipient should carefully read the award package. The award package includes the instructions on administering the grant award and the terms and conditions associated with responsibilities under federal awards. **Recipients must accept all conditions in this NOFO and the [Preparedness Grants Manual](#) as well as any specific terms and conditions in the Notice of Award to receive an award under this program.**

See the [Preparedness Grants Manual](#) for information on Notice of Award.

FEMA will provide the federal award package to the applicant electronically via FEMA GO. Award packages include an Award Letter, Summary Award Memo, Agreement Articles, and Obligating Document. An email notification of the award package will be sent through FEMA's grant application system to the AOR that submitted the application.

Recipients must accept their awards no later than 60 days from the award date. The recipient shall notify FEMA of its intent to accept and proceed with work under

the award through the FEMA GO system.

Funds will remain on hold until the recipient accepts the award through the FEMA GO system and all other conditions of the award have been satisfied or until the award is otherwise rescinded. Failure to accept a grant award within the specified timeframe may result in a loss of funds.

2. Administrative and National Policy Requirements

In addition to the requirements of in this section and in this NOFO, FEMA may place specific terms and conditions on individual awards in accordance with 2 C.F.R. Part 200.

In addition to the information regarding DHS Standard Terms and Conditions and Ensuring the Protection of Civil Rights, see the [Preparedness Grants Manual](#) for additional information on administrative and national policy requirements, including the following:

- Environmental Planning and Historic Preservation (EHP) Compliance
- FirstNet
- National Incident Management System (NIMS) Implementation
- SAFECOM

a. DHS Standard Terms and Conditions

All successful applicants for DHS grant and cooperative agreements are required to comply with DHS Standard Terms and Conditions, which are available online at: [DHS Standard Terms and Conditions](#).

The applicable DHS Standard Terms and Conditions will be those in effect at the time the award was made. What terms and conditions will apply for the award will be clearly stated in the award package at the time of award.

b. Ensuring the Protection of Civil Rights

As the Nation works towards achieving the [National Preparedness Goal](#), it is important to continue to protect the civil rights of individuals. Recipients and subrecipients must carry out their programs and activities, including those related

to the building, sustainment, and delivery of core capabilities, in a manner that respects and ensures the protection of civil rights for protected populations.

Federal civil rights statutes, such as Section 504 of the Rehabilitation Act of 1973 and Title VI of the Civil Rights Act of 1964, along with DHS and FEMA regulations, prohibit discrimination on the basis of race, color, national origin, sex, religion, age, disability, limited English proficiency, or economic status in connection with programs and activities receiving [federal financial assistance](#) from FEMA, as applicable.

The DHS Standard Terms and Conditions include a fuller list of the civil rights provisions that apply to recipients. These terms and conditions can be found in the [DHS Standard Terms and Conditions](#). Additional information on civil rights provisions is available at <https://www.fema.gov/about/offices/equal-rights/civil-rights>.

Monitoring and oversight requirements in connection with recipient compliance with federal civil rights laws are also authorized pursuant to 44 C.F.R. Part 7 or other applicable regulations.

In accordance with civil rights laws and regulations, recipients and subrecipients must ensure the consistent and systematic fair, just, and impartial treatment of all individuals, including individuals who belong to underserved communities that have been denied such treatment.

Environmental Planning and Historic Preservation (EHP) Compliance

See the [Preparedness Grants Manual](#) for information on EHP compliance.

d. National Incident Management System (NIMS) Implementation

See the [Preparedness Grants Manual](#) for information about NIMS implementation.

e. Mandatory Disclosures

The non-Federal entity or applicant for a Federal award must disclose, in a timely manner, in writing to the Federal awarding agency or pass-through entity all

violations of Federal criminal law involving fraud, bribery, or gratuity violations potentially affecting the Federal award. (2 CFR 200.113)

Please note applicants and recipients may report issues of fraud, waste, abuse, and mismanagement, or other criminal or noncriminal misconduct to the [Office of Inspector General \(OIG\) Hotline](#). The toll-free numbers to call are 1 (800) 323-8603, and TTY 1 (844) 889-4357.

3. Reporting

Recipients are required to submit various financial and programmatic reports as a condition of award acceptance. Future awards and funds drawdown may be withheld if these reports are delinquent.

See the [Preparedness Grants Manual](#) for information on reporting requirements.

4. Monitoring and Oversight

The regulation at 2 C.F.R. § 200.337 provides DHS and any of its authorized representatives with the right of access to any documents, papers, or other records of the recipient [and any subrecipients] that are pertinent to a federal award in order to make audits, examinations, excerpts, and transcripts. The right also includes timely and reasonable access to the recipient's or subrecipient's personnel for the purpose of interview and discussion related to such documents. Pursuant to this right and per 2 C.F.R. § 200.329, DHS may conduct desk reviews and make site visits to review project accomplishments and management control systems to evaluate project accomplishments and to provide any required technical assistance. During site visits, DHS may review a recipient's or subrecipient's files pertinent to the federal award and interview and/or discuss these files with the recipient's or subrecipient's personnel. Recipients and subrecipients must respond in a timely and accurate manner to DHS requests for information relating to a federal award.

See the [Preparedness Grants Manual](#) for information on monitoring and oversight.

G. DHS Awarding Agency Contact Information

1. Contact and Resource Information

a. Program Office Contact

FEMA has assigned region-specific Preparedness Officers for the PSGP. If you do not know your Preparedness Officer, please contact FEMA Grants News by phone at (800) 368-6498 or by email at fema-grants-news@fema.dhs.gov, Monday through Friday, 9:00 AM – 5:00 PM ET.

b. FEMA Grants News

FEMA Grants News is a non-emergency comprehensive management and information resource developed by FEMA for grants stakeholders. This channel provides general information on all FEMA grant programs and maintains a comprehensive database containing key personnel contact information at the federal, state, and local levels. When necessary, recipients will be directed to a federal point of contact who can answer specific programmatic questions or concerns. FEMA Grants News can be reached by e-mail at fema-grants-news@fema.dhs.gov OR by phone at (800) 368-6498, Monday through Friday, 9:00 AM – 5:00 PM ET.

c. Grant Programs Directorate (GPD) Award Administration Division

GPD's Award Administration Division (AAD) provides support regarding financial matters and budgetary technical assistance. Additional guidance and information can be obtained by contacting the AAD's Help Desk via e-mail at ASK-GMD@fema.dhs.gov.

d. Equal Rights

The FEMA Office of Equal Rights (OER) is responsible for compliance with and enforcement of federal civil rights obligations in connection with programs and services conducted by FEMA and recipients of FEMA financial assistance. All inquiries and communications about federal civil rights compliance for FEMA grants under this NOFO should be sent to FEMA-CivilRightsOffice@fema.dhs.gov

e. Environmental Planning and Historic Preservation

GPD's EHP Team provides guidance and information about the EHP review process to recipients and subrecipients. All inquiries and communications about GPD projects under this NOFO or the EHP review process, including the submittal of EHP review materials, should be sent to gpdehpinfo@fema.dhs.gov.

2. Systems Information

a. FEMA GO

For technical assistance with the FEMA GO system, please contact the FEMA GO Helpdesk at femago@fema.dhs.gov or (877) 585-3242, Monday through Friday, 9:00 AM – 6:00 PM ET.

H. Additional Information

GPD has developed the [Preparedness Grants Manual](#) to guide applicants and recipients of grant funding on how to manage their grants and other resources. Recipients seeking guidance on policies and procedures for managing preparedness grants should reference the [Preparedness Grants Manual](#) for further information. Examples of information contained in the [Preparedness Grants Manual](#) include:

- Actions to Address Noncompliance
- Audits
- Case Studies and Use of Grant-Funded Resources During Real-World Incident Operations
- Community Lifelines
- Conflicts of Interest in the Administration of Federal Awards and Subawards

- Disability Integration
- National Incident Management System
- Payment Information
- Period of Performance Extensions
- Procurement Integrity
- Record Retention
- Termination Provisions
- Whole Community Preparedness
- Financial Assistance Programs for Infrastructure
- Report issues of Fraud, Waste, and Abuse
- Hazard Resistant Building Codes
- Other Post-Award Requirements

1. Termination Provisions

FEMA may terminate a federal award in whole or in part for one of the following reasons. FEMA and the recipient must still comply with closeout requirements at 2 C.F.R. §§ 200.344-200.345 even if an award is terminated in whole or in part. To the extent that subawards are permitted under this NOFO, pass-through entities should refer to 2 C.F.R. § 200.340 for additional information on termination regarding subawards. Note that all information in this Section H.1 “Termination Provisions” is repeated in the [Preparedness Grants Manual](#).

a. Noncompliance

If a recipient fails to comply with the terms and conditions of a federal award, FEMA may terminate the award in whole or in part. If the noncompliance can be corrected, FEMA may first attempt to direct the recipient to correct the noncompliance. This may take the form of a Compliance Notification. If the noncompliance cannot be corrected or the recipient is non-responsive, FEMA may proceed with a Remedy Notification, which could impose a remedy for noncompliance per 2 C.F.R. § 200.339, including termination. Any action to terminate based on noncompliance will follow the requirements of 2 C.F.R. §§ 200.341-200.342 as well as the requirement of 2 C.F.R. § 200.340(c) to report in FAPIIS the recipient’s material failure to comply with the award terms and

conditions. See also the section on Actions to Address Noncompliance in the [Preparedness Grants Manual](#)

b. With the Consent of the Recipient

FEMA may also terminate an award in whole or in part with the consent of the recipient, in which case the parties must agree upon the termination conditions, including the effective date, and in the case of partial termination, the portion to be terminated.

c. Notification by the Recipient

The recipient may terminate the award, in whole or in part, by sending written notification to FEMA setting forth the reasons for such termination, the effective date, and in the case of partial termination, the portion to be terminated. In the case of partial termination, FEMA may determine that a partially terminated award will not accomplish the purpose of the federal award, so FEMA may terminate the award in its entirety. If that occurs, FEMA will follow the requirements of 2 C.F.R. §§ 200.341-200.342 in deciding to fully terminate the award.

2. Program Evaluation

Federal agencies are required to structure NOFOs that incorporate program evaluation activities from the outset of their program design and implementation to meaningfully document and measure their progress towards meeting agency priority goal(s) and program outcomes.

[OMB Memorandum M-21-27](#), Evidence-Based Policymaking: Learning Agendas and Annual Evaluation Plans, implementing Title I of the Foundations for Evidence-Based Policymaking Act of 2018, Pub. L. No. 115-435 (2019) (Evidence Act), urges federal awarding agencies to use program evaluation as a critical tool to learn, improve equitable delivery, and elevate program service and delivery across the program lifecycle. Evaluation means “an assessment using systematic data collection and analysis of one or more programs, policies, and organizations intended to assess their effectiveness and efficiency.” Evidence Act, § 101 (codified at 5 U.S.C. § 311).

As such, recipients and subrecipients are required to participate in a DHS-, Component, or Program Office-led evaluation if selected, which may be carried out by a third-party on behalf of the DHS, its component agencies, or the Program Office. Such an evaluation may involve information collections including but not limited to surveys, interviews, or discussions with individuals who benefit from the federal award program operating personnel, and award recipients, as specified in a DHS-, component agency-, or Program Office-approved evaluation plan. More details about evaluation requirements may be provided in the federal award, if available at that time, or following the award as evaluation requirements are finalized. Evaluation costs incurred during the period of performance are allowable costs (either as direct or indirect). Recipients and subrecipients are also encouraged, but not required, to participate in any additional evaluations after the period of performance ends, although any costs incurred to participate in such evaluations are not allowable and may not be charged to the federal award.

3. Financial Assistance Programs for Infrastructure

a. Build America, Buy America Act

Recipients and subrecipients must comply with the Build America, Buy America Act (BABAA), which was enacted as part of the Infrastructure Investment and Jobs Act §§ 70901-70927, Pub. L. No. 117-58 (2021); and Executive Order 14005, Ensuring the Future is Made in All of America by All of America's Workers. See also 2 C.F.R. Part 184 and Office of Management and Budget (OMB) Memorandum M-24-02, Implementation Guidance on Application of Buy America Preference in Federal Financial Assistance Programs for Infrastructure.

None of the funds provided under this program may be used for a project for infrastructure unless the iron and steel, manufactured products, and construction materials used in that infrastructure are produced in the United States.

The Buy America preference only applies to articles, materials, and supplies that are consumed in, incorporated into, or affixed to an infrastructure project. As such, it does not apply to tools, equipment, and supplies, such as temporary scaffolding, brought to the construction site and removed at or before the completion of the infrastructure project. Nor does a Buy America preference apply to equipment and furnishings, such as movable chairs, desks, and portable computer equipment, that are used at or within the finished infrastructure project but are not an integral

part of the structure or permanently affixed to the infrastructure project.

For FEMA's official policy on BABAA, please see FEMA Policy 207-22-0001: Buy America Preference in FEMA Financial Assistance Programs for Infrastructure available at https://www.fema.gov/sites/default/files/documents/fema_build-america-buy-america-act-policy.pdf To see whether a particular FEMA federal financial assistance program is considered an infrastructure program and thus required to include a Buy America preference, please see [Programs and Definitions: Build America, Buy America Act | FEMA.gov](#) and https://www.fema.gov/sites/default/files/documents/fema_build-america-buy-america-act-policy.pdf

b. Waivers

When necessary, recipients (and subrecipients through their pass-through entity) may apply for, and FEMA may grant, a waiver from these requirements.

A waiver of the domestic content procurement preference may be granted by the agency awarding official if FEMA determines that:

- Applying the domestic content procurement preference would be inconsistent with the public interest.
- The types of iron, steel, manufactured products, or construction materials are not produced in the United States in sufficient and reasonably available quantities or of a satisfactory quality.
- The inclusion of iron, steel, manufactured products, or construction materials produced in the United States will increase the cost of the overall project by more than 25%.

For FEMA awards, the process for requesting a waiver from the Buy America preference requirements can be found on FEMA's website at: ["Buy America" Preference in FEMA Financial Assistance Programs for Infrastructure | FEMA.gov](#).

c. Definitions

For BABAA specific definitions, please refer to the FEMA Buy America website at: ["Programs and Definitions: Build America, Buy America Act | FEMA.gov."](#)

Please refer to the applicable DHS Standard Terms & Conditions for the BABAA specific term applicable to all FEMA financial assistance awards for infrastructure.

4. Report issues of fraud, waste, abuse

Please note, when applying to this notice of funding opportunity and when administering the grant, applicants may report issues of fraud, waste, abuse, and mismanagement, or other criminal or noncriminal misconduct to the Office of Inspector General (OIG) Hotline. The toll-free numbers to call are 1 (800) 323-8603, and TTY 1 (844) 889-4357.

5. Appendices

- PSGP Sample Memorandum of Understanding/Agreement (MOU/MOA)
The sample MOU/MOA below demonstrates all of the elements required in the PSGP NOFO for acceptance for review as part of a grant application from a state or local agency providing security services to MTSA-regulated entities.

Memorandum of [Understanding / Agreement]

Between [provider of layered security] and [recipient of layered security]

Regarding [provider of layered security's] Use of Port Security Grant Program Funds

1. **PARTIES.** The parties to this Agreement are the [Provider of Layered Security] and the [Recipient of security service].
2. **AUTHORITY.** This Agreement is authorized under the provisions of [applicable Area Maritime Security Committee (AMSC) authorities and/or other authorities].
3. **PURPOSE.** The purpose of this Agreement is to set forth terms by which [Provider of security service] shall expend Port Security Grant Program project funding in providing security service to [Recipient of security service]. Under requested PSGP grant, the [Provider of security service] must provide layered security to [Recipient of security service] consistent with the approach described in an approved grant application.

4. **RESPONSIBILITIES:** The security roles and responsibilities of each party are understood as follows:

(1) [Recipient of security service]

Roles and responsibilities in providing its own security at each MARSEC level

(2) [Provider of security service]

[-An acknowledgement by the facility that the applicant is part of their facility security plan.]

[-The nature of the security that the applicant agrees to supply to the regulated facility (waterside surveillance, increased screening, etc.).]

[-Roles and responsibilities in providing security to [Recipient of security service] at each MARSEC level.]

5. **POINTS OF CONTACT.** [Identify the POCs for all applicable organizations under the Agreement; including addresses and phone numbers (fax number, e-mail, or internet addresses can also be included).]

6. **OTHER PROVISIONS.** Nothing in this Agreement is intended to conflict with current laws or regulations of [applicable State] or [applicable local Government]. If a term of this agreement is inconsistent with such authority, then that term shall be invalid, but the remaining terms and conditions of this agreement shall remain in full force and effect.

7. **EFFECTIVE DATE.** The terms of this agreement will become effective on [EFFECTIVE DATE].

8. **MODIFICATION.** This agreement may be modified upon the mutual written consent of the parties.

9. **TERMINATION.** The terms of this agreement, as modified with the consent of both parties, will remain in effect until the grant end dates for an approved grant. Party upon [NUMBER] day's written notice to the other party may terminate this agreement.

MEMORANDUM FOR RECORD

FROM: Pamela S. Williams *P.S. Williams*
Assistant Administrator
Grant Programs Directorate

SUBJECT: Preparedness Grants Manual, April 2024

The Grant Programs Directorate's Office of Grants Administration (OGA) has developed FEMA Manual 207-23-001, *Preparedness Grants Manual*, April 2024. FEMA has developed the Preparedness Grants Manual (PGM) to guide preparedness grant recipients, including subrecipients, on how to manage their grants. The preparedness grant programs covered in the PGM include the following:

- Homeland Security Grant Program (comprising the State Homeland Security Grant Program, the Urban Area Security Initiative, and Operation Stongarden);
- Tribal Homeland Security Grant Program;
- Nonprofit Security Grant Program;
- Transit Security Grant Program;
- Intercity Passenger Rail Program;
- Intercity Bus Security Grant Program;
- Port Security Grant Program; and
- Emergency Management Performance Grant Program.

Recipients seeking guidance on policies and procedures for managing the aforementioned FEMA preparedness grants should reference this manual for further information. Chapters 8-12 of the PGM contain program-specific information and requirements, while the main content of the PGM (chapters 1-7) contains important information relevant to all preparedness grant programs unless otherwise noted.

The PGM has been updated pursuant to FEMA Directive 112-12 v2, *Development and Management of FEMA Policy (October 28, 2019)*, and in collaboration with the Regional Grants Management Divisions, the OGA program areas and their Department of Homeland Security counterparts (e.g., the U.S. Coast Guard, the Transportation Security Administration, and the Cybersecurity and Infrastructure Security Agency), the Office of External Affairs (including Tribal Affairs), the Office of Chief Counsel, the Office of Environmental and Historic Preservation, the Office of Resilience Strategy, the Office of Equal Rights, the Office of Disability Integration and Coordination, the Office of Policy and Program Analysis, and other financial assistance support offices.

The PGM April 2024 update associated with this memorandum supersedes the previously published version of the PGM issued on February 27, 2023, for Fiscal Year 2024 and into the future, and is effective as of the date of this memorandum. An explanation of specific updates to the PGM can be found in Section 1.3, *Key Changes*, after the Table of Contents.

Please contact the GPD Office of Enterprise Grants Services Policy Division at fema-gpd-policy@fema.dhs.gov if you have any questions regarding FEMA Manual 207-23-001, *Preparedness Grants Manual*, April 2024.

1. Foreword

1.1. Overview of the Federal Emergency Management Agency

The mission of the Federal Emergency Management Agency (FEMA) is helping people before, during, and after disasters, and the agency has done so for more than 40 years. FEMA remains committed to building resilience and developing a culture of preparedness across the country and unifying all levels of community and government in an integrated approach to emergency management. FEMA is part of a larger team of federal agencies, state, local, tribal and territorial (SLTT) governments, and non-governmental partners that share responsibility for emergency management and national preparedness. Those closest to areas impacted by any emergency or disaster are the true first responders—individuals, families, neighbors, and local communities. FEMA's role is to coordinate federal resources to supplement SLTT capabilities. FEMA does this by coordinating across all levels of government meaning that states, local governments, Tribal Nations, and territories are FEMA's primary partners.

1.2. Overview of the Preparedness Grants Manual's Intent

FEMA has developed this **Preparedness Grants Manual** to guide grant recipients, including subrecipients, on how to manage their grants. Recipients seeking guidance on policies and procedures for managing FEMA preparedness grants should reference this manual for further information. The Notice of Funding Opportunity (NOFO) for each program includes information needed to apply to the grant. This manual and relevant NOFOs can be reviewed and consulted in tandem.

Chapters 8-12 of this manual contain program-specific information and requirements, while the main content of this manual (chapters 1-7) contains important information relevant to all preparedness grant programs unless otherwise noted. Please be sure to read both the main content of this manual as well as the program-specific chapters, as needed.

All recipients and subrecipients of FEMA grants must comply with all applicable requirements of the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards located at [2 C.F.R. Part 200](#). For more information on 2 C.F.R. Part 200, please see [Information Bulletin \(IB\) 400, FEMA's Implementation of 2 C.F.R. Part 200, the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards \("Super Circular" or "Omni Circular"\)](#) dated Dec. 23, 2014, regarding FEMA's implementation of these provisions prior to the recent 2020 revisions. For information on the recent revisions to these regulations, see [2 C.F.R. Grants Management Policy Updates](#).

1.3. Key Changes

Future updates to this manual will include a section on specific line-by-line "key changes" made since the last update.

This version of the manual has significantly streamlined pertinent recipient/subrecipient information, lessening the back-and-forth needed between the NOFO and the Preparedness Grants Manual and more clearly defining that the NOFO focuses on applying for the grant, while the manual focuses on managing the grant. Between the Fiscal Year (FY) 2023 and FY 2024 versions, the manual has made the following overarching changes:

1. Sections 2-7, unless otherwise noted, apply to all eight grant programs featured in the manual. These sections are considered generic requirements and do *not* include how to apply to the grant.
2. Specific direct allowable cost information, previously in program-specific chapters, has been moved to the NOFOs. General cost information is in Section 3.
3. The Transit Security Grant Program (TSGP), Intercity Bus Security Grant Program (IBSGP), and Intercity Passenger Rail (IPR) Program Chapters as well as the Homeland Security Grant Program (HSGP) and Tribal Homeland Security Grant Program (THSGP) Chapters are combined.

1.4. Overview of Preparedness Grant Programs

FEMA has the statutory authority to deliver numerous disaster and non-disaster (ND) financial assistance programs in support of its mission, and that of the U.S. Department of Homeland Security (DHS), largely through grants and cooperative agreements. These programs account for a significant amount of the federal assistance funds for which FEMA is accountable. FEMA officials are responsible and accountable for the proper administration of these funds pursuant to federal laws and regulations, Office of Management and Budget (OMB) circulars, and federal appropriations laws and principles. FEMA has developed this manual to provide uniform direction on grant policy and implementation for the following grant programs. If the FEMA grant program you are looking for is not listed below, please navigate to [FEMA.gov](https://www.fema.gov) to find more information.

1.4.1. HOMELAND SECURITY GRANT PROGRAM

The [HSGP](#) includes a suite of risk-based grants to assist SLTT efforts in preventing, preparing for, protecting against, and responding to acts of terrorism. The grants under HSGP include:

- State Homeland Security Program (SHSP): SHSP assists SLTT efforts to build, sustain, and deliver the capabilities necessary to prevent, prepare for, protect against, and respond to acts of terrorism.
- Urban Area Security Initiative (UASI): The UASI assists high-risk urban areas' efforts to build, sustain, and deliver the capabilities necessary to prevent, prepare for, protect against, and respond to acts of terrorism.
- Operation Stonegarden (OPSG): OPSG supports enhanced cooperation and coordination among U.S. Customs and Border Protection (CBP), United States Border Patrol (USBP), and federal and SLTT law enforcement agencies to improve overall border security. OPSG provides funding to support joint efforts to secure U.S. borders along routes of ingress/egress to and from international borders, to include travel corridors in states bordering Mexico and Canada, as well as states and territories with international water borders. SLTT law enforcement agencies utilize their own law enforcement authorities to support the border security mission and do not receive any additional authority by participating in OPSG.

For additional information about the HSGP not found in the [NOFO](#), manual, or other program-specific guidance, contact FEMA-Grants-News@fema.dhs.gov.

1.4.2. TRIBAL HOMELAND SECURITY GRANT PROGRAM

The [THSGP](#) provides funding directly to eligible tribes to strengthen their capacity to prevent, prepare for, protect against, and respond to potential terrorist attacks.

- For additional information about the THSGP not found in the [NOFO](#), manual, or other program-specific guidance, contact FEMA-THSGP@fema.dhs.gov.

1.4.3. NONPROFIT SECURITY GRANT PROGRAM

The [Nonprofit Security Grant Program \(NSGP\)](#) provides funding for physical security enhancements and other security-related activities to nonprofit organizations that are at high risk of a terrorist or other extremist attack. The NSGP also seeks to integrate the preparedness activities of nonprofit organizations with broader state and local preparedness efforts.

- For additional information about the NSGP not found in the [NOFO](#), manual, or other program-specific guidance, contact FEMA-NSGP@fema.dhs.gov.

1.4.4. TRANSIT SECURITY GRANT PROGRAM

The [TSGP](#) provides funds to eligible public transportation systems (which include intra-city bus, ferries, and all forms of passenger rail) to protect critical transportation infrastructure and the travelling public from terrorism, and to increase transportation infrastructure resilience.

- For additional information about the TSGP not found in the [NOFO](#), manual, or other program-specific guidance, contact FEMA-TISB-rail-and-transit@fema.dhs.gov.

1.4.5. INTERCITY BUS SECURITY GRANT PROGRAM

The [IBSGP](#) provides funds to eligible private operators of intercity over-the-road buses to protect critical transportation infrastructure and travelling public from acts of terrorism, and to increase transportation infrastructure resilience.

- For additional information about the IBSGP not found in the [NOFO](#), manual, or other program-specific guidance, contact FEMA-IBSGP@fema.dhs.gov.

1.4.6. INTERCITY PASSENGER RAIL PROGRAM - AMTRAK

The [IPR](#) Program provides funds to the National Railroad Passenger Corporation (Amtrak) to protect critical transportation infrastructure and the travelling public from terrorism, and to increase transportation infrastructure resilience.

- For additional information about the IPR Program not found in the [NOFO](#), manual, or other program-specific guidance, contact FEMA-TISB-rail-and-transit@fema.dhs.gov.

1.4.7. PORT SECURITY GRANT PROGRAM

The [Port Security Grant Program \(PSGP\)](#) provides funding to port authorities, facility operators, and state and local agencies for activities associated with implementing Area Maritime Security Plans (AMSP), facility security plans, and other port-wide risk management efforts.

- For additional information about the PSGP not found in the [NOFO](#), manual, or other program-specific guidance, contact FEMA-GPD-PSGP@fema.dhs.gov.

1.4.8. EMERGENCY MANAGEMENT PERFORMANCE GRANT PROGRAM

The [Emergency Management Performance Grant \(EMPG\)](#) Program provides funds to assist SLTT emergency management agencies in obtaining the resources required for implementation of the National Preparedness System and the National Preparedness Goal of a secure and resilient nation.

- For additional information about the EMPG Program not found in the [NOFO](#), manual, or other program-specific guidance, contact FEMA-EMPG@fema.dhs.gov.

1.5. National Preparedness Goal

The [National Preparedness Goal](#) (the Goal) is “[a] secure and resilient Nation with the capabilities required across the whole community to prevent, protect against, mitigate, respond to, and recover from the threats and hazards that pose the greatest risk.” The Goal essentially defines what it means for all communities to be prepared collectively for the threats and hazards that pose the greatest risk to the nation. The Goal identifies 32 distinct activities, called [core capabilities](#), needed to address the risks. The Goal organizes these core capabilities into five categories, called mission areas. Some core capabilities apply to more than one mission area. For example, the first three core capabilities—Planning, Public Information and Warning, and Operational Coordination—are cross-cutting capabilities, meaning they apply to each of the five mission areas. The Goal’s five mission areas include:

- **Prevention:** Prevent, avoid, or stop an imminent, threatened, or actual act of terrorism.
- **Protection:** Protect our citizens, residents, visitors, and assets against the greatest threats and hazards in a manner that allows our interests, aspirations, and way of life to thrive.
- **Mitigation:** Reduce the loss of life and property by lessening the impact of future disasters.
- **Response:** Respond quickly to save lives, protect property and the environment, and meet basic human needs in the aftermath of an incident.
- **Recovery:** Recover through a focus on the timely restoration, strengthening, and revitalization of infrastructure, housing, and a sustainable economy, as well as the health, social, cultural, historic, and environmental fabric of communities affected by an incident.

The mission areas and core capabilities organize the activities and tasks performed before, during, and after disasters into a framework for achieving the goal of a secure and resilient Nation. Resilience is the desired outcome, defined in the Goal as the “ability to adapt to changing conditions and withstand and rapidly recover from disruption due to emergencies.”

Recipients will use the [National Preparedness System](#) to build, sustain, and deliver these core capabilities. The components of the National Preparedness System are Identifying and Assessing Risk; Estimating Capability Requirements; Building and Sustaining Capabilities; Planning to Deliver Capabilities; Validating Capabilities; and Reviewing and Updating. Additional details regarding the National Preparedness System and how it is supported by preparedness grant programs can be found in the program-specific chapters.

1.6. Strengthening Governance Integration

FEMA preparedness grant programs are intended to support the core capabilities across the five mission areas of Prevention, Protection, Mitigation, Response, and Recovery that are necessary to

prepare for incidents that pose the greatest risk to the Nation's security. Each program reflects the Department's intent to build and sustain an integrated network of national capabilities across all levels of government and the whole community.

Recipients must coordinate activities across preparedness disciplines and levels of government, including SLTT governments. A cohesive planning framework should incorporate FEMA resources, as well as those from other federal and SLTT entities, the private sector, and faith-based community organizations. Disparate governance structures must be integrated and refined to ensure resources are targeted to support the most critical needs of a community based on risk-driven, capabilities-based planning. Strong and inclusive governance systems better ensure that disparate funding streams are coordinated and applied for maximum impact. Inclusive governance can effectively support a whole community approach to emergency preparedness and management and the enhancement of core capabilities.

FEMA requires that all governance processes that guide the allocation of preparedness grant funds adhere to the following guiding principles:

- **Coordination of Investments:** Resources must be allocated to address the most critical capability needs and coordinated among affected preparedness stakeholders, including appropriate representatives of at-risk, underserved communities.
- **Transparency:** Stakeholders must be provided visibility on how preparedness grant funds are allocated and distributed, and for what purpose.
- **Substantive Local Involvement:** The tools and processes that are used to inform the critical priorities, which FEMA grants support, must include local government representatives. At the recipient level, local risk assessments must be included in the overarching analysis to ensure that all threats and hazards are accounted for. Primary focus should be on the needs of socially vulnerable and underserved populations—including rural populations—as well as ensuring equity for those most at risk relative to disaster preparedness, response, and recovery.
- **Accountability:** FEMA recognizes that unique preparedness gaps exist at the local level. Grant recipients are responsible for ensuring the effective use of funds to address those gaps and for maintaining and sustaining existing capabilities, particularly when it comes to serving the needs of at-risk, underserved communities.
- **Support of Regional Coordination:** Inter/intra-government entity partnerships and dependencies at the state, territorial, tribal, and regional levels, including those within metropolitan areas, must be recognized.

2. Award Determination and Obligation

2.1. Federal Award Administration Information

2.1.1. NOTICE OF AWARD

Before accepting the award, the Authorized Organizational Representative (AOR) and recipient should carefully review the award package. The award package includes instructions on administering the grant award and the terms and conditions associated with responsibilities under federal awards. **Recipients must accept all conditions in the applicable program NOFO, as well as this manual, in addition to any special terms and conditions in the Notice of Award to receive an award under the applicable program.**

Beginning in FY 2024, notification of award approval is made through the FEMA Grants Outcomes (FEMA GO) system through an automatic electronic mail to the recipient's authorized official listed in the initial application. The award date will be the date that FEMA approves the award. The recipient should follow the directions in the notification to confirm acceptance of the award.

Recipients must accept their awards within **the time specified in the program-specific NOFO**. The recipient shall notify FEMA within this timeframe of its intent to accept and proceed with work under the award or provide a notice of intent to decline through the FEMA GO system. For instructions on how to accept or decline an award in the FEMA GO system and for more information on FEMA GO generally, please see the [FEMA GO](#) page on FEMA.gov. Funds will remain on hold until the recipient accepts the award through the FEMA GO system and all other conditions of the award have been satisfied or until the award is otherwise rescinded. Failure to accept a grant award within the NOFO-specified timeframe may result in a loss of funds.

2.1.2. PASS-THROUGH REQUIREMENTS

Please see the applicable program-specific NOFO and chapter of this manual for information on pass-through requirements for that program.

3. Recipient and Subrecipient Costs

3.1. Funding Restrictions

All costs charged to awards covered by this manual must comply with the Uniform Administrative Requirements, Cost Principles, and Audit Requirements at 2 C.F.R. Part 200, unless otherwise indicated in this manual, the applicable program NOFO, or the terms and conditions of the award. This includes, among other requirements, that costs must be incurred, and products and services must be delivered, within the period of performance (POP) of the award. See 2 C.F.R. § 200.403(h) (referring to budget periods, which for FEMA preparedness grant awards is the same as the POP).

In general, the Cost Principles establish standards for the allowability of costs, provide detailed guidance on the cost accounting treatment of costs as direct or administrative costs, and set forth allowability principles for selected items of cost. More specifically, except as otherwise stated in the applicable program chapter to this manual, the program NOFO, or the terms and conditions of an award, costs charged to awards covered by this manual must be consistent with the Cost Principles for Federal Awards located at 2 C.F.R. Part 200, Subpart E. To be allowable, all costs charged to a FEMA award or applied to the cost share must be reasonable in nature and amount and allocable to the FEMA award.

Additionally, all costs charged to awards must comply with the grant program's applicable statutes, policies, NOFOs, and requirements in this manual, as well as with the terms and conditions of the award. If FEMA staff identify costs that are inconsistent with any of these requirements, these costs may be disallowed, and FEMA may recover funds as appropriate, consistent with applicable laws, regulations, and policies.

As part of those requirements, grant recipients and subrecipients may only use federal funds or funds applied to a cost share for the purposes set forth in this manual, applicable NOFOs, and the terms and conditions of the award, and those costs must be consistent with the statutory authority for the award. Grant funds may not be used for matching funds for other federal grants/cooperative agreements, lobbying, or intervention in federal regulatory or adjudicatory proceedings. In addition, federal funds may not be used to sue the federal government or any other government entity.

3.2. Direct Allowable Costs

Specific investments made in support of the funding priorities discussed in the NOFOs generally fall into one of the following eight allowable expense categories:

1. Construction;
2. Equipment;
3. Exercises;
4. Management & Administration (M&A);
5. Organization;
6. Operational Activities;
7. Planning; and
8. Training.

As this list is not exhaustive, refer to the relevant program-specific NOFO, this manual, and the program-specific point of contact for more information on allowable costs, funding restrictions, funding priorities, and these categories.

3.2.1. AUTHORIZED EQUIPMENT LIST

The [Authorized Equipment List \(AEL\)](#) is a list of approved equipment types allowed under FEMA's preparedness grant programs. The intended audience of this tool is emergency managers, first responders, and other homeland security professionals. The list consists of equipment categories divided into categories, sub-categories, and then individual equipment items.

Grant funds must comply with [FEMA Policy #207-22-0002, Prohibited or Controlled Equipment Under FEMA Awards](#) and may not be used for the purchase of the following unallowable equipment: firearms, ammunition, grenade launchers, bayonets, or weaponized aircraft, vessels, or vehicles of any kind with weapons installed. Contact your Preparedness Officer with questions on the AEL.

3.2.2. REQUIREMENTS FOR SMALL UNMANNED AIRCRAFT SYSTEMS

All requests to purchase Small Unmanned Aircraft Systems (sUAS) with FEMA grant funding must comply with [FEMA Policy #207-22-0002, Prohibited or Controlled Equipment Under FEMA Awards](#), and also include a description of the policies and procedures in place to safeguard individuals' privacy, civil rights, and civil liberties of the jurisdiction that will purchase, take title to, or otherwise use the sUAS equipment. sUAS policies are not required at the time of application but must be received and approved by FEMA prior to obligating grant funds. All grant-funded procurements must be executed in a manner compliant with federal procurement standards at 2 C.F.R. §§ 200.317 – 200.327. For recipients that use grant funds for sUAS, FEMA advises that there is a general privacy concern related to the use of this equipment if the data the devices collect is transmitted to servers not under the control of the operator. It has been reported that some manufacturers of sUAS encrypt data and send that data to servers outside the United States. DHS's Privacy Office suggests the recipient fully explore data transmission and storage issues with vendors to reduce the possibility of data breaches.

Additionally, the Senate Report accompanying the FY 2024 DHS Appropriations further requires recipients to certify they have reviewed the [Industry Alert on Chinese Manufactured Unmanned Aircraft Systems](#), and completed a risk assessment that considers the proposed use of foreign-made sUAS to ascertain potential risks (e.g., privacy, data breaches, cybersecurity, etc.) related to foreign-made versus domestic sUAS.

Acquisition and Use of Technology to Mitigate Unmanned Aircraft Systems (Counter-Unmanned Aircraft System)

In August 2020, DHS, the Department of Justice, the Federal Aviation Administration, and the Federal Communications Commission issued the [Interagency Legal Advisory on Unmanned Aircraft Systems \(UAS\) Detection and Mitigation Technologies](#). The purpose of the advisory guidance document is to help non-federal public and private entities better understand the federal laws and regulations that may apply to the use of capabilities to detect and mitigate threats posed by UAS operations (i.e., Counter-UAS or C-UAS).

The Departments and Agencies issuing the advisory guidance document, and FEMA, do not have the authority to approve non-federal public or private use of UAS detection or mitigation capabilities, nor do they conduct legal reviews of commercially available product compliance with those laws. The advisory does not address state and local laws nor potential civil liability, which UAS detection and mitigation capabilities may also implicate.

It is strongly recommended that, before the testing, acquisition, installation, or use of UAS detection and/or mitigation systems, entities seek the advice of counsel experienced with both federal and

state criminal, surveillance, and communications laws. Entities should conduct their own legal and technical analysis of each UAS detection and/or mitigation system and should not rely solely on vendors’ representations of the systems’ legality or functionality. Please also see the DHS press release on this topic for further information: [Interagency Issues Advisory on Use of Technology to Detect and Mitigate Unmanned Aircraft Systems](#). For training on the application of UAS technology in emergency management programs, please refer to the [National Preparedness Course Catalog](#) and search ‘UAS’ on the website.

The Cybersecurity and Infrastructure Security Agency (CISA) offers several resources that detail the UAS threat environment and security protocols on the [Unmanned Aircraft Systems Resources](#) page on CISA.gov. Additional resources may be found on the [Homeland Security Information Network – Critical Infrastructure \(HSIN-CI\)](#) site.

Table 1: Unmanned Aircraft System Allowability

Grant Program	Allowed
HSGP (SHSP, UASI)	Yes
HSGP (OPSG)	Yes
THSGP	Yes
NSGP	No
TSGP	Yes
IPR Program	Yes
IBSGP	No
PSGP	Yes
EMPG Program	Yes

3.2.3. PROHIBITIONS ON EXPENDING GRANT OR COOPERATIVE AGREEMENT FUNDS FOR CERTAIN TELECOMMUNICATIONS AND VIDEO SURVEILLANCE SERVICES OR EQUIPMENT

Recipients and subrecipients of FEMA federal financial assistance are subject to the prohibitions described in section 889 of the [John S. McCain National Defense Authorization Act for Fiscal Year 2019 \(FY 2019 NDAA\)](#), Pub. L. No. 115-232 (2018) and 2 C.F.R. §§ 200.216, 200.327, 200.471, and Appendix II to 2 C.F.R. Part 200. Beginning Aug. 13, 2020, the statute—as it applies to FEMA recipients, subrecipients, and their contractors and subcontractors—prohibits obligating or expending federal award funds on certain telecommunications and video surveillance products and contracting with certain entities for national security reasons.

Guidance is available in [FEMA Policy #405-143-1, Prohibitions on Expending FEMA Award Funds for Covered Telecommunications Equipment or Services](#).

Additional guidance is available in the [Contract Provisions Guide: Navigating Appendix II to Part 200 – Contract Provisions for Non-Federal Entity Contracts Under Federal Awards](#).

Effective Aug. 13, 2020, FEMA recipients and subrecipients **may not** use any FEMA funds under open or new awards to:

- Procure or obtain any equipment, system, or service that uses covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology of any system;
- Enter, extend, or renew a contract to procure or obtain any equipment, system, or service that uses covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology of any system; or
- Enter, extend, or renew contracts with entities that use covered telecommunications equipment or services as a substantial or essential component of any system, or as critical technology as part of any system.

Replacement Equipment and Services: FEMA grant funding may be permitted to procure replacement equipment and services impacted by this prohibition, provided the costs are otherwise consistent with the requirements in this manual and the applicable NOFO.

Covered Communications

Per section 889(f)(2)-(3) of the FY 2019 NDAA and 2 C.F.R. § 200.216, covered telecommunications equipment or services means:

- Telecommunications equipment produced by Huawei Technologies Company or ZTE Corporation, (or any subsidiary or affiliate of such entities);
- For the purpose of public safety, security of Government facilities, physical security surveillance of critical infrastructure, and other national security purposes, video surveillance and telecommunications equipment produced by Hytera Communications Corporation, Hangzhou Hikvision Digital Technology Company, or Dahua Technology Company (or any subsidiary or affiliate of such entities);
- Telecommunications or video surveillance services provided by such entities or using such equipment; or
- Telecommunications or video surveillance equipment or services produced or provided by an entity that the Secretary of Defense, in consultation with the Director of National Intelligence or the Director of the Federal Bureau of Investigation, reasonably believes to be an entity owned or controlled by, or otherwise connected to, the People's Republic of China.

Examples of the types of products covered by this prohibition include phones, internet, video surveillance, and cloud servers when produced, provided, or used by the entities listed in the definition of "covered telecommunications equipment or services." See 2 C.F.R. § 200.471.

3.2.4. FUNDING FOR CRITICAL EMERGENCY SUPPLIES

Critical emergency supplies—such as shelf stable products, water, and basic medical supplies—are an allowable expense under the HSGP (SHSP and UASI only), THSGP, and EMPG Program. Each state, urban area, or tribe must have FEMA's approval of a five-year viable inventory management plan prior to allocating grant funds for stockpiling purposes. The Inventory Management Plan should address how critical supplies will be maintained and sustained by the grant recipient and include a

distribution strategy and related sustainment costs if the grant expenditure for these items is over \$100,000. The Inventory Management Plan is associated with but distinct from the Distribution Management Plan, which addresses how supplies will be distributed in an emergency. For more information on distribution management planning, see [FEMA's Distribution Management Plan Guide 2.0](#).

If grant expenditures exceed the minimum threshold, the five-year inventory management plan will be developed by the recipient and monitored by FEMA. FEMA will provide program oversight and technical assistance (TA) as it relates to the purchase of critical emergency supplies. FEMA will establish guidelines and requirements for the purchase of these supplies and monitor development and status of the recipient's inventory management plan.

Recipients are strongly encouraged to consult with their respective FEMA Regional Logistics Chief regarding disaster logistics-related issues. States are further encouraged to share their FEMA approved plan with local jurisdictions and tribes.

Table 2: Critical Emergency Supplies Allowability

Grant Program	Allowed
HSGP (SHSP, UASI)	Yes
HSGP (OPSG)	No
THSGP	Yes
NSGP	No
Surface Transportation Security Grants (TSGP, IBSGP, IPR Program)	No
PSGP	No
EMPG Program	Yes

3.3. Maintenance and Sustainment

The use of FEMA preparedness grant funds for maintenance contracts or agreements, warranty coverage, repair or replacement costs, licenses, upgrades, and user fees are allowable under all active and future grant awards, unless otherwise noted in the program-specific NOFO. These contracts may exceed the POP if they are purchased incidental to the original purchase of the system or equipment as long as the original purchase of the system or equipment is consistent with that which is typically provided for, or available through, these types of agreements, warranties, or contracts. When purchasing a stand-alone warranty or extending an existing maintenance contract on an already-owned piece of equipment system, coverage purchased may not exceed the POP of the award used to purchase the maintenance agreement or warranty. As with warranties and maintenance agreements, this extends to licenses and user fees as well.

Preparedness grant funds are intended to support the Goal and fund activities and projects that build and sustain the capabilities necessary to prevent, protect against, mitigate the effects of, respond to, and recover from those threats and hazards that pose the greatest risk to the security of

the Nation. To assist recipients in meeting this objective, the policy set forth in [IB 379: Guidance to State Administrative Agencies to Expedite the Expenditure of Certain DHS/FEMA Grant Funding](#) allows for the expansion of eligible maintenance and sustainment costs, which must be:

1. In direct support of existing capabilities;
2. An otherwise allowable expenditure under the applicable grant program;
3. Tied to one of the core capabilities in the five mission areas contained within the Goal; and
4. **For the HSGP (SHSP and UASI) and EMPG Program only**, shareable through the Emergency Management Assistance Compact (EMAC).

Additionally, eligible costs may also be in support of equipment, training, and critical resources that have previously been purchased with either federal grant funding or any other source of funding other than FEMA preparedness grant program dollars.

For the HSGP, stand-alone warranties can only cover equipment purchased with HSGP funds or for equipment dedicated for HSGP-related purposes.

For the PSGP, maintenance and sustainment are focused specifically on the repair and replacement of existing equipment and does not include routine activities such as oil changes or washing/cleaning existing equipment.

For more information on maintenance and sustainment costs, see the program-specific NOFO.

3.4. Management and Administration

M&A costs are for activities directly related to the management and administration of the award, such as financial management, reporting, and program and financial monitoring. M&A costs are not operational costs, they are the necessary costs incurred in direct support of the grant or as a result of the grant and should be allocated across the entire lifecycle of the grant. Characteristics of M&A expenses can include the following: 1) direct costs that are incurred to administer a particular federal award; 2) identifiable and unique to each federal award; 3) charged based on the activity performed for that federal award; and 4) not duplicative of the same costs that are included in the approved Indirect Cost Rate Agreement, if applicable.

Some examples of M&A costs include grants management training for M&A staff, equipment and supplies for M&A staff to administer the grant award, travel costs for M&A staff to attend conferences or training related to the grant program, travel costs for the M&A staff to conduct subrecipient monitoring, contractual services to support the M&A staff with M&A activities, and auditing costs related to the grant award to the extent required or permitted by statute or 2 C.F.R. Part 200. For additional program-specific M&A information, please refer to the relevant program-specific NOFO.

3.5. Procedures for Establishing Indirect Cost Rates

Indirect costs (per 2 C.F.R. § 200.1) are incurred for a common or joint purpose benefitting more than one cost objective, and not readily assignable to the cost objectives specifically benefitted, without effort disproportionate to the results achieved. Indirect costs are allowable under all programs covered by this manual. The requirements and procedures for establishing indirect cost rates are the same for all the preparedness programs covered by this manual. The process for establishing the indirect cost rate (per [2 C.F.R. § 200.414](#)) varies based on the type of entity and the amount of funding they receive:

Preparedness Grants Manual

- If the entity is a non-governmental entity (e.g., Institutions of Higher Education/hospital, nonprofit organization, etc.), and is a subrecipient, indirect cost rate procedures are outlined in [2 C.F.R. § 200.332\(a\)\(4\)](#) and Appendices III, IV, IX to Part 200. These types of entities may either use the de minimis rate or negotiate a rate with the pass-through entity.
- If the subrecipient is a state or local governmental entity, indirect cost rate procedures are established in [Appendix VII to Part 200](#).
 - Per Paragraph D.1.b. of Appendix VII, state or local governmental entities receiving grant funds must develop an indirect cost rate proposal.
 - If the state or local entity receives more than \$35 million in grant funding in a fiscal year, the proposal must be approved by the cognizant agency.
 - If a state or local entity receives \$35 million or less in grant funding in a fiscal year, they must develop an indirect cost rate proposal, but that indirect cost rate proposal does *not* need to be approved by the cognizant agency.
- If a state or local governmental entity wants to use the de minimis rate (instead of developing an indirect cost rate proposal), they can request a case-by-case exception from FEMA (per [2 C.F.R. § 200.102\(b\)](#)).

4. Administrative and National Policy Requirements

In addition to the requirements in this section and the applicable NOFO, FEMA may place specific terms and conditions on individual awards in accordance with 2 C.F.R. Part 200.

All grant recipients for FEMA grants and cooperative agreements are required to comply with the [DHS Standard Terms and Conditions](#).

The applicable DHS Standard Terms and Conditions will be those in effect at the time the award was made. The specific terms and conditions that will apply for the award will be clearly stated in the award package at the time of award.

4.1. Accessibility Compliance

Preparedness grant program recipients using funds to build or alter buildings must comply with the applicable accessibility requirements under their local building codes, as well as the [Section 504 Rehabilitation Act of 1973, 29 U.S.C. § 794](#), the [Architectural Barriers Act of 1968 \(ABA\)](#), and the [Americans with Disabilities Act \(ADA\), 42 U.S.C. §§ 12101 et seq.](#), to ensure individuals with disabilities have access to such buildings. State and local governments are required to provide qualified individuals with disabilities equal access to their programs, services, or activities, unless doing so would fundamentally alter the nature of their programs, services or activities or would impose an undue burden. Accessibility standards under the ABA and ADA are highly similar. Additional information regarding compliance with the ABA is available at [Chapter 1: Using the ABA Standards](#) on [access-board.gov](#).

4.2. Ensuring the Protection of Civil Rights

As the Nation works toward achieving [the Goal](#), it is important to continue to protect the civil rights of individuals. Recipients must carry out their programs and activities, including those related to the building, sustainment, and delivery of core capabilities, in a manner that respects and ensures the protection of civil rights for protected populations.

Federal civil rights statutes, such as Section 308 of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act), Section 504 of the Rehabilitation Act of 1973, and Title VI of the Civil Rights Act of 1964, Age Discrimination Act, along with DHS and FEMA regulations, prohibit discrimination on the basis of race, color, national origin, sex, religion, age, disability, limited English proficiency, or economic status in connection with programs and activities receiving [federal financial assistance](#) from FEMA as applicable.

Recipients must complete the [DHS Civil Rights Evaluation Tool](#) within 30 days of receiving the first award that fiscal year, *not for every award*. After initial submittal, an updated submission is due once every two years during which a recipient has an active award. Information about this requirement and a fuller list of the civil rights provisions that apply to recipients can be found in the [DHS Standard Terms and Conditions](#). Additional information on civil rights provisions is available at the [Civil Rights Resources for Recipients of DHS Financial Assistance](#) page on DHS.gov and the [Office of Equal Rights](#) page on FEMA.gov.

Subrecipients are not required to complete or submit the DHS Civil Rights Evaluation tool. However, subrecipients have the same obligations as their primary recipients to comply with applicable civil rights requirements and should follow their primary recipient's procedures regarding the submission of civil rights information.

Monitoring and oversight requirements in connection with recipient compliance with federal civil rights laws are also authorized pursuant to 44 C.F.R Part 7.

In accordance with civil rights laws and regulations, recipients and subrecipients must ensure the consistent and systematic fair, just, and impartial treatment of all individuals, including individuals who belong to underserved communities that have been denied such treatment. A full list of Civil Rights Authorities at FEMA can be found at the [External Civil Rights Division](#) page on FEMA.gov.

Recipients and subrecipients (or representatives of such parties) who believe that discrimination has occurred in awarding or receiving FEMA financial assistance may file a complaint with the Office of Equal Rights (OER) at FEMA-CivilRightsOffice@fema.dhs.gov. A complaint must be filed no later than 180 days from the date of the alleged discrimination unless the filing deadline is extended by the Director of the OER or their designee.

4.3. Disability Integration

Pursuant to Section 504 of the Rehabilitation Act of 1973, recipients of FEMA financial assistance must ensure that their programs and activities do not discriminate against otherwise qualified individuals with disabilities.

Preparedness grant recipients should engage with the whole community to advance individual and community preparedness and to work as a nation to build and sustain resilience. In doing so, recipients should consider the needs of individuals with disabilities into the activities and projects funded by the grant.

FEMA expects that the integration of the needs of people with disabilities will occur at all levels, including planning; alerting, notification, and public outreach; training; purchasing of equipment and supplies; protective action implementation; and exercises/drills.

Section 508 of the Rehabilitation Act of 1973, 29 U.S.C. § 794d, requires federal agencies to provide individuals with disabilities equal access to electronic information and data comparable to those who do not have disabilities. Although Section 508 does not impose requirements on federally-funded recipients, we encourage recipients to use Section 508 best practices to ensure that persons with disabilities have equal access to web-based products/services. For more information, see the [Accessibility of State and Local Government Websites to People with Disabilities](#) page on ADA.gov.

The following are examples that demonstrate the integration of the needs of people with disabilities in carrying out FEMA awards:

- Include representatives of organizations that work with/for people with disabilities on planning committees, work groups and other bodies engaged in development and implementation of the grant programs and activities.
- Hold all activities related to the grant in locations that are accessible to persons with physical disabilities to the extent practicable.
- Acquire interpretation services appropriate for the population being served, including American Sign Language or Puerto Rican Sign Language, that provide public information across the community and in shelters.
- Ensure shelter-specific grant funds are in alignment with FEMA's [Guidance on Planning for Integration of Functional Needs Support Services in General Population Shelters](#).

- If making alterations to an existing building to a primary function area utilizing federal funds, complying with the most recent codes and standards, and making path of travel to the primary function area accessible to the greatest extent possible.
- Implement specific procedures used by public transportation agencies that include evacuation and passenger communication plans and measures for individuals with disabilities.
- Identify, create, and deliver training to address any training gaps specifically aimed toward whole-community preparedness. Include and interact with individuals with disabilities, aligning with the designated program capability.
- Establish best practices in inclusive planning and preparedness that consider physical access and information access. Examples of effective communication access for individuals with disabilities include providing auxiliary aids and services such as sign language interpreters and materials in Braille or alternate formats.

FEMA grant recipients can fund projects toward the resiliency of the whole community, including people with disabilities, such as training, outreach, and safety campaigns, provided that the project aligns with the applicable NOFO, this manual, the applicable chapter to this manual, and the terms and conditions of the award. For specific guidelines on funding a disability inclusive project, please refer to the relevant NOFO.

4.4. Language Access

As per [FEMA Policy #256-23-001, Language Access](#), personnel shall take reasonable steps to provide individuals with limited English proficiency (LEP) with meaningful access to all programs or activities conducted both by FEMA and by entities receiving funding from FEMA, including grant recipients. This policy is based upon the principle that it is the responsibility of FEMA—not the LEP individual—to take reasonable steps to ensure communications are not impaired because of the limited English proficiency of the individual.

The following are examples that demonstrate the integration of the needs of LEP individuals in carrying out FEMA awards:

- Establish best practices in inclusive planning and preparedness that consider language access for LEP individuals.

4.5. Environmental Planning and Historic Preservation Compliance

FEMA must consider the effects of its actions on the environment and historic properties to ensure that all activities and programs funded by FEMA, including grant-funded projects, comply with federal Environmental Planning and Historic Preservation (EHP) regulations, laws, and Executive Orders (EO), as applicable.

Recipients and subrecipients proposing projects that have the potential to impact the natural or built environment, including, but not limited to, the construction of communication towers; modification or renovation of existing buildings, structures, and facilities; new construction, including replacement or relocation of facilities; and some training activities, must participate in the FEMA EHP review process. The EHP review process involves the submission of a detailed project description along with any supporting documentation requested by FEMA to determine whether the proposed project has the potential to impact environmental resources including, but not limited to, threatened or

endangered species and historic properties; and identify mitigation measures and/or alternative courses of action that may lessen any impact to those resources. FEMA may recommend mitigation measures and/or alternative courses of action to lessen any impact to environmental resources and bring the project into compliance with EHP requirements.

In some cases, FEMA is also required to consult with other regulatory agencies and the public to complete the review process. The EHP review process must be completed before funds are released to carry out the proposed project; otherwise, FEMA may not be able to fund the project due to noncompliance with EHP laws, EOs, regulations, and policies.

DHS and FEMA EHP policy is found in directives and instructions available on [Environmental and Historic Preservation Guidance for FEMA Grant Applications](#) page on FEMA.gov, which includes documents regarding EHP responsibilities and program requirements, including implementation of the National Environmental Policy Act and other EHP laws, regulations, and EOs. DHS and FEMA EHP policy is also found in the [EHP Directive & Instruction](#).

An [EHP Screening Form](#) and supporting documentation for preparedness projects requiring EHP review should be submitted to gpdehpinfo@fema.dhs.gov and your assigned Preparedness Officer. Additionally, all recipients under this funding opportunity are required to comply with the FEMA EHP Policy Guidance, [FEMA Policy #108-023-1, Grant Programs Directorate Environmental and Historic Preservation Policy Guidance](#).

4.5.1. CONSTRUCTION AND RENOVATION

All construction and renovation projects require EHP review. Recipients and subrecipients are encouraged to have completed as many steps as possible for a successful EHP review in support of their proposal for funding (e.g., coordination with their State Historic Preservation Office to identify potential historic preservation issues and to discuss the potential for project effects, compliance with all state and local EHP laws and requirements). Projects for which the recipient believes an Environmental Assessment (EA) may be needed, as defined in [DHS Instruction Manual 023-01-001-01, Revision 01](#), [FEMA Directive 108-1](#), and [FEMA Instruction 108-1-1](#), must also be identified to the FEMA HQ Preparedness Officer within 6 months of the award and completed EHP review materials must be submitted no later than 12 months before the end of the POP. [EHP policy guidance](#) and the [EHP Screening Form](#) can both be found on FEMA.gov. EHP review materials should be sent to gpdehpinfo@fema.dhs.gov.

Refer to the program-specific NOFO for information on construction and renovation allowability and restrictions.

Construction and Floodplains

All FEMA actions, including grant-funded actions, must comply with National Flood Insurance Program (NFIP) criteria or any more restrictive federal, state, or local floodplain management standards or building codes (44 C.F.R. § 9.11(d)(6)).

All FEMA-funded non-critical actions in 1% annual chance floodplains (also known as 100-year floodplains) that involve new construction or substantial improvement of structures must be elevated, at a minimum, to the lower of:

- Two feet above the 1% annual chance flood elevation (also known as the base flood elevation), in accordance with the Federal Flood Risk Management Standard (FFRMS) FVA; or

- The 0.2% annual chance flood elevation. Where 0.2% annual chance flood elevations are not available, such actions must be elevated to at least two feet above the 1% annual chance flood elevation.

All FEMA-funded critical actions in 1% annual chance floodplains or 0.2% annual chance floodplains (also known as 500-year floodplains) that involve new construction or substantial improvement of structures must be elevated, at a minimum, to the higher of:

- Three feet above the 1% annual chance flood elevation (also consistent with the FVA); or
- The 0.2% annual chance flood elevation. Where 0.2% annual chance flood elevations are not available, such actions must be elevated to at least three feet above the 1% annual chance flood elevation.

See [EO 11988, Floodplain Management](#), as amended by [EO 13690, Establishing a Federal Flood Risk Management Standard and a Process for Further Soliciting and Considering Stakeholder Input](#). For additional information, see the [Guidelines for Implementing EO 11988 and EO 13690](#).

4.5.2. ENVIRONMENTAL JUSTICE

[EO 14096, Revitalizing our Nation's Commitment to Environmental Justice for All](#) and [EO 14008, Tackling the Climate Crisis at Home and Abroad](#) rearticulate and strengthen the environmental justice framework articulated in 1994 in [EO 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations](#). Specifically, Section 1 of EO 14096 states that: “To fulfill our Nation’s promises of justice, liberty, and equality, every person must have clean air to breathe; clean water to drink; safe and healthy foods to eat; and an environment that is healthy, sustainable, climate-resilient, and free from harmful pollution and chemical exposure. Restoring and protecting a healthy environment—wherever people live, play, work, learn, grow, and worship—is a matter of justice and a fundamental duty that the Federal Government must uphold on behalf of all people.”

Some projects funded by FEMA’s grant programs could have environmental justice impacts. New construction (including communication towers), renovation, demolition, and relocation of buildings and other structures may have disproportionately high and adverse effects on minority and low-income populations. FEMA acknowledges the important role that FEMA recipients and subrecipients play in advancing and achieving environmental justice by identifying low-income and minority populations within a proposed project’s affected area as early as possible, assessing a project’s impact on existing environmental and human health burdens to account for cumulative effects, and taking steps to mitigate any harmful impacts.

FEMA will review and evaluate potential projects for environmental justice concerns. If FEMA determines that a proposed project would have a disproportionately high and adverse effect on minority or low-income populations, FEMA will consult with recipients and subrecipients to discuss the feasibility of revising the scope of work to avoid these adverse impacts, or otherwise applying mitigation measures to alleviate these effects. In addition, FEMA may work with other recipients and subrecipients to solicit public input on the proposed projects for a more informed decision-making process. To learn more about how FEMA environmental justice responsibilities might affect your project, go to the [EO 12898: Environmental Justice page on FEMA.gov](#).

4.5.3. COMMUNICATION TOWERS

For the purposes of the limitations on funding levels only, communication towers are not considered construction. When applying for construction funds, including communications towers, recipients must submit evidence of approved zoning ordinances, architectural plans, and any other locally required planning permits at the time of application.

All construction of communication towers requires EHP review. When applying for funds to construct communication towers, recipients and subrecipients must submit evidence that the Federal Communication Commission's Section 106 of the National Historic Preservation Act, Pub. L. No. 89-665, as amended, review process has been completed and submit all documentation resulting from that review to FEMA with an EHP Screening Form and supporting materials for EHP review. Recipients and subrecipients are encouraged to have completed as many steps as possible for a successful EHP review in support of their proposal for funding (e.g., coordination with their state, tribal, or territorial Historic Preservation Office to identify potential historic preservation issues and to discuss the potential for project effects, compliance with all state and local EHP laws and requirements). Projects for which an EA may be needed, as defined in [DHS Instruction Manual 023-01-001-01, Revision 01](#), [FEMA Directive 108-1](#), and [FEMA Instruction 108-1-1](#), must also be identified to the FEMA HQ Preparedness Officer within 6 months of the award. Completed EHP review materials must be submitted no later than 12 months before the end of the POP. [EHP policy guidance](#) and the [EHP Screening Form](#) can both be found on FEMA.gov. EHP review materials should be sent to gpdehpinfo@fema.dhs.gov.

4.5.4. HAZARD RESISTANT BUILDING CODES

Hazard-resistant building codes are a foundational element of a more resilient nation, safeguarding communities and lives against natural disasters, with an estimated \$11:1 return on investment. The adoption, enforcement and application of modern building codes mitigates community vulnerabilities, reduces disaster recovery costs, and strengthens nationwide capability. FEMA is working to promote and support building codes in all areas of its work in support of the multi-agency National Initiative to Advance Building Codes. In the interest of building a stronger, more resilient nation, FEMA encourages all grant recipients and subrecipients to meet current published editions of relevant consensus-based building codes, specifications and standards, and to exceed them where feasible.

4.6. Davis-Bacon Act Compliance

Recipients using funds for construction projects must comply with the Davis-Bacon Act (codified as amended at 40 U.S.C. §§ 3141 *et seq.*). See 6 U.S.C. § 609(b)(4)(B) (cross-referencing 42 U.S.C. § 5196(j)(9), which cross-references Davis-Bacon). Recipients must ensure that their contractors or subcontractors for construction projects pay workers no less than the prevailing wages for laborers and mechanics employed on projects of a character similar to the contract work in the civil subdivision of the state in which the work is to be performed. Additional information regarding compliance with the Davis-Bacon Act, including Department of Labor (DOL) wage determinations, is available from the [Davis-Bacon and Related Acts](#) page on DOL.gov.

4.7. National Incident Management System Implementation

National Incident Management System (NIMS) guides all levels of government, nongovernmental organizations (NGO), and the private sector to work together to prevent, protect against, mitigate, respond to, and recover from incidents. NIMS provides stakeholders across the whole community with the shared vocabulary, systems, and processes to successfully deliver the capabilities described

in the National Preparedness System. As recipients and subrecipients of federal preparedness (ND) grant awards, jurisdictions and organizations must achieve, or be actively working to achieve, all the NIMS Implementation Objectives. These objectives and implementation information can be found on the [NIMS](#) and [NIMS Implementation and Training](#) pages on FEMA.gov.

Emergency management and incident response activities require carefully managed resources (personnel, teams, facilities, equipment, and/or supplies) to meet incident needs. NIMS defines a national, interoperable approach for sharing resources, coordinating, and managing incidents, and communicating information. Incident management refers to how incidents are managed across all homeland security activities, including prevention, protection, mitigation, response, and recovery. Utilization of the standardized resource management concepts such as typing, credentialing, and inventorying promote a strong national mutual aid capability needed to support the delivery of core capabilities. Additional information on resource management, NIMS resource typing definitions, job titles, and position qualifications is available at the [NIMS Components – Guidance and Tools](#) page on FEMA.gov. Please also see the relevant NOFOs for additional requirements regarding NIMS implementation for specific programs.

4.7.1. NIMS GUIDANCE FOR THE NATIONAL QUALIFICATION SYSTEM

FEMA developed the [NIMS Guideline for the National Qualification System](#) (NQS) to describe national credentialing standards and to provide written guidance regarding the use of those standards. This guideline describes credentialing and typing processes and identifies tools that Federal Emergency Response Officials and emergency managers at all levels of government may use both routinely and to facilitate multijurisdictional coordinated responses. **Starting in FY 2023, EMPG Program recipients are required to use EMPG Program funds to support NQS implementation efforts.**

The NQS doctrine promotes interoperability by establishing a common language for defining job titles and by enabling jurisdictions and organizations to plan for, request, and have confidence in the capabilities of personnel deployed for disasters and emergencies from other entities through mutual aid agreements and compacts. Following the concepts and processes in this Guideline will enhance national preparedness by expanding the network of qualified incident management and support personnel who can be deployed nationwide.

4.8. SAFECOM Guidance Compliance

Lessons learned from recent major disasters, unplanned events, and full-scale exercises have identified a need for greater coordination of emergency communications among senior elected officials, emergency management agencies, and first responders at all levels of government. Federal responders arriving on the scene of a domestic incident are not always able to communicate with SLTT response agencies, as well as key government officials. State and local first responders sometimes experience similar problems, particularly when the incident requires a multi-agency, regional response effort or when primary communications capabilities fail. This lack of operability and interoperability between federal and SLTT agencies—further complicated by problems with communications survivability and resilience—has hindered the ability to share critical information, which can compromise the unity-of-effort required for an effective incident response.

Departments and agencies at all levels of government have identified a need for improvement in several high-priority areas, including Governance, Planning, Training and Exercises, Operational Coordination, and Technology. In addition, communications resilience and continuity should be viewed as a critical component within each of these areas. These priorities are explained in detail in Section 2 of the [SAFECOM Guidance on Emergency Communications Grants \(SAFECOM Guidance\)](#).

By addressing these priorities, which are reflective of proven best practices, emergency communications can be significantly improved at all levels of government. The end goal is to ensure operable, interoperable, and resilient communications that maintain a continuous flow of critical information, under all conditions, among multi-jurisdictional and multi-disciplinary emergency responders, command posts, agencies, critical infrastructure sectors, and government officials for the duration of an emergency response operation, and in accordance with NIMS and the [National Emergency Communications Plan](#), which describes goals and objectives for improving emergency communications nationwide.

To help meet this goal, the SAFECOM Guidance outlines requirements for grant applications, including alignment to national, regional, and state communications plans (e.g., National Emergency Communications Plan (NECP), Statewide Communication Interoperability Plan (SCIP), Tactical Interoperability Communications Plan (TICP), FEMA Regional Emergency Communications Plan (RECP)), project coordination, and technical standards for emergency communications technologies. SCIPs define the current and future direction for interoperable and emergency communications within a state or territory, while TICPs are designed to allow urban areas, counties, regions, states/territories, tribes, or federal departments/agencies to document interoperable communications governance structures, technology assets, and usage policies and procedures. In addition, FEMA's formal planning process has produced 10 RECPs and their associated state and/or tribal/territorial annexes that identify emergency communications capability shortfalls and potential resource requirements. Grant recipients are encouraged to leverage these planning resources as a source of input and reference for all emergency communications grant applications and investment justifications (IJ).

In addition, FEMA formally recognizes several statewide emergency communications governance bodies (e.g., Statewide Interoperability Coordinator (SWIC), Statewide Interoperability Governance Board (SIGB), Statewide Interoperability Executive Committee (SIEC), FirstNet State Single Point of Contact (SPOC)), and strongly encourages grant recipients to closely coordinate with these entities when developing an emergency communications investment to ensure projects support the state or territory's strategy to improve their communications capabilities with the goal of achieving fully operable, interoperable, and resilient communications. In addition, recipients should work with public and private entities, and across jurisdictions and disciplines, to demonstrate engagement with the Whole Community in accordance with [Presidential Policy Directive-8 \(PPD-8\)](#).

For regional, cross-border initiatives, FEMA requires recipients to coordinate projects with national level emergency communications coordination bodies, such as the National Council of Statewide Interoperability Coordinators (NCSWIC) and the Regional Emergency Communications Coordination Working Groups (RECCWG). The NCSWIC promotes and coordinates state-level activities designed to ensure the highest level of public safety communications across the nation. RECCWGs are congressionally mandated planning and coordination bodies located in each FEMA Region and provide a collaborative forum to assess and address the survivability, sustainability, operability, and interoperability of emergency communications systems at all levels of government. Grant-funded investments that are coordinated with these bodies will help ensure that federally funded emergency communications investments are interoperable and support national policies.

All entities using preparedness grant funding to support emergency communications investments are required to comply with the [SAFECOM Guidance](#). The SAFECOM Guidance provides current information on emergency communications policies, eligible costs, best practices, and technical standards for SLTT recipients investing federal funds in emergency communications projects. It is also designed to promote and align with the NECP. Compliance with the SAFECOM Guidance helps ensure that federally funded investments are compatible, interoperable, resilient, and support national goals and objectives for improving emergency communications. Applicants should use the

SAFECOM Guidance during planning, development, and implementation of emergency communications projects and in conjunction with other planning documents (e.g., SCIPs). Specifically, Appendix D of the SAFECOM Guidance contains compliance instructions for FEMA grant recipients.

Emergency communications investments also will be reviewed jointly by FEMA and CISA to verify compliance with SAFECOM Guidance. FEMA will coordinate directly with the recipient on any compliance concerns and will provide TA as necessary to help ensure full compliance.

4.9. Resilient Communications Guidance

The risk imposed by the reliance on communication systems by government and the private sector can be reduced by understanding dependencies, analyzing effects, and taking action. Entities planning to use preparedness grant funding for communications investments are encouraged to take a Whole Community Approach and work with state emergency management agencies, SWICs, SIGBs, and appropriate stakeholders at the regional and SLTT levels to:

- Plan communication around the whole community to meet everyone's needs.
- Establish robust, resilient, reliable, and interoperable communications capabilities. Account for the mission impact of communication system disruptions in your planning;
- Ensure mission-related communications (voice, video, data, and network security requirements) are adequately planned for and understood. It is important to maintain current documentation of your communication systems architecture and perform regular audits. Your ability to continue operations is dependent on the availability of and access to communications systems with sufficient resiliency, redundancy, and accessibility to perform essential functions and provide critical services during a disruption;
- Ensure critical communication systems connectivity among key government leadership, internal elements, other supporting organizations, and the public under all conditions. As such, organizations should ensure current copies of vital records, including electronic files and software, are backed-up and maintained off-site;
- Ensure all communications systems/networks are traced from end to end to identify all Single Points of Failure (SPF). In doing so, recipients should work with communication service providers to add redundancy at key critical infrastructure facilities as needed;
- Ensure key communication systems resiliency through:
 - Ensuring availability of backup systems;
 - Ensuring diversity of network element components and routing;
 - Ensuring geographic separation of primary and alternate transmission media;
 - Ensuring availability of back-up power sources;
 - Ensuring availability and access to systems that are not dependent on commercial infrastructure;
 - Maintaining spares for designated critical communication systems; and

- Working with commercial suppliers to remediate communication SPF.
- All communications system owners are encouraged to address the following issues:
 - Integrate communications needs into continuity planning efforts by incorporating Primary, Alternate, Contingency, and Emergency (PACE) methodology, and vulnerability mitigation options to ensure uninterrupted communications support;
 - Establish a cybersecurity plan that includes continuity of a communications component such as Radio Frequency (RF)-based communications that do not rely on public infrastructure;
 - Maintain communications capabilities to ensure their readiness when needed;
 - Frequently train and exercise personnel required to operate communications capabilities;
 - Test and exercise communications capabilities; and
 - Consider Electromagnetic Pulse (EMP) protective measures for communications systems and emergency backup power where practical.

CISA Emergency Communication Division enhances public safety interoperable communications at all levels of government and conducts extensive, nationwide outreach to support and promote the ability of emergency response providers and relevant government officials to communicate in the event of natural disasters, acts of terrorism, and other hazards. CISA provides plans, resources, and training to support operable and interoperable emergency communications for first responders.

4.10. FirstNet

The Middle-Class Tax Relief and Job Creation Act of 2012, Pub. L. No. 112-96, as amended (codified in part at 47 U.S.C. §§ 1401-1473) established the First Responder Network Authority (hereinafter FirstNet Authority) as an independent authority within the National Telecommunications and Information Administration (NTIA). 47 U.S.C. § 1424(a). The FirstNet Authority's statutory mission is to establish a nationwide public safety broadband network (FirstNet). 47 U.S.C. § 1426(b). FirstNet uses the 700 MHz D block spectrum to provide Long-Term Evolution (LTE)-based broadband services and applications to public safety entities. 47 U.S.C. §§ 1401(2), 1421(a). FirstNet became operational in March 2018 and is based on a single, national network architecture that evolves with technological advances and consists of a physically separate evolved packet core (EPC) network and radio access networks (RANs).

FirstNet provides public safety entities with mission-critical broadband data capabilities and services including, but not limited to messaging, image sharing, video streaming, group text, voice, data storage, application, location-based services, and Quality of Service, Priority, and Preemption. Public safety entities seeking to enhance their operational capabilities using broadband technology may seek grant funding from appropriate programs to support the following:

- Planning for integration of information technology (IT) infrastructure, software, and site upgrades necessary to connect to FirstNet;
- Handheld broadband devices including smartphones, feature phones, tablets, wearables, push-to-talk (PTT) devices;
- Vehicle-mounted or otherwise field operated data devices, such as ruggedized laptops;

- Network access devices, including portable Wi-Fi devices, Universal Serial Bus (USB) modems/dongles, trunk-mounted modems, routers;
- Customer-Owned and Managed (COAM) broadband deployable equipment, enabling public safety to own and dispatch coverage expansion or capacity enhancement equipment within their jurisdiction;
- Broadband device accessories that enable efficient and safe public safety operations such as headsets, belt clips, earpieces, remote Bluetooth sensors, ruggedized cases;
- Subscriber Identification Modules (SIMs)/Universal Integrated Circuit Cards (UICCs) to allow public safety users to update existing devices to operate on public safety prioritized services; and
- One-time purchase and subscription-based applications for public safety use which could include, among several other options, enterprise mobility management (EMM), mobile device management (MDM), mobile Virtual Private Network (VPN), identity services, or cloud service tools.

As FirstNet is built out in all 56 states and territories, and coverage and capacity for first responders expands, recipients are strongly encouraged to coordinate with SWIC and FirstNet on the planning, deployment timelines, and operational availability of the network deployment within a specific state or territory, and to ensure that the project does not conflict with network planning efforts and complies with all technical requirements. FirstNet requires participating agencies to demonstrate a subscription to public safety-prioritized broadband services to purchase FirstNet broadband devices or applications. Recipients must coordinate with FirstNet in advance of any strategic acquisition of broadband LTE equipment to ensure that purchases adhere to all applicable standards for public safety entities. Recipients with questions on FirstNet should contact info@firstnet.gov. Please also refer to the most recent [SAFECOM Guidance](#) for additional guidance.

4.11. Department of Homeland Security/FEMA Communications Support Services

CISA and FEMA offer a variety of TA and other support services to assist state and local entities in their efforts to comply with the above requirements, including the SAFECOM Guidance, with the goal of ensuring interoperable and resilient emergency communications. A summary of DHS support services is provided below. Grant recipients are encouraged to refer to the respective websites for additional information.

4.11.1. CYBERSECURITY AND INFRASTRUCTURE SECURITY AGENCY SUPPORT

CISA assists agencies through a myriad of services, including direct TA and training provided at no cost to the jurisdiction. The TA offerings include (but are not limited to):

- Coordinated statewide governance (e.g., State Mapping Tool, Interoperable Communications Reference Guides);
- Comprehensive emergency communications planning (e.g., SCIPs, TICPs, and Field Operations Guides);
- Next Generation 911 planning and implementation;

- Data operability and interoperability;
- Alerts and warnings;
- Broadband deployment;
- Cybersecurity education and awareness; and
- Communications Unit (COMU) planning and procedures.

Information on these services is available at the [CISA Interoperable Communications Technical Assistance Program \(ICTAP\) Resources](#) page on CISA.gov.

4.11.2. FEMA DISASTER EMERGENCY COMMUNICATIONS DIVISION SUPPORT

FEMA Disaster Emergency Communications (DEC) deploys, installs, operates, maintains, and protects telecommunications, logistics, and operations assets in support of planned special events and in response to disasters, assisting citizens and first responders.

DEC provides DEC through six geographically dispersed Mobile Emergency Response Support (MERS) detachments and a pre-positioned fleet of Mobile Communications Office Vehicles (MCOV). DEC also assists SLTT entities in mitigating their DEC risks and requirements to support life-saving efforts, protect property, and coordinate response and recovery operations. DEC can assist SLTT entities in mitigating their DEC risks and requirements to support life-saving efforts, protect property, and coordinate response and recovery operations. For more information about how DEC can provide stakeholder support in these areas, see the [DEC](#) page on FEMA.gov.

4.11.3. FEMA NATIONAL PREPAREDNESS DIRECTORATE SUPPORT

National Preparedness Directorate (NPD) provides training, exercises, and TA to SLTT stakeholders that support operational and emergency communications. Descriptions and resources specific to operational communication are available on FEMA.gov's [Core Capability Development Sheets](#) page within the Response Mission Area and include the following information to support jurisdictions:

- Description of the operational communications core capability;
- Training for building and sustaining operational communication with specific course titles:
 - Trainings can also be found at [National Training and Education Division \(NTED\)](#) page on [firstrespondertraining.gov](#).
- Example capability targets to complete a Threat and Hazard Identification and Risk Assessment (THIRA):
 - Help in developing targets can be found at [Unified Reporting Tool \(URT\)-Info](#) page on FEMA's Preparedness Toolkit or requested at FEMA-SPR@fema.dhs.gov.
- Tools to validate capabilities through exercises:
 - TA and support from subject-matter experts can be requested through the [Exercises](#) page on FEMA.gov.

4.11.4. FEMA OFFICE OF NATIONAL CONTINUITY PROGRAMS SUPPORT

The Office of National Continuity Program's (ONCP) support services focus on holistic continuity planning, of which communications continuity is an important component. Currently, continuity communications training and TA is limited to the FEMA National Radio System (FNARS) and the Integrated Public Alerts & Warning System (IPAWS) and is delivered either on an ad hoc basis at the request of the state entity, through a FEMA Region, or via a requirement for terms of use. Entities interested in ONCP support services should contact FEMA-CGC@fema.dhs.gov or consult [ONCP's Continuity Resources Toolkit](#) page on FEMA.gov.

5. Post-Award Management and Implementation

5.1. Reporting

Recipients are required to submit various financial and programmatic reports as a condition of award acceptance. Future awards and funds drawdown may be withheld if these reports are delinquent.

Consultants or contractors are not permitted to be the AOR or the Signatory Authority (SA) of the recipient. The AOR, as the Authorized Official for the award, is responsible for submitting programmatic and financial performance reports, accepting award packages, signing assurances and certifications, and submitting award amendments.

5.2. Federal Financial Reporting Requirements

5.2.1. FEDERAL FINANCIAL REPORT

Recipients must report obligations and expenditures to FEMA on a quarterly basis through the Federal Financial Report (FFR) form, also known as Standard Form 425 (SF-425). Recipients may review the FFR at [Post-Award Reporting Forms](#) page on Grants.gov. Recipients must file the FFR electronically using FEMA GO. Note that recipients for awards covered in this manual made before FY 2024 must file the FFR using the Payment and Reporting Systems (PARS).

Financial Reporting Periods and Due Dates

An FFR must be submitted quarterly throughout the POP, including partial calendar quarters, as well as in periods where no grant award activity occurs. The final FFR is due within 120 days after the end of the POP. Future awards and fund drawdowns may be withheld if these reports are delinquent, demonstrate a lack of progress, or are insufficient in detail.

Table 3 shows the reporting periods and due dates for the FFR, except for the final FFR due at 120 days after the end of the POP for purposes of closeout.

Table 3: FFR Reporting Periods and Due Dates

FFR Reporting Period	Report Due Date
Oct. 1–Dec. 31	Jan. 30
Jan. 1–March 31	April 30
April 1–June 30	July 30
July 1–Sept. 30	Oct. 30

Because of a system limitation, if at the end of the POP for awards made prior to FY 2023 a recipient still has funds to draw down, PARS requires an FFR be submitted within 30 days of the end of the POP to access those funds. In that case, the recipient will need to submit an FFR within 30 days of the end of the POP in addition to the final FFR within 120 days of the end of the POP. All other

recipients who do not need to draw down funds after the end of the POP are only required to submit the final FFR within 120 days after the end of the POP.

5.3. Program Performance Reporting Requirements

5.3.1. PERFORMANCE PROGRESS REPORTS

Recipients are responsible for providing performance reports to FEMA on a biannual (twice a year) or quarterly (four times a year) basis via FEMA GO. The Performance Progress Reports (PPR) should include the following:

- A brief narrative of overall project(s) status;
- A summary of project expenditures; and
- A description of any potential issues that may affect project completion.

For the **EMPG Program only**, recipients are responsible for providing performance reports to FEMA on a quarterly (four times a year) basis via FEMA GO. As explained in Section 12.10.1 “Standardized Programmatic Reporting for the EMPG Program,” the quarterly PPRs must use or be based on the approved EMPG Program Work Plan template provided in the EMPG Program NOFO.

Program Performance Reporting Periods and Due Dates

The biannual PPRs are due no later than 30 days after the end of the reporting period. Table 4 shows the reporting periods and due dates for biannual PPRs.

Table 4: Biannual PPR Reporting Periods and Due Dates

Reporting Period	Report Due Date
Jan. 1–June 30	July 30
July 1–Dec. 31	Jan. 30

Program Performance Reporting Periods and Due Dates for the Emergency Management Performance Grant Program

The quarterly PPRs are due no later than 30 days after the end of the quarter. Table 5 shows the reporting periods and due dates for the quarterly PPRs for the EMPG Program only.

Table 5: Quarterly PPR Reporting Periods and Due Dates (EMPG Program)

Reporting Period	Report Due Date
Oct. 1 – Dec. 31	Jan. 30
Jan. 1 – March 31	April 30
April 1 – June 30	July 30

Reporting Period	Report Due Date
July 1 – Sept. 30	Oct. 30

5.4. Biannual Strategy Implementation Report

Applicable to the HSGP, THSGP, NSGP, and EMPG Program only.

In addition to the financial and performance progress reports, recipients are responsible for completing and submitting the Biannual Strategy Implementation Report (BSIR) through the FEMA GO system. For all HSGP, THSGP, NSGP, and EMPG Program awards made prior to FY 2024, the BSIR was completed in the Grants Reporting Tool.

The BSIR is due within 30 days after the end of the reporting period: July 30 for the reporting period of January 1 through June 30 (summer BSIR report); and January 30 for the reporting period of July 1 through December 31 (winter BSIR report). All required attributes of each project must be included. Updated obligations, expenditures, and significant developments must be provided within the BSIR to show the progress of implementation for every project as well as how expenditures support Planning, Organization, Equipment, Training, and Exercises. The first BSIR for a given fiscal year award will be due by January 30, or 30 days after the end of the first reporting period of the award. Subsequent BSIR reports will require recipients to report on a project-by-project basis.

Recipients also are responsible for completing and submitting a closeout BSIR. When an award's POP or the liquidation period ends in the middle of a reporting period, a traditional or "regular" BSIR must be submitted with full accounting of actual project information/expenditures before a Closeout BSIR can be created and submitted. Once FEMA approves the last "regular" BSIR, the Closeout BSIR can be created and submitted. Please contact your respective FEMA Preparedness Officer for questions regarding the BSIR.

5.5. Closeout Reporting Requirements

Within **120 days** after the end of the POP for the prime award or after an amendment has been issued to close out an award before the original POP ends, whichever occurs first, recipients must liquidate all financial obligations and submit the following documentation in FEMA GO:

1. The final request for payment, if applicable;
2. The final FFR;
3. The final PPR;
4. A qualitative narrative summary of the impact of those accomplishments throughout the entire POP submitted to the respective FEMA Preparedness Officer; and
5. Other documents required by program guidance, NOFOs, applicable program-specific chapters of this manual, terms and conditions of the award, or other FEMA guidance.

In addition, any recipient that issues subawards to any subrecipient is responsible for closing out those subawards as described in 2 C.F.R. § 200.344; subrecipients are still required to submit closeout materials within **90 days** of the subaward POP end date. When a subrecipient completes all closeout requirements, pass-through entities must promptly complete all closeout actions for subawards in time for the recipient to submit all necessary documentation and information to FEMA during the closeout of their prime award.

After the prime award closeout reports have been reviewed and approved by FEMA, a closeout notice will be completed to close out the grant. The notice will indicate the POP as closed, list any remaining funds that will be deobligated, and address the requirement of maintaining the award records for at least three years from the date of the final FFR. The record retention period may be longer than three years due to an audit, litigation, for equipment or real property used beyond the POP or other circumstances outlined in 2 C.F.R. § 200.334.

Recipients are responsible for refunding to FEMA any balances of unobligated cash that FEMA paid that are not authorized to be retained per 2 C.F.R. § 200.344(d).

5.6. Administrative Closeout

Administrative closeout is a mechanism for FEMA to unilaterally move forward with closeout of an award using available award information in lieu of final reports from the recipient per 2 C.F.R. § 200.344(h)-(i). It is a last resort available to FEMA, and **if FEMA needs to administratively close an award, this may negatively impact a recipient's ability to obtain future funding**. This mechanism can also require FEMA to make cash or cost adjustments and ineligible cost determinations based on the information it has, which may result in identifying a debt owed to FEMA by the recipient.

When a recipient is not responsive to FEMA's reasonable efforts to collect required reports needed to complete the standard closeout process, FEMA is required under 2 C.F.R. § 200.344(h) to start the administrative closeout process within the regulatory timeframe. FEMA will make at least three written attempts to collect required reports before initiating administrative closeout. If the recipient does not submit all required reports in accordance with 2 C.F.R. § 200.344, the relevant program NOFO, this manual, and the terms and conditions of the award, FEMA must proceed to administratively close the award with the information available within one year of the POP end date. Additionally, if the recipient does not submit all required reports within one year of the POP end date, per 2 C.F.R. § 200.344(i), FEMA must report in SAM.gov Responsibility/Qualification (R/Q) (previously known as the Federal Awardee Performance and Integrity Information System) the recipient's material failure to comply with the terms and conditions of the award.

If FEMA administratively closes an award where no final FFR has been submitted, FEMA uses that administrative closeout date in lieu of the final FFR submission date as the start of the three-year record retention period under 2 C.F.R. § 200.334.

In addition, if an award is administratively closed, FEMA may decide to impose remedies for noncompliance per 2 C.F.R. § 200.339, consider this information in reviewing future award applications, or apply special conditions to existing or future awards.

5.7. Disclosing Information per 2 C.F.R. § 180.335

This reporting requirement pertains to disclosing information related to government-wide suspension and debarment requirements. Before a recipient enters into a grant award with FEMA, the recipient must notify FEMA if it knows if it or any of the recipient's principals under the award fall under one or more of the four criteria listed at 2 C.F.R. § 180.335:

- Are presently excluded or disqualified;
- Have been convicted within the preceding three years of any of the offenses listed in 2 C.F.R. § 180.800(a) or had a civil judgment rendered against it or any of the recipient's principals for one of those offenses within that time period;

Preparedness Grants Manual

- Are presently indicted for or otherwise criminally or civilly charged by a governmental entity (federal, state, or local) with commission of any of the offenses listed in 2 C.F.R. § 180.800(a); or
- Have had one or more public transactions (federal, state, or local) terminated within the preceding three years for cause or default.

At any time after accepting the award, if the recipient learns that it or any of its principals falls under one or more of the criteria listed at 2 C.F.R. § 180.335, the recipient must provide immediate written notice to FEMA in accordance with 2 C.F.R. § 180.350.

5.8. Reporting of Matters Related to Recipient Integrity and Performance

Per 2 C.F.R. Part 200, Appendix I § F.3, the additional post-award reporting requirements in 2 C.F.R. Part 200, Appendix XII may apply to applicants who, if upon becoming recipients, have a total value of currently active grants, cooperative agreements, and procurement contracts from all federal awarding agencies that exceeds \$10 million for any period of time during the POP of an award under these funding opportunities.

Recipients that meet these criteria must maintain current information reported in SAM.gov R/Q about civil, criminal, or administrative proceedings described in paragraph 2 of Appendix XII at the reporting frequency described in paragraph 4 of Appendix XII.

6. Additional Information

6.1. Monitoring and Oversight

6.1.1. OVERVIEW

Per 2 C.F.R. § 200.337, FEMA, through its authorized representatives, has the right, at all reasonable times, to make site visits or conduct desk reviews to review project accomplishments and management control systems to evaluate award progress and to provide any required TA. During site visits or desk reviews, FEMA will review recipients' files related to the award. As part of any monitoring and program evaluation activities, recipients must permit FEMA, upon reasonable notice, to review grant-related records and to interview the organization's staff and contractors regarding the program. Recipients must respond in a timely and accurate manner to FEMA requests for information relating to the award.

Effective monitoring and oversight help FEMA ensure that recipients use grant funds for their intended purpose(s), verify that projects undertaken are consistent with approved plans, and ensure that recipients make adequate progress toward stated goals and objectives. Additionally, monitoring serves as the primary mechanism to ensure that recipients comply with applicable laws, rules, regulations, program guidance, and requirements. FEMA regularly monitors all grant programs both financially and programmatically in accordance with federal laws, regulations (including 2 C.F.R. Part 200), program guidance, and the terms and conditions of the award. All monitoring efforts ultimately serve to evaluate progress toward grant goals and proactively target and address issues that may threaten grant success during the POP.

FEMA staff will periodically monitor recipients to ensure that administrative processes, policies and procedures, budgets, and other related award criteria are meeting federal government-wide and FEMA regulations. Aside from reviewing quarterly financial and programmatic reports, FEMA may also conduct enhanced monitoring through desk-based reviews, onsite monitoring visits, or both. Enhanced monitoring will involve the review and analysis of financial compliance and administrative processes, policies, activities, and other attributes of each federal assistance award, and it will identify areas where the recipient may need TA, corrective actions, or other support.

Financial and programmatic monitoring are complementary processes within FEMA's overarching monitoring strategy that function together to ensure effective grants management, accountability, and transparency; validate progress against grant and program goals; and safeguard federal funds against fraud, waste, and abuse. Financial monitoring primarily focuses on statutory and regulatory compliance with administrative grant requirements, while programmatic monitoring seeks to validate and assist in grant progress, targeting issues that may be hindering project goals and ensuring compliance with the purpose of the grant and grant program. Both monitoring processes are similar in that they feature initial reviews of all open awards and in-depth monitoring of grants requiring additional attention.

Recipients and subrecipients who are pass-through entities are responsible for monitoring their subrecipients in a manner consistent with the terms of the federal award at 2 C.F.R. Part 200, including 2 C.F.R. § 200.332. This includes the pass-through entity's responsibility to monitor the activities of the subrecipient as necessary to ensure that the subaward is used for authorized purposes, in compliance with federal statutes, regulations, and the terms and conditions of the subaward, and that subaward performance goals are achieved.

In terms of overall award management, recipient and subrecipient responsibilities include—but are not limited to—accounting of receipts and expenditures, cash management, maintaining adequate financial records, reporting, and refunding expenditures disallowed by audits, monitoring if acting as a pass-through entity, other assessments and reviews, and ensuring overall compliance with the terms and conditions of the award or subaward, as applicable, including the terms of 2 C.F.R. Part 200.

6.1.2. FINANCIAL MONITORING OVERVIEW AND APPROACH

FEMA's approach to financial monitoring provides a standard monitoring framework that promotes consistent processes across all monitoring staff. There are four core components of the monitoring process:

1. **Monitoring Assessment:** Monitoring staff measure each grant's monitoring needs using a system of pre-determined evaluation criteria. The criteria help assess the recipient and potential challenges to the success of the grant award.
2. **Monitoring Selection and Scheduling:** Monitoring staff make selection and scheduling decisions in accordance with applicable statutory requirements, such as the Homeland Security Act of 2002, as amended (hereafter "HSA") and consider the results of the monitoring assessment process.
3. **Monitoring Activities:** Monitoring activities include cash analysis, desk reviews, and site visits. Grants Management Specialists are responsible for conducting quarterly or semi-annual reviews of all grants via cash analysis. Desk reviews and site visits are additional monitoring activities conducted on grants where the monitoring assessment process identified the need for additional monitoring and validated the use of FEMA resources for these activities.
4. **Post-Monitoring Actions:** Monitoring staff may follow up with recipients via post-monitoring actions based on the outcomes of monitoring activities. Post-monitoring actions include conducting additional monitoring; reviewing Corrective Action Plans (CAP) and monitoring the progress of CAP deliverables; documenting the resolution of identified corrective actions and issues; providing TA and recipient training; and debt collection.

In addition to the monitoring guidance outlined above, section 2022(a)(2)(A) of the HSA mandates the frequency of monitoring activities for applicable preparedness grants. The applicable section of the HSA reads as follows:

Not less than once every 2 years, the Administrator shall conduct, for each state and high-risk urban area receiving a grant administered by the Department, a programmatic and financial review of all grants awarded by the Department to prevent, prepare for, protect against, or respond to natural disasters, acts of terrorism, or other man-made disasters, excluding assistance provided under section 203, title IV, or title V of the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5133, 5170 et seq., and 5191 et seq.).

HSGP (including SHSP, UASI, and OPSG), NSGP, TSGP, PSGP, and the EMPG Program are subject to HSA monitoring requirements. The IPR Program, IBSGP, and THSGP are *not* subject to HSA monitoring requirements.

6.1.3. STANDARD MONITORING ACTIVITY: CASH ANALYSIS

Through cash analysis, a Grants Management Specialist assesses and reports on the recipients' cash-on-hand, expenditures, and unliquidated obligations; gauges potential cost share shortfalls and cash on hand issues; and monitors spend down activities within the POP. The analysis reconciles

and compares grant disbursement records with the recipient submitted FFR. This process identifies recipients that may require additional monitoring due to issues identified with drawdowns or FFR submissions.

6.1.4. ENHANCED MONITORING ACTIVITIES: DESK REVIEW, SITE VISIT

Desk reviews and site visits are two forms of additional monitoring that FEMA conducts on a recipient. Table 6 defines the key differences and similarities.

Table 6: Enhanced Financial Monitoring Activities (Desk Review and Site Visit)

Attribute	Desk Review	Site Visit
Location/ Logistics	A detailed, paper-based review and evaluation conducted at a FEMA office. Desk reviews do not require travel.	A visit by FEMA grants management staff conducted at the site of the recipient’s operations and/or selected performance sites. Site visits may require travel.
Materials Reviewed	Required reports, correspondence, and other documentation, including policies and procedures, to substantiate compliance. Additional documentation available remotely may include information available through the grant file, financial reports, interviews, and other documentation and correspondence to verify compliance.	Includes documents listed under the desk review in addition to all applicable documents and required reports necessary to assess recipient capability and progress, validate records, and substantiate compliance with laws, regulations, and policies.
Goal of Monitoring Activity	<p>The goals of FEMA’s financial desk review monitoring activities are, as applicable, to:</p> <ul style="list-style-type: none"> ▪ Review grant files to verify compliance, conduct interviews to confirm adherence to approved program plans, and confirm equipment acquisition, allowable use, and inventory controls; ▪ Document that recipient institutions possess adequate internal controls, policies, processes, and systems to manage FEMA grants effectively; ▪ Assist the recipient with the grant process and provide guidance to improve recipient administrative efficiencies; ▪ Identify and analyze relevant problems that might prevent the program from achieving its internal and external objectives; and ▪ Provide TA. 	<p>The goals of FEMA’s financial site visit monitoring activities are, as applicable, to:</p> <ul style="list-style-type: none"> ▪ Review grant files to verify compliance, conduct interviews to confirm adherence to approved program plans, and confirm equipment acquisition, allowable use, and inventory controls; ▪ Document that recipient institutions possess adequate internal controls, policies, processes, and systems to manage FEMA grants effectively; ▪ Assist the recipient with the grant process and provide guidance to improve recipient administrative efficiencies; ▪ Identify and analyze relevant problems that might prevent the program from achieving its internal and external objectives; and ▪ Provide TA.

6.1.5. PROGRAMMATIC MONITORING OVERVIEW AND APPROACH

Programmatic monitoring involves oversight throughout the award lifecycle for FEMA to verify that programs and projects undertaken by recipients are consistent with approved plans and comply with applicable laws, regulations, program guidance, and the terms and conditions of the award.

FEMA's monitoring approach complies with the monitoring requirements described in section 2022 of the HSA. Programmatic monitoring also plays an important role in ensuring that FEMA preparedness grant funding builds and sustains capabilities at the SLTT levels that advance the Goal. Programmatic monitoring also is an opportunity for FEMA staff to build relationships with recipients and to work collaboratively to identify and mitigate factors that may impede programmatic performance.

The programs subject to section 2022 of the HSA and three additional programs (THSGP, IPR Program, and IBSGP) are included in this programmatic monitoring approach—meaning that all programs included in this manual are part of this programmatic monitoring approach.

FEMA uses a risk- and project-based programmatic monitoring framework for its preparedness grant programs that is designed for data-driven grants management, and which interacts seamlessly with other aspects of the grant lifecycle. FEMA uses monitoring as a vehicle to validate data previously self-reported by recipients in applications and reporting tools. FEMA does not utilize monitoring as a data collection tool in and of itself. By specializing monitoring in this way, FEMA avoids duplicative data collection, targets its resources more effectively, and provides stronger and more proactive TA to its recipients. The framework also comprehensively documents grant management decisions for resource allocation.

This programmatic monitoring approach establishes baseline monitoring of all open awards across the FEMA preparedness grant portfolio using a First Line Review (FLR). The FLR identifies recipients and awards with a high potential for noncompliance with regulations or failure to meet project objectives. The FLR uses quantifiable measures (criteria) to prioritize and rank recipients and awards according to identified risks that threaten the success of FEMA's preparedness grant awards. Results of this prioritization process determine which high-risk recipients and awards will receive advanced monitoring. Post-monitoring actions document and communicate findings and recommendations for resolution to the recipients and FEMA leadership and allow for increasingly cohesive programmatic and financial monitoring processes.

6.2. Case Studies and Use of Grant-Funded Resources During Real-World Incident Operations

Analyzing the use of grant-funded investments in real-world incidents will improve the ability of FEMA and its SLTT partners to assess the effectiveness of these investments and to better understand how grant funds support improvements in nationwide capability levels. Currently, FEMA conducts case studies with a limited number of grant recipients each year to explore how jurisdictions prioritize grant investments based on risk and capability assessments, and the ways specific investments improve SLTT preparedness (see the [Preparedness Grants Case Studies](#) page on FEMA.gov). By accepting the award, the recipient agrees to participate in a case study or evaluation if requested. Recipients can also contact FEMA-PreparednessGrantEvaluation@fema.dhs.gov if interested in volunteering to participate in a case study.

6.3. Termination Provisions

FEMA may terminate a federal award in whole or in part for one of the following reasons. FEMA and the recipient must still comply with closeout requirements at 2 C.F.R. §§ 200.344-200.345 even if an award is terminated in whole or in part. To the extent that subawards are permitted under the respective program's NOFO, pass-through entities should refer to 2 C.F.R. § 200.340 for additional information on termination regarding subawards.

1. **Noncompliance.** If a recipient fails to comply with the terms and conditions of a federal award, FEMA may terminate the award in whole or in part. If the noncompliance can be corrected, FEMA may first attempt to direct the recipient to correct the noncompliance. This may take the form of a Compliance Notification. If the noncompliance cannot be corrected or the recipient is non-responsive, FEMA may proceed with a Remedy Notification, which could impose a remedy for noncompliance per 2 C.F.R. § 200.339, including termination. Any action to terminate based on noncompliance will follow the requirements of 2 C.F.R. §§ 200.341-200.342 as well as the requirement of 2 C.F.R. § 200.340(c) to report in SAM.gov R/Q the recipient's material failure to comply with the award terms and conditions. See also the section on Actions to Address Noncompliance.
2. **With the Consent of the Recipient.** FEMA may also terminate an award in whole or in part with the consent of the recipient, in which case the parties must agree upon the termination conditions, including the effective date, and in the case of partial termination, the portion to be terminated.
3. **Notification by the Recipient.** The recipient may terminate the award, in whole or in part, by sending written notification to FEMA setting forth the reasons for such termination, the effective date, and in the case of partial termination, the portion to be terminated. In the case of partial termination, FEMA may determine that a partially terminated award will not accomplish the purpose of the federal award, so FEMA may terminate the award in its entirety. If that occurs, FEMA will follow the requirements of 2 C.F.R. §§ 200.341-200.342 in deciding to fully terminate the award.

6.4. Period of Performance Extensions

Extensions to the POP for programs addressed in this manual are allowed under limited circumstances. Extensions to the initial POP identified in the award will only be considered through formal, written requests to the recipient's FEMA Preparedness Officer or Program Manager and must contain specific and compelling justifications as to why an extension is required. Recipients are advised to coordinate with their FEMA Preparedness Officer or Program Manager as needed when preparing an extension request.

All extension requests must address the following:

1. The grant program, fiscal year, and award number;
2. Reason for the delay—including details of the legal, policy, or operational challenges that prevent the final outlay of awarded funds by the deadline;
3. Current status of the activity(ies);
4. Approved POP termination date and new project completion date;
5. Amount of funds drawn down to date;
6. Remaining available funds, both federal and, if applicable, non-federal;
7. Budget outlining how remaining federal and, if applicable, non-federal funds will be expended;
8. Plan for completion, including milestones and timeframes for achieving each milestone and the position or person responsible for implementing the plan for completion; and

9. Certification that the activity(ies) will be completed within the extended POP without any modification to the original statement of work, as described in the investment justification and as approved by FEMA.

Extension requests will be granted only due to compelling legal, policy, or operational challenges. Extension requests will only be considered for the following reasons:

- Contractual commitments by the recipient or subrecipient with vendors prevent completion of the project within the existing POP;
- The project must undergo a complex environmental review that cannot be completed within the existing POP;
- Projects are long-term by design, and therefore acceleration would compromise core programmatic goals; or
- Where other special or extenuating circumstances exist.

Recipients should submit all proposed extension requests to FEMA for review and approval at least 120 days before the end of the POP to allow sufficient processing time. Extensions are typically granted for no more than a six-month period. Recipients are advised to coordinate with their FEMA Preparedness Officer or Program Manager as needed when preparing an extension request.

Recipients should refer to the corresponding chapter of this manual for program-specific details related to POP extensions.

6.5. Conflicts of Interest in the Administration of Federal Awards or Subawards

For conflicts of interest under grant-funded procurements and contracts, refer to the section on Procurement Integrity in the applicable NOFO, this manual, and 2 C.F.R. §§ 200.317 – 200.327.

To eliminate and reduce the impact of conflicts of interest in the subaward process, recipients and pass-through entities must follow their own policies and procedures regarding the elimination or reduction of conflicts of interest when making subawards. Recipients and pass-through entities are also required to follow any applicable federal or SLTT statutes or regulations governing conflicts of interest in the making of subawards.

The recipient or pass-through entity must disclose to the respective Preparedness Officer or Program Manager, in writing, any real or potential conflict of interest that may arise during the administration of the federal award, as defined by the federal or SLTT statutes or regulations or their own existing policies, within five calendar days of learning of the conflict of interest. Similarly, subrecipients, whether acting as subrecipients or as pass-through entities, must disclose any real or potential conflict of interest to the recipient or next-level pass-through entity as required by the recipient or pass-through entity's conflict of interest policies, or any applicable federal or SLTT statutes or regulations.

Conflicts of interest may arise during the process of FEMA making a federal award in situations where an employee, officer, or agent, any members of their immediate family or their partner has a close personal relationship, a business relationship, or a professional relationship, with an applicant, subapplicant, recipient, subrecipient, or FEMA employee.

6.6. Procurement Integrity

Through audits conducted by the DHS Office of Inspector General (OIG) and FEMA grant monitoring, findings have shown that some FEMA recipients have not fully adhered to the proper procurement requirements when spending grant funds. Anything less than full compliance with federal procurement requirements jeopardizes the integrity of the grant, as well as the grant program. To assist with determining whether an action is a procurement or instead a subaward, please consult 2 C.F.R. § 200.331. For detailed guidance on the federal procurement standards, recipients and subrecipients should refer to various materials issued by FEMA's Procurement Disaster Assistance Team (PDAT), such as the [PDAT Field Manual](#) and [Contract Provisions Guide](#). Additional resources, including an upcoming trainings schedule, can be found on the PDAT's [Contracting with Federal Funds for Goods and Services Before, During and After Disasters](#) page on FEMA.gov.

The subsections below highlight the federal procurement requirements for FEMA recipients when procuring goods and services with federal grant funds. FEMA will include a review of recipients' procurement practices as part of the normal monitoring activities. **All procurement activity must be conducted in accordance with federal procurement standards at 2 C.F.R. §§ 200.317–200.327.** Select requirements under these standards are listed below. The recipient and any of its subrecipients must comply with all requirements, even if they are not listed below.

Under 2 C.F.R. § 200.317, when procuring property and services under a federal award, states (including territories) must follow the same policies and procedures they use for procurements from their non-federal funds; additionally, states must follow 2 C.F.R. § 200.321 regarding socioeconomic steps, § 200.322 regarding domestic preferences for procurements, § 200.323 regarding procurement of recovered materials, and § 200.327 regarding required contract provisions.

All other non-federal entities, such as tribes, local governments, and nonprofit organizations, must have and use their own documented procurement procedures that reflect applicable SLTT laws and regulations, provided that the procurements conform to applicable federal law and the standards identified in 2 C.F.R. Part 200. These standards include, but are not limited to, providing for full and open competition consistent with the standards of 2 C.F.R. § 200.319 and § 200.320.

6.6.1. IMPORTANT CHANGES TO PROCUREMENT STANDARDS IN 2 C.F.R. PART 200

OMB recently updated various parts of Title 2 of the Code of Federal Regulations, among them, the procurement standards. States are now required to follow the socioeconomic steps in soliciting small and minority businesses, women's business enterprises, and labor surplus area firms per 2 C.F.R. § 200.321. All non-federal entities should also, to the greatest extent practicable under a federal award, provide a preference for the purchase, acquisition, or use of goods, products, or materials produced in the United States per 2 C.F.R. § 200.322. More information on OMB's revisions to the federal procurement standards can be found in the [Purchasing Under a FEMA Award: OMB Revisions Fact Sheet](#).

The recognized procurement methods in 2 C.F.R. § 200.320 have been reorganized into informal procurement methods, which include micro-purchases and small purchases; formal procurement methods, which include sealed bidding and competitive proposals; and noncompetitive procurements. The federal micro-purchase threshold is currently \$10,000, and non-state entities may use a lower threshold when using micro-purchase procedures under a FEMA award. If a non-state entity wants to use a micro-purchase threshold higher than the federal threshold, it must follow the requirements of 2 C.F.R. § 200.320(a)(1)(iii)-(v). For small purchase procedures (2 C.F.R. § 200.320(a)(2)) under a FEMA award, the federal Simplified Acquisition Threshold (SAT) is currently

\$250,000, and a non-state entity may use a lower threshold but may not exceed the federal threshold. See 2 C.F.R. § 200.1 (citing the definition of SAT from [48 C.F.R. Part 2, Subpart 2.1](#)).

See 2 C.F.R. § 200.216, § 200.471, and Appendix II as well as [FEMA Policy #405-143-1, Prohibitions on Expending FEMA Award Funds for Covered Telecommunications Equipment or Services](#), the relevant program NOFO, and this manual regarding prohibitions on covered telecommunications equipment or services.

6.6.2. COMPETITION AND CONFLICTS OF INTEREST

Among the requirements of 2 C.F.R. § 200.319(b) applicable to all non-federal entities other than states, to ensure objective contractor performance and eliminate unfair competitive advantage, contractors that develop or draft specifications, requirements, statements of work, or invitations for bids or requests for proposals must be excluded from competing for such procurements. FEMA considers these actions to be an organizational conflict of interest and interprets this restriction as applying to contractors that help a non-federal entity develop its grant application, project plans, or project budget. This prohibition also applies to the use of former employees to manage the grant or carry out a contract when those former employees worked on such activities while they were employees of the non-federal entity.

Under this prohibition, unless the non-federal entity solicits for and awards a contract covering both development and execution of specifications (or similar elements as described above), and this contract was procured in compliance with 2 C.F.R. §§ 200.317 – 200.327, federal funds cannot be used to pay a contractor to carry out the work if that contractor also worked on the development of those specifications. This rule applies to all contracts funded with federal grant funds, including pre-award costs, such as grant writer fees, as well as post-award costs, such as grant management fees.

Additionally, some of the situations considered to be restrictive of competition include, but are not limited to:

- Placing unreasonable requirements on firms for them to qualify to do business;
- Requiring unnecessary experience and excessive bonding;
- Noncompetitive pricing practices between firms or between affiliated companies;
- Noncompetitive contracts to consultants that are on retainer contracts;
- Organizational conflicts of interest;
- Specifying only a “brand name” product instead of allowing “an equal” product to be offered and describing the performance or other relevant requirements of the procurement; and
- Any arbitrary action in the procurement process.

Per 2 C.F.R. § 200.319(c), non-federal entities other than states must conduct procurements in a manner that prohibits the use of statutorily or administratively imposed SLTT geographical preferences in the evaluation of bids or proposals, except in those cases where applicable federal statutes expressly mandate or encourage geographic preference. Nothing in this section preempts state licensing laws. When contracting for architectural and engineering services, geographic location may be a selection criterion provided its application leaves an appropriate number of qualified firms, given the nature and size of the project, to compete for the contract.

Under 2 C.F.R. § 200.318(c)(1), non-federal entities other than states are required to maintain written standards of conduct covering conflicts of interest and governing the actions of their employees engaged in the selection, award, and administration of contracts. **No employee, officer, or agent may participate in the selection, award, or administration of a contract supported by a federal award if he or she has a real or apparent conflict of interest.** Such conflicts of interest would arise when the employee, officer or agent, any member of his or her immediate family, his or her partner, or an organization that employs or is about to employ any of the parties indicated herein, has a financial or other interest in or a tangible personal benefit from a firm considered for a contract. The officers, employees, and agents of the non-federal entity may neither solicit nor accept gratuities, favors, or anything of monetary value from contractors or parties to subcontracts. However, non-federal entities may set standards for situations in which the financial interest is not substantial, or the gift is an unsolicited item of nominal value. The standards of conduct must provide for disciplinary actions to be applied for violations of such standards by officers, employees, or agents of the non-federal entity.

Under [2 C.F.R. § 200.318\(c\)\(2\)](#), if the recipient or subrecipient (other than states) has a parent, affiliate, or subsidiary organization that is not an SLTT government, the non-federal entity must also maintain written standards of conduct covering organizational conflicts of interest. In this context, organizational conflict of interest means that because of a relationship with a parent company, affiliate, or subsidiary organization, the non-federal entity is unable or appears to be unable to be impartial in conducting a procurement action involving a related organization. The non-federal entity must disclose in writing any potential conflicts of interest to FEMA or the pass-through entity in accordance with applicable FEMA policy.

6.6.3. SUPPLY SCHEDULES AND PURCHASING PROGRAMS

Generally, a non-federal entity may seek to procure goods or services from a federal supply schedule, state supply schedule, or group purchasing agreement.

6.6.4. GENERAL SERVICES ADMINISTRATION SCHEDULES

States, tribes, local governments, and any instrumentality thereof (such as local education agencies or institutions of higher education), may procure goods and services from a General Services Administration (GSA) schedule. GSA offers multiple efficient and effective procurement programs for SLTT governments, and instrumentalities thereof, to purchase products and services directly from pre-vetted contractors. The GSA schedules (also referred to as the Multiple Award Schedules and the Federal Supply Schedules) are long-term government-wide contracts with commercial firms that provide access to millions of commercial products and services at volume discount pricing.

Information about GSA programs for states, tribes, and local governments, and instrumentalities thereof, can be found at the [Programs for State and Local Governments](#) and [State and Local Governments](#) pages on GSA.gov.

For tribes, local governments, and their instrumentalities that purchase off of a GSA schedule, this will satisfy the federal requirements for full and open competition provided that the recipient follows the GSA ordering procedures; however, tribes, local governments, and their instrumentalities will still need to follow the other rules under 2 C.F.R. §§ 200.317–200.327, such as solicitation of minority businesses, women’s business enterprises, small businesses, or labor surplus area firms (§ 200.321), domestic preferences (§ 200.322), contract cost and price (§ 200.324), and required contract provisions (§ 200.327 and Appendix II).

6.6.5. OTHER SUPPLY SCHEDULES AND PROGRAMS

For non-federal entities other than states, such as tribes, local governments, and nonprofits, that want to procure goods or services from a state supply schedule, cooperative purchasing program, or other similar program, for such procurements to be permissible under federal requirements, the following must be true:

- The procurement of the original contract or purchasing schedule and its use by the non-federal entity complies with state and local law, regulations, and written procurement procedures;
- The state or other entity that originally procured the original contract or purchasing schedule entered into the contract or schedule with the express purpose of making it available to the non-federal entity and other similar types of entities;
- The contract or purchasing schedule specifically allows for such use, and the work to be performed for the non-federal entity falls within the scope of work under the contract as to type, amount, and geography;
- The procurement of the original contract or purchasing schedule complied with all the procurement standards applicable to a non-federal entity other than states under at 2 C.F.R. §§ 200.317–200.327; and
- With respect to the use of a purchasing schedule, the non-federal entity must follow ordering procedures that adhere to applicable SLTT laws and regulations and the minimum requirements of full and open competition under 2 C.F.R. Part 200.

If a non-federal entity other than a state seeks to use a state supply schedule, cooperative purchasing program, or other similar type of arrangement, FEMA recommends the recipient discuss the procurement plans with its FEMA Preparedness Officer or Program Manager.

6.6.6. PROCUREMENT DOCUMENTATION

Per 2 C.F.R. § 200.318(i), non-federal entities other than states and territories are required to maintain and retain records sufficient to detail the history of procurement covering at least the rationale for the procurement method, contract type, contractor selection or rejection, and the basis for the contract price. States and territories are encouraged to maintain and retain this information as well and are reminded that for any cost to be allowable, it must be adequately documented per 2 C.F.R. § 200.403(g).

Examples of the types of documents that would cover this information include but are not limited to:

- Solicitation documentation, such as requests for quotes, invitations for bids, or requests for proposals;
- Responses to solicitations, such as quotes, bids, or proposals;
- Pre-solicitation independent cost estimates and post-solicitation cost/price analyses on file for review by federal personnel, if applicable;
- Contract documents and amendments, including required contract provisions; and

- Other documents required by federal regulations applicable at the time a grant is awarded to a recipient.

Additional information on required procurement records can be found on pages 24–26 of the [PDAT Field Manual](#).

6.7. Financial Assistance Programs for Infrastructure

6.7.1. BUILD AMERICA, BUY AMERICA ACT

Recipients and subrecipients must comply with the [Text - H.R.3684 - 117th Congress \(2021-2022\): Infrastructure Investment and Jobs Act | Congress.gov | Library of Congress](#), which was enacted as part of the Infrastructure Investment and Jobs Act §§ 70901-70927, Pub. L. No. 117-58 (2021); and the [Executive Order on Ensuring the Future Is Made in All of America by All of America's Workers | The White House](#). See also 2 C.F.R. Part 184 and OMB Memorandum M-24-02, [Implementation Guidance on Application of Buy America Preference in Federal Financial Assistance Programs for Infrastructure](#).

None of the funds provided under HSGP, THSGP, NSGP, TSGP, IBSGP, PSGP, the IPR Program, and the EMPG Program may be used for a project for infrastructure unless the iron and steel, manufactured products, and construction materials used in that infrastructure are produced in the United States.

Additional information on the Buy America preference can be found in the program-specific NOFO.

6.8. Records Retention

6.8.1. RECORD RETENTION PERIOD

Financial records, supporting documents, statistical records, and all other non-federal entity records pertinent to a federal award generally must be maintained for at least three years from the date the final FFR is submitted. See 2 C.F.R. § 200.334. Further, if the recipient does not submit a final FFR and the award is administratively closed, FEMA uses the date of administrative closeout as the start of the general record retention period.

The record retention period **may be longer than three years or have a different start date** in certain cases. These include:

- Records for real property and equipment acquired with federal funds must be retained for **three years after final disposition of the property**. See 2 C.F.R. § 200.334(c).
- If any litigation, claim, or audit is started before the expiration of the three-year period, the records **must be retained until** all litigation, claims, or audit findings involving the records **have been resolved and final action taken**. See 2 C.F.R. § 200.334(a).
- The **record retention period will be extended if the recipient is notified in writing** of the extension by FEMA, the cognizant or oversight agency for audit, or the cognizant agency for indirect costs. See 2 C.F.R. § 200.334(b).

- Where FEMA requires recipients to report program income after the POP ends, the **program income record retention period begins at the end of the recipient's fiscal year in which program income is earned**. See 2 C.F.R. § 200.334(e).
- For indirect cost rate proposals, cost allocation plans, or other rate computations records, the start of the record retention period depends on whether the indirect cost rate documents were submitted for negotiation. If the **indirect cost rate documents were submitted for negotiation, the record retention period begins from the date those documents were submitted** for negotiation. If indirect cost rate documents **were not submitted for negotiation, the record retention period begins at the end of the recipient's fiscal year or other accounting period covered by that indirect cost rate**. See 2 C.F.R. § 200.334(f).

6.8.2. TYPES OF RECORDS TO RETAIN

FEMA requires that non-federal entities maintain the following documentation for federally funded purchases:

- Specifications;
- Solicitations;
- Competitive quotes or proposals;
- Basis for selection decisions;
- Purchase orders;
- Contracts;
- Invoices; and
- Canceled checks.

Non-federal entities should keep detailed records of all transactions involving the grant. FEMA may at any time request copies of any relevant documentation and records, including purchasing documentation along with copies of canceled checks for verification. See, e.g., 2 C.F.R. § 200.318(i), § 200.334, § 200.337.

For any cost to be allowable, it must be adequately documented per 2 C.F.R. § 200.403(g). Non-federal entities who fail to fully document all purchases may find their expenditures questioned and subsequently disallowed.

6.9. Actions to Address Noncompliance

Non-federal entities receiving financial assistance from FEMA are required to comply with requirements in the terms and conditions of their awards or subawards, including the terms set forth in applicable federal statutes, regulations, NOFOs, policies, and this manual. Throughout the award lifecycle or even after an award has been closed, FEMA or the pass-through entity may discover potential or actual noncompliance on the part of a recipient or subrecipient. This potential or actual noncompliance may be discovered through routine monitoring, audits, closeout, or reporting from various sources.

In the case of any potential or actual noncompliance, FEMA may place special conditions on an award per 2 C.F.R. § 200.208 and § 200.339, FEMA may place a hold on funds until the matter is corrected, or additional information is provided per 2 C.F.R. § 200.339, or it may do both. Similar remedies for noncompliance with certain federal civil rights laws are authorized pursuant to 44 C.F.R. Parts 7 and 19.

In the event the noncompliance is not able to be corrected by imposing additional conditions or the recipient or subrecipient refuses to correct the matter, FEMA might take other remedies allowed under 2 C.F.R. § 200.339. These remedies include actions to disallow costs, recover funds, wholly or partially suspend, or terminate the award, initiate suspension and debarment proceedings, withhold further federal awards, or take other remedies that may be legally available. For further information on termination due to noncompliance, see the section on Termination Provisions in the relevant NOFO.

FEMA may discover and take action on noncompliance even after an award has been closed. The closeout of an award does not affect FEMA's right to disallow costs and recover funds if the action to disallow costs takes place during the record retention period. See 2 C.F.R. § 200.334, § 200.345(a). Closeout also does not affect the obligation of the non-federal entity to return any funds due as a result of later refunds, corrections, or other transactions. See 2 C.F.R. § 200.345(a)(2).

The types of funds FEMA might attempt to recover include, but are not limited to, improper payments, cost share reimbursements, program income, interest earned on advance payments, or equipment disposition amounts.

FEMA may seek to recover disallowed costs through a Notice of Potential Debt Letter, a Remedy Notification, or other letter. The document will describe the potential amount owed, the reason why FEMA is recovering the funds, the recipient's appeal rights, the requirement to retain records, how the amount can be paid, and the consequences, including billing and collection, for not appealing or paying the amount by the deadline.

If the recipient neither appeals nor pays the amount by the deadline, the amount owed will become final. Potential consequences if the debt is not paid in full or otherwise resolved by the deadline include the assessment of interest, administrative fees, and penalty charges; administratively offsetting the debt against other payable federal funds; and transferring the debt to the U.S. Department of the Treasury for collection. FEMA notes the following common areas of noncompliance for the preparedness grant programs:

- Insufficient documentation and lack of record retention;
- Failure to follow the procurement under grants requirements;
- Failure to submit closeout documents in a timely manner;
- Failure to follow EHP requirements; and
- Failure to comply with the POP deadline.

6.10. Audits

FEMA grant recipients are subject to audit oversight from multiple entities including DHS OIG, the Government Accountability Office (GAO), the pass-through entity, or independent auditing firms for

single audits, and may cover activities and costs incurred under the award. Auditing agencies such as the DHS OIG, the GAO, and the pass-through entity (if applicable), and FEMA in its oversight capacity, must have access to records pertaining to the FEMA award. Recipients and subrecipients must retain award documents for at least three years from the date the final FFR is submitted, and even longer in many cases subject to the requirements of 2 C.F.R. § 200.334. In the case of administrative closeout, documents must be retained for at least three years from the date of closeout, or longer subject to the requirements of 2 C.F.R. § 200.334. If documents are retained longer than the required retention period, the DHS OIG, the GAO, and the pass-through entity, as well as FEMA in its oversight capacity, have the right to access these records as well. See 2 C.F.R. § 200.334, § 200.337.

Additionally, non-federal entities must comply with the single audit requirements at 2 C.F.R. Part 200, Subpart F. Specifically, non-federal entities, other than for-profit subrecipients, that expend \$750,000 or more in federal awards during their fiscal year must have a single or program-specific audit conducted for that year in accordance with Subpart F. 2 C.F.R. § 200.501. A single audit covers all federal funds expended during a fiscal year, not just FEMA funds. The cost of audit services may be allowable per 2 C.F.R. § 200.425, but non-federal entities must select auditors in accordance with 2 C.F.R. § 200.509, including following the proper procurement procedures.

The objectives of single audits are to:

- Determine whether financial statements conform to generally accepted accounting principles (GAAP);
- Determine whether the schedule of expenditures of federal awards (SEFA) is presented fairly;
- Understand, assess, and test the adequacy of internal controls for compliance with major programs; and
- Determine whether the entity complied with applicable laws, regulations, and contracts or grants.

For single audits, the auditee is required to prepare financial statements reflecting its financial position, a SEFA, and a summary of the status of prior audit findings and questioned costs. The auditee also is required to follow up and take appropriate corrective actions on new and previously issued but not yet addressed audit findings. The auditee must prepare a CAP to address the new audit findings. See 2 C.F.R. § 200.508, § 200.510, § 200.511.

Non-federal entities must have an audit conducted, either single or program-specific, of their financial statements and federal expenditures annually or biennially pursuant to 2 C.F.R. § 200.504. Non-federal entities must also follow the information submission requirements of 2 C.F.R. § 200.512, including submitting the audit information to the [Federal Audit Clearinghouse](#) within the earlier of 30 calendar days after receipt of the auditor's report(s) or nine months after the end of the audit period. The audit information to be submitted include the data collection form described at 2 C.F.R. § 200.512(b) and Appendix X to 2 C.F.R. Part 200 as well as the reporting package described at 2 C.F.R. § 200.512(c).

The non-federal entity must retain one copy of the data collection form and one copy of the reporting package for three years from the date of submission to the Federal Audit Clearinghouse. 2 C.F.R. § 200.512(f); see also 2 C.F.R. § 200.517 (setting requirements for retention of documents by the auditor and access to audit records in the auditor's possession).

FEMA, the DHS OIG, the GAO, and the pass-through entity (if applicable), as part of monitoring or as part of an audit, may review a non-federal entity's compliance with the single audit requirements. In cases of continued inability or unwillingness to have an audit conducted in compliance with 2 C.F.R. Part 200, Subpart F, FEMA and the pass-through entity, if applicable, are required to take appropriate remedial action under 2 C.F.R. § 200.339 for noncompliance, pursuant to 2 C.F.R. § 200.505.

6.11. Reporting Issues of Fraud, Waste, and Abuse

Recipients, subrecipients, SAAs, and any other applicable stakeholder at any time may report issues of fraud, waste, abuse, and mismanagement, or other criminal or noncriminal misconduct to the Office of Inspector General (OIG) Hotline. The toll-free numbers to call are 1 (800) 323-8603, and TTY 1 (844) 889-4357.

6.12. Payment Information

Payment requests are submitted through FEMA GO for awards obligated in FY 2024 and going forward. For awards obligated prior to FY 2024 in the ND Grants System, the payment request is submitted through PARS.

6.13. Whole Community Preparedness

Preparedness is a shared responsibility that calls for the involvement of everyone—not just the government—in preparedness efforts. By working together, everyone can help keep the nation safe from harm and help keep it resilient when struck by hazards, such as natural disasters, acts of terrorism, and pandemics. [Whole Community](#) includes, but is not limited to:

- Individuals and families, including those with disabilities and others with access and functional needs;
- Businesses;
- Faith-based and community organizations;
- Nonprofit groups;
- Schools and academia;
- Media outlets; and
- All levels of government, including SLTT and federal partners.

The phrase “Whole Community” often appears in preparedness materials, as it is one of the guiding principles. It means two things:

- Involving people in the development of national preparedness documents; and
- Ensuring their roles and responsibilities are reflected in the content of the materials.

Preparedness Grants Manual

By engaging Whole Community stakeholders, preparedness grant recipients can help FEMA develop and promote a suite of well-targeted solutions for individuals and communities to adopt. Recipients should coordinate preparedness initiatives with FEMA and whole community partners to efficiently apply federal funding to reach the goal of individual and community resilience.

7. Resources

7.1. Department of Homeland Security/FEMA Provided Training and Education

FEMA offers tuition-free training and education programs and courses through several providers including the Center for Domestic Preparedness (CDP), the Emergency Management Institute (EMI), and NTED's Training Partner Program (TPP). TPP includes the Center for Homeland Defense and Security, National Domestic Preparedness Consortium, Rural Domestic Preparedness Consortium, and training partners through the Continuing Training Grants (CTG) program.

7.2. Training Not Provided by the Department of Homeland Security/FEMA

Trainings not provided by DHS/FEMA include courses that are either state-sponsored or federal-sponsored (non-DHS/FEMA), coordinated and approved by the State Administrative Agency (SAA) or their designated Training Point of Contact (TPOC), and fall within the FEMA mission scope to prepare SLTT personnel to prevent, protect against, mitigate, and respond to acts of terrorism or catastrophic events. These trainings often pertain to the HSGP and THSGP.

- *State Sponsored Courses.* These courses are developed for and/or delivered by institutions or organizations other than federal entities or FEMA and are sponsored by the SAA or their designated TPOC.
- *Joint Training and Exercises with the Public and Private Sectors.* These courses are sponsored and coordinated by private sector entities to enhance public-private partnerships for training personnel to prevent, protect against, mitigate, and respond to acts of terrorism or catastrophic events. In addition, states, territories, tribes, and high-risk urban areas are encouraged to incorporate the private sector in government-sponsored training and exercises.

Additional information on both FEMA provided training and other federal and state training can be found at firstrespondertraining.gov.

7.3. Training Information Reporting System (“Web-Forms”)

Web-Forms is an electronic data management system built to assist recipients and federal agencies with submitting non-NTED provided training courses for inclusion in the State/Federal-Sponsored Course Catalog through electronic forms. The information collected is used in a two-step review process to ensure the training programs adhere to the intent of the guidance and the course content is structurally sound and current. As these programs may be delivered nationwide, it is vital to ensure each training program's viability and relevance to the Homeland Security mission. Reporting training activities through Web-Forms is not required under present funding. However, the system remains available and can be accessed through the [Web-Forms section of the FEMA National Preparedness Course Catalog](#) to support recipients in their own tracking of training deliveries. Users need to request First Responder Training System (FRTS) Admin rights from NTED to access the Web-Forms.

7.4. FEMA's National Preparedness Course Catalog

Recipients are also encouraged to utilize FEMA's National Preparedness Course Catalog. Trainings include programs or courses developed for and delivered by institutions and organizations funded by

FEMA. This includes CDP, EMI, and TPP, CTG, the National Domestic Preparedness Consortium (NDPC), the Rural Domestic Preparedness Consortium (RDPC), and other partners.

The catalog features a wide range of course topics in multiple delivery modes to meet FEMA's mission scope as well as the increasing training needs of federal and SLTT audiences. The catalog can be accessed at the [NTED National Preparedness Course Catalog](#) page on [firstrespondertraining.gov](#).

Some exercise and training activities require EHP Review, including those that require any type of land, water, or vegetation disturbance or building of temporary structures or that are not located at facilities designed to conduct training and exercises. Additional information on training requirements and EHP review can be found online at the [Environmental & Historic Preservation Guidance for FEMA Grant Applications](#) page on [FEMA.gov](#).

7.5. Exercises

Exercises conducted with grant funding should be managed and conducted consistent with Homeland Security Exercise and Evaluation Program (HSEEP). HSEEP guidance for exercise design, development, conduct, evaluation, and improvement planning is located at the [HSEEP](#) page on [FEMA.gov](#).

7.6. Planning Assistance

FEMA's NPD offers TA that is designed to provide recipients and subrecipients with specialized expertise to improve and enhance the continuing development of state and local emergency management across the five mission areas of the Goal and across all core capabilities. TA provides the opportunity to engage emergency managers, emergency planners, and appropriate decision-makers in open discussion of options to improve plans and planning considering their jurisdiction's needs. Although there is no direct cost to approved jurisdictions for FEMA TA, jurisdictions are expected to invest staff resources and take ownership of the resulting products and tools.

TA deliveries combine current emergency management best practices with practical consideration of emerging trends, through discussion facilitated by FEMA contract specialists and with the support of FEMA Region operational specialists. Additionally, peer-to-peer representation may also be included from other jurisdictions that have recently addressed the same planning issue. The TA request form can be accessed at the [NIMS Implementation and Training](#) page on [FEMA.gov](#)

7.7. Training Information

States, territories, tribal entities, and high-risk urban areas do not need to request approval from FEMA for personnel to attend non-DHS/FEMA training if the training is coordinated with and approved by the state, territory, tribal, or high-risk urban area TPOC and falls within the FEMA mission scope and the jurisdiction's Emergency Operations Plan (EOP). For additional information on review and approval requirements for training courses funded with preparedness grants, see [FEMA Policy #207-22-0002, Prohibited or Controlled Equipment Under FEMA Awards](#).

FEMA will conduct periodic reviews of all SLTT entities, and high-risk urban area training funded by FEMA. These reviews may include requests for all course materials and physical observation of, or participation in, the funded training. If these reviews determine that courses are outside the scope of this guidance, recipients will be asked to repay grant funds expended in support of those efforts. For further information on developing courses using the Analysis, Design, Development, Implementation,

and Evaluation (ADDIE) model and tools that can facilitate the process, SAAs and TPOCs are encouraged to review the [NTED Training Resource and Development Center](#).

7.8. Weblinks

- U.S. Department of Transportation (DOT) “RAISE” grants for National Infrastructure Investments may include funding to support roads, bridges, transit, rail, ports, or intermodal transportation. See the [RAISE Discretionary Grants](#) page on Transportation.gov for more information.
- Cybersecurity Assessment Evaluation and Standardization, Cyber Resilience Review, Cyber Infrastructure Survey, and other resources are available via CISA. See the [Cyber Resource Hub](#) for additional information.

7.9. Emergency Management Accreditation Program

States can encourage their local jurisdictions to pursue assessment and accreditation under the Emergency Management Accreditation Program (EMAP). EMAP’s assessment and accreditation of emergency management organizations against consensus-based, American National Standards Institute (ANSI)-certified standards allows for standardized benchmarking of critical functions necessary for an emergency management organization to meet the core capabilities identified in the Goal. Additional information on the EMAP Standard is available on the [EMAP website](#).

8. Homeland Security Grant Program and Tribal Homeland Security Grant Program

8.1. Alignment to the National Preparedness System (Homeland Security Grant Program, Tribal Homeland Security Grant Program)

The Nation uses the National Preparedness System to build, sustain, and deliver core capabilities to achieve [the Goal](#). HSGP and THSGP recipients use the National Preparedness System to support their efforts to build, sustain, and deliver these core capabilities, which are essential for each of the five mission areas outlined in the Goal. The components of the National Preparedness System are Identifying and Assessing Risk, Estimating Capability Requirements, Building and Sustaining Capabilities, Planning to Deliver Capabilities, Validating Capabilities, and Reviewing and Updating. Additional information on the National Preparedness System is available at the [National Preparedness System](#) page on FEMA.gov.

As the National Preparedness System matures, we are getting better data on our capabilities as a Nation that can be used to drive our focus and our resources at all levels. States, tribes, and territories provide annual data on their proficiency across [32 core capabilities](#) through the [THIRA, Stakeholder Preparedness Review \(SPR\)](#), exercise and real world After-Action Reports (AAR), and other preparedness data. These data feed into the [National Preparedness Report](#) and form a shared national picture of needs relative to capability gaps, including what threats and hazards are posing the greatest risks and what core capabilities are most in need of improvement or sustainment. Communities and federal agencies alike use these data to prioritize, synchronize, and guide programs and activities to build and sustain capabilities. FEMA requires recipients to prioritize grant funding to demonstrate how investments support identified national priorities (for HSGP only) and building capability, closing capability gaps, or sustaining capabilities as defined by [Comprehensive Preparedness Guide \(CPG\) 201: THIRA/SPR Guide, Third Edition](#). Analytic results help shape prioritization decisions at FEMA and across the nation to make sure we are focusing our time and our resources in the right areas.

The HSGP and THSGP provide financial support to SLTT jurisdictions to help them build, sustain, and deliver core capabilities identified in the Goal. Key focus areas and requirements of both the HSGP and THSGP are to prevent terrorism and other catastrophic events and to prepare the Nation for the threats and hazards that pose the greatest risk to the security of the United States and Tribal Nations, including risks along the nation's borders. When applicable, funding should support deployable assets that can be used anywhere in the nation through automatic assistance and mutual aid agreements, including, but not limited to, the EMAC.

The HSGP and THSGP support investments that improve the ability of jurisdictions nationwide to:

- Prevent a threatened or an actual act of terrorism;
- Protect citizens, residents, visitors, and assets against the threats that pose the greatest risk to the security of the United States;
- Mitigate the loss of life and property by lessening the impact of future catastrophic events; and/or
- Respond quickly to save lives, protect property and the environment, and meet basic human needs in the aftermath of a catastrophic incident.

8.2. Reporting on the Implementation of the National Preparedness System (Homeland Security Grant Program, Tribal Homeland Security Grant Program)

8.2.1. IDENTIFYING AND ASSESSING RISK AND ESTIMATING CAPABILITY REQUIREMENTS

HSGP: By Dec. 31 each year, states, territories, and high-risk urban area HSGP recipients are required to complete an SPR that addresses all 32 core capabilities and is compliant with CPG 201, Third Edition. Additionally, every three years recipients are required to complete a THIRA. In 2020, jurisdictions began the requirement to respond to a series of planning-related questions as part of the THIRA/SPR.

THSGP: THSGP recipients are required to complete a THIRA every three years. Tribes with open THSGP awards must update their SPR inputs and Secondary Assessments (described in Section 8.2.4 “Planning to Deliver Capabilities” and Section 8.2.3 “National Incident Management System Implementation”) for activities completed in each respective calendar year (CY) throughout the POP, starting the CY *after* funding is awarded.

New THSGP recipients are required to complete the THIRA, SPR, and Secondary Assessments by Dec. 31 of the year *following* award issuance. New THSGP recipients are recipients that have *not* received THSGP funding in the past three years. The THIRA/SPR must address all 32 core capabilities and be compliant with the [CPG 201, Third Edition](#). When applying for THSGP funding, tribes that were awarded THSGP funding during the previous two years are expected to prioritize and align grant funding investments in building and sustaining capabilities as identified in their THIRA and SPR.

For additional guidance on the THIRA/SPR, please refer to [CPG 201, Third Edition](#).

Reporting

- States, tribes (with the exception of new THSGP recipients as noted above), and territories will submit their THIRA and SPR through the URT on the [Preparedness Toolkit](#) no later than Dec. 31 of the applicable year (every three years for THIRA and each year for SPR) for which the recipient has an open award.
 - If a THSGP recipient has completed closeout for their THSGP grant award POP, they do not have to submit the THIRA/SPR as the requirement does not apply to closed awards.
- High-risk urban areas that receive UASI funding will submit their SPR through the URT on Preparedness Toolkit no later than Dec. 31 for the years they have UASI open grants. If a UASI recipient has completed closeout for their UASI grant award POP, they do not have to submit a THIRA/SPR as the requirement is not applicable to closed grant awards. While UASIs that have completed closeout for the award POP are not required to complete a THIRA/SPR, it is encouraged.
- Calendar year 2022 was the start of the new 3-year THIRA/SPR cycle and baseline assessment year for existing recipients. Any new grant recipients for which the THIRA/SPR requirement applies will start their new 3-year THIRA/SPR cycle and baseline assessment year in the year during which they apply. States, territories, and high-risk urban areas should work collaboratively

to create the most accurate THIRA and SPR possible. States, territories, and high-risk urban areas may share scenarios, targets, and assessed capabilities when appropriate.

- Please contact FEMA-SPR@fema.dhs.gov if you have questions.

8.2.2. BUILDING AND SUSTAINING CAPABILITIES

States, territories, and high-risk urban areas must prioritize and align SHSP and UASI grant funding investments in building and sustaining capabilities in areas that align with the national priorities in the annual HSGP NOFO, and capability gaps identified in their THIRA and SPR. Tribes receiving THSGP funds must prioritize and align grant funding investments in building and sustaining capabilities as identified in their THIRA and SPR. When applying for THSGP funding, tribes that were awarded THSGP funding during the previous two years are expected to prioritize and align grant funding investments in building and sustaining capabilities as identified in their THIRA and SPR.

Reporting

Within the BSIR and as part of programmatic monitoring, recipients must describe how expenditures support building capability, closing capability gaps, or sustaining capabilities identified in the THIRA and SPR. Recipients must, on a project-by-project basis, check one of the following:

- Building a capability with HSGP or THSGP funding; and
- Sustaining a capability with HSGP or THSGP funding.

8.2.3. NATIONAL INCIDENT MANAGEMENT SYSTEM IMPLEMENTATION

Recipients receiving HSGP or THSGP funding are required to implement NIMS. HSGP and THSGP recipients must use standardized resource management concepts for resource typing, credentialing, and an inventory to facilitate the effective identification, dispatch, deployment, tracking, and recovery of resources.

Reporting

- Recipients report in the applicable secondary NIMS assessment portion of the URT as part of their THIRA/SPR submission, as outlined in the HSGP or THSGP NOFO.

8.2.4. PLANNING TO DELIVER CAPABILITIES

HSGP and THSGP recipients shall develop and maintain, jurisdiction-wide, all threats and hazards EOPs consistent with [CPG 101, Version 3.0 \(CPG 101 v3\), Developing and Maintaining Emergency Operations Plans \(September 2021\)](#). For HSGP, recipients must update their EOPs at least once every two years. For THSGP, recipients must submit an EOP once during the POP.

Reporting

- Recipients report EOP compliance with CPG 101 v3 by completing the secondary CPG 101 v3 assessment portion of the URT as part of their THIRA/SPR submission.

8.2.5. VALIDATING CAPABILITIES

All HSGP and THSGP recipients will develop and maintain a progressive exercise program consistent with HSEEP guidance in support of the National Exercise Program (NEP). THSGP recipients are required to develop and maintain this program regardless of whether the tribe planned to use THSGP funding for exercises. The NEP serves as the principal exercise mechanism for examining national preparedness and measuring readiness. The NEP is a two-year cycle of exercises across the nation that validates capabilities in all preparedness mission areas. The two-year NEP cycle is guided by Principals' Strategic Priorities, established by the National Security Council, and informed by preparedness data from jurisdictions across the Nation.

To develop and maintain a progressive exercise program consistent with HSEEP and in support of the NEP, recipients should engage senior leaders and other whole community stakeholders to identify preparedness priorities. These priorities should be informed by various factors, including jurisdiction-specific threats and hazards (i.e., the THIRA); areas for improvement identified by real-world events and exercises; external requirements such as state or national preparedness reports, homeland security policy, and industry reports; and accreditation standards, regulations, or legislative requirements. Recipients should document these priorities and use them to deploy a schedule of preparedness events in a multi-year Integrated Preparedness Plan (IPP). Information related to Integrated Preparedness Planning Workshops (IPPWs) can be found on the [HSEEP](#) page on FEMA.gov and the [Preparedness Toolkit](#).

The NEP provides exercise sponsors the opportunity to receive exercise design and delivery assistance, tools and resources, enhanced coordination, and the ability to directly influence and inform policy and preparedness programs. If you have any questions, or would like to request assistance through the NEP, please visit the NEP website on the [Exercises](#) page on FEMA.gov, or reach out to the NEP directly at NEP@fema.dhs.gov.

Reporting

- Recipients must have a current multi-year IPP that identifies preparedness priorities and activities. The current multi-year IPP must be submitted to hseep@fema.dhs.gov before Jan. 31 of each year:
 - Recipients are encouraged to enter their exercise information into the [Preparedness Toolkit](#).
- Recipients must submit AARs/Improvement Plans (IPs) to hseep@fema.dhs.gov and indicate which fiscal year's funds were used (if applicable).
- Submission of AAR/IPs must take place within 90 days following completion of the single exercise or progressive series:
 - Recipients are encouraged to submit AAR/IPs reflecting tabletop exercises that validate critical plans or those reflecting large-scale functional or full-scale exercises that took place at the state, territorial, tribal, or urban area level. Recipients are discouraged from submitting AAR/IPs specific to local jurisdictions that reflect drills;
 - If a recipient endures a significant real-world incident during the CY that delays or prevents conduct of a grant-funded exercise, they can submit the AAR from that event in place of the exercise AARs. Jurisdictions submitting real world AARs should include an explanation with the AAR submission to hseep@fema.dhs.gov; and

- Recipients can access a sample AAR/IP template on the [Improving Planning Templates](#) page on the Preparedness Toolkit.

8.3. Funding Guidelines (Homeland Security Grant Program, Tribal Homeland Security Grant Program)

Recipients must comply with all the requirements in 2 C.F.R. Part 200 (*Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards*). In general, recipients should consult with their FEMA HQ Preparedness Officer prior to making any investment that does not clearly meet the allowable expense criteria. Funding guidelines support four of the five mission areas—Prevention, Protection, Mitigation, and Response—and associated core capabilities within the Goal. While Recovery is part of the Goal, it is not explicitly part of the HSGP and THSGP. Allowable investments made in support of the national priorities, as well as other capability-enhancing projects must have a nexus to terrorism preparedness and fall into the categories of planning, organization, exercises, training, or equipment, aligned to building capability, closing capability gaps, and/or sustaining capabilities, as defined by [CPG 201, Third Edition](#). Recipients are encouraged to use grant funds for evaluating grant-funded project effectiveness and return on investment. FEMA encourages recipients to provide the results of that analysis to FEMA.

8.4. Allowable Costs (Homeland Security Grant Program)

8.4.1. MULTIPLE PURPOSE OR DUAL-USE OF FUNDS (STATE HOMELAND SECURITY PROGRAM AND URBAN AREA SECURITY INITIATIVE)

For both SHSP and UASI, many activities that support the achievement of core capabilities related to the national priorities and terrorism preparedness may simultaneously support enhanced preparedness for other hazards unrelated to acts of terrorism. However, all SHSP- and UASI-funded projects must assist recipients and subrecipients in achieving core capabilities related to preventing, preparing for, protecting against, or responding to acts of terrorism per section 2008(c) of the HSA (6 U.S.C. § 609(c)).

8.4.2. ORGANIZATIONAL ACTIVITIES

Personnel Costs

In addition to the personnel cost allowability detailed in the HSGP NOFO, HSGP (SHSP, UASI) funds may not be used to support the hiring of any personnel to fulfill traditional public health and safety duties nor to supplant traditional public health and safety positions and responsibilities. **HSGP (SHSP, UASI, OPSG) funds will be used to supplement existing funds and will NOT replace (supplant) funds that have been appropriated and/or budgeted for the same purpose.** Applicants or recipients may be required to supply documentation certifying that a reduction in non-federal resources occurred for reasons other than the receipt or expected receipt of federal funds.

8.4.3. 28 C.F.R. PART 23 GUIDANCE

FEMA requires that any IT system funded or supported by HSGP funds comply with 28 C.F.R. Part 23, Criminal Intelligence Systems Operating Policies if this regulation is determined to be applicable.

8.5. Fusion Centers (Homeland Security Grant Program)

A critical component of the national response to the 9/11 terrorist attacks was the development of a national-level, decentralized, and coordinated terrorism-related information sharing environment (ISE). State and local governments, supported by federal investments from DHS, the Department of Justice (DOJ), Department of Health and Human Services (HHS), and other federal agencies of the national ISE. This National Network, comprised of 80 state and major urban area fusion centers, collaborates and shares information with partners from all levels of government and the private sector, as well as other field-based information sharing partners, including High-Intensity Drug Trafficking Areas (HIDTA), Regional Information Sharing Systems (RISS) Centers, Joint Terrorism Task Forces (JTTF), major city/county intelligence units, and real-time crime analysis centers, among others.

National Network participation in the Nationwide Suspicious Activity Reporting Initiative (NSI) enables fusion centers to identify, receive and analyze Suspicious Activity Reports (SAR) and other tips/leads from frontline public safety personnel, the private sector, and the public, and ensure the sharing of SARs with DHS and the FBI's JTTFs for further investigation. In addition to those activities identified in the National Prevention Framework, fusion centers are also required to collaborate with those intelligence, operational, analytic, investigative, and information-sharing focused entities to combat a wide array of threats—noted below—in support of efforts to enhance capabilities for detecting, deterring, disrupting, and preventing acts of terrorism, targeted violence, and other threats. Such entities include, but are not limited to JTTFs, Area Maritime Security Committees (AMSC), Border Enforcement Security Task Forces, Integrated Border Enforcement Teams, HIDTAs, and RISS Centers as well as other federal intelligence, operational, analytic, and investigative entities. Applicants should describe their collaboration plan and proposed efforts in their required Fusion Center project as part of the Intelligence and Information Sharing National Priority.

Today's threats—including international and domestic terrorism, drugs, gangs, active shooters, targeted violence, transnational organized crime, and cyber—require federal, state, and local governments to leverage this national capacity to effectively respond to the evolving nature of the various national and homeland security threats confronting our Nation. Ultimately, timely identification and analysis of key indicators from local, state, and federal partners will enable all stakeholders to address threats and develop and implement data-driven strategies to prevent, protect against, mitigate, and respond effectively, while ensuring the protection of privacy, civil rights, and civil liberties.

To underscore the importance of the National Network as a critical component of our Nation's distributed homeland security and counterterrorism architecture, FEMA preparedness grants will continue to prioritize support for [designated fusion centers](#) and the maturation of the ISE. Fusion centers **must** prioritize the following capabilities to further enable and mature this national asset and strengthen the collective capacity to identify, collect, analyze, and share information, and to disseminate actionable and strategic intelligence to key stakeholders:

- **Addressing Threats:** Fusion centers provide a national level, decentralized, and coordinated ISE across all levels of government and disciplines that can be leveraged and applied to address threats to homeland security, national security, public safety, and/or public health, and especially those threats that may have little or no warning. Fusion centers should leverage and build upon their terrorism-focused analytic and information-sharing capabilities so they can be applied to address threats across the DHS mission space, including threats from both international terrorism and domestic violent extremists, threats to life and targeted violence, transnational organized criminal activity, cyber threats, and natural hazards, among others that require close collaboration with DHS operational, investigative, and analytic entities such as CBP,

ICE, United States Secret Service (USSS), CISA, the United States Coast Guard (USCG), and FEMA.

- **Analytic Capability:** Fusion centers must maintain strong analytic capabilities at tactical, operational, and strategic levels to address a wide array of threats or hazards that could have implications for homeland security or national security. These capabilities directly support operational, investigative, and information sharing efforts across all levels of government. These capabilities include, but are not limited to:
 - Building and sustaining a capable workforce of analysts who have the necessary experience and training; access to open source, unclassified and classified information, products, data, SAR; tips/leads and online/social media-based threats; as well as necessary services and technology to facilitate analytic capabilities and collaboration;
 - Assessing, evaluating, and deconflicting acts of targeted violence, threats to life, and other criminal or suspicious activity, to include potential indicators and behaviors, for potential connection to or implications for international or domestic terrorism, or other threats within the DHS mission space;
 - Providing analytic support and responses to requests for information from federal, state, and local partners during no notice threats, attacks, or incidents, as well as other planned events such as National Security Special Events (NSSEs);
 - Conducting threat assessments within their respective jurisdictions, including the identification of threats, intelligence gaps, and mitigation efforts;
 - Establishing, formalizing, and maintaining bi-directional information sharing with federal and other state agencies in accordance with jurisdictional authorities;
 - Leveraging available resources and capabilities to conduct target and event deconfliction in support of threat identification, officer safety, and information sharing.
 - Maintaining an ability to routinely support federal government efforts to watchlist terrorists and transnational organized crime actors; and
 - Appropriately planning for, and assessing/forecasting, prioritizing, and executing against both known and emerging threat vectors, and ensuring the safety and security of all operations, while protecting privacy, civil rights, and civil liberties.

Fusion centers should also consider their operational capacity when aligning manpower and resources in support of this capability (e.g., the ability to maintain watch and analytic support functions over a 24/7 operational tempo).

- **Technological Integration:** Access to data, information, and products is essential for fusion centers and the federal government to effectively identify, collect, analyze, and share information. Just as threats do not stop at jurisdictional borders, fusion centers must be able to effectively access and share appropriate information and data across jurisdictions, agencies, and disciplines. Fusion centers must **ensure and certify via the Fusion Center Assessment** they have the necessary technological capacity to access, analyze, and share information, including criminal intelligence and online/social media threat information, both within their jurisdictions, as well as with other fusion centers across the country and with the Federal Government through a variety of systems, databases, tools, and technologies that allow for federated searching and

data/information analysis that protects Personally Identifiable Information and includes appropriate security, privacy, civil rights, and civil liberties protections. This includes maintenance of the ability to collect, integrate, evaluate, and assess SAR, tips/leads, data resident in Computer Assisted/Aided Dispatch (CAD) and Records Management System (RMS), and online/social media-based threats from agencies across the jurisdiction. Such approaches should also address the evaluation and use of emerging capabilities, including social network analysis, federated search technology across CAD, RMS, and other data systems, complex data indexing, social media, open source, facial recognition, unmanned aircraft systems, geographic information systems (GIS), license plate reader technologies, and other artificial intelligence technologies.

- **Interagency Collaboration:** Fusion centers must maintain strong partnerships to enable intelligence, operational, investigative, and analytic collaboration and deconfliction of threat information with other partners located within their jurisdiction and across their region, including HIDTAs, RISS Centers, DHS intelligence, operational, investigative, and analytic entities, FBI Field Offices, JTTFs, and major city/county intelligence units.

State and urban area fusion centers receiving SHSP or UASI grant funds will be evaluated based on compliance with the guidance and requirements for the National Network as set forth by DHS Intelligence and Analysis (I&A) through the annual Fusion Center Assessment.

- Additional fusion center grant requirements, including 28 C.F.R. Part 23 requirements, are listed at the [Fusion Center Performance Program’s HSGP page](#) on DHS.gov and in the [28 C.F.R. Part 23 Online Training](#).
- FEMA approved analyst courses that meet the grant requirement are listed at [FEMA Approved Intelligence Analyst Training Courses](#) page on DHS.gov.

Through the PPR, fusion centers will report on the compliance with measurement requirements within the fusion centers through the annual Fusion Center Assessment managed by DHS I&A and reported to FEMA. In addition to the activities identified in the National Prevention Framework, fusion centers are also **required** to collaborate with those analytic, investigative, and information-sharing entities focused on preventing, detecting, deterring, and disrupting acts of terrorism and combating transnational criminal organizations. Such entities include, but are not limited to JTTFs, AMSC, Border Enforcement Security Task Forces, Integrated Border Enforcement Teams, HIDTAs, and RISS Centers, as well as other federal intelligence, operational, analytic, and investigative entities. **Applicants will be required to provide information regarding their information sharing partnerships, including how they will identify, address, and overcome any existing laws, policies, and practices that prevent information sharing, via the Information and Intelligence National Priority Investment and supporting data via the annual Fusion Center Assessment.**

8.5.1. FUSION CENTER PERFORMANCE MEASURES

Table 7: Fusion Center Performance Measures

Reference Number*	Performance Measures
YEAR.1	Percentage of federal Information Intelligence Reports (IIRs) originating from fusion center information that address a specific Intelligence Community need

Preparedness Grants Manual

Reference Number*	Performance Measures
YEAR.2	Percentage of federal IIRs originating from fusion center information that the Intelligence Community otherwise used in performing its mission (e.g., contained first-time reporting; corroborated existing information; addressed a critical intelligence gap; or helped to define an issue or target)
YEAR.3	Number of SARs vetted and submitted by fusion centers that result in the initiation or enhancement of an investigation by the FBI
YEAR.4	Number of SAR vetted and submitted by fusion centers that involve an individual on the Watchlist
YEAR.5	Percentage of Requests for Information (RFIs) from the Terrorist Screening Center (TSC) for which fusion centers provided information for a TSC case file
YEAR.6	Percentage of I&A Watchlist nominations that were initiated or updated existing case files based on information provided by fusion centers
YEAR.7	Number of distributable analytic products co-authored by one or more fusion centers and/or federal agencies
YEAR.8	Percentage of fusion center distributable analytic products that address Homeland Security topics
YEAR.9	Percentage of fusion center distributable analytic products that address state/local customer information needs
YEAR.10	Percentage of key customers reporting that fusion center products are relevant
YEAR.11	Percentage of key customers reporting that fusion center services are relevant
YEAR.12	Percentage of key customers reporting that fusion center products are timely for mission needs
YEAR.13	Percentage of key customers reporting that fusion center services are timely for mission needs
YEAR.14	Percentage of key customers reporting that fusion center products influenced their decision making related to threat response activities within their AOR
YEAR.15	Percentage of key customers reporting that fusion center services influenced their decision making related to threat response activities within their AOR
YEAR.16	Percentage of key customers reporting that fusion center products resulted in increased situational awareness of threats within their AOR
YEAR.17	Percentage of key customers reporting that fusion center services resulted in increased situational awareness of threats within their AOR
YEAR.18	Number of tips and leads vetted by the fusion center
YEAR.19	Number of tips and leads vetted by the fusion center that were provided to other F/SLTT agencies for follow up action

Reference Number*	Performance Measures
YEAR.20	Number of responses to RFIs from all sources
YEAR.21	Number of situational awareness products developed and disseminated by fusion centers
YEAR.22	Number of case support and/or tactical products developed and disseminated by fusion centers
YEAR.23	Percentage of federally designated special events in which fusion centers played a direct role
YEAR.24	Percentage of federally declared disasters in which fusion centers played a direct role
YEAR.25	Number of public safety incidents in which fusion centers played a direct role

*“YEAR” should be changed for the current fiscal year, e.g., 2024, 2025, etc. Any updates to Performance Measures will be noted in the HSGP NOFO.

8.6. Investment Modifications – Changes in Scope or Objective (Tribal Homeland Security Grant Program)

Changes in scope or objective of the award—including those resulting from intended actions by the recipient or subrecipients—require FEMA’s prior written approval, in accordance with 2 C.F.R. § 200.308(c)(1), § 200.407. THSGP is competitive with applications recommended for funding based on threat, vulnerability, and consequence, and their mitigation of potential terrorist attacks. However, consistent with 2 C.F.R § 200.308(c)(1), Change in Scope Prior Approval, FEMA requires prior approval of any change in scope or objective of the grant-funded activity after the award is issued. See 2 C.F.R. § 200.308(b), (c). Scope or objective changes will be considered on a case-by-case basis provided the change does not negatively impact the competitive process used to recommend THSGP awards.

Requests to change the scope or objective of the grant-funded activity after the award is made must be submitted via FEMA GO as a Scope Change Amendment. The amendment request must include the following:

- A written request on the recipient’s letterhead outlining the scope or objective change including the approved projects from the IJ, the funds and relative scope or objective significance allocated to those projects, the proposed changes, and any resulting reallocations as a result of the change of scope or objective;
- An explanation why the change of scope or objective is necessary;
- How the proposed scope or objective changes to the project support the vulnerabilities and capability gaps identified in the approved IJ; and
- The request must also address whether the proposed changes will impact the recipient’s ability to complete the project within the award’s POP.

Recipients may not proceed with implementing any scope or objective changes until they receive prior written approval from FEMA through FEMA GO.

8.7. Continuity Capability (Homeland Security Grant Program, Tribal Homeland Security Grant Program)

Continuity should be integrated into each core capability and the coordinating structures that provide them. Continuity capabilities increase resilience and the probability that organizations can perform essential functions in the delivery of core capabilities that support the mission areas. FEMA is responsible for coordinating the implementation and development, execution, and assessment of continuity capabilities among executive departments and agencies. To support this role, FEMA develops and promulgates directives, policy, and guidance for federal and SLTT governments, non-governmental organizations, and private sector critical infrastructure owners and operators. Federal Continuity Directives (FCD) establish continuity program and planning requirements for executive departments and agencies, while FEMA's Continuity Guidance Circular (CGC) tailors' continuity guidance to SLTT and other non-Federal audiences. This direction and guidance assist in developing capabilities for continuing the essential functions of federal and SLTT governmental entities, as well as public/private critical infrastructure owners, operators, and regulators enabling them.

The FCDs, CGC, and the Continuity Resource Toolkit provide guidance and resources for organizations. For additional information on continuity programs, guidance, and directives, see the [Continuity Resources and Technical Assistance](#) page on FEMA.gov.

8.8. Senior Advisory Committee (Homeland Security Grant Program)

To support the Whole Community Approach (see Section 1.6 “Strengthening Governance Integration” and Section 6.13 “Whole Community Preparedness”), the SAA must establish or reestablish a unified Senior Advisory Committee (SAC). The SAC builds upon previously established advisory bodies under SHSP, UASI, TSGP, and PSGP. Examples of advisory bodies that should be included on a SAC include Urban Area Working Groups (UAWGs), SIGB, AMSCs, Regional Transportation Security Working Groups (RTSWG), Citizen Corps Whole Community Councils, Disability Inclusion Working Groups, and Children’s Working Groups. The membership of the SAC must reflect a state’s unique risk profile and the interests of the five mission areas as outlined in the Goal. Further, the SAC must include representatives that were involved in the production of the state’s THIRA and SPR.

8.8.1. SENIOR ADVISORY COMMITTEE COMPOSITION AND SCOPE

SAC membership shall include at least one representative from relevant stakeholders including:

- Individuals from the counties, cities, towns, and Indian tribes within the state or high-risk urban area including, as appropriate, representatives of rural, high-population, and high-threat jurisdictions of UASI-funded high-risk urban areas;
- Representatives that were involved in the production of the state’s THIRA and SPR;
- State and urban area Chief Information Officers (CIOs) and Chief Information Security Officers (CISOs);
- SWIC and SIGB members;
- Citizen Corps Whole Community Councils;
- Local and tribal government officials;

Preparedness Grants Manual

- Tribal organizations and associations;
- Emergency response providers, including representatives of the fire service, law enforcement, emergency medical services, and emergency managers;
- Public health officials and other appropriate medical practitioners;
- Hospitals;
- Individuals representing educational institutions, including elementary schools, middle schools, junior high schools, high schools, community colleges, and other institutions of higher education;
- State and regional interoperable communications coordinators, as appropriate;
- State and major urban area fusion centers, as appropriate; and
- Nonprofit, faith-based, and other voluntary organizations, such as the American Red Cross.

Additionally, program representatives from the following entities should be members of the SAC (as applicable): State Primary Care Association, State Homeland Security Advisor (if this role is not also the SAA), State Emergency Management Agency (EMA) Director, State Public Health Officer, State Awardee for HHS' Hospital Preparedness Program, State Public Safety Officer (and SAA for Justice Assistance Grants, if different), State Coordinator for the DoD 1033 Program (also known as the Law Enforcement Support Office [LESO] Program), State Court Official, State Emergency Medical Services (EMS) Director, State Trauma System Manager, Statewide Interoperability Coordinator, State Citizen Corps Whole Community Council, the State Emergency Medical Services for Children (EMSC) Coordinator, State Education Department, State Human Services Department, State Child Welfare Services, State Juvenile Justice Services, Urban Area Points of Contact (POC), Senior Members of AMSCs, Senior Members of the RTSWG, Senior Security Officials from Major Transportation Systems, and the Adjutant General.

SACs are encouraged to develop subcommittee structures, as necessary, to address the issue or region-specific considerations. The SAC must include whole community intrastate and interstate partners as applicable and have balanced representation among entities with operational responsibilities for terrorism/disaster prevention, protection, mitigation, and response activities within the state, and include representation from the stakeholder groups and disciplines identified above.

The above membership requirement does not prohibit states, high-risk urban areas, regional transit and port entities, or other recipients of FEMA preparedness funding from retaining their existing structure under separate programs; however, at a minimum, those bodies must support and feed into the larger SAC. The composition, structure, and charter of the SAC should reflect this focus on building core capabilities, instead of simply joining previously existing advisory bodies under other grant programs. For designated high-risk urban areas, the SAA POCs are responsible for identifying and coordinating with the POC for the UAWG, which should be a member of the SAC. The POC's contact information must be provided to FEMA with the grant application. SAAs must work with existing high-risk urban areas to ensure that information for current POCs is on file with FEMA.

Finally, FEMA recommends that organizations advocating on behalf of youth, older adults, individuals with disabilities, individuals with limited English proficiency and others with other access and

functional needs, socio-economic factors and cultural diversity be invited to participate in the SAC. Applicants must submit the list of SAC members and the SAC charter at the time of application as an attachment in FEMA GO. SAAs will use the URT to verify compliance with SAC charter requirements.

8.8.2. SENIOR ADVISORY COMMITTEE RESPONSIBILITIES

The responsibilities of a SAC include:

- Integrating preparedness activities across disciplines, the private sector, nonprofit, faith-based, and community organizations, and SLTT governments, with the goal of maximizing coordination and reducing duplication of effort;
- Creating a cohesive planning network that builds and implements preparedness initiatives using FEMA resources as well as other federal, SLTT, private sector, and faith-based community resources;
- Managing all available preparedness funding sources to ensure their effective use and to minimize duplication of effort;
- Ensuring investments support building capability, closing capability gaps, or sustaining capabilities identified in the THIRA/SPR;
- Assisting in preparation and revision of the state, regional, or local homeland security plan or the THIRA, as the case may be; and
- Assisting in determining effective funding priorities for SHSP grants.

8.8.3. SENIOR ADVISORY COMMITTEE CHARTER

The governance of SHSP and UASI through the SAC should be directed by a charter. All members of the SAC should sign and date the charter showing their agreement with its content and their representation on the Committee. Revisions to the governing charter must be sent to the recipient's assigned FEMA HQ Preparedness Officer. The SAC charter must at a minimum address the following:

- A detailed description of the SAC's composition and an explanation of key governance processes, including how the SAC is informed by the states and urban area's THIRA/SPR;
- A description of the frequency at which the SAC will meet;
- How the committee will leverage existing governance bodies;
- A detailed description of how decisions on programmatic priorities funded by SHSP and UASI are made and how those decisions will be documented and shared with its members and other stakeholders, as appropriate; and
- A description of defined roles and responsibilities for financial decision making and meeting administrative requirements.

To ensure ongoing coordination efforts, SAAs are encouraged to share community preparedness information submitted in a state's BSIR with members of the SAC. SAAs are also encouraged to share their THIRA/SPR data with members of the SAC who are applying for other FEMA preparedness grants to enhance their understanding of statewide capability gaps. The charter should be made

available upon request to promote transparency in decision-making related to SHSP and UASI activities.

To manage this effort and to further reinforce collaboration and coordination across the stakeholder community, a portion of the 20% holdback of a state or territory award may be utilized by the SAA to support the SAC and to ensure representation and active participation of SAC members. Funding may be used for hiring and training planners, establishing and maintaining a program management structure, identifying and managing projects, conducting research necessary to inform the planning process, and developing plans that bridge mechanisms, documents, protocols, and procedures.

8.9. Urban Area Working Group (Homeland Security Grant Program)

To support the Whole Community Approach (see Section 1.6 “Strengthening Governance Integration” and Section 6.13 “Whole Community Preparedness”), high-risk urban areas are required to establish UAWGs representative of the counties, cities, towns, and tribes within the high-risk urban area including, as appropriate, representatives of rural jurisdictions, high-population jurisdictions, and high-threat jurisdictions.

UASI implementation and governance must include regional partners and should have balanced representation among entities with operational responsibilities for prevention, protection, mitigation, and response activities within the region. In some instances, high-risk urban area boundaries cross state borders. States and territories must ensure that the identified high-risk urban areas take an inclusive regional approach to the development and implementation of the UASI and involve the contiguous jurisdictions, mutual aid partners, port authorities, rail and transit authorities, state agencies, Statewide Interoperability Coordinators, Citizen Corps Whole Community Council(s), and campus law enforcement in their program activities.

8.9.1. URBAN AREA WORKING GROUP COMPOSITION AND SCOPE

Pursuant to section 2003(b) of the HSA (codified as amended at 6 U.S.C. § 604(b)), eligible high-risk urban areas were determined based on an analysis of relative risk of the 100 most populous Metropolitan Statistical Areas (MSA), as defined by OMB. MSAs are used by FEMA to determine eligibility for participation in the program. Geographical areas queried do not equate to minimum mandated membership representation of an urban area, nor does this guarantee funding for geographical areas queried. UAWGs are not required to expand or contract existing urban area participation to conform to MSA composition. Detailed information on [MSAs](#) is publicly available from the United States Census Bureau.

An SAA must confirm a specific POC with the designated high-risk urban area. The SAA POC is responsible for identifying and coordinating with the POC for the UAWG. This information must be provided to FEMA with the grant application. SAAs must work with existing high-risk urban areas to ensure that information for current POCs is on file with FEMA.

Membership in the UAWG must provide either direct or indirect representation for all relevant jurisdictions and response disciplines (including law enforcement, fire service, EMS, hospitals, public health, and emergency management) that comprise the defined high-risk urban area. It must also be inclusive of local Whole Community Citizen Corps Council and tribal representatives. The UAWG should also include at least one representative from each of the following significant stakeholders:

- Local and tribal government officials;

- CIO and CISO;
- Emergency response providers, which shall include representatives of the fire service, law enforcement, emergency medical services, and emergency managers;
- Public health officials and other appropriate medical practitioners, including Health Care Coalitions (HCCs);
- Individuals representing educational institutions, including elementary schools, middle schools, junior high schools, high schools, community colleges, and other institutions of higher education; and
- State and regional interoperable communications coordinators and state and major urban area fusion centers, as appropriate.

In addition to representatives from the local jurisdictions and tribes within the state, territory, or high-risk urban area, the UAWG should include officials responsible for the administration of Centers for Disease Control and Prevention's (CDC) and the HHS Assistant Secretary for Preparedness and Response's (ASPR) cooperative agreements. Finally, it must be inclusive of members advocating on behalf of youth, older adults, individuals with disabilities, individuals with limited English proficiency, and others with other access and functional needs, socio-economic factors, and cultural diversity.

High-risk urban areas will use the URT to verify UAWG structure and membership. The list of UAWG members must also be submitted at the time of application as an attachment in FEMA GO. High-risk urban areas must notify the SAA and the FEMA Headquarters Preparedness Officer of any updates to the UAWG structure or membership after the application is submitted.

8.9.2. URBAN AREA WORKING GROUP RESPONSIBILITIES

UAWGs must ensure that applications for funding under the UASI support building capability, closing capability gaps, or sustaining capabilities identified in the high-risk urban area's THIRA/SPR. The UAWG should support state efforts to develop the SPR particularly as it relates to UASI-funded activities. The UAWG, in coordination with the SAA POC, must develop a methodology for allocating funding available through the UASI. The UAWG must reach consensus on all UASI funding allocations. If consensus cannot be reached within the 45-day period allotted for the state to obligate funds to subrecipients, the SAA must make the allocation determination. The SAA must provide written documentation verifying the consensus of the UAWG or the failure to achieve otherwise on the allocation of funds and submit it to FEMA immediately after the 45-day period allotted for the state to obligate funds to subrecipients. Any UASI funds retained by the state must be used in direct support of the high-risk urban area. States must provide documentation to the UAWG, and FEMA upon request, demonstrating how any UASI funds retained by a state are directly supporting the high-risk urban area.

8.9.3. URBAN AREA WORKING GROUP CHARTER

In keeping with sound project management practices, the UAWG must ensure that its approach to critical issues such as membership, governance structure, voting rights, grant M&A responsibilities, and funding allocation methodologies are formalized in a working group charter, or another form of standard operating procedure related to the UASI governance. The charter must also outline how decisions made in UAWG meetings will be documented and shared with UAWG members. The UAWG charter must be submitted at the time of application as an attachment in FEMA GO and must be on

file with FEMA prior to drawing down UASI funding. It also must be available to all UAWG members to promote transparency in decision making related to the UASI.

8.10. Supplemental State Homeland Security Program and Urban Area Security Initiative Guidance (Homeland Security Grant Program)

8.10.1. COLLABORATION WITH OTHER FEDERAL PREPAREDNESS PROGRAMS

FEMA strongly encourages states, high-risk urban areas, tribes, and territories to understand other federal preparedness programs in their jurisdictions and to work with them in a collaborative manner to leverage all available resources and avoid duplicative activities. For example, HHS has two robust preparedness programs—CDC’s Public Health Emergency Preparedness (PHEP) cooperative agreement and ASPR’s Hospital Preparedness Program (HPP) cooperative agreement—that focus on preparedness capabilities. CDC’s 15 public health preparedness capabilities and ASPR’s 4 healthcare preparedness capabilities serve as operational components for many of the core capabilities, and collaboration with the PHEP directors and HPP coordinators can build capacity around shared interests and investments that fall in the scope of these HHS cooperative agreements and the HSGP.

States and high-risk urban areas should coordinate among the entire scope of federal partners, national initiatives, and grant programs to identify opportunities to leverage resources when implementing their preparedness programs. These may include but are not limited to: Medical Reserve Corps; Emergency Medical Services for Children grants; ASPR HPP; CDC PHEP; CDC Cities Readiness Initiative; Strategic National Stockpile Programs; EMS; DOJ grants; the Department of Defense 1033 Program (also known as the LESO Program); and CISA’s Infrastructure Security Division. However, coordination is not limited to grant funding. It also includes leveraging assessments such as Transportation Security Administration’s (TSA) Baseline Assessment for Security Enhancement (BASE), reporting from the Intelligence Community, risk information such as USCG’s Maritime Security Risk Analysis Model (MSRAM), and USBP Sector Analysis.

Each SHSP- and UASI-funded investment that addresses biological risk, patient care, or health systems preparedness should be implemented in a coordinated manner with other federal programs that support biological and public health incident preparedness such as those administered by HHS ASPR, CDC, and DOT’s National Highway Traffic Safety Administration (NHTSA).

8.10.2. COLLABORATION WITH HEALTH CARE COALITIONS

Health Care Coalitions (HCC) are regional entities comprised of health care, public health, emergency management, and emergency medical services organizations that plan and respond together, leverage resources, and address challenges in health care delivery brought on by public health and medical incidents. Given that many of the risks being mitigated include the potential for a range of mass casualties, including those across the chemical, biological, radiological, nuclear, explosive (CBRNE) spectrum, planning efforts should include the participation of HCCs and should take into account the elements and capabilities articulated in the [2017-2022 Health Care Preparedness and Response Capabilities](#), and other forthcoming versions.

8.10.3. COLLABORATION WITH NONPROFIT ORGANIZATIONS

SHSP and UASI recipients are encouraged to work with the nonprofit community to address terrorism and all-hazards prevention concerns, seek input on the needs of the nonprofit sector, and support the goals of their investments.

8.10.4. COLLABORATION WITH TRIBAL NATIONS

Tribal governments and their members are an essential part of our nation's emergency management team. Effective relationships with tribes are necessary to fulfill FEMA's mission of working together to improve our nation's preparedness and response posture. As such, FEMA strongly encourages states, high-risk urban areas, and territories to work with Tribal Nations in overall initiatives, such as whole community preparedness and emergency management planning.

8.11. Operation Stonegarden Operational Guidance (Homeland Security Grant Program)

This section provides operational guidance to OPSG applicants on the development of a concept of operations and campaign planning, the tactical operation period, and reporting procedures. This guidance also delineates specific roles and responsibilities, expectations for operations, and performance measures. Successful execution of these objectives will promote situational awareness among participating agencies and ensure a rapid, fluid response to emerging border security conditions.

OPSG uses an integrated approach to address transnational criminal activity. Federal and SLTT partners are required to establish and maintain an OPSG Integrated Planning Team (IPT) with representation from all participating law enforcement agencies and co-chaired by representatives from USBP, the SAA, and participating local law enforcement agencies' OPSG program representatives. Each operational order will address specific threats, gaps, and vulnerabilities identified by the USBP. All requests in the operational plan will be reviewed and approved by the corresponding sector's Chief Patrol Agent or his/her designee for border security value. USBP will provide routine monitoring and technical expertise to each participating agency. The content of each operational plan, to include the requested items will be reviewed for border security value and approved by the corresponding sector's Chief Patrol Agent or his/her designee.

All operational plans should be crafted in cooperation and coordination with federal and SLTT partners to meet the needs of the USBP Sector. Consideration will be given to applications that are coordinated across multiple jurisdictions. All applicants must coordinate with the CBP/USBP Sector Headquarters with geographic responsibility for the applicant's location in developing and submitting an Operations Order with an embedded budget to the SAA. Operations are to be crafted so that resources are allocated to one or more of the supportable categories:

1. Law Enforcement Presence;
2. Situational Awareness; and/or
3. Intelligence Collection, Analysis, and Distribution.

Law Enforcement Presence includes activities and costs associated to having an SLTT partner provide a law enforcement patrol presence in an area designated by the USBP Sector in support of border security efforts. Situational Awareness includes technology to provide current and immediately relevant information about currently active border security threats. Intelligence Collection, Analysis, and Distribution includes both technology and manpower related to the gathering and analysis of intelligence with a nexus to border security.

The terms of an OPSG award do not extend to an SLTT partner any authority to enforce additional laws, statutes, or regulations beyond their own authorities; SLTT partners are not empowered through OPSG to enforce immigration authorities under Title 8 of the U.S. Code (i.e., the Immigration and Nationality Act (INA)). Participation in the grant does not grant participants the power to operate outside of their own jurisdictional boundaries.

8.11.1. CONCEPT OF OPERATIONS AND CAMPAIGN PLANNING

Post-Allocation Announcement/Pre-Award

The overarching operational cycle involves three stages: 1) application (described in the HSGP NOFO); 2) concept of operations to formulate a Campaign Plan, and 3) one or more tactical operational periods, which are all developed by the IPT. All Operations Orders: Concept of Operations (CONOPS), Operation Orders or Campaign Plans, and Fragmentary Orders (FRAGOs) shall be submitted through the CBP Stonegarden Data Management System.

Campaign Plan

After awards are announced, participants will create and submit an operations order that forms a campaign plan and captures the initial, generalized-budgetary intent to their IPT.

The campaign plan should articulate the participant agency's long-term border security objectives and goals designed to mitigate border security risk.

Funds should be obligated as needed to target specific threats or vulnerabilities and ensure that OPSG usage is commensurate to the unique risk of each border region. This may require several short-term operations that combine to form an ongoing operational cycle, ensuring that USBP commanders and SLTT agency partners reserve the flexibility to respond to the ever-changing elements of border security.

The operations plan also will articulate the budgetary intent of how funds are to be used throughout the performance period. The operations plan will project planned expenditures in the following categories: overtime, equipment, travel, maintenance, fuel, and administrative funds. The subrecipient can initiate the procurement of equipment as well as state how much the county intends to use for M&A while keeping funds for overtime or residual equipment funds available for use as needed. If the subrecipient intends to spend more than 50% of its award on overtime over the course of the performance period, a Personal Reimbursement for Intelligence Cooperation and Enhancement of Homeland Security Act (PRICE Act) waiver request must be submitted in accordance with the policy initially outlined in [IB 379: Guidance to State Administrative Agencies to Expedite the Expenditure of Certain DHS/FEMA Grant Funding](#). The operations plan will meet both the SAA expectations to obligate the funds within 45 days of the award announcement and the demands of the grant's operational intent. **Sector approved campaign plans must be submitted to USBP Headquarters no later than four months after the official awards announcement has been made.**

Investment Modifications - Changes in Scope or Objective

Changes in scope or objective of the award – including those resulting from intended actions by the recipient or subrecipients – require FEMA's prior written approval, in accordance with 2 C.F.R. § 200.308(c)(1), § 200.407.

If changes must be made to the original operational plan, such as additional funding requests or other changes to the original scope or objectives, a FRAGO must be submitted in Homeland Security Information Network (HSIN) to obtain FEMA's prior written approval of such changes in accordance with 2 C.F.R. § 200.308(c)(1). These modifications will be annotated in the annex section of the FRAGO.

Operational Execution

If changes or additional funding requests to the original operational order must be made, a FRAGO will be created. These modifications will be annotated in the annex section of the FRAGO. Operational discipline is necessary for the success of OPSG. Deliberate, adaptive, integrated, and intelligence-driven planning is critical to conducting targeted enforcement operations consistent with the objectives of the OPSG. By participating in the OPSG, the SLTT agencies agree to conduct operations designed to reduce border security risk.

Operations are composed of six critical elements: 1) a pre-planning meeting with the IPT; 2) specified beginning and ending dates; 3) the integration of intelligence and border security; 4) use of targeted enforcement techniques; 5) clearly stated objectives; and 6) an after-action meeting. These operations require deliberate on-going planning to ensure command, staff, and unit activities synchronize to current and future operations. The cyclical nature of the process will ensure OPSG activities align with the fluctuating border security threats and vulnerabilities. The IPT should leverage information provided by the fusion center, Border Intelligence Centers, or other local intelligence center when possible and establish a common operational vision.

The USBP Sector's Chief Patrol Agent or his/her designee will ensure that the information or intelligence has a clear nexus to border security. Intelligence will be shared and vetted for border security value, driving the focus of operations. Once intelligence-driven targets are identified, the IPT will decide on operational objectives that reflect the intended impact of operations. The objectives should outline how the operation will deter, deny, degrade, or dismantle the operational capacity of the targeted transnational criminal organizations.

Each operational period will begin on a predetermined date and end on a predetermined date; however, dates may be subject to change commensurate with emerging security conditions. The starting date of the operational period should be established to allow sufficient time for the order to be submitted and approved by the corresponding USBP Sector and in concurrence with its SAA and USBP Headquarters. The USBP Sectors will upload copies of the operations order in the corresponding folder in the CBP Stonegarden Data Management System.

8.11.2. REPORTING PROCEDURES

Participation in OPSG requires accurate, consistent, and timely reporting of how funds are used, and how the SLTT agencies' operations have impacted border security through the mitigation of threat or vulnerability and the overall reduction of risk. Reporting will focus on monitoring program performance; determining the level of integration and information sharing; and developing best practices for future operations. To ensure consistent reporting each SLTT agency will identify a single point of contact to represent their agency as a member of the IPT and to coordinate the submission of reports or execute other aspects of the grant.

The Daily Activity Report (DAR), which can be found by selecting the current fiscal year HSGP NOFO on [FEMA's preparedness grants page](#), is to be used to submit the ongoing results and outputs from OPSG operations conducted. The information and statistics included in the DAR will be delineated by agency (friendly forces). The DAR must be submitted to the USBP sector or the participating

agency's OPSG coordinator within 48 hours of the conclusion of each OPSG shift. Subrecipients and Sectors are responsible to ensure that DARs are submitted in the proper format and in a timely manner. DARs will be submitted using the CBP Stonegarden Data Management System. Friendly forces receiving funding through a subrecipient will submit DARs within 48 hours. Border Patrol Sectors and OPSG subrecipients will implement internal protocols to ensure operational data from subrecipients and friendly force DARs are properly collected following the established guidelines.

In addition to the ongoing reporting of outputs, subrecipient participants will be required to submit AARs to USBP sectors within 10 days of closing the operational POP for that funding year. The AAR should carefully articulate outcomes and outputs as well as how the results of the operation compare with the objectives identified during the pre-planning meeting. Failure to submit the AAR in a timely manner may prevent the approval of future operations requests. All AARs and other OPSG reporting requirements will be submitted through the CBP Stonegarden Data Management System. Sectors are responsible for submitting AARs into Border Patrol Enforcement Tracking System (BPETS) as applicable.

8.11.3. OPERATION STONEGARDEN COORDINATION

OPSG supports enhanced cooperation and coordination among CBP, USBP, and federal and SLTT law enforcement agencies to improve overall border security. OPSG provides funding to support joint efforts to secure the United States' borders along routes of ingress/egress of international borders including travel corridors in states bordering Mexico and Canada along with states and territories with international water borders. OPSG also further enhances the sharing of threat information and intelligence between federal and SLTT law enforcement agencies through the development and sustainment of a capable workforce of analysts that have the necessary experience and training, access to open source, unclassified and classified information, products, data, SAR, tips/leads, and online/social media-based threats as well as necessary services and technology to facilitate analytic capabilities and collaboration.

SLTT law enforcement agencies will utilize their own law enforcement authorities to support the CBP and USBP border security mission and will not receive any additional authority as a result of participation in the grant. An OPSG award does not provide any additional authority to SLTT law enforcement agencies. More specifically, SLTT law enforcement agencies are not empowered through OPSG to enforce immigration authorities under Title 8 of the U.S. Code (i.e., the INA).

SLTT law enforcement agencies are expected utilize their own jurisdictional authority in support of enhanced border security unless some other agreement applies. SLTT law enforcement agencies are further expected to operate within the bounds of all applicable laws, to include federal laws, state statutes, and local laws, policies, and procedures.

OPSG is intended to support border states and territories of the United States in accomplishing the following objectives:

- Increase intelligence and operational capabilities to prevent, protect against, and respond to border security issues;
- Increase coordination and collaboration among federal and SLTT law enforcement agencies;
- Continue the distinct capability enhancements required for border security and border protection;

Preparedness Grants Manual

- Provide intelligence-based operations through USBP Sector Level experts to ensure safety and operational oversight of federal and SLTT law enforcement agencies participating in OPSG operational activities;
- Support a request to any Governor to activate, deploy, or redeploy specialized National Guard Units/Packages and/or elements of state law enforcement to increase or augment specialized/technical law enforcement elements operational activities;
- Continue to increase operational, material, and technological readiness of SLTT law enforcement agencies;
- Enhance the sharing of threat information and intelligence between federal and SLTT law enforcement agencies; and
- Develop and sustain a capable workforce of analysts that have the necessary experience and training, as well as access to open source, unclassified and/or classified information, products, data, SAR, tips/leads, online/social media-based threats, and the necessary services and technology to facilitate these analytic activities.

OPSG funds must be used to provide an enhanced law enforcement presence and to increase operational and intelligence capabilities of federal and SLTT law enforcement, promoting a layered, coordinated approach to law enforcement within border states and territories of the United States.

- **Federal and SLTT OPSG IPT:** Federal and SLTT partners must establish and maintain a formalized OPSG IPT with representation from all participating law enforcement agencies, co-chaired by representatives from USBP, the SAA, and participating law enforcement agencies' OPSG program representatives.
- No fewer than two IPT meetings must take **place during every funding year:**
 - Before submitting the CONCOPS (application); and
 - Before submitting the Campaign Plan
- OPSG funds may be used for travel and per diem in support of the IPTs and OPSG strategic planning events if the costs are otherwise compliant with other program and regulatory requirements.

8.11.4. COORDINATION REQUIREMENTS

All operational plans should be crafted in cooperation and coordination among federal and SLTT partners. Consideration will be given to applications that are coordinated across multiple jurisdictions. All applicants must coordinate with the USBP Sector Headquarters with geographic responsibility for the applicant's location in developing and submitting an Operations Order with an embedded budget to the SAA. OPSG funds must be used to provide increased operational capabilities to SLTT partners in support of enhanced border security through:

- Enhanced Law Enforcement Presence;
- Enhanced Situational Awareness; and
- Enhanced Intelligence Collection and Distribution.

After awards are announced, prospective recipients will re-scope the draft Operations Order and resubmit it as a final Operations Order with an embedded budget based on actual dollar amounts awarded. The appropriate Sector Headquarters will approve final Operations Orders and forward those orders to Headquarters, Office of Border Patrol, Washington, D.C., before funding is released. Recipients may not begin operations, obligate, or expend any funds until FEMA and USBP Headquarters have approved the final Operations Order and the embedded budget and removed any existing special conditions and/or restrictions.

8.11.5. OPERATIONAL ROLES AND RESPONSIBILITIES

To achieve unity of effort, it is essential that each participant know the roles and responsibilities within the IPT. The USBP sector's Chief Patrol Agent, or his/her designee, will:

- Coordinate and chair the area IPT's meetings;
- Coordinate with all interested and eligible SLTT agencies in the sector's area of operation during the open period of the OPSG application process by:
 - Assisting applicants in completing the operations planning portion of the application, which is like the Operations Order used by the USBP;
 - Forwarding the approved operation portion of the application to CBP/USBP Headquarters as well as to the SAA to complete the application process set by FEMA; and
 - Detailing what operational support the USBP Sector anticipates for specific periods and matching the capabilities of partners to fill those gaps.
- Following the announcement of grant awards, coordinate and chair a meeting with SLTT agencies that received OPSG awards to develop an individualized campaign plan. This includes:
 - Working with SLTT agencies along with other federal law enforcement agencies to determine the dates, focus, and needs of each operational period thus ensuring that each operation has a nexus to border security;
 - Receiving the first periodic operations order from the SLTT agencies and ensuring that the operation is conducted as outlined in the Campaign Planning section;
 - Monitoring and supporting the Operational Cycle throughout the performance period;
 - Ensuring the DAR and the AAR are submitted by SLTT agencies in the proper format and within the established timeframes;
 - Providing instruction, when possible, to SLTT agencies regarding techniques, methods, and trends used by transnational criminal organizations in the area;
 - Providing a single point of contact to participants as a subject-matter expert in OPSG that can coordinate, collect, and report operational activities within the established reporting procedures;
 - Providing verification that operations are conducted;

Preparedness Grants Manual

- Documenting and conducting random, on-site operational verification of OPSG patrols by subrecipients and friendly forces;
- Verifying that subrecipients are performing OPSG enforcement duties in accordance with the applicable grant, statute, and regulatory guidance and instructions; and
- Ensuring that grant funds are appropriately expended to meet sector border enforcement operational requirements and assist in enhancing subrecipient/friendly force capabilities to provide for enhanced enforcement presence, operational integration, and intelligence sharing in border communities.

The SLTT agency lead, or their designee, will:

- Coordinate with the SAA on all grant management matters including but not limited to the development and review of operations orders, expenditure of funds, allowable costs, reporting requirements;
- Upon receiving a grant award, coordinate and meet as a member of the IPT to develop an individualized campaign plan that covers the length of the grant performance period;
- Work within the IPT to develop an initial Operational Cycle and determine the duration of the first operational period based on the tactical needs specific to the area;
- Submit all operations orders for review and submit the operations order to the Border Patrol and ensure the operation meets the six criteria established in the Operational Execution Section (see Section 8.11.1 “Concept of Operations and Campaign Planning”):
 - Conduct operations as needed throughout the length of the grant performance period;
 - Integrate law enforcement partners from contiguous counties and towns into their tactical operations to expand the layer of security beyond existing areas;
 - Ensure all required reports, including reports from friendly forces, are submitted to the Border Patrol and the SAA, when applicable, in the proper format and within established timeframes;
 - Ensure applicable OPSG-derived data is shared with the designated fusion center in the state or high-risk urban areas;
 - Ensure applicable intelligence is shared with the designated fusion center in the state and/or high-risk urban areas;
 - Request instruction and information from the SAA, when applicable, and/or USBP and other federal law enforcement agencies regarding techniques, methods, and trends used by transnational criminal organizations in the area;
- Provide the SAA and USBP a single point of contact that maintains subject-matter expertise in OPSG who can coordinate, collect, and report operational activities within the established reporting procedures; and
- Assist as required with the coordination, management, and operational aspects of the grant.

The SAA will:

- Actively engage in the IPT meetings;
- Work in direct coordination and communication with the local or tribal agency lead on all grant management matters;
- Review all operations orders created by the local or tribal agency;
- Act as the fiduciary agent for the program and provide expertise in state policy and regulations;
- Enter into a subaward agreement to disburse the allocated funding awarded through FEMA;
- Generate biannual reports to FEMA capturing the subrecipients' obligations and expenditures of funds;
- Determine if the grant's performance period requires additional refinement over the federally established 36-month period;
- Conduct audits of the program to ensure that the subrecipients are following program guidance; and
- Assist as required with the coordination, management, and operational aspects of the grant.

8.11.6. DEFINITIONS (OPERATION STONEGARDEN)

Area of Interest: A specific area, areas, or facilities known to be used by transnational criminal organizations in furtherance of their criminal activity.

Border security related crime: Any action or enterprise that constitutes an offense which is punishable by law, for which prosecution would serve established border security goals as outlined by the CBP for a whole of community approach:

That results in a favorable environment for criminal enterprise network, transnational criminal, or terrorist organizations; the smuggling/trafficking of humans, contraband, narcotics, or weapons of mass destruction across or in proximity to the U.S. border; or

- That has a direct nexus to illicit cross-border activity.

Campaign Plan: The first Operational Order based on the CONOP aimed at accomplishing a strategic or operational objective within a given time and space.

CONOPS: A written statement that clearly and concisely expresses what the SLTT commander intends to accomplish and how it will be done using available resources (and funding). It is also the operational equivalent of the OPSG grant application.

FRAGO: A fragmentary order is a modification of the approved campaign plan, reflecting changes to the scope or objective pursuant to 2 C.F.R. § 200.308(c)(1). After an operation order has been approved, any changes to a campaign plan will be submitted via HSIN as a FRAGO for FEMA's approval. Subsequent FRAGOs are permissible, subject to FEMA's prior written approval, consistent with the requirements of 2 C.F.R. § 200.308, § 200.407.

Friendly Forces: Local law enforcement entities supporting border security operations to whom OPSG subrecipients provide funding.

IPT: Group that coordinates on all aspects of OPSG application, planning, and de-briefings.

Operational Cycle: A deliberate on-going cycle of command, staff, and unit activities intended to synchronize current and future operations (driven by current intelligence and short-term goals that support the campaign).

Operational Discipline: The organized manner in which an organization plans, coordinates, and executes the OPSG mission with common objectives toward a particular outcome.

Operation/Operational Order: A formal description of the action to be taken to accomplish or satisfy a CONOP, Campaign Plan, or FRAGO. The Operation/Operational Order includes a detailed description of actions to be taken and required logistical needs to execute an operation.

Opioid Receptor Antagonists: Any medically approved drug or medical substance that can be utilized by first responder personnel in an emergency that is designed to counteract the effects of an opioid overdose.

Performance Measure: A numerical expression that quantitatively conveys how well the organization is doing against an associated performance goal, objective, or standard.

Risk: Potential for an adverse outcome assessed as a function of threats, vulnerabilities, and consequences associated with an incident, event, or occurrence.

Targeted Enforcement: The leveraging of all available assets against a specific action, area, individual, or organization and using those deemed most appropriate to mitigate risk.

Target of Interest: A specific person, group of persons, or conveyance known to be part of, or used by transnational criminal organizations to advance their criminal activity.

Threat: Information expressing intent to conduct illegal activity often derived from intelligence sources, the overall context, a specific event or series of events, or observation of suspicious activity.

Tier: Tier refers to the geographical location of a municipality, county, or tribe with respect to the United States national border, i.e., Tier 1 is a county located on the border; a Tier 2 county is a county contiguous to a Tier 1 county; and a Tier 3 is a county not located on the physical border but is a contiguous to a Tier 2 county.

Unity of Effort: Coordination and cooperation among all organizational elements, even though they may not be part of the same command structure, to achieve success.

Vulnerability: The protective measures in place are less than the protective measures needed to mitigate risk.

8.12. Supplemental Resources (Homeland Security Grant Program, Tribal Homeland Security Grant Program)

FEMA collaborates with various subject-matter experts and acknowledges the value and expertise these Federal partner agencies provide to help shape the development and implementation of the

HSGP and THSGP. This continued partnership and collaboration helps provide recipients with the greatest number of resources required to effectively manage and implement funds as well as promotes transparency. Therefore, FEMA is providing links to information on various subjects and policies that are relevant to the mission and intent of FEMA and its preparedness grant programs.

8.12.1. CHEMICAL, BIOLOGICAL, RADIOLOGICAL, AND NUCLEAR DETECTION

The Countering Weapons of Mass Destruction (CWMD) Office is a support component within DHS established in December 2017 to counter attempts by terrorists or other threat actors to carry out an attack against the United States or its interests using a weapon of mass destruction. The CWMD Office provides guidance to improve national coordination on CBRN issues and works with federal and SLTT agencies to ensure operators have better access to current data and subject-matter expertise they need. FEMA offers implementation support on the THIRA/SPR for SLTT partners and the CWMD Office offers TA to provide guidance to SLTT partners seeking to address CBRN threats and to build or sustain CBRN detection and response capabilities. For more information or assistance, please contact CWMD-THIRA@hq.dhs.gov.

8.12.2. NATIONAL INFORMATION EXCHANGE MODEL

National Information Exchange Model (NIEM) is a common vocabulary that enables efficient information exchange across diverse public and private organizations. NIEM can save time and money by providing consistent, reusable data terms and definitions and repeatable processes. To support information sharing, all recipients of grants for projects implementing information exchange capabilities are required to use NIEM and to adhere to the NIEM compliance rules. Go to NIEM.gov for guidance on how to utilize FEMA award funding for information sharing, exchange, and interoperability activities.

The NIEM Emergency Management domain supports emergency-related services (including preparing first responders and responding to disasters), information sharing, and activities such as homeland security and resource and communications management. The NIEM Emergency Management domain has an inclusive governance structure that includes federal, SLTT, industry, and, where necessary, international partnerships. The NIEM Emergency Management domain is committed to community support via TA and NIEM training. For more information on the NIEM Emergency Management domain, to request training or TA or to just get involved, go to the [Emergency Management](#) page on NIEM.gov.

8.12.3. INFRASTRUCTURE RESILIENCE PLANNING FRAMEWORK

SLTT governments are faced with complex long-term decisions, limited sources of revenue, and changing populations. CISA developed the Infrastructure Resilience Planning Framework (IRPF) as a resource for SLTT planners. The IRPF provides a process and a series of tools and resources for incorporating critical infrastructure resilience considerations into planning activities. The IRPF can be used to support capital improvement plans, hazard mitigation plans, or other planning documents, as well as funding requests. For more information, see the [IRPF](#).

8.12.4. INTEGRATED PUBLIC ALERT AND WARNING SYSTEM

The Integrated Public Alert & Warning System (IPAWS) is FEMA's national system for local alerting that provides authenticated emergency and life-saving information to the public through mobile phones using Wireless Emergency Alerts, to radio and television via the Emergency Alert System, and

on the National Oceanic and Atmospheric Administration's Weather Radio. For more information, see the [IPAWS](#) page on FEMA.gov.

8.12.5. HOMELAND SECURITY INFORMATION NETWORK

HSIN is a user-driven, web-based, information sharing platform that connects all homeland security professionals including the DHS and its federal, SLTT, international, and private sector partners across all homeland security mission areas. HSIN is used to support daily operations, events, exercises, natural disasters, and incidents. To support user mission needs, HSIN provides three sets of services for secure information sharing. The first service provides a shared place for communities to securely collaborate on homeland security issues and includes core functions such as a web conferencing and instant messaging tools with white boarding, video, and chat services for real-time communication and situational awareness. The second set provides secure dissemination and sharing capabilities for homeland security alerts, reports, and products. The third set allows users to access and query a variety of shared data and services from all homeland security mission areas and trusted federal partners. Preparedness grant funds may be used to support planning, training and development costs associated with developing and managing mission critical HSIN communities of interest and sites. Learn more about HSIN on the [HSIN HSGP Guidance](#) page on DHS.gov.

8.12.6. STATE, LOCAL, TRIBAL, TERRITORIAL CYBERSECURITY ENGAGEMENT PROGRAM

CISA is responsible for enhancing the security, resilience, and reliability of the Nation's cyber and communications infrastructure. CISA works to prevent or minimize disruptions to critical information infrastructure to protect the public, the economy, and government services. CISA leads efforts to protect the Federal ".gov" domain of civilian government networks and to collaborate with the private sector—the ".com" domain—to increase the security of critical networks.

The DHS SLTT Cybersecurity Engagement Program within CISA was established to help non-federal public stakeholders and associations manage cyber risk. The program provides appointed and elected SLTT government officials with cybersecurity risk briefings, information on available resources, and partnership opportunities to help protect their citizens online. Through these and related activities, the program coordinates DHS's cybersecurity efforts with its SLTT partners to enhance and protect their cyber interests. More information on all CISA resources available to support SLTT governments is available at the [Resources & Tools](#) page on CISA.gov.

8.12.7. FRAMEWORK FOR IMPROVING CRITICAL INFRASTRUCTURE CYBERSECURITY

When requesting funds for cybersecurity, applicants are encouraged to propose projects that would aid in implementation of all or part of the [Framework for Improving Critical Infrastructure Cybersecurity](#) (the "Framework") developed by the National Institute of Standards and Technology (NIST). The Framework gathers existing international standards and practices to help organizations understand, communicate, and manage their cyber risks. For organizations that do not know where to start with developing a cybersecurity program, the Framework provides initial guidance. For organizations with more advanced practices, the Framework offers a way to improve their programs, such as better communication with their leadership and suppliers about management of cyber risks.

CISA's Critical Infrastructure Cyber Community C³ Voluntary Program also provides resources to critical infrastructure owners and operators to assist in adoption of the Framework and managing cyber risks. Additional information on the Critical Infrastructure Cyber Community C³ Voluntary Program can be found at the [Critical Infrastructure Cyber Community C³ Voluntary Program](#) page on CISA.gov.

DHS's Enhanced Cybersecurity Services (ECS) program is an example of a resource that assists in protecting U.S.-based public and private entities and combines key elements of capabilities under the "Detect" and "Protect" functions to deliver an impactful solution relative to the outcomes of the Cybersecurity Framework. Specifically, ECS offers intrusion prevention and analysis services that help U.S.-based companies and SLTT governments defend their computer systems against unauthorized access, exploitation, and data exfiltration. ECS works by sourcing timely, actionable cyber threat indicators from sensitive and classified Government Furnished Information (GFI). DHS then shares those indicators with accredited Commercial Service Providers (CSPs). Those CSPs in turn use the indicators to block certain types of malicious traffic from entering a company's networks. Groups interested in subscribing to ECS must contract directly with a CSP to receive services. Please visit the [ECS](#) page on CISA.gov for a current list of ECS CSP points of contact.

8.12.8. REGIONAL RESILIENCY ASSESSMENT PROGRAM

The Regional Resiliency Assessment Program (RRAP) is a cooperative assessment of specific critical infrastructure within a designated geographic area and a regional analysis of the surrounding infrastructure that address a range of infrastructure resilience issues that could have regionally and nationally significant consequences. These voluntary, non-regulatory RRAP projects are led by CISA's Infrastructure Security Division and are selected each year by DHS with input and guidance from federal, state, and local partners. For additional information on the RRAP, visit the [RRAP](#) page on CISA.gov.

8.12.9. LAW ENFORCEMENT SUPPORT OFFICE, OR 1033 PROGRAM

LESO facilitates a law enforcement support program, which originated from the National Defense Authorization Act of Fiscal Year 1997. This law allows the transfer of excess Department of Defense property that might otherwise be destroyed to law enforcement agencies across the United States and its territories.

No equipment is purchased for distribution. All items were excess that had been turned in by military units or had been held as part of reserve stocks until no longer needed. Requisitions cover the gamut of items used by America's military — clothing, office supplies, tools and rescue equipment, vehicles, small arms, and more. There is no fee for the equipment itself; however, the law enforcement agencies are responsible for the shipping costs.

For additional information on the LESO, see the [LESO](#) page on DLA.mil.

9. Nonprofit Security Grant Program

9.1. Program Funding Guidelines and Priorities

NSGP grant recipients (e.g., SAAs) and subrecipients (e.g., nonprofit organizations) may only use NSGP grant funds for the purpose set forth in the grant award and must use funding in a way that is consistent with the statutory authority for the award. See the annual NSGP NOFO for program Priorities.

9.1.1. NATIONAL INCIDENT MANAGEMENT SYSTEM IMPLEMENTATION

Recipients receiving NSGP funding must implement NIMS. Recipients must manage resources purchased or supported with FEMA grant funding according to NIMS resource management guidance.

9.2. Nonprofit Security Grant Program Investment Modifications – Changes in Scope or Objective

Changes in scope or objective of the award—whether as a result of intended actions by the recipient or subrecipients—require FEMA’s prior written approval, in accordance with 2 C.F.R. § 200.308(c)(1), § 200.407. NSGP is competitive with applications recommended for funding based on threat, vulnerability, consequence, and their mitigation to a specific facility/location. However, consistent with 2 C.F.R § 200.308(c)(1), Change in Scope Notification, FEMA requires prior written approval of any change in scope/objective of the grant-funded activity after the award is issued. See 2 C.F.R. § 200.308(b), (c). Scope/objective changes will be considered on a case-by-case basis, provided the change does not negatively impact the competitive process used to recommend NSGP awards. Requests to change the scope or objective of the grant-funded activity after the award is made must be submitted by the SAA via FEMA GO as a Scope Change Amendment. The amendment request must include the following:

- A written request from the NSGP subrecipient on its letterhead, outlining the scope or objective change including the approved projects from the subrecipient’s IJ, the funds and relative scope or objective significance allocated to those projects, the proposed changes, and any resulting reallocations as a result of the change of scope or objective;
- An explanation why the change of scope or objective is necessary;
- Validation from the SAA that any deviations from the approved IJ are addressed in the vulnerability assessment submitted by the subrecipient at the time of application; and
- The subrecipient request must also address whether the proposed changes will impact its ability to complete the project within the award’s POP.

FEMA will generally not approve NSGP change-of-scope requests resulting from the following situations:

- Subrecipients that relocate their facilities after submitting their application who are requesting a change of scope to allow them to use NSGP funds toward projects at the new facility; or

- Subrecipients that renovate their facilities after submitting their application in cases where the subsequent renovations would affect the vulnerability/risk assessment upon which the IJ is based.

NSGP project funding is based on the ability of the proposed project to mitigate the risk factors identified in the IJ. For this reason, FEMA may reject requests to significantly change the physical security enhancements that are purchased with NSGP funding where FEMA believes approval of the request would change or exceed the scope of the originally approved project. FEMA will consider all requests to deviate from the security project as originally proposed on a case-by-case basis, *consistent with 2 C.F.R. § 200.308(c)(1)*.

Subrecipients may not proceed with implementing any scope/objective changes until the SAA receives written approval from FEMA through FEMA GO and until the SAA has made any required subaward modifications.

If a subrecipient is simply making changes to its own budget without impacting the scope or objective of the subaward, and where the budget changes do not involve other prior approval requirements listed in 2 C.F.R. § 200.407, then the subrecipient does not need the prior approval of the SAA or FEMA. See 2 C.F.R. § 200.308. Instead, the subrecipient is only required to report to the SAA the budget changes. Similarly, the SAA should report those budget changes to FEMA.

9.3. Pass-Through Requirements

Pass-through funding is required under this program. Awards made to the SAA for the NSGP carry additional pass-through requirements. Pass-through is defined as an obligation on the part of the state to make subawards to selected nonprofit organizations. The SAA must provide funds awarded under NSGP to subrecipients within 45 days of receipt of the funds. A letter of intent (or equivalent) to distribute funds is not sufficient. Award subrecipients that are selected for funding under this program must be provided with funding within 45 days from the date the funds are first made available to the recipient so that they can initiate implementation of approved investments.

For the SAA to successfully meet the pass-through requirement and provide funding to the subrecipients, the SAA must meet the following four requirements:

- There must be some action by the SAA to establish a firm commitment to award the funds to the selected nonprofit organization;
- The action must be unconditional on the part of the SAA (i.e., no contingencies for availability of SAA funds);
- There must be documentary evidence of the commitment of the award of funding to the selected nonprofit organization; and
- The SAA must communicate the terms of the subaward to the selected nonprofit organization.

If a nonprofit organization is selected for an NSGP award and elects to decline the award, the SAA must notify their FEMA Preparedness Officer. The SAA may not re-obligate to another subrecipient without prior approval. "Receipt of the funds" occurs either when the SAA accepts the award or 15 calendar days after the SAA receives notice of the award, whichever is earlier. SAAs are sent notification of NSGP awards via the FEMA GO system. If an SAA accepts its award within 15 calendar days of receiving notice of the award in the FEMA GO system, the 45-calendar day pass-through period will start on the date the SAA accepted the award. Should an SAA not accept the NSGP award

Preparedness Grants Manual

within 15 calendar days of receiving notice of the award in the FEMA GO system, the 45-calendar days pass-through period will begin 15 calendar days after the award notification is sent to the SAA via the FEMA GO system.

It is important to note that the POP start date does not directly affect the start of the 45-calendar day pass-through period. For example, an SAA may receive notice of the NSGP award on Aug. 20, 2023, while the POP dates for that award are Sept. 1, 2023, through Aug. 31, 2026. In this example, the 45-day pass-through period will begin on the date the SAA accepts the NSGP award or Sept. 4, 2023 (15 calendar days after the SAA was notified of the award), whichever date occurs first. The POP start date of Sept. 1, 2023, would not affect the timing of meeting the 45-calendar day pass-through requirement.

10. Surface Transportation Security Grant Programs (Transit Security Grant Program, Intercity Passenger Rail Program, Intercity Bus Security Grant Program)

10.1. Program Funding Guidelines and Priorities (Transit Security Grant Program, Intercity Passenger Rail Program, Intercity Bus Security Grant Program)

Costs charged to a TSGP, IPR Program, or IBSGP award must be consistent with the Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, located at 2 C.F.R. Part 200.

- NOTE: Costs charged to an **IPR Program award** must also be consistent with the cost principles in the Federal Acquisition Regulation (FAR) Part 31.2 in lieu of 2 C.F.R. Part 200, Subpart E. Any conflicts between FAR 31.2 and 2 C.F.R. Part 200, Subpart E shall be resolved in favor of the applicable provision in FAR 31.2.

See annual program NOFO for information on program-specific priorities.

10.2. Changes in Scope or Objectives (Transit Security Grant Program, Intercity Passenger Rail Program, Intercity Bus Security Grant Program)

All three Surface Transportation Security Grant Programs generally do not allow for scope or objective changes unless there are extenuating circumstances (e.g., the COVID-19 or a similar pandemic preventing activities). FEMA will consider scope/objective changes on a case-by-case basis if extenuating circumstances are present.

10.3. Security Plan Requirements (Transit Security Grant Program, Intercity Passenger Rail Program, Intercity Bus Security Grant Program)

10.3.1. TRANSIT SECURITY GRANT PROGRAM AND INTERCITY PASSENGER RAIL PROGRAM

The following information regarding security plan requirements is provided in 6 U.S.C. § 1134(c)(2):

Security plans should include the following, as appropriate:

- A prioritized list of all items included in the public transportation agency's security assessment that have not yet been addressed;
- A detailed list of any additional capital and operational improvements identified by DHS or the public transportation agency and a certification of the public transportation agency's technical capacity for operating and maintaining any security equipment that may be identified in such list;
- Specific procedures to be implemented or used by the public transportation agency in response to a terrorist attack including evacuation and passenger communication plans along with appropriate evacuation and communication measures for the elderly and individuals with disabilities;

- A coordinated response plan that establishes procedures for appropriate interaction with state and local law enforcement agencies, emergency responders, and federal officials to coordinate security measures and plans for response in the event of a terrorist attack or other major incident;
- A strategy and timeline for conducting training under 49 C.F.R. § 1570.109(b) and 49 C.F.R. Part 1582;
- Plans for providing redundant and other appropriate backup systems necessary to ensure the continued operation of critical elements of the public transportation system in the event of a terrorist attack or other major incident;
- Plans for providing service capabilities throughout the system in the event of a terrorist attack or other major incident in the city or region which the public transportation system serves;
- Methods to mitigate damage within a public transportation system in case of an attack on the system, including a plan for communication and coordination with emergency responders; and
- Other actions or procedures as the Secretary of Homeland Security determines are appropriate to address the security of the public transportation system.

10.3.2. ADDITIONAL AMTRAK REQUIREMENTS

Sections 1512 and 1513 of the Implementing Recommendations of the 9/11 Commission Act of 2007 (6 U.S.C. §§ 1162 and 1163) require a recipient to complete a vulnerability assessment and develop a security plan. To be eligible for the IPR Program, Amtrak must have developed, or updated, its security plan. The security plan must be based on a security assessment, such as the Baseline Assessment for Security Enhancement, which is performed by 'SA's Transportation Security Inspectors-Surface. This security assessment must have been conducted within the last three years prior to receiving the respective fiscal year's IPR Program award. A copy of the security plan and security assessment must be provided to DHS/FEMA upon request.

Entities providing transit security (e.g., city/county police department or a transportation agency's own police department) must approve the security plan. The signature of a responsible official from the agency's railroad security provider serves as this approval. Associated documentation of this approval must be provided to DHS/FEMA upon request. In addition, the agency's railroad security provider is encouraged to review the IJs prior to submission.

Amtrak, in receiving funds through this program, must participate in RTSWG in participating urban areas. The RTSWG should serve as the forum for regional partners to discuss risk, planning efforts, and mitigation strategies. These discussions should be held regardless of funding to continue enhancing the overall security of the region. Regional working groups are a best practice for enhancing security and are encouraged for all jurisdictions.

An application submitted by an otherwise eligible non-federal entity (i.e., the applicant) may be deemed ineligible when the person that submitted the application is not: 1) a current employee, personnel, official, staff or leadership of the non-federal entity; and 2) duly authorized to apply for an award on behalf of the non-federal entity at the time of application.

Further, the AOR and SA must be a duly authorized current employee, personnel, official, staff or leadership of the recipient and provide an email address unique to the recipient at the time of application and upon any change in assignment during the POP. Consultants or contractors of the recipient are not permitted to be the AOR or the SA of the recipient. It is the sole responsibility of the

recipient to keep their points of contact for the organization up-to-date and accurate in all federal systems.

The AOR is responsible for submitting programmatic and financial performance reports, accepting award packages, signing assurances and certifications, and submitting award amendments.

10.3.3. INTERCITY BUS SECURITY GRANT PROGRAM REQUIREMENTS

To be eligible for the IBSGP, operators must have developed or updated their organization's Vulnerability Assessment and Security Plan (VASP) that must be based on a security assessment, such as the BASE performed by Transportation Security Inspectors-Surface from TSA. Private operators providing transportation with an over-the-road bus system must have completed or updated their VASP within the past three years before the opening of the respective fiscal year's IBSGP application period. Additionally, a copy of the VASP certification must be submitted along with the application to be considered eligible. Failure to include this certification will result in the application being deemed ineligible. All operators must have completed or updated a VASP as required by Section 1531 of the 9/11 Act (6 U.S.C. § 1181) as follows:

Assessments and security plans should include, as appropriate:

- Identification and evaluation of critical assets and infrastructure, including buses, platforms, stations, terminals, and information systems;
- Identification of vulnerabilities to those assets and infrastructure; and
- Identification of gaps in physical security; passenger and cargo security; the security of programmable electronic devices, computers, or other automated systems that are used in providing over-the-road bus transportation; alarms, cameras and other communications systems and utilities needed for over-the-road bus security purposes, including dispatching systems; emergency response planning; and employee training.

Security plans should also include, as appropriate:

- The identification of a security coordinator having authority to implement security actions, coordinate security improvements, and receive communications from appropriate federal officials regarding over-the-road bus security;
- A list of needed capital and operational improvements;
- Procedures to be implemented or used by the operator in response to a terrorist attack, including evacuation and passenger communication plans that include individuals with access and functional needs;
- The identification of steps taken with state and local law enforcement agencies, emergency responders, and federal officials to coordinate security measures and plans for response to a terrorist attack;
- A strategy and timeline for conducting training to prepare frontline employees for potential security threats and conditions;

- Enhanced security measures to be taken by the operator when the Secretary of Homeland Security declares a period of heightened security risk; and
- Plans for providing redundant and backup systems required to ensure the continued operation of critical elements of the operator's system in the event of a terrorist attack.

For additional information, see the current fiscal year's IBSGP NOFO.

10.4. Allowable Cost Guidance

10.4.1. SPECIFIC GUIDANCE ON EXPLOSIVE DETECTION CANINE TEAMS (TRANSIT SECURITY GRANT PROGRAM, INTERCITY PASSENGER RAIL PROGRAM)

Explosive Detection Canine Team Certification

Each Explosive Detection Canine Team (EDCT), composed of one dog and one handler, must be certified by an appropriate, qualified organization. TSA-certified EDCTs will meet or exceed certification standards set by the TSA National Explosives Detection Canine Team Program (NEDCTP). Recipient EDCTs that do not participate in the NEDCTP will be required to certify annually under their respective agency, local, and state regulations. The recipient will maintain certification, utilization, and training data to show compliance in meeting or exceeding those guidelines set forth by the Scientific Working Group on Dog and Orthogonal Detection Guidelines (SWGDOG), as of Sept. 14, 2007, in addition to the requirements set forth in the NOFO.

Explosive Detection Canine Team Submission Requirements

1. The recipient will ensure that a written security procedure plan exists for the safekeeping of all explosive training aids, including safe transportation. The recipient will document the removal, use, and return of explosive training aids used during training exercises or for any other reason. The plan and all documentation must be made available to FEMA upon request;
2. The recipient will comply with requirements for the proper storage, handling, and transportation of all explosive training aids in accordance with the Bureau of Alcohol, Tobacco, Firearms and Explosives' Publication 5400.7 (ATF P 5400.7) (09/00), Federal Explosive Law and Regulation;
3. The recipient will ensure that certified EDCTs are available to respond to situations 24 hours a day, 7 days per week on an on-duty or off-duty on-call basis. If TSGP- or IPR Program-funded EDCTs are not available, other non-TSGP or non-IPR Program funded EDCTs may be utilized for this response. The intent is to provide maximum coverage during peak operating hours and to maintain the ability to promptly respond to threats that affect public safety or mass transit operations;
4. EDCTs under this grant are single purpose and will be trained to detect "live" explosives only, not "simulated" explosives. EDCTs must not have received previous training to detect any other substances;
5. The recipient will ensure that each EDCT receives on-site proficiency training at a minimum of 4 hours per week per duty cycle. This training shall include, but not be limited to, mass transit passenger cars, terminals/platforms, luggage, freight/warehouses, and vehicles. Complete, detailed, and accurate training records must be maintained for all proficiency training conducted by each EDCT. These records must be made available to FEMA upon request;
6. The recipient will conduct appropriate training or other canine activities, within view of the public, to increase public awareness of EDCTs and provide a noticeable deterrent to acts which

affect public safety or mass transit operations. The recipient will also ensure that such activities include, over a period, a presence in operational areas of the mass transit system during peak and off-peak hours. The recipient agrees that EDCTs will be utilized in the field at least 80% of their duty time, annually;

7. The recipient will provide safe and sanitary kennel facilities for program canines, and these costs may be allowable with prior approval by FEMA. This applies to kenneling canines at a mass transit system, handlers' residences, or commercial boarding facilities. Canines must not be left in makeshift accommodations or without proper supervision, protection, and care. The recipient will ensure that canines are transported on-duty and off-duty in vehicles configured with adequate temperature control, padding, and screening to ensure proper health, safety, and security; and
8. The recipient will ensure that adequate routine and emergency veterinary care are provided for all canines.

Note: FEMA reserves the right to conduct an on-site operational and record review upon 48-hour notice to ensure compliance with applicable federal regulations.

10.4.2. CAPITAL (CONSTRUCTION) PROJECTS GUIDANCE (TRANSIT SECURITY GRANT PROGRAM, INTERCITY PASSENGER RAIL PROGRAM, INTERCITY BUS SECURITY GRANT PROGRAM)

The recipient must obtain written approval from FEMA prior to the use of any program funds for construction or renovation projects. When applying for construction funds, including communications towers, the recipient must submit evidence of approved zoning ordinances, architectural plans, and any other locally required planning permits. Additionally, the recipient is required to submit a [SF-424C](#) Form and budget detail citing the project costs and a [SF-424D](#) Form for standard assurances for the construction project.

Additional guidance for Transit Security Grant Program Capital (Construction) Projects:

Capital expenditures are defined in [2 C.F.R. § 200.1](#) as expenditures to acquire capital assets or expenditures to make additions, improvements, modifications, replacements, rearrangements, reinstallations, renovations, or alterations to capital assets that materially increase their value or useful life. Use of capital expenditures must comply with [2 C.F.R. § 200.439](#). See Section 4.5.1 "Construction and Renovation" for more information.

11. Port Security Grant Program

11.1. Program Funding Guidelines and Priorities

PSGP grant recipients may only use PSGP grant funds for the purpose set forth in the grant award and must use funding in a way that is consistent with the statutory authority for the award. See the annual PSGP NOFO for program Priorities.

11.2. Allowable Cost Guidance

11.2.1. SPECIFIC GUIDANCE ON EXPLOSIVE DETECTION CANINE TEAMS

Explosive Detection Canine Team Certification

Each EDCT, composed of one dog and one handler, must be certified by an appropriate, qualified organization. Canine (K-9) and handler should receive an initial basic training course and weekly maintenance training sessions thereafter to maintain the certification. The basic training averages ten weeks for the canine team (K-9 and handler together) with weekly training and daily exercising. Comparable training and certification standards, such as those promulgated by the TSA Explosive Detection Canine Program, the National Police Canine Association (NPCA), the U.S. Police Canine Association (USPCA), or the International Explosive Detection Dog Association (IEDDA), may be used to meet this requirement. Certifications and training records will be kept on file with the recipient and made available to FEMA upon request.

Explosive Detection Canine Team Submission Requirements

PSGP recipients are required to submit a written plan or standard operating procedure (SOP) that describes EDCT deployment policy including visible and unpredictable deterrent efforts and on-call EDCTs rapid response times. Recipients who are subject to the maritime security regulations contained in 33 C.F.R. Parts 104 (vessel security) or 105 (facility security), shall submit a Vessel Security Plan (VSP) or Facility Security Plan (FSP) amendment detailing the inclusion of a (K-9) explosive detection program into their security measures to the USCG for review and approval. The relevant portion of any USCG-approved VSP or FSP, or any agency specific security plan or SOP must be made available to FEMA and USCG upon request. The recipient will comply with requirements for the proper storage, handling, and transportation of all explosive training aids in accordance with the Bureau of Alcohol, Tobacco, Firearms and Explosives' Publication 5400.7 (ATF P 5400.7) (09/00), *Federal Explosive Law and Regulations*.

Additional Explosive Detection Canine Team Resources Available for Canine Costs

The PSGP, while providing the ability to defray some start-up costs, does not cover any recurring costs associated with EDCT programs. FEMA strongly encourages applicants to investigate their eligibility under other programs, and potential exclusions, when developing their K-9 programs.

11.2.2. MARITIME DOMAIN AWARENESS

The maritime domain is defined as “all areas and things of, on, under, relating to, adjacent to, or bordering on a sea, ocean, or other navigable waterway, including all maritime-related activities, infrastructure, people, cargo, and vessels and other conveyances.” PSGP recipients are encouraged to

familiarize themselves with this National Strategy. Homeland Security Presidential Directive-13 (NSPD-41/HSPD-13) (Maritime Security Policy, Dec. 21, 2004). According to the [National Plan to Achieve Maritime Domain Awareness for the National Strategy for Maritime Security \(Oct. 2005\)](#), “Maritime Domain Awareness (MDA) is the effective understanding of anything associated with the global maritime domain that could impact the security, safety, economy, or environment of the United States. MDA is a key component of an active, layered maritime defense in depth. It will be achieved by improving our ability to collect, fuse, analyze, display, and disseminate actionable information and intelligence to operational commanders.” *Id.* at ii.

11.2.3. CAPITAL (CONSTRUCTION) PROJECTS GUIDANCE

Recipients must obtain written approval from FEMA prior to the use of any PSGP funds for construction or renovation projects. Additionally, PSGP funding may not be used to construct buildings or other physical facilities that are not constructed under terms and conditions consistent with the requirements of section 611(j)(9) of the Stafford Act (42 U.S.C. § 5196(j)(9))¹ which requires compliance with the Davis-Bacon Act (codified as amended at 40 U.S.C. §§ 3141 *et seq.*) for PSGP funded projects. Grant recipients must ensure that their contractors or subcontractors for construction projects pay workers no less than the prevailing wages for laborers and mechanics employed on projects of a character similar to the contract work in the civil subdivision of the state in which the work is to be performed. See Section 4.6 “Davis-Bacon Act Compliance” for more information.

The following types of construction and renovation projects are allowable under PSGP, provided they address a specific vulnerability or need identified in an AMSP or otherwise support the maintenance/sustainment of capabilities and equipment acquired through PSGP funding:

- Maritime Command and Control Centers;
- Interagency Operations Centers (IOCs) for maritime security;
- Port Security Emergency Communications Centers;
- Buildings to house generators that support maritime security risk mitigation;
- Maritime security risk mitigation facilities (e.g., dock house, ramps, and docks for existing port security assets);
- Hardened security fences/barriers at access points;
- Any other building or physical facility that enhances access control to the port/Maritime Transportation Security Act (MTSA) facility area; and
- PSGP funding may be used to purchase and/or upgrade a barge to support a staging area for maritime/port security patrols or maritime security risk mitigation responses. (Certain areas

¹ While the Maritime Transportation Security Act of 2002, as amended at 46 U.S.C. § 70107(b)(2), requires that such activities are carried out consistent with Section 611(j)(8) of the Stafford Act, a subsequent amendment to the Stafford Act by section 3 of Pub. L. No. 109-308 in 2006 redesignated the text of Section 611(j)(8) to 611(j)(9). The cross reference in the Maritime Transportation Security Act of 2002 has not been updated.

throughout the Nation may require a barge that can be permanently anchored or moored in certain areas to support maritime security risk mitigation activities.)

To be considered eligible for funding, the construction of fusion centers, operations centers, or communications centers must offer a port wide benefit and support information sharing and operational coordination among regional interagency and other port security partners. Applicants are reminded that the POP is 36 months. Eligible costs for construction or renovation projects may not exceed \$1 million (federal share) per project, which may not exceed 10% of the total amount of the award, as stated in 46 U.S.C. § 70107(b)(2)(A) and (B) (Section 102 of the Maritime Transportation Security Act of 2002, Pub. L. 107-295, as amended). Grant recipients are not permitted to use PSGP funds for construction projects that are eligible for funding under other federal grant programs. PSGP funds may only be used for construction activities directly related to maritime security risk mitigation enhancements.

All construction or renovation projects require EHP review. See Section 4.5 “Environmental Planning and Historic Preservation Compliance” for more information.

11.3. Port-Wide Risk Management Plans

Port areas with existing Port Wide Risk Mitigation Plans (PRMPs) are encouraged to maintain their PRMPs and use them to identify projects that will serve to address remaining maritime security vulnerabilities. These ports are also encouraged to develop or maintain a Business Continuity and Resumption of Trade Plans (BCRTP). For purposes of regional strategic and tactical planning, these plans must take into consideration all port areas covered by their AMSP, align with the port area’s AMSP, consider the entire port system strategically as a whole, and identify actions designed to effectively mitigate security risks associated with the system’s maritime critical infrastructure and key resources.

11.4. Port Security Grant Program Investment Modifications

The purpose of the grant award is to implement projects pursuant to the authorities at 46 U.S.C. § 70107. Under extreme circumstances, a recipient may reallocate award funds from one project to another with prior written approval from FEMA and in a manner consistent with 2 C.F.R. § 200.308 if it does not change the overall scope or objective of the award. Circumstances include, but are not limited to, an inability to complete the original project, disaster events perpetuating an immediate need to reprioritize funds, and changes in regulatory requirements. A recipient must explain the deviation from the original project- including why it is deviating from or scaling down the original project and what specific circumstances that occurred after the time of its award that necessitate the reallocation request- in its reallocation request. The recipient must also identify how the reallocation request aligns with PSGP priorities and the recipient’s original application and the award’s scope of work. Due to legal limitations, reallocation requests that would change the scope of the overall project(s) are not permitted. FEMA will also coordinate such reallocation requests with the USCG Captain of the Port (COTP), and these requests must be verified and supported by the COTP as essential in addressing Port Area priorities. Please also see the relevant PSGP NOFO regarding cost share requirements including the implications if the project costs are less than what was applied for.

12. Emergency Management Performance Grant Program

12.1. Alignment of the Emergency Management Performance Grant Program to the National Preparedness System

The EMPG Program contributes to the implementation of the National Preparedness System by supporting the building, sustainment, and delivery of core capabilities. Core capabilities are essential for the execution of critical tasks for each of the five mission areas outlined in the Goal. The EMPG Program's allowable costs support efforts to build and sustain core capabilities across the Prevention, Protection, Mitigation, Response, and Recovery mission areas described in the Goal.

FEMA requires recipients to prioritize grant funding to demonstrate how EMPG Program-funded investments support the following:

- Building or sustaining those capabilities that are identified as high priority through the THIRA/SPR process and other relevant information sources, such as:
 - AARs following exercises or real-world events;
 - Audit and monitoring findings;
 - Hazard Mitigation Plans; and/or,
 - Other deliberate planning products; and
- Closing capability gaps that are identified in the state or territory's most recent SPR.

To better understand the relationship between building capabilities and closing capability gaps, refer to [CPG 201, Third Edition](#). In advance of issuing the EMPG Program awards, FEMA Regional Administrators will identify individual regional priorities based on their unique knowledge of each region's preparedness and emergency management needs and will share those priorities with the states and territories within their region. The final priorities will be identified and mutually agreed to by the state/territory and Regional Administrator through a collaborative negotiation process. Ideally, all EMPG Program-funded projects, as outlined in the approved EMPG Program Work Plan, will support the priorities identified through this collaborative approach. See the EMPG Program Work Plan template in the EMPG Program NOFO for additional guidance.

FEMA continues to place emphasis on capabilities that address the greatest risks to the security and resilience of the United States. When applicable, funding should support deployable assets that can be used anywhere in the Nation through automatic assistance and mutual aid agreements, including, but not limited to, the [EMAC](#). The EMPG Program supports investments that improve the ability of jurisdictions nationwide to:

- Prevent a threatened or an actual act of terrorism;
- Protect our citizens, residents, visitors, and assets against the greatest threats and hazards;
- Mitigate the loss of life and property by lessening the impact of future disasters;

- Respond quickly to save lives, protect property and the environment, and meet basic human needs in the aftermath of a catastrophic incident; or
- Recover through a focus on the timely restoration, strengthening, and revitalization of infrastructure, housing, and a sustainable economy as well as the health, social, cultural, historic, and environmental fabric of communities affected by a catastrophic incident.

The core capabilities contained in the Goal are highly interdependent and require the use of existing preparedness networks and activities to improve training and exercise programs, innovation, and appropriate administrative, finance, and logistics systems.

12.2. Implementation of the National Preparedness System

12.2.1. IDENTIFYING AND ASSESSING RISK AND ESTIMATING CAPABILITY REQUIREMENTS

By Dec. 31, 2022, recipients were required to complete a THIRA/SPR that addresses all 32 core capabilities and is compliant with [CPG 201, Third Edition](#). Recipients are required to submit a THIRA every three years to establish a consistent baseline for assessment. 2022 was the start of the new 3-year THIRA/SPR cycle and baseline assessment year for existing recipients. Any new grant recipients during future CYs, for which the THIRA/SPR requirement applies, will start their new 3-year THIRA/SPR cycle and baseline assessment year in that year. Specific guidance on the requirements for each core capability is provided through program implementation support and supplemental guidance, as some core capabilities have fewer reporting requirements than others. Recipients must continue to respond to a series of planning-related questions as part of the THIRA/SPR process.

While the THIRA is only required every three years, jurisdictions are required to submit an SPR annually. The submission deadline is Dec. 31 each year (as applicable). For additional guidance on the THIRA/SPR, please refer to [CPG 201, Third Edition](#). Recipients are also encouraged to refer to the [Preparedness Toolkit](#), which is an online portal that provides the whole community with tools to aid in implementing all six areas of the National Preparedness System.

Reporting

In each EMPG Program recipient's BSIR, the recipient must describe how expenditures support building capability, closing capability gaps, or sustaining capabilities identified in the THIRA/SPR process. EMPG Program recipients will, on a project-by-project basis, check one of the following:

- Building a capability with EMPG Program funding; or
- Sustaining a capability with EMPG Program funding.

Building and Sustaining Core Capabilities

Recipients must describe how proposed EMPG Program-funded projects will close capability gaps or sustain capabilities identified through the THIRA/SPR process, particularly SPR Step 2 (see [CPG 201, Third Edition](#)), or other relevant information sources that identify capability needs. See the EMPG Program Work Plan template in the EMPG Program NOFO for additional guidance and requirements.

12.2.2. NATIONAL INCIDENT MANAGEMENT SYSTEM IMPLEMENTATION

EMPG Program recipients must use standardized resource management concepts for resource typing, credentialing, and an inventory to facilitate the effective identification, dispatch, deployment, tracking, and recovery of resources. EMPG Program funds may be used for NIMS implementation; specifically, to meet the requirements described in the [NIMS Implementation Objectives for Local, State, Tribal, and Territorial Jurisdictions](#).

Reporting

- Recipients will answer questions in the applicable secondary NIMS assessment portion of the URT as part of a jurisdiction's THIRA/SPR submission. This involves reporting on the status of the qualification system used within the jurisdiction and sub-jurisdictions, as outlined in the EMPG Program NOFO.
- Reporting will also be through a review by the FEMA Regional NIMS Coordinators during annual TA visits with the states, tribes, and territories within their regions.

12.2.3. NATIONAL QUALIFICATION SYSTEM IMPLEMENTATION

For FY 2023 and going forward, as a post-award requirement, all recipients in the 50 states and District of Columbia must work toward achieving the Phase 1 NQS Implementation Objectives outlined in the table below and must, at a minimum, execute the Implementation Plan they developed in FY 2022 as part of the Phase 0 NQS Implementation Objectives. Jurisdictions that began implementation in FY 2023 shall have designed and adopted organizational qualification system procedures, a certification program and credentialing standards for incident workforce personnel in alignment with the NIMS Guideline for the NQS. All other jurisdictions (including territories and EMPG Program subrecipients) are required to work toward implementation of NQS by developing an Implementation Plan, using the FEMA-provided [two-page template](#) referenced in the table below.

For all states and territories, the following requirements shall apply:

- At a minimum, only **EMPG Program-funded deployable personnel, as determined by each recipient organization**, will be required to meet NQS certification requirements.
- Recipients and subrecipients will be considered in compliance with the NQS requirements as long they are **working toward implementing** the NQS Implementation Objectives as outlined in the table below.
- The expected completion date for each phase of the NQS Implementation Objectives is Dec. 31 of the applicable CY.

Additional NQS Implementation Guidance can be found at the [NQS Supplemental Documents](#) page on FEMA.gov.

Table 8: National Qualification System Implementation Phase Objectives

Phase 0: NQS Implementation Objectives for CY 2022	Example Indicators
<ul style="list-style-type: none"> ▪ Only the 50 States, the District of Columbia and Puerto Rico shall work toward implementation of NQS by developing an Implementation Plan using the FEMA-provided two-page template. ▪ The Implementation Plan will identify a jurisdiction’s timeline for implementing NQS by CY 2025. ▪ All other jurisdictions are encouraged to begin working toward identifying, at a minimum, frequently deployed positions and implementation but will not be required until CY 2023. 	<ul style="list-style-type: none"> ▪ Completion of a jurisdiction implementation plan. ▪ Identification of implementation challenges.
Phase 1: NQS Implementation Objectives for CY 2023	Example Indicators
<ul style="list-style-type: none"> ▪ All jurisdictions shall work toward implementation of NQS by developing an Implementation Plan using the FEMA-provided two-page template. ▪ Jurisdictions that began implementation in CY 2022 shall have designed and adopted organizational qualification system procedures, a certification program, and credentialing standards for incident workforce personnel in alignment with the NIMS Guideline for the NQS. 	<ul style="list-style-type: none"> ▪ Completion of a jurisdiction implementation plan. ▪ Identification of implementation challenges. ▪ Qualification policies and procedures approved by the jurisdiction. Procedures may include: <ul style="list-style-type: none"> ○ Establishment of a Qualification Review Board or equivalent review processes for incident workforce personnel qualifications. ○ Individual and team coach and evaluation processes for incident workforce personnel qualifications.

<p>Phase 0: NQS Implementation Objectives for CY 2022</p>	<p>Example Indicators</p>
<p>Phase 2: NQS Implementation Objectives for CY 2024</p>	<p>Example Indicators</p>
<ul style="list-style-type: none"> ▪ All jurisdictions shall have designed and approved organizational qualification system procedures, certification program, and credentialing standards for incident workforce personnel in alignment with the NIMS Guideline for the NQS. ▪ Jurisdictions that began implementation in CY 2022 shall have issued position task books (PTBs) to incident workforce personnel, as designated by the jurisdiction, and ensure incident workforce personnel show progress in working toward task endorsements and minimum training requirements. ▪ In CY 2024, all jurisdictions partially satisfy the requirement by ensuring designated incident workforce personnel meet the minimum training requirements from the Job Title/Position Qualification. ▪ Jurisdictions shall use a resource management or qualification tool system to track the qualification, certification, and credentialing of incident workforce personnel. 	<ul style="list-style-type: none"> ▪ Qualification policies and procedures approved by the jurisdiction. ▪ Minimum criteria that trainees must meet to be qualified in a specific position is outlined in the NQS Job Title/Position Qualification. ▪ PTB issuance and completion data. ▪ Adoption of a resource management system, such as <u>OneResponder</u>: a web-based application hosted in a cloud environment. It allows Authority Having Jurisdictions (AHJ) to manage qualifications of personnel.
<p>Phase 3: NQS Implementation Objectives for CY 2025</p>	<p>Example Indicators</p>
<ul style="list-style-type: none"> ▪ All jurisdictions shall have issued PTBs to designated incident workforce personnel and ensure incident workforce personnel show progress in working toward task endorsements and minimum training requirements. 	<ul style="list-style-type: none"> ▪ PTB issuance and completion data.

Reporting

Data collection and reporting on NQS implementation will be addressed via the following:

- NIMS secondary assessment questions on the URT. This involves reporting on the status of the qualification system used within the jurisdiction and sub-jurisdictions.
- Review by the Regional NIMS Coordinators during annual TA visits with the states, tribes, and territories within their regions.

12.3. Logistics Planning

12.3.1. DISTRIBUTION MANAGEMENT PLANS

EMPG Program recipients are required to develop and maintain a Distribution Management (DM) plan as an annex to their existing EOP. [CPG 101 v3](#) provides guidance on the fundamentals of planning and development of EOPs. The [Distribution Management Plan Guide 2.0](#) released in Jan. 2022 provides information on how to develop the DM plan annex, key DM plan components, how to review and update a DM plan, and how FEMA reviews and evaluates the plans.

A state/territory should submit its DM plan as both a Word document and PDF to its FEMA Regional Grants Division. The maturity level of the plan may vary by state/territory, but the recipient is required to submit a DM plan that accurately reflects the state or territory's current capabilities and capacity to distribute resources to survivors after a disaster and addresses the following components: Requirements Defining; Resource Ordering; Distribution Methods; Inventory Management; Transportation; Staging; and Demobilization.

The DM plan must be reviewed by recipients on an annual basis and updated as necessary by Sept. 30 of each CY. In the applicable secondary CPG 101 assessment portion of the online URT, jurisdictions capture whether they have developed and incorporated a DM plan in their EOP.

- The DM plan should focus on the distribution of commodities and supplies such as food, water, generators, and tarps to survivors following a disaster.
- The DM plan should address strategies/plans for:
 - Requirements Defining;
 - Resource Ordering;
 - Distribution Methods;
 - Inventory Management;
 - Staging Areas;
 - Transportation; and
 - Demobilization.

FEMA Regional Logistics Branch staff will work with EMPG Program recipients to provide TA during the development and maintenance of their DM plans and to ensure all recipients have effective DM plans capable of integrating with federal, NGOs, private sector, and SLTT stakeholders during major disasters. Recipients should refer to the following for additional guidance:

- [IB 442, Guidance on Distribution Management Plans for the Fiscal Year 2019 Emergency Management Performance Grants Program](#); and
- The Distribution Management Plan Guidance found on the [Planning Guides](#) page on FEMA.gov

12.3.2. ADDITIONAL LOGISTICS PLANNING RESOURCES

FEMA recommends that EMPG Program recipients use the following resources in developing their DM plan. To learn more about these programs and documents, or for any questions, please contact the Logistics Section Chief from your FEMA Region.

- **The Logistics Capability Assessment Tool 2 (LCAT2) Flyer:** The LCAT2 Flyer provides an overview of the LCAT2, how it is beneficial, how the LCAT process works, and how to obtain an LCAT2. For more information on the LCAT2, contact your FEMA Regional Logistics Branch Chief.
- **Points of Distribution (PODs) Training:** FEMA Logistics developed a comprehensive POD training to assist states in developing actionable emergency distribution plans and understanding associated challenges. Additional information, including an explanatory DVD, POD guide, and online exam, are available on EMI's website at the [IS-26: Guide to Points of Distribution](#) page.
- **Interagency Logistics (IL) Training:** This basic IL training course (Interagency Logistics Training, E8540) familiarizes participants with the IL concepts of planning and response. The course also provides an overview of IL Partner disaster response organizations, discusses parameters for logistics support coordination, and creates a whole community forum to exchange the best logistics practices. Recipients may find more information on this and other courses by visiting the [EMI Courses & Schedules website](#).
- **Other Logistics Planning Resources:** Recipients will find additional planning guidance at the [Planning Guides](#) page on FEMA.gov. Specific to logistics planning, [CPG 101 v3](#) provides guidance on how to incorporate logistics into EOPs. Additionally, the [Supply Chain Resilience Guide](#) provides emergency managers with recommendations and best practices on how to analyze local supply chains and work with the private sector to enhance supply chain resilience using a five-phased approach.

Reporting

Annual DM plan reviews will be reported in the PPR for the quarter ending Sept. 30 of the most recently awarded EMPG Program. Reviews that result in an update must be submitted to the Regional Grants Division Director or Regional EMPG Program Manager for review by regional logistics staff. The regional logistics staff will review and rate the plans using the latest [FEMA Distribution Management Plan Guide 2.0](#).

12.4. Evacuation Planning

EMPG Program recipients should review and update their EOP in accordance with [CPG 101 v3](#). Recipients are strongly encouraged to include an evacuation plan or annex as part of their EOP as well as plans to exercise and validate the evacuation plan and capabilities. At a minimum, recipients should incorporate the National Response Framework's (NRF's) Mass Evacuation Incident Annex's planning considerations, and other FEMA documents related to evacuation planning, when developing their own Evacuation Plan or Annex. See the [NRF](#), Fourth Edition (October 2019) and [NRF Mass Evacuation Incident Annex](#) (June 2008). Additional National Preparedness resources are

available at [National Preparedness](#) and [Planning Guides](#) pages on FEMA.gov. Specific to evacuation planning, the [Evacuation and Shelter in Place Guidance](#) identifies relevant concepts, considerations, and principles that can inform jurisdictions in planning for evacuation and/or shelter-in-place protective actions.

12.5. Disaster Housing Planning

12.5.1. STATE-LED DISASTER HOUSING TASK FORCE

Based on lessons learned from recent disasters, FEMA strongly encourages EMPG Program recipients to establish a State-Led Disaster Housing Task Force (SLDHTF) plan as part of their EOP or as a standalone document and update their plan at least once every two years.

SLDHTFs lead and coordinate state, local, private sector, and community-based actions to assess housing impacts, identify appropriate post-disaster housing options, and establish processes for expediting post-disaster housing delivery. SLDHTF plans should clearly identify the roles, responsibilities, composition, and mobilization procedures for the SLDHTF, and how the SLDHTF integrates into the incident command structure. To have a successful SLDHTF plan, FEMA encourages recipients to establish a State Disaster Recovery Coordinator (SDRC).

- Complete the State Housing Strategy Template.

12.5.2. DISASTER HOUSING EXERCISES

SLTT governments are encouraged to exercise and validate their long-term sheltering and housing stabilization plans as part of an existing exercise program. This includes:

- Validating the organizational structure of the Housing Task Force and internal readiness capabilities to address post-disaster housing recovery.
- Validating disaster housing communication plans and procedures that coordinate and integrate the activities and information generated by internal/external partners.
- Validating data systems, security, and exchange protocols.
- Validating planned actions and milestones transitioning from emergency sheltering to temporary housing to permanent housing and long-term recovery.

12.5.3. ADDITIONAL DISASTER HOUSING PLANNING RESOURCES

SLTT governments are encouraged to review the planning guidance available at the [Planning Guides](#) page on FEMA.gov. The Planning Guides page includes [Planning Considerations: Disaster Housing Guidance for State, Local, Tribal and Territorial Partners \(May 2020\)](#), which supplements [CPG 101 v3](#). It provides guidance on national housing priorities, types of housing, key considerations, and housing-specific planning recommendations for SLTT jurisdictions to use, in conjunction with the Six-Step Planning Process described in CPG 101 v3, to develop or improve disaster housing plans.

12.6. State Disaster Recovery Coordinator

The [Pre-Disaster Recovery Planning Guide](#) helps states prepare for recovery by developing pre-disaster recovery plans that follow a process to engage members of the whole community, develop recovery capabilities, and create an organizational framework for recovery efforts.

FEMA strongly recommends that EMPG Program recipients include pre-disaster recovery planning as part of their State Readiness and Preparedness efforts by establishing an SDRC. An effective pre-disaster recovery plan and process is crucial to help recipients prepare for major disaster incidents and recover effectively. Recipients are encouraged to use the [Pre-Disaster Recovery Planning Guide](#) to help inform their identification and establishment of a SDRC. The SDRC position should be included in the State Administrative Plan with the following responsibilities:

- Development of the pre-disaster recovery plan, including state-level leadership and structure, formation of communication channels, multi-agency coordination, and building whole-community partnerships to support recovery efforts.
- Set the stage for necessary strategic, operational, and tactical post-disaster planning, actions, and processes.
- Maximize impact of federal, private sector, and nongovernmental dollars to enable recovery and resilience.
- Accelerate the delivery of resources, including funding and TA, to disaster-impacted communities.
- Enable state leadership to better organize and identify gaps in the state's recovery capabilities.

12.7. Disaster Financial Management Policies and Procedures

Lessons learned from recent hurricane seasons and wildfires demonstrate the need for impacted jurisdictions to improve their ability to immediately track and account for disaster costs. Disaster financial management includes policies and procedures that work to recover expenses pertaining to damage, emergency protective measures, and debris management during and after a disaster. These policies and procedures include, but are not limited to, those supporting eligible contract costs and force account labor, materials, and equipment.

12.7.1. STATE ADMINISTRATIVE PLAN

FEMA strongly recommends that EMPG Program recipients include disaster financial management planning as part of their State Administrative Plan. An effective disaster financial management plan and process is crucial to help recipients prepare for declarations of emergencies or major disasters and plan for reimbursement. The table below details the processes that should be included in the State Administrative Plan and recommendations on where they should be placed.

Table 9: State Administrative Plan Guidance

State Administrative Plan Section Recommendations	Processes
<ul style="list-style-type: none"> ▪ Section V Part D: Project Funding and Reimbursement ▪ Section V Part G: Records and Reports 	<ul style="list-style-type: none"> ▪ A process to ensure subrecipients are tracking and documenting disaster costs necessary for federal reimbursement, such as receipts, invoices, procurement documents, contracts, and insurance coverage/claims
<ul style="list-style-type: none"> ▪ Section V Part D: Project Funding and Reimbursement ▪ Section V Part G: Records and Reports 	<ul style="list-style-type: none"> ▪ A process to document disaster cost operations such as labor, equipment, and materials that are allowable under federal requirements
<ul style="list-style-type: none"> ▪ Section V Part D: Project Funding and Reimbursement 	<ul style="list-style-type: none"> ▪ A process to ensure that subrecipients are not receiving a duplication in benefits
<ul style="list-style-type: none"> ▪ Section IV Part B: Organization and Staffing 	<ul style="list-style-type: none"> ▪ A process to ensure pre-disaster contracts and procurement strategies are in place, if necessary

Additionally, recipients are encouraged to use EMPG Program funds for training that develops, delivers, and exercises disaster financial management procedures.

12.7.2. DISASTER FINANCIAL MANAGEMENT RESOURCES

Recipients are encouraged to use the following resources to inform their disaster financial management planning efforts:

- **State Administrative Plan Template:** Recipients are recommended to use the [State Administrative Plan template](#) found on FEMA’s Public Assistance webpage to inform their planning efforts. The template includes example structure and content as a model for states to create their own Administrative Plan.
- **Public Assistance Program and Policy Guide:** The [Public Assistance Program and Policy Guide \(PAPPG\)](#) combines all Public Assistance policy into a single volume and provides an overview of the Public Assistance program implementation process.
- **Public Assistance Frequently Asked Questions and Guidance:** Recipients are encouraged to view the Public Assistance Frequently Asked Questions and guidance found on the Public Assistance webpage to assist with disaster financial management planning efforts. The webpage provides information pertaining to documentation, Public Assistance grant funding eligibility, and hazard mitigation and can be found at the [Public Assistance Fact Sheets, Job Aids, and FAQs](#) page on FEMA.gov.
- **DHS OIG Audit Tips:** Recipients are recommended to consult the DHS OIG report, [Audit Tips for Managing Disaster-Related Project Costs \(OIG-17-120-D\)](#) for further assistance in documenting and accounting for disaster-related costs. This report is informed by OIG audit findings and can assist recipients in addressing issues that are frequent findings in disaster-related audits.

- **Disaster Financial Management Guide:** The [Disaster Financial Management Guide](#) provides guidance for SLTT partners on establishing and implementing sound disaster financial management practices.
- **PDAT Training and Resources:** The PDAT provides training and other resources to assist grant recipients in their efforts to comply with federal procurement standards.

12.8. Training and Exercises

12.8.1. INTEGRATED PREPAREDNESS PLAN

Recipients are expected to engage senior leaders and other whole community stakeholders to identify preparedness priorities specific to training and exercise needs, which will guide development of a state/territory multi-year IPP. Like the EMPG Program Work Plan development process, these priorities should be informed by various factors, including jurisdiction-specific threats and hazards (i.e., the THIRA); areas for improvement identified by real-world events and exercises (i.e., AAR); external requirements such as stakeholder preparedness reviews (i.e., SPR), homeland security policy, and industry reports; and accreditation standards, regulations, or legislative requirements. Recipients must document these priorities, in conjunction with the Work Plan development process, and use them to deploy a schedule of preparedness events and activities in the IPP. Information related to IPPs and IPPWs can be found on the [HSEEP](#) page on FEMA.gov and [FEMA's Preparedness Toolkit](#). FEMA Regional staff can provide TA for IPP and IPPW development.

Recipients should ensure that their EMPG Program Work Plans and IPPs align with and are complementary to one another and are used in tandem to support shared priorities for building and sustaining the state/territory's preparedness capabilities. Recipients should include planning, training, and exercise projects in their EMPG Program Work Plan that support priorities included in their IPP. The current multi-year IPP must be submitted to hseep@fema.dhs.gov and the Regional EMPG Program Manager before Jan. 31 of each year.

This will help ensure that priorities for both the IPP and EMPG Program Work Plan are based on building capability and/or closing capability gaps documented in their THIRA/SPR and other relevant sources of information. For example, if a recipient included Logistics and Distribution Management, Resilient Communications, and Housing as priorities for its IPP, those should also be priorities in its EMPG Program Work Plan. Additionally, IPPs should include all planning, training, and exercise activities funded by the EMPG Program as well as activities funded by other sources. This inclusion will ensure that recipients' preparedness projects, investments, and activities are concentrated, focused, and oriented toward closing gaps related to their top priorities, regardless of funding source.

12.8.2. VALIDATING CAPABILITIES THROUGH EXERCISES

All recipients are required to develop and maintain a progressive exercise program consistent with HSEEP guidance in support of the NEP. The NEP serves as the principal exercise mechanism for examining national preparedness and measuring readiness. The NEP is a two-year cycle of exercises across the nation that validates capabilities in all preparedness mission areas. The two-year NEP cycle is guided by Principals' Strategic Priorities, established by the National Security Council, and informed by preparedness data from jurisdictions across the Nation.

The NEP provides exercise sponsors the opportunity to receive exercise design and delivery assistance, tools and resources, enhanced coordination, and the ability to directly influence and

inform policy and preparedness programs. If you have any questions or would like to request assistance through the NEP, please visit the [NEP website](#) or reach out to the NEP directly at NEP@fema.dhs.gov.

The exercises and priorities outlined in the IPP and all EMPG Program-funded exercises must be included in the current fiscal year's EMPG Program Work Plan. To avoid duplicate reporting, applicants/recipients are not required to report EMPG Program-funded personnel costs associated with exercises in the EMPG Program Work Plan. See the EMPG Program Work Plan template in the EMPG Program NOFO for additional guidance.

12.8.3. TRAINING

Like the exercise guidance above, training activities should align to a current, multi-year IPP developed through an annual IPPW and build from training gaps identified in the THIRA/SPR and work plan development process. Further guidance concerning the IPP and the IPPW can be found at the [HSEEP Resources](#) page on Preparedness Toolkit.

Through the NPD's training and education enterprise, consisting of CDP, EMI, and NTED's partnerships with the National Domestic Preparedness Consortium, Rural Domestic Preparedness Consortium, Continuing Training Grants partners, and the Center for Homeland Defense and Security, FEMA develops and delivers training and education programs to increase capabilities, reduce risk, and build resilient communities. More than 700 tuition-free courses are offered to members of SLTT communities. By accessing the [National Preparedness Course Catalog](#), users will find all courses to include EMI training and includes links to the basic, advanced, and executive emergency management academies.

12.8.4. FEMA'S NATIONAL PREPAREDNESS COURSE CATALOG

Training should foster the development of a community-oriented approach to emergency management that emphasizes engagement at the community level, strengthens best practices, and provides a path toward building sustainable resilience, all of which is included in the curriculum of the EMI Basic Academy. The EMI Basic Academy provides a foundational education in emergency management as a way for emergency managers to begin or advance their career. The goal of the Basic Academy is to support the early careers of emergency managers through a training experience combining knowledge of all fundamental systems, concepts, and practices of cutting-edge emergency management.

EMPG Program funds used for training should support the nationwide implementation of NIMS. The NIMS Training Program establishes a national curriculum for NIMS and provides information on NIMS courses. Recipients are encouraged to place emphasis on the core competencies as defined in the NIMS Training Program. NIMS is also included in the curriculum of the EMI Basic Academy. The NIMS Training Program can be found at [NIMS Implementation and Training](#).

All EMPG Program-funded personnel are expected to be trained emergency managers (see Section 12.2.3 "National Qualification System Implementation"). All EMPG Program-funded personnel must complete *either* the Independent Study courses identified in the Professional Development Series, *or* the National Emergency Management Basic Academy delivered either by EMI or at a sponsored SLTT, regional, or other designated location. Further information on the National Emergency Management Basic Academy and the Emergency Management Professional Program (EMPP) can be found at the [EMPP](#) page on EMI's website. A complete list of Independent Study Program Courses may be found at the [Independent Study](#) page on EMI's website.

In addition to training activities aligned to and addressed in the IPP, all EMPG Program-funded personnel (including full- and part-time SLTT recipients and subrecipients) must complete the following training requirements and record proof of completion:

1. NIMS Training, Independent Study (IS)-100 (any version), IS-200 (any version), IS-700 (any version), and IS-800 (any version)²; **and**
2. Professional Development Series (PDS) **or** the EMPP Basic Academy courses listed in the table below.

Table 10: PDS or EMPP Basic Academy Courses

PDS Professional Development Series	Basic Academy Basic Academy Pre-requisites and Courses
IS-120.a: An Introduction to Exercises	IS-100 (any version): Introduction to the Incident Command System
IS-230.d: Fundamentals of Emergency Management	IS-700 (any version): National Incident Management System (NIMS)-An Introduction
IS-235.b: Emergency Planning	IS-800 (any version): National Response Framework, An Introduction
IS-240.b: Leadership and Influence	IS-230.d: Fundamentals of Emergency Management
IS-241.b: Decision Making and Problem Solving	E/L101: Foundations of Emergency Management
IS-242.b: Effective Communication	E/L102: Science of Disasters
IS-244.b: Developing and Managing Volunteers	E/L103: Planning Emergency Operations
IS-244.b: Developing and Managing Volunteers	E/L104: Exercise Design
IS-244.b: Developing and Managing Volunteers	E/L105: Public Information & Warning

The [EMI Basic Academy](#) provides this foundational Emergency Management education. To ensure the professional development of the emergency management workforce, the recipients must ensure a routine capabilities assessment is accomplished and an IPP is developed and implemented.

² NIMS training courses IS-100, IS-200, IS-700, and IS-800 only need to be taken once to fulfill requirements. Also, previous versions of the IS courses are still considered as meeting the NIMS training requirement.

12.8.5. TRAINING AND EXERCISE REPORTING

- All EMPG Program-funded exercise and training activities must be captured in the approved EMPG Program Work Plan and should be included in the IPP. This includes training for which the only expenses are for overtime and/or backfill costs associated with emergency management personnel attending the training.
- EMPG Program-funded exercise costs in the Work Plan can include costs to plan, conduct and evaluate the exercise (e.g., planning, materials, props, contractual services for conducting the exercise, AAR, and IP, etc.).
- All EMPG Program-funded training activities must be reported quarterly. To simplify reporting, it is recommended the recipient submit an updated Training Data Table from the EMPG Program Work Plan Template as an attachment to the quarterly PPR. For those recipients who choose not to use the EMPG Program Work Plan Template, the data and information found in the Training Data Table must still be submitted (in any chosen format) as an attachment to the PPR.
- EMPG Program-funded personnel costs associated with exercises are not required in the EMPG Program Work Plan Template for application or reporting purposes.
- Recipients are encouraged to enter their exercise information into the [Preparedness Toolkit](#).
- Recipients must have a current multi-year IPP that identifies preparedness priorities and activities. The current multi-year IPP must be submitted to hseep@fema.dhs.gov and the Regional EMPG Program Manager and indicate which fiscal year's funds were used (if applicable) before Jan. 31 of each year.
- Submission of AAR/IPs to hseep@fema.dhs.gov and the Regional EMPG Program Manager must take place within 90 days following completion of the single exercise or progressive series.
 - Recipients are encouraged to submit AAR/IPs reflecting tabletop exercises that validate critical plans or those reflecting large-scale functional or full-scale exercises that took place at the state, territorial, tribal, or regional level. Recipients are discouraged from submitting AAR/IPs specific to local jurisdictions that reflect drills.
 - If a state, territory, tribe, or local jurisdiction has experienced a major disaster and they would like to request exemptions for a scheduled exercise, the recipient should send this request to its assigned Regional EMPG Program Manager through the quarterly PPR. Exemptions will be reviewed by the Region on a case-by-case basis.
- Recipients can access a sample AAR/IP template at the [Improvement Planning Templates](#) page on Preparedness Toolkit.
- Recipients must report their NIMS implementation status of their jurisdiction and sub-jurisdictions, including the training of personnel, in the applicable secondary NIMS assessment portion of the URT as part of their THIRA/SPR submission.
- Recipients must maintain proof of completion of training requirements. Recipients are encouraged to use the OneResponder system to enter, track, and report training.
- Training Information Reporting System ("Web Forms"): Web Forms is an electronic data management system built to assist SAA TPOCs and federal agencies to submit **non-NTED training**

courses for inclusion in the State/Federal-Sponsored Course Catalog. The information collected is used in a two-step review process to ensure that the training programs adhere to the EMPG Program's intent, and the course content is sound and current. While reporting training activities through Web Forms is not required under the EMPG Program, the system remains available and can be accessed through the Web-Forms section of the [FEMA National Preparedness Course Catalog](#) to support recipients in their own tracking of training deliveries.

12.9. Reviewing and Updating Planning Products

Based on the applicant's current THIRA/SPR, capability levels, and resources, plans should be reviewed on an annual basis to determine if they remain relevant or need to be updated. This review should be based on a current THIRA/SPR and utilize information gathered during the capability validation process. These reviews will provide a means to determine priorities, direct preparedness actions, and calibrate goals and objectives.

12.10. Program Performance Reporting Requirements

12.10.1. STANDARDIZED PROGRAMMATIC REPORTING FOR THE EMERGENCY MANAGEMENT PERFORMANCE GRANT PROGRAM

The EMPG Program Work Plan Template standardizes data collection, which enables improved analysis and reporting. The EMPG Program Work Plan includes 10 components:

1. Grant Investment Strategy
2. Grant Activities Outline
3. Detailed Budget – Excluding M&A
4. Budget Narrative – Excluding M&A
5. Detailed Budget – M&A Only
6. Budget Narrative – M&A Only
7. EMPG Program Summary
8. Implementation Schedule
9. Training Data Table
10. Exercise Data Table

Although using the fiscal year's EMPG Program Work Plan Template is not mandatory (see the EMPG Program Work Plan template in the EMPG Program NOFO), baseline data on personnel, training, and exercises, as well as the information included on the Grant Activities Outline and Implementation Schedule, must be provided in the EMPG Program Work Plan at the time of application regardless of the chosen work plan format.

The status of all EMPG Program-funded plans, training, and exercise activities, any risks that may affect project progress or success, and updates to project schedules, must be reported quarterly as part of the PPR. To facilitate reporting, recipients are encouraged to submit an updated Implementation Schedule, Training Data Table, and Exercise Data Table from the EMPG Program Work Plan Template as an attachment to the quarterly PPR. Recipients who choose not to use the EMPG Program Work Plan Template must still provide the updated data and information included in the Implementation Schedule, Training Data Table, and Exercise Data Table, but may use a different format for reporting that information in their PPR submission.

13. Abbreviations and Acronyms

Abbreviation	Definition
AAR	After-Action Report
ABA	Architectural Barriers Act of 1968
ADA	Americans with Disabilities Act
ADDIE	Analysis, Design, Development, Implementation, and Evaluation
AEL	Authorized Equipment List
AHJ	Authority Having Jurisdiction
AMSC	Area Maritime Security Committees
AMSP	Area Maritime Security Plan
ANSI	American National Standards Institute
AOR	Authorized Organizational Representative
ASPR	Assistant Secretary for Preparedness and Response
ATF	Alcohol, Tabaco, Firearms, and Explosives
BABAA	Build America, Buy America Act
BASE	Baseline Assessment for Security Enhancement
BCRTP	Business Continuity and Resumption of Trade Plans
BPETS	Border Patrol Enforcement Tracking System
BSIR	Biannual Strategy Implementation Report
CAD	Computer Assisted/Aided Dispatch
CAP	Corrective Action Plans
CART	Computer Aided Real-Time Translation
CBP	Customs and Border Protection
CBRN	Chemical, Biological, Radiological, and Nuclear
CBRNE	Chemical, Biological, Radiological, Nuclear, Explosive
CDC	Centers for Disease Control and Prevention
