Analysis

This ordinance abandons approximately 244 linear feet of existing eight-inch public sanitary sewer mains, two sanitary sewer manholes and the associated easement, authorizes the construction of approximately 242 linear feet of new eight-inch public sanitary sewer mains (PVC), three sanitary sewer manholes, and accepts a new public sanitary sewer easement for property located at 104 Duluth Avenue.

In addition, this ordinance authorizes the Director of Metro Water Services to execute a mutual release of liability with the property owner, Tee Line LLC, regarding the construction of the new eight-inch public sanitary sewer mains. The construction is necessary after the parties discovered a previous property owner built an unpermitted addition over Metro's existing easement and sewer infrastructure. The infrastructure collapsed after the unpermitted addition was built.

The mutual release of liability provides that Metro would re-route the existing sewer line and/or install a new sewer line through the proposed easement at Metro's sole cost and expense. It further states that Metro would abandon the existing easement and that Metro and the property owner would release each other from any and all liability tied to the project and the related easements.

This ordinance has been approved by the Planning Commission. Future amendments to this ordinance may be approved by resolution.

Fiscal Note: This ordinance has no cost to Metro. Abandoned easements have no market value according to the Department of Water Services.
